Edgar Filing: CRYPTOLOGIC INC - Form 6-K

December 18, 2006 (Toronto, ON) CryptoLogic Inc., a leading software developer to the global Internet gaming industry, has redesigned its poker software, licensed through its WagerLogic Limited subsidiary. The appealing new design includes enhancements to the main lobby, game tables and tournament lobby, making it easier than ever for players to navigate, select their game and stake level, and access key statistics on the game and their play. Also, players can launch a game of blackjack or for the first time in the industry any casino game directly from a poker table or lobby without missing a moment of the action.

This is an exciting day for CryptoLogic, because we're taking our award-winning poker software to a new level that offers players more simplicity, selection and statistics! said Lewis Rose, CryptoLogic's President and CEO. CryptoLogic's redesigned poker software demonstrates our continued commitment to provide the best entertainment experience available on the Internet to benefit our customers, their players and our business.

The main lobby

The improved layout of CryptoLogic's new main lobby enables players to quickly find the most suitable game, browse updated choices and find detailed information on upcoming games and tournaments. For example, Texas Hold'em players can quickly find tables at just the right limit, find out who is playing and the size of their chip stack. Or, with a click and a glance players can get information on today's hottest Internet poker tournaments and how to enter the satellites for each. A new menu bar at the top of the lobby organizes options that players have become used to, such as account, display and customer service information, plus new features like links to the latest licensee-specific poker news and promotions also available from prominent banner ads in the lobby.

The poker tables

New poker tables display betting action with compelling visuals that highlight fold, check, bet and raise decisions, and enable players to save and view notes made on their competitors. In-depth and instant play information, including current rank and chip stack size, let players compare their table status. An improved Stats button provides at-a-glance information on your own actions and overall game statistics, without the need for scrolling. The enhanced tables also incorporate a new pot display and improved hand history details, including a unique Last 15 Hands option. Additional features, to be released in January, will enable players to upload individual pictures and icons for identification and display at the table.

The tournament lobby

CryptoLogic has improved the tournament lobby, too. Highlights include new icons that draw attention to special features, summaries and key details of upcoming or ongoing Internet poker tournaments. New options let players confirm information about running time, blind levels, stack sizes and prize pool distribution including a pop-up window displaying the betting structure and break times. Players can also track their progress with improved lists to help them locate and monitor players from other tables.

Blackjack and casino games

Whether browsing games or tournaments from a lobby or waiting for their turn at a table, players can launch a game of blackjack or any of the 201 CryptoLogic-developed downloadable games in the casino. No other poker room offers the flexibility to play the full breadth of casino games while in the poker environment. CryptoLogic's award-winning casino offering includes player favourites like the slot version of Bejeweled, the casual game blockbuster, Marvel slots, based on Super Heroes like The Hulk, X-Men and Thor, and Millionaires Club®, which currently offers a world-record online jackpot of approximately \$4.9 million.

From fast action to hot competition at any level, CryptoLogic's new software delivers what today's sophisticated players demand, said Andy Goetsch, CryptoLogic's Vice President of Poker Software Development. It all stems from the core principle that drives CryptoLogic's poker strategy: knowing the heart of the online player.

Through WagerLogic Limited, CryptoLogic's licensing subsidiary, the redesigned poker software is available today at all licensee's sites, including williamhillpoker.com, interpoker.com, sunpoker.com, pokerplex.com, ukbettingpoker.co.uk, littlewoodspoker.com, classicpoker.com and dtdpoker.com.

According to AJ Slivinski, WagerLogic's Managing Director, All of our licensees get the advantage of this major enhancement at once. Soon, players will also be able to enjoy the same poker excitement at our newest licensees, Playboy and Betsafe.

About CryptoLogic(www.cryptologic.com)

Focused on integrity and innovation, CryptoLogic Inc. is a world-leading, blue-chip public developer and supplier of Internet gaming software. CryptoLogic's leadership in regulatory compliance makes it one of the very few companies with gaming software that is certified to strict standards similar to land-based gaming. WagerLogic Limited, a wholly-owned subsidiary of CryptoLogic, is responsible for the licensing of the company's gaming software and services to a blue-chip customer base around the world. For information on WagerLogic(, visit www.wagerlogic.com. CryptoLogic's common shares trade on the Toronto Stock Exchange (symbol: CRY), on the NASDAQ Global Select Market (symbol: CRYP), and on the Main Market of the London Stock Exchange (symbol: CRP).
