Half Year Results 2008: Strong performance, positive outlook

- Sales up 20 percent at constant exchange rates to \$7.3 billion
 - Crop Protection sales up 21 percent(2) at \$5.55 billion
 - Seeds sales up 15 percent(2) to \$1.74 billion
 - Earnings per share(1) up 36 percent to \$16.53
- Earnings per share \$15.93 after restructuring and impairment
- Capacity expansion to meet longer term demand growth

	Reported Financial Highlights			Excluding Restructuring, Impairment

Mike Mack, Chief Executive Officer, said:

“Rising commodity prices and their impact on the cost of food have heightened awareness of the vital role of agriculture. The challenge of increasing global food supply by 50 percent over the next 20 years means that not only must yield improvements continue but their pace must accelerate. Syngenta’s performance in the first half of 2008 illustrates the role that technology is already playing in driving land productivity. Strong growth across all regions demonstrates the readiness of growers worldwide to invest more in their crops. Our confidence in the prospects for our Crop Protection business is evidenced by our decision to invest in new capacity for products for which we see a substantial increase in sales potential. In Seeds, growing recognition of the value of our Corn and Soybean offer and pipeline is being accompanied by rapid growth in Oilseeds and Vegetables. Across all our businesses, we are

intensifying our focus on emerging markets in order to bring the benefits of modern agricultural technology to countries where the need for productivity gains is most pronounced.”

- (1) EPS on a fully-diluted basis, excluding restructuring and impairment.
- (2) Growth at constant exchange rates, see Appendix A.
- (3) Net income to shareholders of Syngenta AG.

Syngenta – July 24, 2008 / Page 1 of 24

Financial Performance 1st Half 2008

Sales up 20 percent

Sales at constant exchange rates (CER) increased by 20 percent, with growth across all product lines and regions. Sales growth was largely volume driven with a three percent contribution from price. Reported sales were 28 percent higher at \$7.3 billion. Crop Protection sales* rose by 21 percent (CER) and Seeds sales by 15 percent.

EBITDA margin 31 percent

EBITDA increased by 21 percent (CER) to \$2.3 billion. Volume growth was the main driver, with price increases and operational efficiency savings more than offsetting higher costs linked to the expansion of the business.

Currencies: The weakness of the US dollar, notably against the Euro, had a favorable impact on sales and increased EBITDA by \$169 million.

Earnings per share up 36 percent

Earnings per share, excluding restructuring and impairment, rose 36 percent to \$16.53. Excluding non-recurring income in 2007, earnings per share rose by 41 percent. The increase was driven by higher operating income. After charges for restructuring and impairment, earnings per share were \$15.93 (2007: \$12.43, including non-recurring income).

Business Highlights

Crop Protection: growth in all product lines, all regions

In 2008 growers across the world have focused on yield maximization resulting in higher usage intensity for crop protection products. In this context the benefits of Syngenta's unique portfolio have been well recognized and are reflected in an outstanding performance in all regions.

In Europe, Africa and the Middle East a resurgence of investment in agriculture led to strong growth in Western Europe. Eastern Europe continued to expand rapidly with the ongoing modernization of agriculture and extensions to the Syngenta product range. In NAFTA the impact of lower US corn acres on selective herbicide sales was more than offset by a focus on new fungicide opportunities and expansion in non-selective herbicides. Emerging markets in Asia Pacific, notably China and India, continued to drive growth, more than offsetting weakness in Japan. Latin America concluded an outstanding season: high soybean prices encouraged growers to maximize yield, and demand on other crops such as corn also increased. Syngenta's leading product portfolio and close customer relationships allowed us to take full advantage of this favorable environment.

The breadth of our range is reflected in strong growth in all product lines, with three major compounds playing a leading role. Sales growth of 57 percent for the fungicide AMISTAR® (azoxystrobin) was driven by broad spectrum mixture products successfully introduced over the last three years. Sales of the insecticide thiamethoxam increased by 32 percent with growth in both ACTARA®, for foliar and soil application, and in CRUISER®, for seed treatment where it is frequently used in combinations with fungicides. In Non-Selective Herbicides, TOUCHDOWN® achieved unprecedented growth with prices up by close to 50 percent and high demand for glyphosate on herbicide-tolerant acres.

* Crop Protection sales include \$18 million of inter-segment sales.

Syngenta – July 24, 2008 / Page 2 of 24

New products: DURIVO®, for which the peak sales target has been raised to \$400 million, was successfully launched on rice in Indonesia with further launches to come in the course of the year. REVUS® made an excellent start in its first full year with registrations in more than 50 countries planned. The continued roll-out of AXIAL® resulted in sales almost doubling, reflecting the versatility of the product and strong demand on cereals. Sales of AVICTA® were lower affected by reduced US cotton acres; product performance is excellent with launch due this year on cotton in Brazil and in 2009 on corn in the USA. Combined peak sales for new products, defined as those launched since 2006, are estimated at over \$1 billion.

EBITDA increased by 25 percent (CER) to \$2.02 billion with a record margin of 36.3 percent. Substantial volume growth and price increases more than offset the impact of higher raw materials costs of \$30 million in the first half, while allowing significant investment in growth opportunities.

R&D pipeline: Syngenta has a rich pipeline which extends beyond 2012 with sales potential in excess of \$2 billion. In June, Syngenta and DuPont announced that they will jointly prepare regulatory studies for DuPont's Cyazypyr™, a new broad spectrum insecticide, for commercialization starting in 2012. In January, a letter of intent was signed for a strategic alliance with Rohm & Haas to develop and commercialize INVINSA™ technology, a unique product for crop stress protection in field crops. Launch is targeted within two years with a market potential estimated at over \$500 million.

Seeds: strong sales growth, further progress in business transformation

Syngenta has one of the most diversified portfolios in the seeds industry covering corn, soybean, oilseeds, sugar beet, vegetables and flowers. Increasing R&D investment is delivering a range of new technologies to the market and is capitalizing on Syngenta's global germplasm base and extensive expertise in breeding.

While corn acres were lower in the USA, they expanded in all other regions in response to higher corn prices. With GM technology in its infancy outside North America, sales growth in these regions has reflected the strength of Syngenta's conventional hybrids as well as the acreage increase. In the USA, where GM penetration continued to expand, the successful launch of proprietary triple stack seed completed Syngenta's offer of all current corn trait combinations. Further advances in portfolio quality will be achieved through the combination of these traits with elite germplasm. In Brazil, approval for our Bt11 trait was confirmed and will enable us to play a leading role in the introduction of new corn technology. Soybean sales showed strong growth in the first half reflecting the US acreage shift and the proven yield advantage of NK® seeds.

Growth in Diverse Field Crops was driven by expanding oilseed acreage, market share growth in Eastern Europe, and by the successful launch of glyphosate-tolerant sugar beet in the USA.

Underlying growth in Vegetables and Flowers was supplemented by the consolidation of both Zeraim Gedera, the Israeli vegetable seeds company focusing on high value crops, and Fischer, the German-based flowers business which has reinforced Syngenta's world-leading position.

EBITDA increased to \$272 million (2007: \$202 million) with an EBITDA margin of 15.6 percent. Seeds remains on track to achieve an EBITDA margin of five percent for the full year, after taking account of the ongoing investments in Corn and Soybean designed to ensure that our pipeline will capture a wide range of future biotech opportunities. The development of a fully traited offer in Corn, together with growth in high margin businesses such as Vegetables, will drive significant margin expansion from 2009 towards the target of 15 percent in 2011, with further progress thereafter.

R&D pipeline: A number of second generation trait launches are targeted from 2009 onwards, including: MIR162 (VIP/broad lep) for broad lepidoptera insect control; corn amylase for more efficient bio-ethanol production; and drought-tolerant corn. These launches will enable us to offer multiple stack seeds with both productivity and end-use benefits.

In the first half we announced two agreements which affirm the value of our pipeline. In February, Syngenta and DuPont announced a global agreement granting Pioneer Hi-Bred access to VIP/broad lep. In May, an agreement with Monsanto settling all outstanding Corn and Soybean litigation also included cross-enabling terms which will accelerate the delivery of new products to the market and expand the choices available to growers.

Our R&D strategy has been developed to take full account of the needs and opportunities of emerging markets. In addition to the five-year research collaboration with the Institute of Genetics and Developmental Biology in China announced last year, Syngenta announced in April the construction of a new biotech research and technology center in Beijing for the early evaluation of GM and native traits in key crops. The investment will be approximately \$65 million in the first five years and by 2010 the center will employ some 200 researchers and staff.

Taxation

The underlying tax rate for the period was 22 percent (2007: 22 percent). A similar rate is expected for the full year with a target rate in the low to mid-twenties over the medium term.

Cash flow

Free cash flow was \$240 million. Average trade working capital as a percentage of sales was 36 percent (2007: 41 percent) reflecting good receivables collection and low inventories. Fixed capital expenditure of \$168 million (2007: \$125 million) was higher as investment in both Seeds and Crop Protection was increased.

Capacity expansion

Syngenta today announces a phased capacity expansion program with an expected total investment of \$600 million over the three years 2008-2010, and an estimated payback period of less than four years. The capacity expansion will be focused on Syngenta's sites at Grangemouth in the United Kingdom and Monthey in Switzerland. The main products concerned are the fungicide azoxystrobin (AMISTAR®) and the insecticide thiamethoxam (ACTARA®/CRUISER®). The decision to invest in these key compounds is underpinned by their outstanding success to date and by favorable long term trends towards improving crop performance. Their combined peak sales potential is estimated at \$3.5 billion (2007 sales: \$1.2 billion).

Cash return to shareholders

A dividend of CHF 4.80 per share (2007: CHF 3.80) was paid on 25 April 2008 representing a total payout of \$450 million. In line with Syngenta's objective of returning up to \$1 billion to shareholders in 2008, a total of 1.22 million shares were repurchased in the first half at a total cost of \$349 million. The total returned to shareholders in the first half was \$799 million.

Outlook

Mike Mack, Chief Executive Officer, said:

“The strong first half performance attests to Syngenta's contribution to increasing crop yield in buoyant agricultural markets. This performance and good prospects for the southern hemisphere season enable us to raise our target for full year earnings per share* growth to over 35 percent. We expect the continuing need to improve agricultural productivity to result in sustained demand for our products, allowing us to raise our target for 2009 to high teens growth in earnings per share*. Looking further ahead, our capacity expansion program reinforces our confidence in the strength of our offer and the outlook for our business.”

* Fully diluted, excluding 2007 non-recurring income, restructuring, impairment and share repurchase program.

Syngenta – July 24, 2008 / Page 4 of 24

Crop Protection

For a definition of constant exchange rates, see Appendix A.

Total	5554	4303	+29	+21	2880	2259	+27	+20

Selective Herbicides: major brands AXIAL®, CALLISTO® family, DUAL®/BICEP® MAGNUM, FUSILADE®MAX, TOPIK®

Sales were driven by an expanding cereals market which accelerated the adoption of AXIAL® with its proven flexibility for wheat and barley growers. The roll-out of the CALLISTO® family outside the USA benefited from higher corn acreage and strong acceptance of a product range tailored to local needs.

Non-Selective Herbicides: major brands GRAMOXONE®, TOUCHDOWN®

An exceptional performance reflected unprecedented demand for TOUCHDOWN® in response to higher glyphosate-tolerant acres in the USA and Latin America. The TOUCHDOWN® range has been further differentiated this year by the launch of the combination product HALEX®. A favorable pricing environment meant that higher sourcing costs were fully offset. Sales of GRAMOXONE® benefited from its effectiveness in rapid weed burn-down and the tightness of glyphosate supply.

Fungicides: major brands AMISTAR®, BRAVO®, REVUS®, RIDOMIL GOLD®, SCORE®, TILT®, UNIX®

Increased usage intensity and a focus on plant performance allowed us to reinforce our world leading position in fungicides. Growth in sales of AMISTAR® reflected the success of a variety of combination products used across crops. In the USA, the development of the corn fungicide market has been spearheaded by the launch of QUILT®; fungicide use on wheat is also growing rapidly. In Brazil PRIORI Xtra® is now the leading product for the prevention and treatment of soybean rust.

Insecticides: major brands ACTARA®, DURIVO®, FORCE®, KARATE®, PROCLAIM®, VERTIMEC®

Insecticide sales rose in all regions, notably in Latin America, where climatic conditions require extensive treatments to avoid crop losses. Sales also showed strong growth in Asia Pacific with the gradual substitution of generic products by more modern technologies. Sales of ACTARA® increased by one third globally. A reduction of sales of FORCE® in NAFTA was offset by growth in Europe with the spread of corn rootworm.

Seed Care: major brands AVICTA®, CRUISER®, DIVIDEND®, MAXIM®

Sales showed strong growth across all regions. CRUISER® benefited, in particular, from higher soybean acres in the USA, grower recognition of its unique vigor effect in soybean and a registration in France. CRUISER® is applied on more than 20 crops including corn, for which Pioneer Hi Bred recently signed a multi-year use agreement.

Professional Products: major brand HERITAGE®

Lawn & Garden saw strong sales of growing media by Fafard and good growth of HERITAGE® on turf in Asia Pacific. Home Care strengthened its performance in vector control and expanded sales for timber treatment.

Crop Protection by region	1st Half		Growth		2nd Quarter		Growth	
	2008 \$m	2007 \$m	Actual %	CER %	2008 \$m	2007 \$m	Actual %	CER %
Europe, Africa, Mid. East	2250	1670	+35	+20	1134	842	+35	+20
NAFTA	1850	1597	+16	+13	1060	914	+16	+14
Latin America	698	449	+55	+55	318	219	+46	+46
Asia Pacific	756	587	+29	+21	368	284	+29	+22
Total	5554	4303	+29	+21	2880	2259	+27	+20

In Europe, Africa and the Middle East strong commodity prices drove cereal and corn acreage with some incremental benefit from the elimination of set-aside. Growers significantly increased the use of technology in order to raise yields with a marked increase in cereal fungicide intensity. Eastern Europe continued to show rapid growth, notably in Russia, Ukraine and Kazakhstan.

NAFTA saw good sales growth in a context of lower US corn acres and an increase in trait penetration. Growth reflected an expansion of the fungicide market for corn and wheat, strong growth in TOUCHDOWN® and the further expansion of seed care.

Latin America maintained excellent momentum at the end of the season. In the key Brazilian market growers increased acreage but the main driver was investment in both corn and soybean. Syngenta continues to reinforce its leading market position in the region with significant improvements in both receivables and pricing.

In Asia Pacific emerging markets continue to drive growth, notably India, China, Indonesia and Vietnam. Australia showed a marked upturn in the first half owing to more favorable weather.

Seeds

For a definition of constant exchange rates, see Appendix A.

Product line	1st Half		Growth		2nd Quarter		Growth	
	2008 \$m	2007 \$m	Actual %	CER %	2008 \$m	2007 \$m	Actual %	CER %
Corn & Soybean	814	732	+11	+7	194	175	+10	+7
Diverse Field Crops	353	254	+39	+27	151	87	+75	+63
Vegetables & Flowers	572	432	+32	+23	267	216	+23	+16
Total	1739	1418	+23	+15	612	478	+28	+21

Corn & Soybean: major brands AGRISURE®, NK®, GARST®, GOLDEN HARVEST®

With early predictions of lower US corn acres, growers in other regions responded by increasing acreage to take advantage of the higher corn price, leading to rapid growth in corn sales, particularly in Europe. In the USA, soybean sales benefited from the acreage shift. Triple stack corn under the AGRISURE® brand was launched in small quantities and is expected to grow significantly as both penetration and supply increase.

Diverse Field Crops: major brands NK® oilseeds, HILLESHÖG® sugar beet

Diverse field crops showed strong growth largely as result of NK's leading position in sunflower. Demand for healthy oils led to strong growth particularly in Eastern Europe. Sugar beet sales improved with the launch of glyphosate-tolerant sugar beet in the USA.

Vegetables & Flowers: major brands, Vegetables S&G®, ROGERS®, Zeraim Gedera; major brands, Flowers S&G®, Fischer

Good growth in vegetables was supplemented by the consolidation of Zeraim Gedera, which realized strong sales in Israel and Spain. In flowers the main driver was the full year consolidation of Fischer acquired in 2007.

Syngenta is a world-leading agribusiness committed to sustainable agriculture through innovative research and technology. The company is a leader in crop protection, and ranks third in the high-value commercial seeds market. Sales in 2007 were approximately \$9.2 billion. Syngenta employs over 21,000 people in more than 90 countries. Syngenta is listed on the Swiss stock exchange (SYNN) and in New York (SYT). Further information is available at www.syngenta.com.

Syngenta – July 24, 2008 / Page 15 of 24

Notes to the Condensed Consolidated Financial Statements

Note 1: Basis of Preparation

Nature of operations: Syngenta AG ('Syngenta') is a world leading crop protection and seeds business that is engaged in the discovery, development, manufacture and marketing of a range of agricultural products designed to improve crop yields and food quality.

Basis of presentation and accounting policies: The consolidated financial statements for the six months ended June 30, 2008 have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and with the accounting policies set out in the Syngenta 2007 Financial Report.

The consolidated financial statements are presented in United States dollars (\$) as this is the major currency in which revenues are denominated.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimated.

Note 2: Changes in Accounting Policies - IFRS

There were no changes to accounting policies in 2008 which had an effect on these condensed consolidated financial statements, except for the following reclassification, which has no impact on earnings, shareholders' equity or cash flows:

Comparative figures for the condensed consolidated balance sheet have been adjusted to reclassify derivative financial assets and liabilities as current or non-current based on the maturity dates of the derivative contracts. Previously, all derivatives were shown within current assets or liabilities. Derivative assets of \$45 million as at June 30, 2007 and \$168 million as at December 31, 2007 have been reclassified as non-current assets. Derivative liabilities of \$23 million as at June 30, 2007 and \$33 million as at December 31, 2007 have been reclassified as non-current liabilities.

Note 3: Changes in the Scope of Consolidation

In 2007 following a public offer to minority shareholders of Syngenta India Ltd., Syngenta increased its shareholding in Syngenta India Ltd to 95 percent. During January 2008 final adjustments increased the holding to 96.3 percent. On 3rd April, 2008, Syngenta acquired a 49 percent share in Chinese company Sanbei Seeds Co Ltd, which specializes in the production and sale of high-quality, high-yielding corn seeds. The combined 2008 purchase price of these two transactions was \$41 million.

Note 4: Restructuring and Impairment before Taxes

For the six months to June 30	2008		2007	
	\$m	\$m	\$m	\$m
Reversal of inventory step-up (in cost of goods sold)			(6)	(1)
Restructuring costs:				
Write-off or impairment				
- property, plant and equipment	(4)		(17)	
- intangible assets	(11)		(11)	
Non-cash pension restructuring charges	(1)		8	
Total non-cash restructuring costs:		(16)		(20)
Cash costs				
- operational efficiency	(25)		(51)	
- Seeds acquisition integration	(8)		(1)	
- other cash costs	(1)		(1)	
Total cash restructuring costs		(34)		(53)
Impairment of Financial Assets		(25)		-
Divestment gains		-		117
			(75)	44
Total restructuring and impairment charge			(81)	43

Restructuring represents the effect on reported performance of initiating business changes which are considered major and which, in the opinion of management, will have a material effect on the nature and focus of Syngenta's operations, and therefore require separate disclosure to provide a more thorough understanding of business performance. Restructuring includes the effects of completing and integrating significant business combinations and divestments. The incidence of these business changes may be periodic and the effect on reported performance of initiating them will vary from period to period. Because each such business change is different in nature and scope, there will be little continuity in the detailed composition and size of the reported amounts which affect performance in successive periods. Separate disclosure of these amounts facilitates the understanding of performance including and excluding items affecting comparability. Reported performance before restructuring and impairment is one of the measures used in Syngenta's short term employee incentive compensation schemes. Syngenta's definition of restructuring and impairment may not be comparable to similarly titled line items in financial statements of other companies.

Restructuring and impairment includes the impairment costs associated with major restructuring and also impairment losses and reversals of impairment losses resulting from major changes in the markets in which a reported segment operates.

In 2008 Syngenta continued to incur costs associated with the Operational Efficiency program announced in 2004. Whilst no further initiatives were announced under this program in 2008, charges were incurred relating to the implementation of the Crop Protection manufacturing site closures announced in 2004-2006 and the rationalization and relocation

of Research and Technology sites announced in 2004. In 2008 charges for cash costs under this program were \$6 million.

A second Operational Efficiency program was announced in February 2007 and included restructuring in Crop Protection and Seeds. During 2008 \$7 million in cash costs were incurred by Crop Protection including \$6 million relating to the restructuring of the Development function and \$1 million for restructuring of Crop Protection organizations impacting sites in Switzerland and Belgium. In addition, headquarter and IS restructuring activity incurred costs of \$3 million. Cash costs in Seeds totaled approximately \$3 million for the continued restructuring of the NAFTA Corn & Soybean marketing and sales organizations. In 2008, \$6 million has been spent on a project to enable further back office standardization and consolidation.

Impairments of property, plant and equipment in 2008 consist of accelerated depreciation and asset write-offs from site closures and rationalizations. Impairments of \$11 million intangible assets largely relate to accelerated amortization of a lease on a Crop Protection development site, the closure of which was announced in 2006. The \$25 million Financial Asset impairment largely reflects the significant fall in the share price of Verenum (previously Diversa Corporation), which is now below the previously impaired cost of the shareholding.

Reversal of inventory step up included in cost of goods sold in 2008 relates to the reversal of inventory step up on the Zeraim Gedera acquisition.

Note 5: Principal Currency Translation Rates

As an international business selling in over 100 countries, with major manufacturing and R&D facilities in Switzerland, the UK and the USA, movements in currencies impact business performance. The principal currencies and adopted exchange rates against the US dollar used in preparing the financial statements contained in this communication were as follows:

	Average 1st Half 2008	Average 1st Half 2007	Period end 30 June 2008	Period end 30 June 2007
Brazilian real. BRL	1.72	2.07	1.60	1.93
Swiss franc. CHF	1.06	1.23	1.02	1.23
Euro. EUR	0.66	0.75	0.63	0.74
British pound. GBP	0.50	0.51	0.50	0.50
Japanese yen. JPY	105.34	119.74	105.25	123.44

The above average rates are an average of the monthly rates used to prepare the condensed consolidated income and cash flow statements. The period end rates were used for the preparation of the condensed consolidated balance sheet.

Supplementary Financial Information

Appendix A: Constant Exchange Rates (CER)

In this report results from one period to another period are, where appropriate, compared using constant exchange rates (CER). To present that information, current period results for entities reporting in currencies other than US dollars are converted into US dollars at the prior period's exchange rates, rather than at the exchange rates for the current year. CER margin percentages for gross profit and EBITDA are calculated by the ratio of these measures to sales after restating the measures and sales at prior period exchange rates. The CER presentation indicates the underlying business performance before taking into account currency exchange fluctuations

Appendix B: Free Cash Flow

Free cash flow comprises cash flow after operating activities, including taxes and interest and other financial payments and receipts, and investing activities, except investments in and proceeds from marketable securities, prior to discontinued operations and capital financing activities such as drawdown or repayment of debt, dividends paid to Syngenta Group shareholders, share repurchase and other equity movements. Free cash flow is not a measure of financial performance under generally accepted accounting principles and the free cash flow measure used by Syngenta may not be comparable to similarly titled measures of other companies. Free cash flow has been included as it is used by many investors as a useful supplementary measure of cash generation.

	2008	2007
	\$m	\$m
For the six months to June 30		
Cash flow from operating activities	510	388
Cash flow used for investing activities	(231)	(84)
Cash flow for/(from) marketable securities	(39)	2
Free cash flow	240	306

Syngenta – July 24, 2008 / Page 19 of 24

Appendix C: Reconciliation of EBITDA(1) to Net Income

EBITDA is defined as earnings before interest, tax, minority interests, depreciation, amortization and impairment. Information concerning EBITDA has been included as it is used by management and by investors as a supplementary measure of operating performance and is used by Syngenta as the basis of part of its employee incentive schemes. Management focuses on EBITDA excluding restructuring as this excludes items affecting comparability from one period to the next. EBITDA is not a measure of cash liquidity or financial performance under generally accepted accounting principles and the EBITDA measures used by Syngenta may not be comparable to other similarly titled measures of other companies. EBITDA should not be construed as an alternative to operating income or cash flow as determined in accordance with generally accepted accounting principles.

	1st Half 2008 \$m	1st Half 2007 \$m
Net income attributable to Syngenta AG shareholders	1519	1219
Minority interests	6	6
Income tax (credit)/expense	422	352
Financial expenses, net	37	22
Pre-tax restructuring and impairment	81	(43)
Depreciation, amortization and other impairment	217	193
EBITDA excluding restructuring	2282	1749

Appendix D: Reconciliation of Segment EBITDA to Segment Operating Income(1)

	1st Half 2008			1st Half 2007		
	Crop Protection \$m	Seeds \$m	Business Dev. \$m	Crop Protection \$m	Seeds \$m	Business Dev. \$m
	Operating income(2)	1849	229	(34)	1347	172
Income/(loss) from associates and joint ventures	-	-	-	-	-	-
Depreciation, amortization and other impairment	170	43	4	159	30	4
EBITDA(2)	2019	272	(30)	1506	202	26

(1) Excluding restructuring and impairment see Note 4 on page 17.

(2) Including inter-segment, for details see Appendix G on page 22.

Appendix E: Net Debt Reconciliation

Net debt comprises total debt net of related hedging derivatives, cash and cash equivalents and marketable securities. Net debt is not a measure of financial position under generally accepted accounting principles and the net debt measure used by Syngenta may not be comparable to the similarly titled measure of other companies. Net debt has been included as it is used by many investors as a useful measure of financial position and risk. The following table provides a reconciliation of movements in net debt during the period:

	2008	2007
	\$m	\$m
Opening balance at January 1	1385	1153
Acquisitions and other non-cash items	28	9
Foreign exchange effect on net debt	(8)	8
Purchase/(sale) of treasury shares	388	358
Dividends paid to group shareholders	450	128
Dividends paid to minorities	2	2
Free cash flow	(240)	(306)
Closing balance as at June 30	2005	1352
Constituents of closing balance;		
Cash and cash equivalents	(822)	(380)
Marketable securities(1)	(65)	(101)
Current financial debts	790	271
Non-current financial debts	2325	1583
Financing-related derivatives(2)	(223)	(21)
Closing balance as at June 30	2005	1352

(1) Long-term marketable securities are included in other financial assets.

(2) Included within other non-current financial assets and other non-current liabilities.

The following table presents the derivation of the Debt/Equity gearing ratio:

	2008	2007
	\$m	\$m
Net debt	2005	1352
Shareholders' equity	6950	6287
Debt/Equity gearing ratio (%)	29%	21%

Syngenta – July 24, 2008 / Page 21 of 24

Appendix F: Period End Trade Working Capital

The following table provides detail of trade working capital at the period end as a percentage of twelve-month sales:

	2008 \$m	2007 \$m
Inventories	2595	2062
Trade accounts receivable	4927	4049
Trade accounts payable	(2771)	(2126)
Net trade working capital	4751	3985
Twelve-month sales	10846	8535
Trade working capital as percentage of sales (%)	44%	47%

Appendix G: Half Year Segmental Results(1) and inter-segment elimination

Half Year Segmental Results	Sales	Gross Profit	Operating income	EBITDA
Crop Protection	5554	3153	1849	2019
Seeds	1739	795	229	272
Business Development	20	8	(34)	(30)
Total	7313	3956	2044	2261
Inter-segment elimination(2)	(18)	21	21	21
Total 3rd party	7295	3977	2065	2282

(1) Excluding restructuring and impairment see Note 4 on page 17.

(2) Crop Protection inter-segment sales to Seeds.
