Item 2.02 Results of Operations and Financial Condition

On October 25, 2006, Newfield issued a press release announcing its third quarter 2006 financial and operating results and fourth quarter 2006 earnings guidance. A copy of the press release is furnished herewith as Exhibit 99.1.

Item 7.01 Regulation FD Disclosure

On October 25, 2006, Newfield issued its @NFX publication, which includes an update on recent drilling programs and key development projects and updated tables detailing complete hedging positions as of October 24, 2006. A copy of this publication is furnished herewith as Exhibit 99.2. The statements set forth in this publication regarding estimated or anticipated production for future periods, fourth quarter results, timing of first production from properties, future production rates and planned drilling activities are forward looking and are based upon assumptions and anticipated results that are subject to numerous uncertainties. Actual results may vary significantly from those anticipated due to many factors. Newfield's ability to produce oil and gas from the Gulf of Mexico is dependent on infrastructure (such as host platforms, pipelines and onshore processing facilities) owned by third parties. Much of this infrastructure was damaged by Hurricanes Katrina and Rita. As a result, it is difficult to predict when production will return to pre-storm levels. Other factors include drilling results, oil and gas prices, industry conditions, the prices of goods and services, the availability of drilling rigs and other support services, the availability of capital resources, the availability of refining capacity for the crude oil Newfield produces from its Monument Butte Field in Utah and labor conditions. In addition, the drilling of oil and gas wells and the production of hydrocarbons are subject to governmental regulations and operating risks.
