ILLUSTRATIVE SETTLEMENT TABLE  
-----

The following illustrative table demonstrates the hypothetical Cash Settlement Value of a Note based on the assumptions outlined below. The table does not purport to be representative of every possible scenario concerning increases or decreases in the Index Level. You should not construe this table as an indication or assurance of the expected performance of the Notes. Actual returns may be different. The table demonstrating the hypothetical Cash Settlement Value of a Note is based on the following assumptions:

- o Investor purchases \$1,000 aggregate principal amount of Notes at the initial public offering price of \$1,000.
- o Investor holds the Notes to maturity.
- o The Upside Participation Rate is 135%.
- o The Initial Index Level is equal to 170.00.
- o All returns are based on a 2-year term; pre-tax basis.
- o No Market Disruption Events or Events of Default occur during the term of the Notes.

The following table sets forth the monthly performance of the Index from January 31, 2001 through July 31, 2006. We obtained the Index Levels listed below from public sources and believe such information to be accurate.

Since its inception, the Index has experienced significant fluctuations. Any historical upward or downward trend in the level of the Index during any period shown in the following table is not an indication that the level of the Index is more or less likely to increase or decrease at any time during the term of the Notes. The historical Index Level during any period shown in the following table is not an indication of the future performance of the Index. The results shown should not be considered as a representation of the income, yield or capital gain or loss that may be generated by the Index in the future. The actual performance of the Index over the life of the Notes may bear little relation to the historical terms shown below.

### SELECTED RISK CONSIDERATIONS

---

The following highlights some, but not all, of the risk considerations relevant to investing in the Notes. The following must be read in conjunction with the sections "Risk Factors" beginning on pages S-3 and PS-12, respectively, in the Prospectus Supplement and Pricing Supplement.

- o Suitability of Notes for Investment -- A person should reach a decision to invest in the Notes after carefully considering, with his or her advisors, the suitability of the Notes in light of his or her investment objectives and the information set out in the Pricing Supplement. Neither the Issuer nor any dealer participating in the offering makes any recommendation as to the suitability of the Notes for investment.
- o Possible loss of principal--The Notes are not principal protected. If the Final Index Level is less than the Initial Index Level, the Notes will not be principal protected and the Cash Settlement Value you will receive at maturity will be less than the initial public offering price in proportion to the percentage decline in the Index Level. In that case, you will receive less, and possibly significantly less, than the initial public offering price of \$1,000.
- o Not exchange-listed--The Notes will not be listed on any securities exchange, and we do not expect a trading market to develop, which may affect the price that you receive for your Notes upon any sale prior to maturity.
- o Liquidity--If a trading market were to develop in the Notes, it may not be liquid. Our subsidiary, Bear Stearns & Co., Inc. has advised us that, under ordinary market conditions, it intends to indicate prices for the Notes on request. However, we cannot guarantee that bids for outstanding Notes will be made; nor can we predict the price at which any such bids will be made. In any event, the Notes will cease trading as of the close of business on the Maturity Date.

- 4 -

BEAR, STEARNS & CO. INC.

---

- o Possible loss of value in the secondary market--If you sell your Notes prior to maturity, you may receive less than the amount you originally invested or the amount you would have received had you held the Notes to maturity.
- o No interest or other payments and no current income--During the term of the Notes, you will not receive any interest or other periodic distributions and such payments will not be included in the calculation of the Cash Settlement Value you will receive at maturity. The yield on the Notes therefore may be less than the overall return you would earn if you purchased a conventional debt security at the same time and with the same maturity.

## Edgar Filing: BEAR STEARNS COMPANIES INC - Form FWP

- o Return related to commodity market price movement--The Notes entail exposure to commodity price movements. If the Final Index Level is less than the Initial Index Level, your return will be reduced in proportion to the percentage decline in the Index Level.
- o Taxes--The U.S. federal income tax consequences of an investment in the Notes are uncertain. We intend to treat the Notes for federal income tax purposes as pre-paid cash-settled forward contracts linked to the value of the Index and, where required, to file information returns with the Internal Revenue Service in accordance with such treatment. Assuming the Notes are treated as pre-paid cash-settled forward contracts, you should be required to recognize capital gain or loss to the extent that the cash you receive on the Maturity Date or upon a sale or exchange of the Notes prior to the Maturity Date differs from your tax basis on the Notes (which will generally be the amount you paid for the Notes). However, other treatments are possible. Prospective investors are urged to consult their tax advisors regarding the U.S. federal income tax consequences of an investment in the Notes.
