IMMTECH INTERNATIONAL, INC. AND SUBSIDIARIES
(A Development Stage Enterprise)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. BASIS OF PRESENTATION

The accompanying condensed consolidated financial statements have been prepared by Immtech International, Inc. and its subsidiaries (the "Company") pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC") and, in the opinion of the Company, include all adjustments necessary for a fair statement of results for each period shown (unless otherwise noted herein, all adjustments are of a normal recurring nature). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such SEC rules and regulations. The Company believes that the disclosures made are adequate to prevent the financial information given from being misleading. It is suggested that these financial statements be read in conjunction with the financial statements and notes thereto included in the Company's latest Annual Report on Form 10-K/A.

2. COMPANY BUSINESS AND SELECTED ACCOUNTING POLICIES

Description of Business - Immtech International, Inc. (a development stage enterprise) and its subsidiaries (the "Company") are pharmaceutical companies focused on the development and commercialization of oral drugs to treat infectious diseases. The Company has development programs that include treatments for fungal infections, Malaria, Tuberculosis, Hepatitis C, diabetes, Pneumocystis carinii pneumonia and tropical medicine diseases including African sleeping sickness (a parasitic disease also known as Trypanosomiasis) and Leishmaniasis (a parasitic disease that destroys the liver). The Company holds worldwide patents, patent applications, licenses and rights to license worldwide patents and technologies from a scientific consortium and exclusive rights to commercialize products from those

Edgar Filing: IMMTECH INTERNATIONAL INC - Form 10-Q

patents and licenses that are integral to the Company. The Company is a development stage enterprise and since its inception on October 15, 1984, has engaged in research and development programs, expanding its network of scientists and scientific advisors, licensing technology agreements, and advancing the commercialization of its dication technology platform. The Company uses the expertise and resources of strategic partners and third parties in a number of areas, including: (i) laboratory research, (ii) pre-clinical and human clinical trials and (iii) manufacture of pharmaceutical drugs. The Company has licensing and exclusive commercialization rights to a dicationic pharmaceutical platform and is developing drugs intended for commercial use based on that platform.

The Company does not have any products currently available for sale, and no products are expected to be commercially available for sale until after March 31, 2004, if at all.

Since inception, the Company has incurred accumulated losses of approximately \$51,114,000. Management expects the Company to continue to incur significant losses during the next several years as the Company continues its commercialization, research and development activities and clinical trial efforts. In addition, the Company has various research and development agreements with third parties and is dependent upon their ability to perform under these agreements. There can be no assurance that the Company's continued research will lead to the development of commercially viable products. The Company's operations to date have consumed substantial

-4-

amounts of cash. The negative cash flow from operations is expected to continue in the foreseeable future. The Company will require substantial additional funds to commercialize its product candidates. The Company's cash requirements may vary materially from those now planned due to the results of research and development efforts, results of pre-clinical and clinical testing, responses to grant requests, relationships with strategic partners, changes in the focus and direction of the Company's research and development programs, competitive and technological advances, the regulatory process, and other factors. In any of these circumstances, the Company may require substantially more funds than are currently available or than management intends to raise.

The Company believes its existing unrestricted cash and cash equivalents, and the grants the Company has received or has been awarded and is awaiting disbursement of, will be sufficient to meet the Company's planned expenditures through at least the next twelve months, although there can be no assurance the Company will not require additional funds. Management may seek to satisfy future funding requirements through public or private offerings of securities, by collaborative or other arrangements with pharmaceutical or biotechnology companies or from other sources.

The Company's ability to continue as a going concern is dependent upon its ability to generate sufficient funds to meet its obligations as they become due and, ultimately, to obtain profitable operations. Management's plans for the forthcoming year, in addition to normal operations, include continuing their efforts to obtain additional equity and/or debt financing and to obtain additional research grants and entering into research and development agreements with other entities.

Principles of Consolidation - The consolidated financial statements

Edgar Filing: IMMTECH INTERNATIONAL INC - Form 10-Q

include the accounts of Immtech International, Inc., Lenton Fibre Optics Development Limited ("Lenton"), a majority-owned subsidiary located in Hong Kong, and Lenton's wholly-owned subsidiaries. All significant intercompany balances and transactions have been eliminated.

Cash and Cash Equivalents - The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents. Cash and cash equivalents consist of an amount on deposit at a bank and an investment in a money market mutual fund, stated at cost, which approximates fair value.

Restricted Funds on Deposit - Restricted funds on deposit consist of cash on deposit at a bank which is restricted for use in accordance with a clinical research subcontract agreement with The University of North Carolina at Chapel Hill.

Concentration of Credit Risk - The Company maintains its cash in commercial banks. Balances on deposit are insured by the Federal Deposit Insurance Corporation ("FDIC") up to specified limits. Balances in excess of FDIC limits are insured.

Investment - The Company accounts for its investment in NextEra Therapeutics, Inc. ("NextEra") on the equity method. As of September 30, 2003 and March 31, 2003, the Company owned approximately 28% of the issued and outstanding shares of NextEra common stock. The Company has recognized an equity loss in NextEra to the extent of the basis of its investment, and the investment balance is zero as of September 30, 2003 and March 31, 2003. Recognition of any investment income on the equity method by the Company for its investment in NextEra will occur only after NextEra has earnings in excess of previously unrecognized equity losses.

Land Use Rights - Land use rights represent an agreement by Lenton Fibre Optics Development Limited ("Lenton") to use land in the People's Republic of China for a period of 50 years and is being amortized over that period on a straight-line basis. Land use rights, net of accumulated

-5-

amortization, of \$3,470,180 and \$3,501,522 at September 30, 2003 and March 31, 2003, respectively, are included in the accompanying condensed consolidated balance sheets under property and equipment.

Minority Interest - Minority interest represents the carryover basis of the 20% of Lenton not owned by the Company at the date of acquisition, plus equity in earnings or minus equity in losses from that date.

Income Taxes - The Company accounts for income taxes using an asset and liability approach. Deferred income tax assets and liabilities are computed annually for differences between the financial statement and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. In addition, a valuation allowance is recognized if it is more likely than not that some or all of the deferred income tax assets will not be realized.

Net Income (Loss) Per Share - Net income (loss) per share is calculated in accordance with Statement of Financial Accounting Standard No. 128, "Earnings Per Share." Basic net income (loss) and diluted net income

Edgar Filing: IMMTECH INTERNATIONAL INC - Form 10-Q

(loss) per share are computed by dividing net income (loss) attributable to common stockholders by the weighted average number of common shares outstanding during the period. Diluted net income per share, when applicable, is computed by dividing net income attributable to common stockholders by the weighted average number of common shares outstanding increased by the number of potential dilutive common shares.

Comprehensive Loss - There were no differences between comprehensive loss and net loss for the three month and six months periods ended September 30, 2003 and 2002, respectively.

Edgar Filing: IMMTECH INTERNATIONAL INC - Form 10-Q

The Company has various collaborative research agreements with commercial enterprises. Under the terms of these arrangements, the Company has agreed to perform best efforts research and development and, in exchange, the Company may receive advanced cash funding and may also earn additional fees for the attainment of certain milestones. The Company may receive royalties on the sales of such products. The other parties generally receive exclusive marketing and distribution rights for certain products for set time periods in specific geographic areas.

The Company initially acquired its rights to the platform technology and indications developed by a consortium of universities consisting of The University of North Carolina at Chapel Hill ("UNC"), Georgia State University, Duke University and Auburn University (the "Scientific Consortium") pursuant to an agreement, dated January 15, 1997 (as amended, the "Consortium Agreement") among the Company, Pharm-Eco Laboratories, Inc. ("Pharm-Eco"), and UNC (to which each of the other members of the Scientific Consortium agreed shortly thereafter to become a party). The Consortium Agreement commits the parties to collectively research, develop, finance the research and development of, manufacture and market both the technology and compounds owned by the Scientific Consortium and previously licensed or optioned to Pharm-Eco and licensed to the Company in accordance with the Consortium Agreement (the "Current Compounds"), and all technology and compounds developed by the Scientific Consortium after January 15, 1997, through use of Company-sponsored research funding or National Cooperative Drug Development grant funding made available to the Scientific Consortium (the "Future Compounds" and, collectively with the Current Compounds, the "Compounds").

-12-

The Consortium Agreement contemplated that upon the completion of the Company's initial public offering ("IPO") of shares of its common stock with gross proceeds of at least \$10,000,000 by April 30, 1999, the Company and Pharm-Eco, with respect to the Current Compounds, and the Company and UNC, (on behalf of the Scientific Consortium), with respect to Future Compounds, would enter into license agreements for, or assignments of, the intellectual property rights relating to the Compounds held by Pharm-Eco and the Scientific Consortium; pursuant to which the Company would pay royalties and other payments based on revenues received for the sale of products based on the Compounds.

The Company completed its IPO on April 26, 1999, with gross proceeds in excess of \$10,000,000. Pursuant to the Consortium Agreement, both Pharm-Eco and the Scientific Consortium then became obligated to grant or assign to the Company an exclusive worldwide license to use, manufacture, have manufactured, promote, sell, distribute, or otherwise dispose of any products based directly or indirectly on all of the Current Compounds and Future Compounds.

As a result of the closing of the IPO, the Company issued an aggregate of 611,250 shares of common stock, of which 162,500 shares were issued to the Scientific Consortium and 448,750 shares were issued to Pharm-Eco or persons designated by Pharm-Eco.

Pursuant to the Consortium Agreement, the Company may, subject to the satisfaction of certain conditions, be required to issue 100,000 shares of common stock to the Scientific Consortium upon the filing by the Company of the first new drug application or an abbreviated new drug application

Edgar Filing: IMMTECH INTERNATIONAL INC - Form 10-Q

with the Food and Drug Administration with respect to a product incorporating certain Compounds. In addition, the Company will pay the Scientific Consortium an aggregate royalty of up to 5.0% of net sales derived from the Compounds, except that the royalty rate payable on any Compound developed at Duke University will be determined by negotiation at the time such Compound is developed. In the event that the Company sublicenses its rights with respect to the Compounds to a third party, the Company will pay the Scientific Consortium a royalty based on a percentage of any royalties the Company receives, and a percentage of all signing, milestone and other payments made to the Company pursuant to the sublicense agreement.

As contemplated by the Consortium Agreement, on January 28, 2002, the Company entered into a License Agreement with the Scientific Consortium whereby the Company received the exclusive license to commercialize dication technology and compounds developed or invented by one or more of the Consortium scientists after January 15, 1997, and which also incorporated into such License Agreement the Company's existing license with the Scientific Consortium with regard to the Current Compounds.

The Company was required, under an agreement which has subsequently expired, to make quarterly research grants in the amount of \$100,000 to UNC through April 30, 2002. Grant and research and development agreement revenue is recognized as earned based on the performance requirements of the specific grant. Upfront cash payments from research and development grants are reported as deferred revenue until such time as the research and development activities covered by the grant are performed.

Interest income for the three months ended September 30, 2003 and 2002 was approximately \$4,000 and \$2,000, respectively. The increase in interest income was due to an increase in funds invested. There was no interest expense for the three months ended September 30, 2003 and September 30, 2002.

Research and development expenses increased to approximately \$905,000 from \$711,000 for the three months ended September 30, 2003, and September 30, 2002, respectively. -16-

months ended September 30, 2002 to approximately \$382,000 in the three months ended September 30, 2003.

General and administrative expenses increased to approximately \$6,596,000 from approximately \$883,000 for the three months ended September 30, 2003, and September 30, 2002, respectively. The increase was primarily due to non-cash

Legal fees also increased from approximately \$185,000 during the three months ended September 30, 2002 to approximately \$521,000 during the three months ended September 30, 2003. The net loss increased to approximately \$6,838,000 from approximately \$1,232,000 for the three months ended September 30, 2003, and September 30, 2002, respectively. The increase in net loss was primarily due to an increase in general and administrative expenses resulting from non-cash expenses related to stock and warrant issuances for services.

Six Months Ended September 30, 2003 Compared with the Six Months Ended September 30, 2002.

Upfront cash payments from research and development grants are reported as deferred revenue until such time as the research and development activities covered by the grant are performed.

-17-

Interest income for the six months ended September 30, 2003 and 2002 was approximately \$5,000 and \$10,000, respectively. The decrease in interest income was due to a reduction in average funds invested and a reduction in interest rates paid on the invested funds. There was no interest expense for the six months ended September 30, 2003 and September 30, 2002.

Research and development expenses increased to approximately \$1,511,000 in the

Edgar Filing: IMMTECH INTERNATIONAL INC - Form 10-Q

six months ended September 30, 2003 from approximately \$1,463,000 in the six months ended September 30, 2002. The increase in research and development expenses was primarily the result of (i) decreases in the revenues relating to the clinical research subcontract agreement between the Company and UNC and grant revenues from SBIR grants from the NIH, (ii) offset by an increase in clinical trial direct costs in the three months ended September 30, 2003.

General and administrative expenses increased for the six months ended September 30, 2003 to approximately \$7,604,000 from approximately \$2,335,000 for the six months ended September 30, 2002. The increase in general and administrative expenses was primarily due to non-cash expenses for stock and warrant issuance in the six month period ended September 30, 2003 of approximately \$5,561,000 as compared to non-cash stock issuance in the six months ended September 30, 2002 of approximately \$945,000. Non-cash expenses in the six months ended September 30, 2003 included (i) approximately \$2,744,000 for the issuance of Warrants to purchase 600,000 shares of Common Stock issued to China Harvest International Ltd. as payment for services to assist in obtaining regulatory approval to conduct clinical trials in China, (ii) approximately \$61,000 for the issuance of 10,000 shares of Common Stock issued to David Tat Koon Shu for consulting services in China, (iii) approximately \$1,400,000 for the issuance of 100,000 shares of Common Stock issued to Fulcrum for assistance with listing the Company's securities on a recognized stock exchange and for consulting services, and (iv) approximately \$1,353,000 for the vested portion of 50,000 shares of Common Stock and the vested portion of Warrants to purchase 175,000 shares of Common Stock issued to Fulcrum during the period based on agreements signed March 21, 2003. Legal fees increased from approximately \$330,000 during the six month period ended September 30, 2002 to approximately \$685,000 during the six month period ended September 30, 2003. The increase in legal fees was primarily due to an increase in litigation fees. Additionally, expenses relating to the start-up of Immtech Therapeutics and continuing expenses for Immtech Hong Kong were approximately \$173,000 for the six months ended September 30, 2003.

We incurred a net loss of approximately \$7,966,000 for the six months ended September 30, 2003 as compared with a net loss of approximately \$2,998,000 for the six months ended September 30, 2002. The increase in net loss was primarily due to an increase in general and administrative expenses resulting from non-cash expenses related to stock and warrant issuances for services.

Liquidity and Capital Resources

During the three and six month periods ended September 30, 2003, cash and cash equivalents were primarily invested in a money market fund. Unrestricted cash and cash equivalents were approximately \$4,761,000 as of September 30, 2003.

-18-

There were equipment expenditures during the three and six month periods ended September 30, 2003 of approximately \$4,000 as compared to approximately \$9,000 and \$11,000 during the three and six month periods ended September 30, 2002, respectively.

The Company periodically receives cash from the exercise of Common Stock options. During the three and six month periods ended September 30, 2003, options were exercised for 9,218 shares of Common Stock.

We believe our existing unrestricted cash and cash equivalents and the grants we have received or have been awarded and are awaiting disbursement of, will be sufficient to meet our planned expenditures from the end of the quarter through

Edgar Filing: IMMTECH INTERNATIONAL INC - Form 10-Q

the next twelve months, although there can be no assurance we will not require additional funds.

To date, we have financed our operations with:

- o proceeds from various private placements of debt and equity securities, an initial public offering and other cash contributed from stockholders, which in the aggregate raised approximately \$35,268,000;
- o payments from research and testing agreements, foundation grants and SBIR grants and STTR grants of approximately \$9,986,000; and
- o the use of stock, options and warrants in lieu of cash compensation.

Our cash resources have been used to finance research and development (including sponsored research), capital expenditures, expenses associated with development of product candidates, as well as general and administrative expenses. All resources have been used pursuant to an agreement, dated January 15, 1997, (the "Consortium Agreement"), among the Company, UNC, and Pharm-Eco (to which each of Duke University, Auburn University and Georgia State University agreed shortly thereafter to become a party, and all of which, collectively with UNC, are referred to as the "Consortium") and, as contemplated by the Consortium Agreement, under a license agreement dated January 28, 2002 ("Consortium License Agreement") with the Consortium. Over the next several years we expect to incur substantial additional research and development costs, including costs related to early-stage research in pre-clinical (laboratory) and clinical (human) trials, administrative expenses to support our research and development operations and capital expenditures for expanded research capacity, various equipment needs and facility improvements.

Our future working capital requirements will depend upon numerous factors, including the progress of research and development and commercialization programs (which may vary as product candidates are added or abandoned), pre-clinical testing and clinical trials, achievement of regulatory milestones, the Company's corporate partners fulfilling their obligations to the Company, the timing and cost of seeking regulatory approvals, the level of resources that the Company devotes to the engagement or development of manufacturing capabilities, the ability of the Company to maintain existing and to establish new collaborative arrangements with other companies to provide funding to the Company to support these activities, and other factors. In

-19-

any event, we will require substantial funds in addition to our existing working capital to develop product candidates and otherwise to meet our business objectives.

Our ability to continue as a going concern is dependent upon our ability to generate sufficient funds to meet obligations as they become due and, ultimately, to obtain profitable operations. Management's plans for the remainder of the fiscal year, in addition to normal operations, include continuing their efforts to obtain additional financing and research grants, and to enter into various research and development and commercialization agreements with other entities.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

The Company's cash and cash equivalents are maintained primarily in U.S. dollar accounts and amounts payable for research and development to research organizations are contracted in U.S. dollars. Accordingly, the Company's exposure to foreign currency risk is limited because its transactions are primarily based in U.S. dollars. The Company does not have any other exposure to market risk. The Company will develop policies and procedures to manage market risk in the future as circumstances may require.

Item 4. Controls and Procedures.

Disclosure and Procedures

The Company maintains controls and procedures designed to ensure that it is able to collect the information it is required to disclose in the reports it files with the SEC, and to process, summarize and disclose this information within the time periods specified in the rules of the SEC. The Company's Chief Executive and Chief Financial Officers are responsible for establishing and maintaining these procedures and, as required by the rules of the SEC, evaluate their effectiveness. Based on their evaluation of the Company's disclosure controls and procedures, which took place as of the end of the period covered by this quarterly report on Form 10-Q, the Chief Executive and Chief Financial Officers believe that these procedures are effective to ensure that the Company is able to collect, process and disclose the information it is required to disclose in the reports it files with the SEC within the required time periods.

Internal Controls

The Company maintains a system of internal controls designed to provide reasonable assurance that: transactions are executed in accordance with management's general or specific authorization; transactions are recorded as necessary (i) to permit preparation of financial statements in conformity with generally accepted accounting principles and (ii) to maintain accountability for assets. Access to assets is permitted only in accordance with management's general or specific authorization and the recorded accountability for assets is compared with the existing assets at reasonable intervals and appropriate action is taken with respect to any differences.

There was no change in our internal control over financial reporting that occurred during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

Dale M. Geiss v. Immtech International, Inc. and Criticare Systems, Inc.

On August 29, 2003, Geiss responded to certain affirmative defenses that the Company had filed by generally denying the defenses. Geiss also filed a motion

Edgar Filing: IMMTECH INTERNATIONAL INC - Form 10-Q

to strike two of the Company's affirmative defenses. On September 25, 2003, the parties filed a stipulated order with the court extending the discovery schedule and amending the case management order. On October 9, 2003, defendant Criticare Systems, Inc. served discovery requests on Geiss.

Immtech International, Inc. v. Neurochem, Inc.

On September 2, 2003, the Company entered into a stipulation withdrawing without prejudice its request for a preliminary injunction and agreed to stay discovery pending settlement discussions. Since September 2003, the Company has been engaged in settlement discussions with Neurochem.

Gerhard Von der Ruhr et al. v. Immtech International, Inc. et al.:

On or about October 20, 2003, plaintiffs filed a complaint in the United States District Court for the Northern District of Illinois against the Company and certain officers and directors. Plaintiffs' complaint alleged that (i) the Company refused to authorize the Company's transfer agent to remove the restrictive legends from the plaintiffs' stock certificates; (ii) the Company refused to honor plaintiff's exercise of certain stock options; and (iii) the Company refused to honor an agreement regarding certain technology. Plaintiffs' complaint also alleged that certain officers and directors interfered with plaintiffs' contracts with the Company. Plaintiffs' complaint seeks unspecified monetary damages and punitive damages, equitable relief and costs and attorneys' fees. The Company believes that the plaintiffs' claims are meritless and intends to vigorously defend against this proceeding.

Except as noted above and in Part I, Item 3, Legal Proceedings, of the Form 10-K/A filed on October 15, 2003, the Company is not aware of any pending litigation.
