NOTES TO FINANCIAL STATEMENTS

Note 1 -- Basis of Presentation

The financial information herein is unaudited; however, such information reflects all adjustments (consisting of normal, recurring adjustments) which are, in the opinion of management, necessary for a fair statement of results for the interim period. The results of operations for the three and nine months ended September 30, 2002, are not necessarily indicative of the results to be expected for the full year. Certain financial information and footnote disclosure normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. The reader is referred to the audited financial statements and notes thereto for the year ended December 31, 2001, filed as part of the Company's Annual Report on Form 10-K for such year.

Note 2--- Inventory

Edgar Filing: STRATASYS INC - Form 10-Q

Inventories consisted of the following at September 30 and December 31, respectively:

	2002	2001
	----	----
Finished Goods	\$2,953,341	\$4,539,943
Work in process	38,770	
Raw materials	4,147,870	2,337,639
	-----	-----
Totals	\$7,139,981	\$6,877,582
	=====	=====

Note 3--Material Commitments

The Company has signed material commitments with several vendors for fixed delivery of selected inventory expected to be supplied in the ensuing twelve-month period. These commitments amount to approximately \$3,300,000, some of which contain non-cancellation clauses.

Note 4 -- Income per common share

The difference between the number of shares used to compute basic income per share and diluted income per share relates to additional shares to be issued upon the assumed exercise of stock options and warrants, net of shares hypothetically repurchased at the average market price with the proceeds of exercise. For the three months ended September 30, 2002 and 2001, the additional shares amounted to 202,954 and 17,105, respectively. For the nine months ended September 30, 2002 and 2001, the additional shares amounted to 269,728 and 7,236, respectively.

4

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

GENERAL

We develop, manufacture, and market a family of rapid prototyping devices that enable engineers and designers to create physical models, tooling and prototypes out of plastic and other materials directly from a computer aided design ("CAD") workstation. Historically, our growth has come from sales to a number of industries, including automotive, consumer products, electronics, medical, and aerospace. Universities, other educational institutions, government agencies, and service bureaus have also been significant markets for us. Our current and future growth is largely dependent upon our ability to penetrate new markets, and develop and market new rapid prototyping devices and applications that meet the needs of our current and prospective customers. We intend to focus our new product development on various rapid prototyping devices, modeling materials, and software enhancements. In 2002, we have focused our primary business strategy on expanding international and domestic sales of our existing family of rapid prototyping devices, while maintaining on-going development of new rapid prototyping equipment, modeling materials, services, and software.

We introduced Dimension(TM), our new 3-D printer, in February 2002. Dimension offers ABS modeling capabilities in a 3-D Printer platform. The part output from competitive 3-D printers has tended to be extremely fragile. Dimension allows users to create parts from ABS, which offers part strength

Edgar Filing: STRATASYS INC - Form 10-Q

required of true form, fit and function testing. We believe that Dimension, introduced at a selling price of \$29,900, is the lowest priced system in the rapid prototyping market. Commercial shipments of Dimension systems commenced in February 2002.

In March 2002 we introduced the Prodigy Plus(TM). This system incorporates our WaterWorks(TM) soluble support system on the Prodigy(TM) platform, and is further enhanced by the addition of our Insight(TM) software that offers speed and performance improvements over those of our Benchtop systems. Commercial shipments commenced in May 2002.

Aided by the successful introduction of the Dimension, where both orders and shipments continued to exceed our expectations, net revenue in the third quarter of 2002 increased to \$12,028,475. Gross unit shipments in the third quarter of 2002 increased to 162 systems from 60 systems in the third quarter of 2001. In addition, sales of our high-end systems, including our Maxum(TM) and Titan(TM) systems, improved from the levels reported in the first half of 2002. Total bookings in the quarter exceeded our plan, but our backlog declined by approximately 35% from the backlog as of June 30, 2002. Our backlog consists of both Dimensions and our high-end systems, the majority of which are expected to ship in the fourth quarter of 2002.

We have continued to implement our 2002 strategy to expand our position in the 3-D printing market and our core rapid prototyping businesses. We anticipate that we will continue to control our expenses while we expand our revenue growth from the results attained in 2001. We believe that the 3-D printing market represents a significant growth area and that the introduction of Dimension will have a significant positive impact on our 2002 results and beyond. However, we remain fully committed to the continued growth of our historic core business, which is currently served by our Maxum, Titan, Prodigy Plus, and FDM 3000 systems. We also believe that our service, consumable, and maintenance revenues derived from our installed base of systems will also improve over the results attained in 2001. Our ability to implement our strategy is subject to numerous uncertainties, many of which are described in this Management's Discussion and Analysis of Financial Condition and Results of Operations and in the section below captioned "Forward Looking Statements and Factors That May Affect Future Results of Operations." We cannot ensure that our efforts will be successful.

We believe that the rapid prototyping industry is growing at approximately 5-10% per year and that 3-D printers and office modelers account for more than 30% of the total units of rapid prototyping systems shipped. Furthermore, we believe the 3-D Printing segment of this market is the fastest growing component of the market, and that our Dimension system, based upon price and performance, is positioned to capture an increased share of this market. We believe that there is a long-term trend toward lower-priced rapid prototyping systems capable of producing functional prototypes. This pricing trend should lead to growth in the more traditional functional prototyping marketplace as companies

5

continue to address in-house rapid prototyping and concept-modeling needs. Certain market segments in the industry have not demonstrated significant pricing sensitivity. These segments are more interested in modeling envelope size, modeling material, throughput, part quality, part durability, rapid manufacturing, and rapid tooling, which should allow growth to continue for higher priced rapid prototyping systems, such as our Maxum and Titan systems, that address these needs.

RESULTS OF OPERATIONS

QUARTER ENDED SEPTEMBER 30, 2002 COMPARED WITH QUARTER ENDED SEPTEMBER 30, 2001

Edgar Filing: STRATASYS INC - Form 10-Q

The following table sets forth certain statement of operations data as a percentage of net sales for the periods indicated. All items are included in or derived from our statement of operations.

	For the quarters ended September 30,	
	2002	2001
	----	----
Net sales	100.0%	100.0%
Cost of sales	36.0%	38.9%
Gross margin	64.0%	61.1%
Selling, general, and administrative expenses	33.2%	36.8%
Research & development expense	10.6%	12.2%
Operating income	20.3%	12.1%
Other income (expense)	(0.3%)	1.4%
Income before taxes	20.0%	13.5%
Income taxes	5.7%	3.4%
Net income	14.3%	10.1%

NET SALES

Net sales for the quarter ended September 30, 2002 were \$12,028,475, compared with net sales of \$9,703,008 for the quarter ended September 30, 2001. This represents an increase of \$2,325,467, or 24.0%. Dimension sales were very strong and exceeded our internal expectations, as did sales of our Titan and Maxum systems. Revenues from consumables, maintenance, and other services also increased in the quarter ended September 30, 2002 as compared with the same 2001 period. Maintenance and consumable revenue was enhanced by the larger installed base of systems and continued emphasis on the sale of maintenance contracts.

Domestic sales accounted for approximately 55% of total revenue in the third quarter of 2002, compared with approximately 60% recorded in the third quarter of 2001. In the United States, our eastern region recorded the highest revenue. Internationally, our European region reported the highest revenue, which amounted to approximately 23% of total sales, compared with approximately 15% recorded in the comparable 2001 period. Our combined Asia Pacific region, which comprises Japan, China, the Far East and India, accounted for approximately 21% of total revenue in the third quarter of 2002, similar to the results reported for the comparable 2001 period. We believe that sales into our Asia Pacific, European, and eastern USA regions will remain strong throughout the remainder of 2002. However, declining economic conditions in any of these regions could adversely impact our future sales and profitability.

6

GROSS PROFIT

Gross profit increased to \$7,701,580, or 64% of sales, in the quarter ended September 30, 2002, compared with \$5,931,270, or 61.1% of sales, in the quarter ended September 30, 2001. This represents an increase of \$1,770,310, or 29.8%. Gross profit increased due to higher revenues, principally due to strong sales of our Dimension, Titan, and Maxum systems and service and consumable sales. The improvement to gross profit as a percentage of sales was principally due to favorable product mix, a cost reduction to a product line, lower scrap and obsolescence expenses, and a reclassification from cost of goods sold to R&D expense of approximately \$100,000 resulting from a transfer of finished goods inventory for internal use. Gross profits as a percentage of sales should range between 58% to 62% over the next several quarters, but will be highly dependent

Edgar Filing: STRATASYS INC - Form 10-Q

upon sales mix and volumes. Accordingly, our actual results could differ.

OPERATING EXPENSES

SG&A expenses increased to \$3,988,082 for the quarter ended September 30, 2002, from \$3,573,314 for the quarter ended September 30, 2001. This represents an increase of \$414,768, or 11.6%. Variable commission and travel-related expenses, together with marketing, promotional, and sales expenses associated with the Dimension product launch, accounted for much of the increase in the quarter ended September 30, 2002, as compared with same quarter in 2001. SG&A expenses should be expected to be higher than comparative year-over-year quarters for the next several quarters, primarily due to expected expenses associated with the Dimension product launch. Our actual results could differ, however.

R&D expenses increased to \$1,273,278 for the quarter ended September 30, 2002 from \$1,185,319 for the quarter ended September 30, 2001. The increase amounted to \$87,959, or 7.4%. As referenced above, approximately \$100,000 of expense associated with the internal use of inventory was reclassified to R&D expense from cost of goods sold. In light of rising salary and benefit expenses, our goal of controlling R&D expenses has been successful thus far in 2002. Future trends in R&D should reflect expense levels reasonably consistent with the results reported in the quarter and nine months ended September 30, 2002, although some fluctuations due to the timing of certain expenses or to the completion of certain projects could impact the reported results in any given quarter.

For the reasons cited above, our operating income for the quarter ended September 30, 2002 amounted to \$2,440,220, or 20.3% of sales, compared with operating income of \$1,172,637, or 12.1% of sales, for the quarter ended September 30, 2001. This represents an increase of \$1,267,583, or 108.1%.

Over the next several quarters, our operating results could be adversely affected if the downturn in general economic conditions experienced by most capital equipment manufacturers in 2001 and 2002 were to continue. Our expense levels are based in part on our expectations of future revenues and product mix. Our planning assumes that the economic conditions affecting capital equipment manufacturers will slowly improve, commencing in late 2002 and continuing through 2003. If general economic conditions should worsen or the recovery takes longer than we expect, the revenues we recognize, or the mix of those revenues, could be severely impacted. While our backlog at the end of September was significantly higher than our backlog as of the end of 2001, we will still need a significant number of new orders to achieve our revenue and operating profit objectives. These factors may lead to operating losses in certain quarters, or reduced operating and gross profits as compared with prior periods. Our intention is to build our backlog of unshipped orders in the fourth quarter, assuming that we are able to achieve our fourth quarter revenue plan. This would improve operating results for the first quarter of 2003, which has historically been our weakest and most volatile quarter. We can give no assurances that we will succeed in this. While we have adjusted, and will continue to adjust, our expense levels based on revenues, fluctuations in revenues and product mix in a particular period could adversely impact our operating results.

7

OTHER INCOME (EXPENSE)

Other expense netted to \$30,132 in the quarter ended September 30, 2002 compared with other income of \$133,533 in the quarter ended September 30, 2001. Interest income declined to \$36,325 in the quarter ended September 30, 2002 compared with \$78,442 in the same quarter in 2001. The reduction in interest income was primarily due to lower interest rates. Interest expense increased to

Edgar Filing: STRATASYS INC - Form 10-Q

\$44,051 in the quarter ended September 30, 2002 from \$35,960 in the same quarter of 2001, primarily due to interest expense on the mortgage of our manufacturing facility. In the quarter ended September 30, 2002, we recognized other expense of \$22,406, principally due to a loss on foreign currency transactions related to the euro, which compared with other income of \$91,051, principally due to income on foreign currency transactions related to the euro in the same quarter of 2001.

NET INCOME

For the reasons cited above, the net income for the third quarter of 2002 amounted to \$1,723,214, or 14.3% of sales, compared with net income of \$979,667, or 10.1% of sales, in the comparable 2001 quarter. This resulted in earnings per diluted common share of \$.31 in the quarter ended September 30, 2002, compared with earnings per diluted common share of \$.18 for the quarter ended September 30, 2001.

NINE MONTHS ENDED SEPTEMBER 30, 2002 COMPARED WITH NINE MONTHS ENDED SEPTEMBER 30, 2001

The following table sets forth certain statement of operations data as a percentage of net sales for the periods indicated. All items are included in or derived from our statement of operations.

	For the nine months ended September 30,	
	2002	2001
	----	----
Net sales	100.0%	100.0%
Cost of sales	38.8%	40.0%
Gross margin	61.2%	60.0%
Selling, general, and administrative expenses	41.5%	39.2%
Research & development expense	12.7%	13.3%
Operating income	7.0%	7.5%
Other income	0.4%	0.2%
Income before taxes	7.4%	7.7%
Income taxes	2.1%	1.9%
Net income	5.3%	5.8%

NET SALES

Net sales for the nine months ended September 30, 2002, were \$28,536,472, compared with sales of \$27,614,412 for the nine months ended September 30, 2001. This represents an increase of \$922,060, or 3.3%. Dimension and Titan sales were very strong and exceeded our internal expectations. Neither Titan nor Dimension was available for sale for full nine-month period of 2001, so year-over-year comparison is not applicable. Revenues from both consumables and maintenance also increased in the nine months ended September 30, 2002 as compared with the same 2001 period. Maintenance and consumable revenue were enhanced by the larger installed base of systems and continued emphasis on the sale of maintenance contracts. Certain market segments, especially automotive, have remained weak for us throughout 2002. Historically, these segments have provided us with significant revenue and profitability, and their continued weakness could represent a risk to us for meeting our future growth and profitability objectives.

Domestic sales accounted for approximately 54% of total revenue in both the nine months ended September 30, 2002, as well as the comparable 2001 period.

Edgar Filing: STRATASYS INC - Form 10-Q

However, international system sales were equivalent to the results achieved in

8

our domestic markets for the 2002 period. In the United States, our eastern region continued to record the highest revenue, replacing our central region, which has been impacted by weakness in the automotive industry. Internationally, both our European and Far East regions recorded revenues that amounted to 22% of total sales. Europe accounted for only 19% of total revenue for the nine months ended September 30, 2001, while our combined Asia Pacific region, which comprises Japan, China, the Far East and India, accounted for approximately 22% of total revenue in the nine months ended September 30, 2001.

GROSS PROFIT

Gross profit improved to \$17,467,114, or 61.2% of sales, in the nine months ended September 30, 2002, compared with \$16,561,884, or 60% of sales, in the comparable period of 2001. This represents an increase of \$905,230, or 5.5%. Gross profit increased due to higher revenues, a favorable mix to higher margin products, lower scrap and obsolescence expense, and the reclassification of cost of goods sold to R&D expense of approximately \$100,000 resulting from the transfer of finished goods inventory for internal use.

OPERATING EXPENSES

SG&A expenses increased to \$11,850,599 for the nine months ended September 30, 2002, from \$10,830,523 for the comparable period of 2001. This represents an increase of \$1,020,076, or 9.4%. Bad debt expense in the 2002 period exceeded \$200,000, principally the result of a customer's bankruptcy. Variable commissions and travel expenses were higher in the 2002 period as a result of increased revenues, while marketing, promotional, and sales expenses associated with the Dimension product launch accounted for much of the remainder of the increases in the period.

R&D expenses declined to \$3,611,537 for the nine months ended September 30, 2002 from \$3,672,890 for the nine months ended September 30, 2001. The decrease amounted to \$61,443, or 1.7%. On higher revenues, R&D expenses decreased as a percentage of sales to 12.7% in the nine months ended September 30, 2002, from 13.3% in the 2001 period. Our R&D expenses for the fourth quarter of 2002, with some modest fluctuations, should be consistent with the results reported in the first nine months of the year, although our actual results could differ.

For the reasons cited above, our operating income for the nine months ended September 30, 2002 amounted to \$2,004,978, or 7.0% of sales, compared with operating income of \$2,058,381, or 7.5% of sales, for the nine months ended September 30, 2001. This represents a decline of \$53,403, or 2.6%.

OTHER INCOME

Other income netted to \$115,467 in the nine months ended September 30, 2002 compared with other income of \$66,665 in the comparable 2001 period. Interest income declined to \$117,228 in the current nine-month period, compared with \$282,973 in the 2001 nine-month period. The reduction in interest income was primarily due to lower interest rates. Interest expense increased to \$135,313 in the nine months ended September 30, 2002 from \$85,768 in the same period of 2001, primarily due to interest expense on the mortgage of our manufacturing facility. In the nine months ended September 30, 2002, we recognized other income of \$133,582, principally due to income from foreign currency transactions related to the euro, which compared with a loss on foreign currency transactions related to the euro of \$130,540 in the same period of 2001.

Edgar Filing: STRATASYS INC - Form 10-Q

NET INCOME

For the reasons cited above, the net income for the nine months ended September 30, 2002, amounted to \$1,516,139, or 5.3% of sales, compared with net income of \$1,593,794, or 5.8% of sales, in the comparable 2001 period. This resulted in earnings per diluted common share of \$.27 in the nine months ended September 30, 2002, compared with earnings per diluted common share of \$.29 for the comparable period ended September 30, 2001.

9

LIQUIDITY AND CAPITAL RESOURCES

Operating activities for the nine months ended September 30, 2002, provided cash of \$4,544,456, primarily reflecting our net income of \$1,516,139 and a decrease in accounts receivable of \$904,225. Strong collections of our second quarter receivables accounted for this decrease. An increase in inventories and a decrease in unearned maintenance revenue used cash of \$904,225 and \$150,916, respectively. Most of the increase in inventories was on our best selling product lines, allowing us to expand capacity for expected future shipments. In the nine months ended September 30, 2001, our operating activities provided cash of \$3,367,951, primarily reflecting our net income of \$1,593,794, coupled with a decrease in inventories and an increase in unearned maintenance of \$656,500 and \$345,338, respectively. An increase in accounts receivable and a decrease in accounts payable and other current liabilities used cash of \$901,466 and \$808,481, respectively, in the same 2001 period.

Our investing activities used cash of \$1,025,193 in the nine months ended September 30, 2002, reflecting the acquisition of machinery and equipment of \$607,591 and payments for intangible assets, including patents and capitalized software, of \$417,602. Our investing activities used cash of \$1,839,493 in the nine months ended September 30, 2001, including \$1,442,518 for the acquisition of machinery and equipment and \$396,975 for payments for intangible assets, including patents and capitalized software.

In the nine months ended September 30, 2002, our financing activities used cash of \$1,968,512, which included the purchase of treasury stock for an aggregate of \$3,641,265, and for payments of obligations under capital leases of \$100,526. We purchased 427,337 outstanding shares during this nine-month period. Net proceeds from the sale of common stock pursuant to the exercise of employee and director options provided cash of \$1,812,260, which represented options exercised to purchase 334,997 shares. In the nine months ended September 30, 2001, our financing activities used cash of \$253,920, principally for repayments under capitalized leases and purchase of treasury stock for \$156,419 and \$89,292, respectively.

The net increase in cash in the nine months ended September 30, 2002, for the reasons cited above, amounted to \$1,558,252. In the comparable 2001 period, the net increase in cash amounted to \$1,256,152. Our ending cash and cash equivalents balance as of September 30, 2002 and 2001 was \$11,769,650 and \$7,993,458, respectively.

For the remainder of 2002, we expect to use our cash for working capital purposes; for improvements to our manufacturing facility; for new product development and sustaining engineering; for the acquisition of equipment, including production equipment, tooling, and computers; for the purchase of intangible assets, including patents; for increased selling and marketing activities, especially as they relate to the Dimension product launch and market development; for acquisitions; and for our common stock buyback program. In October 2002, our board of directors authorized a continuation of our stock buyback program by authorizing an additional \$1,000,000 to the prior

Edgar Filing: STRATASYS INC - Form 10-Q

authorization of \$2,000,000, net of the proceeds from the exercise of stock options. While we believe that the primary source of liquidity during 2002 and 2003 will be derived from current cash balances and cash flows from operations, we have maintained a line of credit for the lesser of \$4,000,000 or a defined borrowing base. To date, we have not borrowed against this credit facility.

As of September 30, 2002, we had gross accounts receivable of \$11,704,204, less an allowance of \$475,691 for returns and doubtful accounts. Historically, our bad debt expense has been minimal. However, in the nine months ended September 30, 2002, principally due to the bankruptcy of a customer, we wrote-off receivables in excess of \$200,000. Certain customers, especially those that purchased our Maxum or Titan systems, continue to carry high balances. Additionally, at September 30, 2002, large balances were concentrated with certain international distributors, and some of these balances exceed our payment terms. Default by one or more of these distributors or customers would result in a significant charge against our current reported earnings. We have reviewed our policies that govern credit and collections, and will continue to monitor them in light of current payment status and economic conditions. While we can give no assurances, we believe that most, if not all, of the accounts receivable balances will ultimately be collected.

10

Our total current assets amounted to \$30,772,475 at September 30, 2002, the majority of which consisted of cash and cash equivalents, inventories and accounts receivable. Total current liabilities amounted to \$8,336,296. Our debt is minimal, consisting of a mortgage payable of \$2,231,996 and principal payments due under a capital lease of \$29,794. We will pay off the capital lease by the end of 2002. We estimate that we will spend approximately \$1,200,000 in 2002 for facility improvements, production and R&D equipment, computers and integrated software, and tooling, of which approximately \$900,000 has been completed. As of September 30, 2002, material commitments for inventory purchases from selected vendors for the ensuing twelve-month period ending September 30, 2003, should amount to approximately \$3,300,000. We intend to finance these purchases from existing cash or from cash flows from operations.

Inflation

We believe that inflation has not had a material effect on our operations or on our financial condition during the three most recent fiscal years.

FOREIGN CURRENCY TRANSACTIONS

Prior to 2001, substantially all of our recognized revenues from foreign sales were invoiced in United States dollars. Therefore, our exposure to foreign currency exchange rates was immaterial. Commencing in late 2000 and continuing throughout 2002, we began to invoice sales to certain European distributors in euros. Our reported results have been subject to fluctuations based upon changes in the exchange rates of that currency in relation to the United States dollar. We have previously hedged using forward foreign exchange contracts, although this hedging involved relatively small positions. We will continue to monitor our exposure to currency fluctuations, and, when appropriate, may use financial hedging techniques in the future. Instruments to hedge our risks may include foreign currency forward, swap, and option contracts. These instruments will be used to selectively manage risk but there can be no assurances that we will be fully protected against material foreign currency fluctuations. Translation exposure to our balance sheet with respect to foreign operations is not hedged. We expect to continue to derive most of our revenue from regions where the transactions are negotiated, invoiced, and paid in US dollars. Fluctuations in the currency exchange rates in these other countries may therefore reduce the demand for our products by increasing the price of our products in the currency of countries in which the local currency has declined in value.

Edgar Filing: STRATASYS INC - Form 10-Q

FORWARD-LOOKING STATEMENTS AND FACTORS THAT MAY AFFECT FUTURE RESULTS OF OPERATIONS

All statements herein that are not historical facts or that include such words as "expect", "anticipate", "project", "estimate" or "believe" or other similar words are forward-looking statements that we deem to be covered by and to qualify for the safe harbor protection covered by the Private Securities Litigation Reform Act of 1995 (the "1995 Act"). Investors and prospective investors in our Company should understand that several factors govern whether any forward-looking statement herein will be or can be achieved. Any one of these factors could cause actual results to differ materially from those projected herein. These forward-looking statements include the expected increases in net sales of rapid prototyping systems, services and consumables, our ability to maintain our gross margins on these sales, and our plans and objectives to introduce new products, control expenses, improve the quality and reliability of our systems, and improve profitability. The forward-looking statements included herein are based on current expectations that involve a number of risks and uncertainties. These forward-looking statements are based on assumptions, among others, that we (1) will be able to continue to introduce new rapid prototyping systems and materials acceptable to the market and improve our existing technology and software in our current product offerings, (2) will be able to successfully launch the new Dimension product, and that the market will accept this product, (3) will be able to maintain our revenues and gross margins on our present products, (4) will be able to control our operating expenses, (5) will be able to expand our manufacturing capabilities to meet the expected demand generated by Dimension, and (6) will be able to retain and recruit employees with the necessary skills to produce, develop, market, and sell our products. Assumptions relating to the foregoing involve judgments with respect to, among other things, future economic, competitive, market and technology conditions and future business decisions, all of which are difficult or impossible to predict accurately and many of which are beyond our control. Although we believe that the assumptions underlying the forward-looking

11

statements contained herein are reasonable, any of those assumptions could prove inaccurate, and therefore there is and can be no assurance that the results contemplated in any such forward-looking statement will be realized. The impact of actual experience and business developments may cause us to alter our marketing plans, our capital expenditure budgets, or our engineering, selling, manufacturing or other budgets, which may in turn affect our results of operations or the success of our new product development and introduction. Due to the factors noted above and elsewhere in the Management's Discussion and Analysis of Financial Condition and Results of Operations, our future earnings and stock price may be subject to significant volatility, particularly on a quarterly basis. Additionally, we may not learn of revenue or earnings shortfalls until late in a fiscal quarter, since we frequently receive the majority of our orders very late in a quarter. This could result in an immediate and adverse effect on the trading price of our common stock. Past financial performance should not be considered a reliable indicator of future performance, and investors should not use historical trends to anticipate results or trends in future periods.

ITEM 4. CONTROLS AND PROCEDURES

a) Evaluation of Disclosure Controls and Procedures

Based on their evaluation as of a date within 90 days of the filing date of this report, our chief executive officer and chief financial officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-14(c) and 15d-14(c) under the Securities Exchange Act of 1934

Edgar Filing: STRATASYS INC - Form 10-Q

(the "Exchange Act")) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities Exchange Commission rules and forms.

b) Changes in Internal Controls

There have been no significant changes in our internal controls or in other factors that could significantly affect the disclosure controls subsequent to the chief executive officer's and chief financial officer's most recent evaluation, and there have been no corrective actions with regard to significant deficiencies and material weaknesses in such controls.

12

PART II OTHER INFORMATION

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K

a) Exhibits.

- (1) Exhibit 99.1 Certification Pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
 - (2) Exhibit 99.2 Certification Pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- (b) Reports on Form 8-K.

CERTIFICATION

I, S. Scott Crump, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Stratasys, Inc. (the "registrant");

Edgar Filing: STRATASYS INC - Form 10-Q

2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of and for the periods presented in this quarterly report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a) Designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) Evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c) Presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of the registrant's board of directors:
 - a) All significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal control; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
