GOODRICH CORPORATION

(Exact name of registrant as specified in its charter)

New York

(State of incorporation)

Four Coliseum Centre

2730 West Tyvola Road

Charlotte, North Carolina

(Address of principal executive offices)

34-0252680

(I.R.S. Employer Identification No.)

28217

(Zip Code)

Registrant's telephone number, including area code: (704) 423-7000

SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE ACT:

Title of Each Class

Name of Each Exchange on Which Registered

Common Stock, \$5 par value

New York Stock Exchange

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Edgar Filing: GOODRICH CORP - Form 10-K

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files), Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company filer (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting and non-voting common equity of the registrant, consisting solely of common stock, held by nonaffiliates of the registrant as of June 30, 2009 was \$6.2 billion.

The number of shares of common stock outstanding as of January 31, 2010 was 125,165,336 (excluding 14,000,000 shares held by a wholly owned subsidiary).

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the proxy statement dated March 11, 2010 are incorporated by reference into Part III (Items 10, 11, 12, 13 and 14).

Table of Contents

PART I

Item 1. *Business*

Overview

We are one of the largest worldwide suppliers of aerospace components, systems and services to the commercial and general aviation airplane markets. We are also a leading supplier of systems and products to the global defense and space markets. Our business is conducted globally with manufacturing, service and sales undertaken in various locations throughout the world. Our products and services are principally sold to customers in North America, Europe and Asia.

We were incorporated under the laws of the State of New York on May 2, 1912 as the successor to a business founded in 1870.

Our principal executive offices are located at Four Coliseum Centre, 2730 West Tyvola Road, Charlotte, North Carolina 28217 (telephone 704-423-7000).

We maintain an Internet site at <http://www.goodrich.com>. The information contained at our Internet site is not incorporated by reference in this report, and you should not consider it a part of this report. Our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and any amendments to those reports, are available free of charge on our Internet site as soon as reasonably practicable after they are filed with, or furnished to, the Securities and Exchange Commission. In addition, we maintain a corporate governance page on our Internet site that includes key information about our corporate governance initiatives, including our Guidelines on Governance, the charters for our standing board committees and our Business Code of Conduct. These materials are available upon request.

Unless otherwise noted herein, disclosures in this Annual Report on Form 10-K relate only to our continuing operations. Our discontinued operations include the Goodrich Aviation Technical Services, Inc. (ATS) business, which was sold in November 2007.

Unless the context otherwise requires, the terms *we*, *our*, *us*, *Company* and *Goodrich* as used herein refer to Goodrich Corporation and its subsidiaries.

As used in this Form 10-K, the following terms have the following meanings:

aftermarket means products and services provided to our customers to replace, repair or overhaul original equipment (OE) parts and systems;

commercial means large commercial and regional airplanes;

large commercial means commercial airplanes manufactured by Airbus S.A.S (Airbus) and The Boeing Company (Boeing);

regional means commercial airplanes produced by manufacturers other than Airbus and Boeing, such as Bombardier and Embraer; and

general aviation means business jets and all other non-commercial, non-military airplanes.

Business Segment Information

Our three business segments are as follows:

The Actuation and Landing Systems segment provides systems, components and related services pertaining to aircraft taxi, take-off, flight control, landing and stopping, and engine components, including fuel delivery systems and rotating assemblies.

The Nacelles and Interior Systems segment produces products and provides maintenance, repair and overhaul services associated with aircraft engines, including thrust reversers,

Table of Contents

cowlings, nozzles and their components, and aircraft interior products, including slides, seats, cargo and lighting systems.

The Electronic Systems segment produces a broad array of systems and components that provide flight performance measurements, flight management information, engine controls, fuel controls, electrical power systems, safety data and reconnaissance and surveillance systems.

For financial information about our segments, see Note 3, **Business Segment Information** to our consolidated financial statements included in Part II, Item 8 of this report, which is incorporated herein by reference.

Key Products and Services

We provide products and services for the entire life cycle of airplane and defense programs, including a significant amount of aftermarket support for our key products. Our key products include:

Nacelles the structure surrounding an aircraft engine. Components that make up a nacelle include thrust reversers, inlet and fan cowls, nozzle assemblies, exhaust systems and other structural components. Our aerostructures business is one of a few businesses that is a nacelle integrator, which means that we have the capabilities to design and manufacture all components of a nacelle, dress the engine systems and coordinate the installation of the engine and nacelle to the aircraft.

Actuation systems equipment that utilizes linear, rotary or fly-by-wire actuation to control movement. We manufacture a wide-range of actuators including primary and secondary flight controls, helicopter main and tail rotor actuation, engine and nacelle actuation, utility actuation, precision weapon actuation and land vehicle actuation.

Landing gear complete landing gear systems for commercial, general aviation and defense aircraft.

Aircraft wheels and brakes aircraft wheels and brakes for a variety of commercial, general aviation and defense applications.

Engine control systems applications for commercial engines, large and small, helicopters and all forms of military aircraft. Our products include fuel metering controls, fuel pumping systems, electronic controls (software and hardware), variable geometry actuation controls and engine health monitoring systems.

Intelligence surveillance and reconnaissance systems high performance custom engineered electronics, optics, shortwave infrared cameras and arrays, and electro-optical products and services for sophisticated defense, scientific and commercial applications.

Sensor systems aircraft and engine sensors that provide critical measurements for flight control, cockpit information and engine control systems.

Power systems aircraft electrical power systems for large commercial airplanes, business jets and helicopters. We supply these systems to defense and civil customers around the globe.

Customers

We serve a diverse group of customers worldwide in the commercial and general aviation airplane markets and in the global defense and space markets. We market our products, systems and services directly to our customers through an

internal marketing and sales force.

Table of Contents

In 2009, 2008 and 2007, direct and indirect sales to the United States (U.S.) government were approximately 22%, 17% and 17%, respectively, of consolidated sales. Indirect sales to the U.S. government include a portion of the direct and indirect sales to Boeing.

In 2009, 2008 and 2007, direct and indirect sales to Airbus were approximately 17%, 15% and 15%, respectively, of consolidated sales. In 2009, 2008 and 2007, direct and indirect sales to Boeing were approximately 16%, 14% and 15%, respectively, of consolidated sales.

Competition

The aerospace industry in which we operate is highly competitive. Principal competitive factors include price, product and system performance, quality, service, design and engineering capabilities, new product innovation and timely delivery. We compete worldwide with a number of U.S. and foreign companies that are both larger and smaller than us in terms of resources and market share, and some of which are our customers.

The following table lists the companies that we consider to be our major competitors for each major aerospace product or system platform for which we believe we are one of the leading suppliers. Unless otherwise noted, the primary market channels include original equipment and aftermarket products and services.

System	Primary Market Channels	Major Non-Captive Competitors(1)
<i>Actuation and Landing Systems</i>		
Wheels, Brakes and Brake Control Systems	Commercial/Regional/ Business/Defense	Honeywell International Inc.; Messier-Bugatti (a subsidiary of SAFRAN); Meggitt Aircraft Braking Systems; Crane Co.; Triumph Group Inc.
Landing Gear	Large Commercial/Defense	Messier-Dowty (a subsidiary of SAFRAN), Liebherr-Holding GmbH; Héroux-Devtek Inc.; APPH Ltd; Sumitomo Precision; GE Aviation; Loud Engineering
Flight Control Actuation	Large Commercial/Defense	Parker Hannifin Corporation; United Technologies Corporation; Liebherr-Holding GmbH; Moog Inc.; Nabtesco Aerospace, Inc.; Woodward Governor Company
Power Transmission Systems	Commercial and Military Helicopters	Kamatics (a subsidiary of Kaman Corporation); Pankl Aerospace Systems Inc. (a subsidiary of Pankl Racing Systems AG); Rexnord Industries, LLC
Turbine Fuel Technologies	Large Commercial/Military/ Regional/Business	Parker Hannifin Corporation; Woodward Governor Company
Turbomachinery Products	Aero and Industrial Turbine Components	

Blades Technology; Samsung; Alcoa Howmet (a subsidiary of Alcoa Inc.); PZL, LLC (a subsidiary of United Technologies Corporation); Honeywell Greer (a subsidiary of Honeywell International, Inc.); TECT Corporation

Nacelles and Interior Systems

Nacelles/Thrust Reversers Large Commercial/Military

Nexcelle, a joint-venture of Aircelle (a subsidiary of SAFRAN) and Middle River Aircraft Systems (a subsidiary of General Electric); Spirit Aerosystems, Inc.

Evacuation Systems Large Commercial/Regional

Air Cruisers (a subsidiary of Zodiac S.A.)

Table of Contents

System	Primary Market Channels	Major Non-Captive Competitors(1)
Propulsion Systems	Defense	Danaher Corp (Pacific Scientific, McCormick Selph, SDI); Scot, Inc. (a subsidiary of Chemring PLC.); Nammo Talley; Ensign Bickford
Aircraft Crew Seating	Large Commercial/Regional/ Business/Military	Ipeco Holdings Ltd; Sicma Aero Seat (a subsidiary of Zodiac S.A.); EADS Sogerma Services (a subsidiary of EADS European Aeronautical Defense and Space Co.); B/E Aerospace, Inc.; C&D Aerospace Group; BAE Systems; DeCrane
Ejection Seats	Defense	Martin-Baker Aircraft Co. Limited
Lighting	Large Commercial/Regional/ Business/Defense	Page Aerospace Limited; LSI Luminescent Systems Inc.; Honeywell Inc. (Grimes Inc.); Diehl Luftfahrt Elektronik GmbH (DLE); Zodiac; Luminator; B/E Aerospace; Astronics; Finmeccanica
Cargo Systems	Large Commercial	Telair International (a subsidiary of Teleflex Incorporated); Ancra International LLC, AAR Manufacturing Group, Inc.
<i>Electronic Systems</i>		
Sensors	Large Commercial/Regional/ Business/Defense	Honeywell International Inc.; Thales, S.A.; Auxitrol (a subsidiary of Esterline Technologies Corporation)
Fuel and Utility Systems	Large Commercial/Defense	Honeywell International Inc.; Parker Hannifin Corporation; Smiths Group plc (a subsidiary of General Electric)
De-Icing Systems	Large Commercial/Regional/ Business/Defense	Aérazur S.A. (a subsidiary of Zodiac S.A.); B/E Aerospace, Inc.
Aerospace Hoists/Winches	Defense/Search & Rescue/ Commercial Helicopter	Breeze-Eastern (a division of TransTechnology Corporation); Telair International (a subsidiary of Teleflex Incorporated)
Intelligence, Surveillance and Reconnaissance Systems	Defense/Space	BAE Systems, plc; ITT Industries, Inc.; L-3 Communications Holdings, Inc.; Honeywell International Inc.

Power Systems	Large Commercial/Regional/ Business/Defense	Honeywell International Inc.; Smiths Group plc (a subsidiary of General Electric); Hamilton Sunstrand (a subsidiary of United Technologies Corporation)
Engine Controls	Large Commercial Aftermarket/Regional/ Business/Defense/Helicopter	United Technologies Corporation; BAE Systems plc; Honeywell International Inc.; Argo-Tech Corporation, Woodward Governor Company; Hispano-Suiza (a subsidiary of SAFRAN)

(1) Excludes aircraft manufacturers, airlines and prime defense contractors who, in some cases, have the capability to produce these systems internally.

Table of Contents**Backlog**

Backlog as of December 31, 2009 was approximately:

	Firm Backlog	Unobligated Backlog (Dollars in millions)	Total Backlog	Firm Backlog Expected to be Filled in 2010
Commercial	\$ 2,589	\$ 10,237	\$ 12,826	\$ 1,945
Defense and Space	1,863	832	2,695	1,373
	\$ 4,452	\$ 11,069	\$ 15,521	\$ 3,318

Firm commercial backlog includes orders for which we have definitive purchase contracts and the estimated sales value to be realized under firm agreements to purchase future aircraft maintenance and overhaul services. Firm backlog includes fixed, firm contracts that have not been shipped and for which cancellation is not anticipated.

Aircraft manufacturers, such as Airbus and Boeing, may have firm orders for commercial aircraft that are in excess of the number of units covered under their firm contracts with us. We believe it is reasonable to expect that we will continue to provide products and services to these aircraft in the same manner as those under firm contract. Our unobligated commercial backlog includes the expected sales value for our product on the aircraft manufacturers' firm orders for commercial aircraft in excess of the amount included in our firm commercial backlog.

Firm defense and space backlog represents the estimated remaining sales value of work to be performed under firm contracts for which the funding has been approved by the U.S. Congress, as well as commitments by international customers that are similarly funded and approved by their governments. Unobligated defense and space backlog represents the estimated remaining sales value of work to be performed under firm contracts for which funding has not been appropriated. Indefinite delivery, indefinite quantity contracts are not reported in backlog.

Backlog is subject to delivery delays or program cancellations which are beyond our control. Firm backlog approximated \$4.2 billion at December 31, 2008.

Raw Materials and Components

We purchase a variety of raw materials and components for use in the manufacture of our products, including aluminum, titanium, steel, various specialty metals and carbon fiber. In some cases we rely on sole-source suppliers for certain of these raw materials and components, and a delay in delivery of these materials and components could create difficulties in meeting our production and delivery obligations. We continue to experience margin and cost pressures in some of our businesses due to increased market prices and limited availability of some raw materials, such as titanium, steel and various specialty metals. We have taken actions to address these market dynamics, including securing long-term supply contracts for titanium, and with these actions, we believe that we currently have adequate sources of supply for raw materials and components.

Environmental

We are subject to various U.S. and international environmental laws and regulations which may require that we investigate and remediate the effects of the release or disposal of materials at sites associated with past and present operations, including sites at which we have been

Table of Contents

identified as a potentially responsible party under the federal Superfund laws and comparable state laws. We are currently involved in the investigation and remediation of a number of sites under these laws. For additional information concerning environmental matters, see Item 3. Legal Proceedings Environmental.

Research and Development

We perform research and development under company-funded programs for commercial products and under contracts with customers. Research and development under contracts with others is performed on both defense and commercial products. Total research and development expenses from continuing operations in 2009, 2008 and 2007 were approximately \$239 million, \$284 million and \$280 million, respectively. These amounts are net of approximately \$101 million, \$133 million and \$124 million, respectively, which were funded by customers.

Intellectual Property

We own or are licensed to use various intellectual property rights, including patents, trademarks, copyrights and trade secrets. While such intellectual property rights are important to us, we do not believe that the loss of any individual property right or group of related rights would have a material adverse effect on our overall business or on any of our business segments.

Seasonality

Our large commercial, regional, business and general aviation airplane aftermarket market channel is moderately seasonal because certain of our customers maintain busy flight schedules from late November through December. This has historically resulted in some sales in this market channel being postponed from the fourth quarter into the first quarter of the following year.

Working Capital

Our working capital is influenced by the following factors:

New commercial aircraft development;

Aircraft production rate changes by OE manufacturers;

Levels of aircraft utilization, age of aircraft in the fleets and types of aircraft utilized by airlines; and

Levels of defense spending by governments worldwide.

Our working capital is currently at a high level primarily due to several new commercial aircraft development programs, including the Boeing 787 and the Airbus A350 XWB, early production of the Airbus A380 and high production rates for Airbus and Boeing aircraft.

Human Resources

As of December 31, 2009, we employed approximately 24,000 people, of which approximately 15,000 people were employed in the U.S. and approximately 9,000 people were employed in other countries. We believe that we have good relationships with our employees. Those hourly employees who are unionized are covered by collective bargaining agreements with a number of labor unions and with varying contract termination dates through 2013. Approximately 20% of our global labor force is covered by collective bargaining arrangements and approximately 4%

of our global labor force is covered by collective bargaining arrangements that will expire within one year. There were no material work stoppages during 2009.

Table of Contents

International Operations

We are engaged in business worldwide. We market our products and services through sales subsidiaries and distributors in various countries. We also have international joint venture agreements.

Currency fluctuations, tariffs and similar import limitations, price controls and labor regulations can affect our foreign operations, including foreign affiliates. Other potential limitations on our foreign operations include expropriation, nationalization, restrictions on foreign investments or their transfers and additional political and economic risks. In addition, the transfer of funds from foreign operations could be impaired by the unavailability of dollar exchange or other restrictive regulations that foreign governments could enact.

For financial information about our U.S. and foreign sales and assets, see Note 3, Business Segment Information to our consolidated financial statements.

Item 1A. Risk Factors

Our business, financial condition, results of operations and cash flows can be affected by a number of factors, including but not limited to those set forth below and elsewhere in this Annual Report on Form 10-K, any one of which could cause our actual results to vary materially from recent results or from our anticipated future results.

Our future success is dependent on demand for and market acceptance of new commercial and military aircraft programs.

We are currently under contract to supply components and systems for a number of new commercial, general aviation and military aircraft programs, including the Airbus A380 and A350 XWB, the Boeing 787 and 747-8, the Embraer 190, the Bombardier C Series, the Mitsubishi Regional Jet, the Dassault Falcon 7X and the Lockheed Martin F-35 JSF. We have made and will continue to make substantial investments and incur substantial development costs in connection with these programs. We cannot provide assurance that each of these programs will enter full-scale production as expected or that demand for the aircraft will be sufficient to allow us to recover our investment in these programs. In addition, we cannot assure you that we will be able to extend our contracts relating to these programs beyond the initial contract periods. If any of these programs are not successful, it could have a material adverse effect on our business, financial condition or results of operations.

The market segments we serve are cyclical and sensitive to domestic and foreign economic considerations that could adversely affect our business and financial results.

The market segments in which we sell our products are, to varying degrees, cyclical and have experienced periodic downturns in demand. For example, certain of our commercial aviation products sold to aircraft manufacturers have experienced downturns during slowdowns in the commercial airline industry and during periods of weak general economic conditions, as demand for new aircraft typically declines during these periods. Aftermarket demand for many of our products is also exposed to these business downturns and we have experienced periods of declining demand for our products from aircraft operators in the recent past and may experience downturns in the future. In 2009, our aftermarket sales decreased 16% as compared to 2008.

Capital spending by airlines and aircraft manufacturers may be influenced by a variety of factors including current and predicted traffic levels, load factors, aircraft fuel pricing, labor issues, competition, the retirement of older aircraft, regulatory changes, terrorism and related safety concerns, general economic conditions, worldwide airline profits and backlog levels. Also, since a substantial portion of commercial airplane OE deliveries are scheduled beyond 2009, changes

Table of Contents

in economic conditions may cause customers to request that firm orders be rescheduled or canceled. Aftermarket sales and service trends are affected by similar factors, including usage, pricing, regulatory changes, the retirement of older aircraft and technological improvements that increase reliability and performance. Credit availability to airlines and airline leasing companies could also impact the demand for new aircraft. A reduction in spending by aircraft manufacturers, airlines, airline customers or airline leasing companies could have a significant effect on the demand for our products, which could have an adverse effect on our business, financial condition, results of operations or cash flows.

Current conditions in the airline industry could adversely affect our business and financial results.

Increases in fuel costs, global economic conditions, high labor costs and heightened competition from low cost carriers have adversely affected the financial condition of some commercial airlines. Over the past ten years, several airlines have declared bankruptcy. A portion of our sales are derived from the sale of products directly to airlines, and we sometimes provide sales incentives to airlines and record sales incentives as other assets. If an airline declares bankruptcy, we may be unable to collect our outstanding accounts receivable from the airline and we may be required to record a charge related to unamortized sales incentives to the extent they cannot be recovered.

A significant decline in business with Airbus or Boeing could adversely affect our business and financial results.

For the year 2009, approximately 17% of our sales were made to Airbus and approximately 16% of our sales were made to Boeing for all categories of products, including OE and aftermarket products for commercial and military aircraft and space applications. Accordingly, a significant reduction in purchases by either of these customers could have a material adverse effect on our business, financial condition, results of operations or cash flows.

Demand for our defense and space-related products is dependent upon government spending.

Approximately 30% of our sales for the year 2009 were derived from the defense and space market segment. Included in that category are direct and indirect sales to the U.S. Government, which represented approximately 22% of our sales for 2009. The defense and space market segment is largely dependent upon government budgets, particularly the U.S. defense budget. We cannot assure you that an increase in defense spending will be allocated to programs that would benefit our business. Moreover, we cannot assure you that new military aircraft programs in which we participate will enter full-scale production as expected. A change in levels of defense spending or levels of military flight operations could curtail or enhance our prospects in this market segment, depending upon the programs affected.

Our business could be adversely affected if we are unable to obtain the necessary raw materials and components.

We purchase a variety of raw materials and components for use in the manufacture of our products, including aluminum, titanium, steel, various specialty metals and carbon fiber. Our inability to obtain necessary raw materials or an unanticipated spike in the price of such raw materials could impact our capability to manufacture our products and the profitability of our products. In addition, the loss of a significant supplier or the inability of a supplier to meet our performance and quality specifications or delivery schedules could affect our ability to complete our contractual obligations to our customers on a satisfactory, timely and/or profitable basis. These events may adversely affect our operating results, result in the termination of one or more of our customer contracts or damage our reputation and relationships with our customers. All of these events could have a material adverse effect on our business.

Table of Contents

We use a number of estimates in accounting for some long-term contracts. Changes in our estimates could materially affect our future financial results.

We account for sales and profits on some long-term contracts in accordance with the percentage-of-completion method of accounting, using the cumulative catch-up method to account for revisions in estimates. The percentage-of-completion method of accounting involves the use of various estimating techniques to project revenues and costs at completion and various assumptions and projections relative to the outcome of future events, including the quantity and timing of product deliveries, future labor performance and rates, and material and overhead costs. These assumptions involve various levels of expected performance improvements. Under the cumulative catch-up method, the impact of revisions in our estimates related to units shipped to date is recognized immediately.

Because of the significance of the judgments and estimates described above, it is likely that we could record materially different amounts if we used different assumptions or if the underlying circumstances or estimates were to change. Accordingly, changes in underlying assumptions, circumstances or estimates may materially affect our future financial performance.

Competitive pressures may adversely affect our business and financial results.

The aerospace industry in which we operate is highly competitive. We compete worldwide with a number of U.S. and foreign companies that are both larger and smaller than we are in terms of resources and market share, and some of which are our customers. While we are the market and technology leader in many of our products, in certain areas some of our competitors may have more extensive or more specialized engineering, manufacturing or marketing capabilities and lower manufacturing cost. As a result, these competitors may be able to adapt more quickly to new or emerging technologies and changes in customer requirements or may be able to devote greater resources to the development, promotion and sale of their products than we can.

The significant consolidation occurring in the aerospace industry could adversely affect our business and financial results.

The aerospace industry in which we operate has been experiencing significant consolidation among suppliers, including us and our competitors, and the customers we serve. There have been mergers and global alliances in the aerospace industry to achieve greater economies of scale and enhanced geographic reach. Aircraft manufacturers have made acquisitions to expand their product portfolios to better compete in the global marketplace. In addition, aviation suppliers have been consolidating and forming alliances to broaden their product and integrated system offerings and achieve critical mass. This supplier consolidation is in part attributable to aircraft manufacturers and airlines more frequently awarding long-term sole source or preferred supplier contracts to the most capable suppliers, thus reducing the total number of suppliers from whom components and systems are purchased. Our business and financial results may be adversely impacted as a result of consolidation by our competitors or customers.

Expenses related to employee and retiree medical and pension benefits may continue to rise.

We have periodically experienced significant increases in expenses related to our employee and retiree medical and pension benefits. Although we have taken action seeking to contain these cost increases, including making material changes to some of these plans, there are risks that our expenses will rise as a result of continued increases in medical costs due to increased usage of medical benefits and medical cost inflation. Pension expense may increase if investment returns on our pension plan assets do not meet our long-term return assumption, if there are reductions in the discount rate used to determine the present value of our benefit obligation, or if other actuarial assumptions are not realized.

Table of Contents

The aerospace industry is highly regulated.

The aerospace industry is highly regulated in the U.S. by the Federal Aviation Administration and in other countries by similar regulatory agencies. We must be certified by these agencies and, in some cases, by individual OE manufacturers in order to engineer and service systems and components used in specific aircraft models. If material authorizations or approvals were revoked or suspended, our operations would be adversely affected. New or more stringent governmental regulations may be adopted, or industry oversight heightened, in the future, and we may incur significant expenses to comply with any new regulations or any heightened industry oversight.

We may have liabilities relating to environmental laws and regulations that could adversely affect our financial results.

We are subject to various domestic and international environmental laws and regulations which may require that we investigate and remediate the effects of the release or disposal of materials at sites associated with past and present operations. We are currently involved in the investigation and remediation of a number of sites for which we have been identified as a potentially responsible party under these laws. Based on currently available information, we do not believe that future environmental costs in excess of those accrued with respect to such sites will have a material adverse effect on our financial condition. We cannot be assured that additional future developments, administrative actions or liabilities relating to environmental matters will not have a material adverse effect on our results of operations and/or cash flows in a given period.

In connection with the divestiture of our tire, vinyl and other businesses, we received contractual rights of indemnification from third parties for environmental and other claims arising out of the divested businesses. If these third parties do not honor their indemnification obligations to us, it could have a material adverse effect on our financial condition, results of operations and/or cash flows.

Any material product liability claims in excess of insurance may adversely affect us.

We are exposed to potential liability for personal injury or death with respect to products that have been designed, manufactured, serviced or sold by us, including potential liability for asbestos and other toxic tort claims. While we believe that we have substantial insurance coverage available to us related to such claims, our insurance may not cover all liabilities. Additionally, insurance coverage may not be available in the future at a reasonable cost. Any material liability not covered by insurance or for which third-party indemnification is not available could have a material adverse effect on our financial condition, results of operations and/or cash flows.

Any material product warranty obligations may adversely affect us.

Our operations expose us to potential liability for warranty claims made by third parties with respect to aircraft components that have been designed, manufactured, distributed or serviced by us. Any material product warranty obligations could have a material adverse effect on our financial condition, results of operations and/or cash flows.

Our operations depend on our production facilities throughout the world. These production facilities are subject to physical and other risks that could disrupt production.

Our production facilities could be damaged or disrupted by a natural disaster, labor strike, war, political unrest, terrorist activity or a pandemic. Although we have obtained property damage and business interruption insurance, a major catastrophe such as an earthquake or other natural disaster at any of our sites, or significant labor strikes, work stoppages, political unrest, war or terrorist activities in any of the areas where we conduct operations, could result in a prolonged

Table of Contents

interruption of our business. Any disruption resulting from these events could cause significant delays in shipments of products and the loss of sales and customers. We cannot assure you that we will have insurance to adequately compensate us for any of these events.

We have significant international operations and assets and are therefore subject to additional financial and regulatory risks.

We have operations and assets throughout the world. In addition, we sell our products and services in foreign countries and seek to increase our level of international business activity. Accordingly, we are subject to various risks, including: U.S.-imposed embargoes of sales to specific countries; foreign import controls (which may be arbitrarily imposed or enforced); price and currency controls; exchange rate fluctuations; dividend remittance restrictions; expropriation of assets; war, civil uprisings and riots; government instability; the necessity of obtaining governmental approval for new and continuing products and operations; legal systems of decrees, laws, taxes, regulations, interpretations and court decisions that are not always fully developed and that may be retroactively or arbitrarily applied; and difficulties in managing a global enterprise. We may also be subject to unanticipated income taxes, excise duties, import taxes, export taxes or other governmental assessments. Any of these events could result in a loss of business or other unexpected costs that could reduce sales or profits and have a material adverse effect on our financial condition, results of operations and/or cash flows.

We are exposed to foreign currency risks that arise from normal business operations. These risks include transactions denominated in foreign currencies and the translation of certain non-functional currency balances of our subsidiaries. Our international operations also expose us to translation risk when the local currency financial statements are translated to U.S. Dollars, our reporting currency. As currency exchange rates fluctuate, translation of the statements of income of international businesses into U.S. Dollars will affect comparability of revenues and expenses between years.

Creditors may seek to recover from us if the businesses that we spun off are unable to meet their obligations in the future, including obligations to asbestos claimants.

In May 2002, we completed the tax-free spin-off of our Engineered Industrial Products (EIP) segment, which at the time of the spin-off included EnPro Industries, Inc. (EnPro) and Coltec Industries Inc (Coltec). At that time, two subsidiaries of Coltec were defendants in a significant number of personal injury claims relating to alleged asbestos-containing products sold by those subsidiaries prior to our ownership. It is possible that asbestos-related claims might be asserted against us on the theory that we have some responsibility for the asbestos-related liabilities of EnPro, Coltec or its subsidiaries. A limited number of asbestos-related claims have been asserted against us as successor to Coltec or one of its subsidiaries. We believe that we have substantial legal defenses against these and other such claims. In addition, the agreement between EnPro and us that was used to effectuate the spin-off provides us with an indemnification from EnPro covering, among other things, these liabilities. We believe that such claims would not have a material adverse effect on our financial condition, but could have a material adverse effect on our results of operations and cash flows in a particular period.

Certain of our contracts could subject us to losses in the event that we experience cost overruns.

At the time we bid for business on OEM platforms, in many cases, we must make certain assumptions with respect to our estimated costs and expenditures in developing, manufacturing and selling our products. In certain cases, these contracts involve new technologies or applications and extend for many years. As a result, it is often difficult to predict the ultimate costs and expenditures associated with these contracts. Factors such as technological difficulties, fluctuations in raw material prices and supplier problems can lead to cost overruns, resulting in the

Table of Contents

contractual price becoming less profitable or even unprofitable. Our inability to accurately predict the costs associated with our contracts could have a material adverse effect on our results of operations and cash flows in a particular period.

We expect to continue to make acquisitions, which could involve certain risks and uncertainties.

Over the last two years, we have completed five acquisitions as part of our growth strategy and in an effort to enhance shareholder value. We expect to continue to make acquisitions in the future. There are risks and uncertainties related to acquisitions, including: integration difficulties; unrealized sales expectations from the acquired business; unrealized synergies and cost savings; unknown or underestimated liabilities; and potential loss of key management employees of the acquired business. Any of these risks or uncertainties could result in an acquisition having a material adverse effect on our results of operations and cash flows in a particular period.

Item 1B. *Unresolved Staff Comments*

Not applicable.

Item 2. *Properties*

We operate manufacturing plants and service and other facilities throughout the world.

Information with respect to our significant facilities that are owned or leased is set forth below:

Segment	Location	Owned or Leased	Approximate Number of Square Feet
Actuation and Landing Systems	Cleveland, Ohio	Leased	482,000
	Wolverhampton, England	Owned	429,000
	Troy, Ohio	Owned	415,000
	Oakville, Canada	Owned	390,000
	Vernon, France	Owned	273,000
	Tullahoma, Tennessee	Owned	260,000
	Miami, Florida	Owned	200,000
	Nacelles and Interior Systems	Chula Vista, California	Owned
Riverside, California		Owned	1,196,000
Singapore, Singapore		Owned	634,000
Foley, Alabama		Owned	420,000
Mexicali, Mexico		Owned	350,000
Toulouse, France		Owned	330,179
Phoenix, Arizona		Owned/Leased	274,000
Jamestown, North Dakota		Owned/Leased	272,000
Bangalore, India		Leased	260,000
Prestwick, Scotland		Owned	250,000
Electronic Systems		Danbury, Connecticut	Owned
	Birmingham, England	Owned	377,000
	Neuss, Germany	Owned/Leased	305,000

Edgar Filing: GOODRICH CORP - Form 10-K

Burnsville, Minnesota	Owned/Leased	285,000
West Hartford, Connecticut	Owned	262,000
Vergennes, Vermont	Owned	211,000

Table of Contents

Our headquarters is in Charlotte, North Carolina. In May 2000, we leased approximately 120,000 square feet under a lease that extends through May 2018, with two additional consecutive five-year options. The offices provide space for our corporate and segment headquarters.

Approximately 290,000 square feet of the Birmingham, England facility is leased to Aero Engine Controls, of which we have a 50% interest.

We and our subsidiaries are lessees under a number of cancelable and non-cancelable leases for real properties, used primarily for administrative, maintenance, repair and overhaul of aircraft, aircraft wheels and brakes and evacuation systems and warehouse operations.

In the opinion of management, our principal properties, whether owned or leased, are suitable and adequate for the purposes for which they are used and are suitably maintained for such purposes. See Item 3, *Legal Proceedings-Environmental* for a description of proceedings under applicable environmental laws regarding some of our properties.

Item 3. *Legal Proceedings*

General

There are various pending or threatened claims, lawsuits and administrative proceedings against us or our subsidiaries, arising in the ordinary course of business which seek remedies or damages. Although no assurance can be given with respect to the ultimate outcome of these matters, we believe that any liability that may finally be determined with respect to commercial and non-asbestos product liability claims should not have a material effect on our consolidated financial position, results of operations or cash flows. Legal costs are expensed when incurred.

Environmental

We are subject to environmental laws and regulations which may require that we investigate and remediate the effects of the release or disposal of materials at sites associated with past and present operations. At certain sites we have been identified as a potentially responsible party under the federal Superfund laws and comparable state laws. We are currently involved in the investigation and remediation of a number of sites under applicable laws.

Estimates of our environmental liabilities are based on current facts, laws, regulations and technology. These estimates take into consideration our prior experience and professional judgment of our environmental specialists. Estimates of our environmental liabilities are further subject to uncertainties regarding the nature and extent of site contamination, the range of remediation alternatives available, evolving remediation standards, imprecise engineering evaluations and cost estimates, the extent of corrective actions that may be required and the number and financial condition of other potentially responsible parties, as well as the extent of their responsibility for the remediation.

Accordingly, as investigation and remediation proceed, it is likely that adjustments in our accruals will be necessary to reflect new information. The amounts of any such adjustments could have a material adverse effect on our results of operations or cash flows in a given period. Based on currently available information, however, we do not believe that future environmental costs in excess of those accrued with respect to sites for which we have been identified as a potentially responsible party are likely to have a material adverse effect on our financial condition.

Environmental liabilities are recorded when the liability is probable and the costs are reasonably estimable, which generally is not later than at completion of a feasibility study or when we have recommended a remedy or have committed to an appropriate plan of action. The liabilities are reviewed periodically and, as investigation and

remediation proceed, adjustments are made as

Table of Contents

necessary. Liabilities for losses from environmental remediation obligations do not consider the effects of inflation and anticipated expenditures are not discounted to their present value. The liabilities are not reduced by possible recoveries from insurance carriers or other third parties, but do reflect anticipated allocations among potentially responsible parties at federal Superfund sites or similar state-managed sites, third party indemnity obligations, and an assessment of the likelihood that such parties will fulfill their obligations at such sites.

Our consolidated balance sheet included an accrued liability for environmental remediation obligations of \$66.1 million and \$62.3 million at December 31, 2009 and 2008, respectively. At December 31, 2009 and 2008, \$11.3 million and \$20.9 million, respectively, of the accrued liability for environmental remediation were included in current liabilities as accrued expenses. At December 31, 2009 and 2008, \$25.3 million and \$24 million, respectively, was associated with ongoing operations and \$40.8 million and \$38.3 million, respectively, was associated with previously owned businesses.

We expect that we will expend present accruals over many years, and will generally complete remediation in less than 30 years at sites for which we have been identified as a potentially responsible party. This period includes operation and monitoring costs that are generally incurred over 15 to 25 years.

Certain states in the U.S. and countries globally are promulgating or proposing new or more demanding regulations or legislation impacting the use of various chemical substances by all companies. We are currently evaluating the potential impact, if any, of complying with such regulations and legislation.

During 2009, a judgment in our favor became final when the initial verdict was upheld on appeal. As a result, we received \$79.3 million from Commercial Union Insurance Company for reimbursement of environmental remediation costs, attorney fees and interest; however, we paid a portion of the insurance proceeds to a former subsidiary. See Note 6, *Discontinued Operations* to our consolidated financial statements.

Asbestos

We and some of our subsidiaries have been named as defendants in various actions by plaintiffs alleging damages as a result of exposure to asbestos fibers in products or at our facilities. A number of these cases involve maritime claims, which have been and are expected to continue to be administratively dismissed by the court. We believe that pending and reasonably anticipated future actions are not likely to have a material adverse effect on our financial condition, results of operations or cash flows. There can be no assurance, however, that future legislative or other developments will not have a material adverse effect on our results of operations or cash flows in a given period.

Insurance Coverage

We maintain a comprehensive portfolio of insurance policies, including aviation products liability insurance which covers most of our products. The aviation products liability insurance typically provides first dollar coverage for defense and indemnity of third party claims.

A portion of our historical primary and excess layers of pre-1986 insurance coverage for third party claims was provided by certain insurance carriers who are either insolvent, undergoing solvent schemes of arrangement or in run-off. We have entered into settlement agreements with a number of these insurers pursuant to which we agreed to give up our rights with respect to certain insurance policies in exchange for negotiated payments. These settlements represent negotiated payments for our loss of insurance coverage, as we no longer have this insurance available for claims that may have qualified for coverage. A portion of these settlements was

Table of Contents

recorded as income for reimbursement of past claim payments under the settled insurance policies and a portion was recorded as a deferred settlement credit for future claim payments.

At December 31, 2009 and 2008, the deferred settlement credit was \$45 million and \$49.4 million, respectively, for which \$6.1 million and \$6.4 million, respectively, was reported in accrued expenses and \$38.9 million and \$43 million, respectively, was reported in other non-current liabilities. The proceeds from such insurance settlements were reported as a component of net cash provided by operating activities in the period payments were received.

Liabilities of Divested Businesses

Asbestos

In May 2002, we completed the tax-free spin-off of our Engineered Industrial Products (EIP) segment, which at the time of the spin-off included EnPro Industries, Inc. (EnPro) and Coltec Industries Inc (Coltec). At that time, two subsidiaries of Coltec were defendants in a significant number of personal injury claims relating to alleged asbestos-containing products sold by those subsidiaries prior to our ownership. It is possible that asbestos-related claims might be asserted against us on the theory that we have some responsibility for the asbestos-related liabilities of EnPro, Coltec or its subsidiaries. A limited number of asbestos-related claims have been asserted against us as successor to Coltec or one of its subsidiaries. We believe that we have substantial legal defenses against these and other such claims. In addition, the agreement between EnPro and us that was used to effectuate the spin-off provides us with an indemnification from EnPro covering, among other things, these liabilities. We believe that such claims would not have a material adverse effect on our financial condition, but could have a material adverse effect on our results of operations and cash flows in a particular period.

Other

In connection with the divestiture of our tire, vinyl and other businesses, we have received contractual rights of indemnification from third parties for environmental and other claims arising out of the divested businesses. Failure of these third parties to honor their indemnification obligations could have a material adverse effect on our financial condition, results of operations and cash flows.

Tax

We are continuously undergoing examination by the United States Internal Revenue Service (IRS), as well as various state and foreign jurisdictions. The IRS and other taxing authorities routinely challenge certain deductions and credits reported by us on our income tax returns.

Tax Years 2005 and 2006

During 2009, the IRS issued a Revenue Agent's Report for the tax years 2005 and 2006. In July 2009, we submitted a protest to the Appeals Division of the IRS with respect to certain unresolved issues which involve the proper timing of deductions. Although it is reasonably possible that these matters could be resolved during the next 12 months, the timing or ultimate outcome is uncertain.

Tax Years 2000 to 2004

During 2007, we reached agreement with the IRS on substantially all of the issues raised with respect to the examination of taxable years 2000 to 2004. We submitted a protest to the Appeals Division of the IRS with respect to the remaining unresolved issues which involve the proper timing of certain deductions. We were unable to reach

agreement with the IRS on the remaining issues and in December 2009, we filed a petition to the U.S. Tax Court. If the IRS were

Table of Contents

to prevail, we believe the amount of the estimated tax liability is fully reserved. We cannot predict the timing or ultimate outcome of a final resolution of the remaining unresolved issues.

Tax Years Prior to 2000

The previous examination cycle included the consolidated income tax groups for the audit periods identified below:

Coltec Industries Inc. and Subsidiaries	December, 1997 – July, 1999 (through date of acquisition)
Goodrich Corporation and Subsidiaries	1998 – 1999 (including Rohr, Inc. (Rohr) and Coltec)

We previously reached final settlement with the IRS on all but one of the issues raised in this examination cycle. We received statutory notices of deficiency dated June 14, 2007 related to the remaining unresolved issue which involves the proper timing of certain deductions. We filed a petition with the U.S. Tax Court in September 2007 to contest the notices of deficiency. If the IRS were to prevail, we believe the amount of the estimated tax liability is fully reserved. Although it is reasonably possible that these matters could be resolved during the next 12 months, the timing or ultimate outcome is uncertain.

Rohr was examined by the State of California for the tax years ended July 31, 1985, 1986 and 1987. The State of California disallowed certain expenses incurred by one of Rohr’s subsidiaries in connection with the lease of certain tangible property. California’s Franchise Tax Board held that the deductions associated with the leased equipment were non-business deductions. The additional tax associated with the Franchise Tax Board’s position is \$4.5 million. The amount of accrued interest associated with the additional tax is approximately \$29 million at December 31, 2009. In addition, the State of California enacted an amnesty provision that imposes nondeductible penalty interest equal to 50% of the unpaid interest amounts relating to taxable years ended before 2003. The penalty interest is approximately \$14.5 million at December 31, 2009. The tax and interest amounts continue to be contested by Rohr. No payment has been made for the \$29 million of interest or \$14.5 million of penalty interest. In April 2009, the Superior Court of California issued a ruling granting our motion for summary judgment. In August 2009 the State of California appealed the ruling. Once the State’s appeals have been exhausted and if the Superior Court’s decision is not overturned, we will be entitled to a refund of the \$4.5 million of tax, together with interest from the date of payment.

Following settlement of the U.S. Tax Court for Rohr’s tax years 1986 to 1997, California audited our amended tax returns and issued an assessment based on numerous issues including proper timing of deductions and allowance of tax credits. We submitted a protest of the assessment to the California Franchise Tax Board in November 2008. We believe that we are adequately reserved for this contingency. Although it is reasonably possible that these matters could be resolved during the next 12 months, the timing or ultimate outcome is uncertain.

Item 4. *Submission of Matters to a Vote of Security Holders*

Not applicable.

Executive Officers of the Registrant

Marshall O. Larsen, age 61, Chairman, President and Chief Executive Officer

Mr. Larsen joined the Company in 1977 as an Operations Analyst. In 1981, he became Director of Planning and Analysis and subsequently Director of Product Marketing. In 1986, he became Assistant to the President and later served as General Manager of several divisions of the Company’s aerospace business. He was elected a Vice President

of the Company and named a Group Vice President of Goodrich Aerospace in 1994 and was elected an Executive Vice President

Table of Contents

of the Company and President and Chief Operating Officer of Goodrich Aerospace in 1995. He was elected President and Chief Operating Officer and a director of the Company in February 2002, Chief Executive Officer in April 2003 and Chairman in October 2003. Mr. Larsen is a director of Becton, Dickinson & Co. and Lowe's Companies, Inc. He received a B.S. in engineering from the U.S. Military Academy and an M.S. in industrial management from the Krannert Graduate School of Management at Purdue University.

John J. Carmola, age 54, Vice President and Segment President, Actuation and Landing Systems

Mr. Carmola joined the Company in 1996 as President of the Landing Gear Division. He served in that position until 2000, when he was appointed President of the Engine Systems Division. Later in 2000, Mr. Carmola was elected a Vice President of the Company and Group President, Engine and Safety Systems. In 2002, he was elected Vice President and Group President, Electronic Systems. He was elected Vice President and Segment President, Engine Systems, in 2003, Vice President and Segment President, Airframe Systems, in 2005, and Vice President and Segment President, Actuation and Landing Systems in 2007. Prior to joining the Company, Mr. Carmola served in various management positions with General Electric Company. Mr. Carmola received a B.S. in mechanical and aerospace engineering from the University of Rochester and an M.B.A. with concentration in finance from Xavier University.

Cynthia M. Egnotovich, age 52, Vice President and Segment President, Nacelles and Interior Systems

Ms. Egnotovich joined the Company in 1986 and served in various positions with the Ice Protection Systems Division, including Controller from 1993 to 1996, Director of Operations from 1996 to 1998 and Vice President and General Manager from 1998 to 2000. Ms. Egnotovich was appointed as Vice President and General Manager of Commercial Wheels and Brakes in 2000. She was elected a Vice President of the Company and Group President, Engine and Safety Systems in 2002. In 2003, she was elected Vice President and Segment President, Electronic Systems. Ms. Egnotovich was elected Vice President and Segment President, Engine Systems in 2005. In 2007, she was elected Vice President and Segment President, Nacelles and Interior Systems. Ms. Egnotovich is a director of The Manitowoc Company, Inc. Ms. Egnotovich received a B.B.A. in accounting from Kent State University and a B.S. in biology from Immaculata College.

Curtis C. Reusser, Age 49, Vice President and Segment President, Electronic Systems

Mr. Reusser joined the Company in 1988 when it acquired TRAMCO. He held roles of increasing responsibility in Goodrich's Maintenance, Repair and Overhaul operations before being appointed General Manager of Goodrich MRO Europe, based in the UK, in 1996. He joined the Aerostructures Division in 1999 and held various Vice President and general management positions. He served as President of the Aerostructures Division from 2002 to 2007. Mr. Reusser was elected Vice President and Segment President, Electronic Systems effective January 1, 2008. Effective January 1, 2009, he was also elected a Director of Aero Engine Controls, a joint venture of Goodrich and Rolls-Royce plc. Before joining Goodrich, Mr. Reusser worked in engineering and business development for the Convair and Space Systems divisions of General Dynamics. Mr. Reusser graduated with a B.S. in Mechanical/Industrial Engineering from the University of Washington in 1983.

Gerald T. Witowski, age 62, Executive Vice President, Operational Excellence and Technology

Mr. Witowski joined the Company in 1978 as a Marketing Engineer in the Sensor Systems business. He was promoted to Vice President of Marketing and Sales in 1988 and was named Vice President and General Manager for the Commercial Transport Business Unit of Sensor Systems as well as the head of Goodrich's Test System Business Unit in New Century, Kansas in

Table of Contents

1997. In January 2001, he was named President and General Manager of Sensor Systems. He was elected Vice President and Segment President, Electronic Systems in March 2006 and to his current position in January 2008. Effective January 1, 2009, he was also elected a Director of Aero Engine Controls, a joint venture of Goodrich and Rolls-Royce plc. Prior to joining Goodrich, Mr. Witowski spent 10 years on active duty in the U.S. Navy where he was a commissioned officer and pilot. Mr. Witowski received a B.S. in Naval Science from the U.S. Naval Academy and an M.A. in Management and Human Relations from Webster University.

Terrence G. Linnert, age 63, Executive Vice President, Administration and General Counsel

Mr. Linnert joined the Company in 1997 as Senior Vice President and General Counsel. In 1999, he was elected to the additional positions of Senior Vice President, Human Resources and Administration, and Secretary. He was elected Executive Vice President, Human Resources and Administration, General Counsel in 2002 and Executive Vice President, Administration and General Counsel in February 2005. Effective January 1, 2009, he was also elected a Director of Aero Engine Controls, a joint venture of Goodrich and Rolls-Royce plc. Prior to joining Goodrich, Mr. Linnert was Senior Vice President of Corporate Administration, Chief Financial Officer and General Counsel of Centenor Energy Corporation. Mr. Linnert received a B.S. in electrical engineering from the University of Notre Dame and a J.D. from the Cleveland-Marshall School of Law at Cleveland State University.

Scott E. Kuechle, age 50, Executive Vice President and Chief Financial Officer

Mr. Kuechle joined the Company in 1983 as a Financial Analyst in the Company's former Tire Division. He has held several subsequent management positions, including Manager of Planning and Analysis in the Tire Division, Manager of Analysis in Corporate Analysis and Control as well as Director of Planning and Control for the Company's former Water Systems and Services Group. He was promoted to Director of Finance and Banking in 1994 and elected Vice President and Treasurer in 1998. Mr. Kuechle was elected Vice President and Controller in September 2004, Senior Vice President and Chief Financial Officer in August 2005 and Executive Vice President and Chief Financial Officer in January 2008. Mr. Kuechle received a B.B.A. in economics from the University of Wisconsin Eau Claire and an M.S.I.A. in finance from Carnegie-Mellon University.

Jennifer Pollino, age 45, Senior Vice President, Human Resources

Ms. Pollino joined the Company in 1992 as an Accounting Manager at Aircraft Evacuation Systems and since that time has served in a variety of positions, including Controller of Aircraft Evacuation Systems from 1995 to 1998, Vice President, Finance of Safety Systems from 1999 to 2000, Vice President and General Manager of Aircraft Seating Products from 2000 to 2001, President and General Manager of Turbomachinery Products from 2001 to 2002 and President and General Manager of Aircraft Wheels and Brakes from 2002 to 2005. She was elected as Senior Vice President, Human Resources in February 2005. Prior to joining Goodrich, Ms. Pollino served as a Field Accounting Officer for the Resolution Trust Corporation from 1990 to 1992, as Controller of Lincoln Savings and Loan Association from 1987 to 1990 and as an Auditor for Peat Marwick Main & Co. from 1986 to 1987. Ms. Pollino received a B.B.A. in accounting from the University of Notre Dame.

Scott A. Cottrill, age 44, Vice President and Controller

Mr. Cottrill joined the Company in 1998 as Director External Reporting. He later served as Director Accounting and Financial Reporting from 1999 to 2002 and as Vice President, Internal Audit from 2002 to 2005. Mr. Cottrill was elected as Vice President and Controller effective October 2005. Prior to joining the Company, Mr. Cottrill served as a Senior Manager with PricewaterhouseCoopers LLP. Mr. Cottrill received a B.S. in accounting from The Pennsylvania State University and is a Certified Public Accountant and a Certified Internal Auditor.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity and Related Stockholder Matters**

Our common stock (symbol GR) is listed on the New York Stock Exchange. The following table sets forth on a per share basis, the high and low sale prices for our common stock for the periods indicated as reported on the New York Stock Exchange composite transactions reporting system, and the cash dividends declared on our common stock for these periods.

Quarter	High	Low	Dividend
2009			
First	\$ 41.67	\$ 29.95	\$.25
Second	55.34	35.69	.25
Third	57.98	47.36	.25
Fourth	65.93	51.97	.27
2008			
First	\$ 71.14	\$ 56.72	\$.225
Second	70.38	47.21	.225
Third	55.00	38.79	.225
Fourth	41.50	25.11	.25

As of December 31, 2009, there were 7,514 holders of record of our common stock.

Our debt agreements contain various restrictive covenants that, among other things, place limitations on the payment of cash dividends and our ability to repurchase our capital stock. Under the most restrictive of these agreements, \$1,772.5 million of income retained in the business and additional capital was free from such limitations at December 31, 2009.

The following table summarizes our purchases of our common stock for the quarter ended December 31, 2009:

ISSUER PURCHASES OF EQUITY SECURITIES

Period	(a) Total Number of Shares Purchased(1)	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(2)	(d) Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs(2)(3)
October 2009	1,164	\$ 55.94		
November 2009				

Edgar Filing: GOODRICH CORP - Form 10-K

December 2009	251,439	\$	63.59	250,000		
Total	252,603	\$	63.56	250,000	\$	230 million

- (1) The category includes 2,603 shares delivered to us by employees to pay withholding taxes due upon vesting of a restricted stock unit award and to pay the exercise price of employee stock options.
- (2) This balance represents the number of shares that were repurchased under the Company's repurchase program (the Program). The Program was initially announced on October 24, 2006. On February 19, 2008, the Company announced that its Board of Directors had increased the dollar amount of shares that could be purchased under the Program from \$300 million to \$600 million. Unless terminated earlier by resolution of the Company's Board of Directors, the Program will expire when the Company has purchased all shares authorized

Table of Contents

for repurchase. The Program does not obligate the Company to repurchase any particular amount of common stock, and may be suspended or discontinued at any time without notice.

- (3) This balance represents the value of shares that can be repurchased under the Program.

Item 6. Selected Financial Data**Selected Financial Data(1)**

	2009	2008(2)	2007(3)	2006(4)(5)	2005(4)
	(Dollars in millions, except per share amounts)				
Statement of Income Data					
Sales	\$ 6,685.6	\$ 7,061.7	\$ 6,392.2	\$ 5,719.1	\$ 5,202.6
Income from continuing operations	576.3	691.6	516.5	491.6	251.9
Balance Sheet Data					
Total assets	\$ 8,741.4	\$ 7,482.9	\$ 7,534.0	\$ 6,901.2	\$ 6,454.0
Long-term debt and capital lease obligations	2,008.1	1,410.4	1,562.9	1,721.7	1,742.1
Per Share of Common Stock					
Income from continuing operations, Diluted	\$ 4.43	\$ 5.29	\$ 3.86	\$ 3.76	\$ 1.92
Net income, diluted	4.70	5.35	3.75	3.79	2.12
Cash dividends declared	1.02	0.925	0.825	0.80	0.80

- (1) Except as otherwise indicated, the historical amounts presented above have been reclassified to present our former Test Systems business (sold on April 19, 2005) and ATS business (sold on November 15, 2007) as discontinued operations.
- (2) In 2008, we recognized a net gain of approximately \$13 million in connection with the formation of a joint venture with Rolls-Royce Group plc. See Note 5, Other Income (Expense) Net, to our consolidated financial statements.
- (3) On December 27, 2007, we settled a claim with Northrop related to the Airbus A380 actuation systems development program resulting in a receipt of cash and an increase in operating income of \$18.5 million.
- (4) During 2005, we recognized share-based compensation of \$10.4 million related to stock options and shares issued under our employee stock purchase plan. Effective January 1, 2006, we began accelerating the recognition of share-based compensation expense for individuals who are either retirement eligible on the grant date or will become retirement eligible in advance of the normal vesting date. The incentive compensation cost recognized during 2006 related to this provision was approximately \$22 million.
- (5) During 2006, we recorded a benefit of approximately \$147 million, or \$1.15 per diluted share, primarily related to the Rohr and Coltec tax settlements.

OUR FORMER GOODRICH AVIATION TECHNICAL SERVICES, INC. (ATS) BUSINESS HAS BEEN ACCOUNTED FOR AS A DISCONTINUED OPERATION. UNLESS OTHERWISE NOTED HEREIN, DISCLOSURES PERTAIN ONLY TO OUR CONTINUING OPERATIONS.

OVERVIEW

We are one of the largest worldwide suppliers of aerospace components, systems and services to the commercial and general aviation airplane markets. We are also a leading supplier of systems and products to the global defense and space markets. Our business is conducted globally with manufacturing, service and sales undertaken in various locations throughout the world. Our products and services are principally sold to customers in North America, Europe and Asia.

Key Market Channels for Products and Services, Growth Drivers and Industry and our Highlights

We participate in three key market channels: commercial, regional, business and general aviation airplane original equipment (OE); commercial, regional, business and general aviation airplane aftermarket; and defense and space.

Commercial, Regional, Business and General Aviation Airplane OE

Commercial, regional, business and general aviation airplane OE includes sales of products and services for new airplanes produced by Airbus and Boeing, and regional, business and small airplane manufacturers.

The key growth drivers in this market channel include the number of orders for their airplanes, which will be delivered to the manufacturers' customers over a period of several years, OE manufacturer production and delivery rates for in-service airplanes such as the Airbus A320 and Boeing 737NG, and introductions of new airplane models such as the Boeing 787 and 747-8, and the Airbus A350 XWB, and engine types such as the Pratt and Whitney PurePower™ PW1000G. We continue to expect 787 deliveries to commence during the fourth quarter of 2010.

We have significant sales content on most of the airplanes manufactured in this market channel. Over the last few years, we have benefited from increased production rates and deliveries of Airbus and Boeing airplanes and from our substantial content on many of the regional and general aviation airplanes. Delivery of new commercial, regional, business, and general aviation aircraft in 2010 and beyond, however, may be negatively impacted by the current economic conditions which may influence customers' willingness and/or ability to purchase new aircraft.

Commercial, Regional, Business and General Aviation Airplane Aftermarket

The commercial, regional, business and general aviation airplane aftermarket channel includes sales of products and services for existing commercial and general aviation airplanes, primarily to airlines and package carriers around the world.

The key growth drivers in this channel include worldwide passenger capacity growth measured by Available Seat Miles (ASM) and the size, type and utilization levels of the worldwide airplane

Table of Contents

fleet. Other important factors affecting growth in this market channel are the age and types of the airplanes in the fleet, fuel prices, airline maintenance practices, Gross Domestic Product (GDP) trends in countries and regions around the world and domestic and international air freight activity.

Capacity in the global airline system, as measured by ASMs, is expected to grow slightly in 2010. ASM expectations could be adversely affected if airlines choose to fly their in-service airplanes less frequently, or temporarily ground airplanes due to decreased demand, high fuel prices and other factors including the downturn of the global economy.

While we have significant product content on most of the airplane models that are currently in service, we enjoy the benefit of having excellent positions on the newer, more fuel-efficient airplanes currently in service. Even though many airlines have announced that they will remove some of their older airplanes, such as Boeing MD-80 and 737 Classic airplanes, from their fleets, we do not expect these removals to have a significant impact on our results in 2010.

Defense and Space

Worldwide defense and space sales include sales to prime contractors such as Boeing, Northrop Grumman, Lockheed Martin, the U.S. Government and foreign companies and governments.

The key growth drivers in this channel include the level of defense spending by the U.S. and foreign governments, the number of new platform starts, the level of military flight operations, the level of upgrade, overhaul and maintenance activities associated with existing platforms and demand for optical surveillance and reconnaissance systems.

The market for our defense and space products is global, and is not dependent on any single program, platform or customer. We anticipate fewer new fighter and transport aircraft platform starts over the next several years. We also anticipate that the introduction of the F-35 Lightning II and new helicopter platforms, along with upgrades on existing defense and space platforms, will provide long-term growth opportunities in this market channel. Additionally, we are participating in, and developing new products for, the rapidly expanding homeland security and intelligence, surveillance and reconnaissance sectors, which should further strengthen our position in this market channel.

Long-term Sustainable Growth

We believe that we are well positioned to grow our sales, through organic growth and acquisitions, over the long-term due to:

- Awards for key products on important new and expected programs, including the Airbus A350 XWB, the Boeing 787 and 747-8, the Pratt & Whitney PurePower™ PW1000G and the Lockheed Martin F-35 Lightning II;

- The large installed base of commercial airplanes and our strong positions on newer, more fuel-efficient airplanes, which should fuel sustained long-term aftermarket strength;

- Balance in the large commercial airplane market, with strong sales to both Airbus and Boeing;

- Aging of the existing large commercial and regional airplane fleets, which should result in increased aftermarket support;

- Increased number of long-term agreements for product and service sales on new and existing commercial airplanes;

Increased opportunities for aftermarket growth due to airline outsourcing;

Table of Contents

Growth in global maintenance, repair and overhaul (MRO) opportunities for our systems and components, particularly in Europe, Asia and the Middle East, where we have expanded our capacity; and

Expansion of our product offerings in support of high growth areas in the defense and space market channel, such as helicopter products and systems and intelligence, surveillance and reconnaissance products.

Year Ended December 31, 2009 Sales Content by Market Channel

During 2009, approximately 95% of our sales were from our three key market channels described above. Following is a summary of the percentage of sales by market channel:

Airbus Commercial OE	17%
Boeing Commercial OE	10%
Regional, Business and General Aviation Airplane OE	6%
Total Large Commercial, Regional, Business and General Aviation Airplane OE	33%
Large Commercial Airplane Aftermarket	26%
Regional, Business and General Aviation Airplane Aftermarket	6%
Total Large Commercial, Regional, Business and General Aviation Airplane Aftermarket	32%
Total Defense and Space	30%
Other	5%
Total	100%

Table of Contents**Results of Operations Year Ended December 31, 2009 as Compared to the Year Ended December 31, 2008**

	2009	2008	Favorable/ (Unfavorable)	
			\$ Change	% Change
(Dollars in millions, except diluted EPS)				
Sales	\$ 6,685.6	\$ 7,061.7	\$ (376.1)	(5.3)
Segment operating income(1)	\$ 1,058.6	\$ 1,216.3	\$ (157.7)	(13.0)

Income from continuing operations	576.3	691.6	(115.3)	(16.7)
Income from discontinued operations	34.5	7.6	26.9	353.9
Consolidated net income	610.8	699.2	(88.4)	(12.6)
Net income attributable to noncontrolling interests	(13.5)	(18.0)	4.5	25.0
Net income attributable to Goodrich	\$ 597.3	\$ 681.2	\$ (83.9)	(12.3)
Effective tax rate	26.5%	29.8%		
Diluted EPS:				
Continuing operations	\$ 4.43	\$ 5.29	\$ (0.86)	(16.3)
Net income attributable to Goodrich	\$ 4.70	\$ 5.35	\$ (0.65)	(12.1)

(1) We measure each reporting segment's profit based upon operating income. Accordingly, we do not allocate net interest expense, other income (expense) net and income taxes to our reporting segments. The company-wide Enterprise Resource Planning (ERP) implementation costs that were not directly associated with a specific business were not allocated to the segments. For a reconciliation of total segment operating income to total operating income, see Note 3, Business Segment Information to our consolidated financial statements.

Sales

The sales decrease in 2009 as compared to 2008 was driven by changes in our major market channels as follows:

Large commercial airplane original equipment sales decreased by approximately 3%;

Regional, business and general aviation airplane original equipment sales decreased by approximately 31%; and

Large commercial, regional, business and general aviation airplane aftermarket sales decreased by approximately 16%; partially offset by

Defense and space sales of both original equipment and aftermarket products and services increased by approximately 10%.

Table of Contents**Segment operating income**

See discussion in the Business Segment Performance section.

Corporate general and administrative costs

Corporate general and administrative costs increased primarily due to unfavorable foreign exchange and higher share-based compensation, as discussed below, partially offset by reductions in discretionary spending.

Net interest expense

Net interest expense increased primarily as a result of higher net borrowings partially offset by favorable interest rates.

Other income (expense) net

Other income (expense) net increased for 2009 as compared to 2008, primarily as a result of:

A net gain of approximately \$13 million recognized in 2008 in connection with the formation of a joint venture (JV) with Rolls-Royce that was formed in 2008 (see Note 5, Other Income and Expense of our consolidated financial statements); and

Lower income of approximately \$6 million from equity in affiliated companies; partially offset by

Lower legal and environmental expenses related to previously owned businesses of approximately \$5 million.

Income from continuing operations

In addition to the items described above, income from continuing operations during 2009 as compared to 2008 was also affected by the following items:

	Increase (Decrease)		
	Before	After	Diluted
	Tax	Tax	EPS
	(Dollars in millions, except diluted EPS)		
Lower effective tax rate	\$	\$ 25.5	\$ 0.20
Higher pension expense	\$ (102.0)	\$ (63.9)	\$ (0.51)
Changes in estimates on long-term contracts	\$ (66.8)	\$ (41.8)	\$ (0.33)
Higher share-based compensation	\$ (30.3)	\$ (19.3)	\$ (0.16)
Foreign exchange, including net monetary asset remeasurement	\$ (22.3)	\$ (13.9)	\$ (0.10)
Higher restructuring costs	\$ (19.5)	\$ (12.2)	\$ (0.10)

Lower effective tax rate

For 2009, we reported an effective tax rate of 26.5% as compared to 29.8% for 2008. The decrease in the effective tax rate was primarily due to reductions in estimated state tax obligations and foreign and domestic tax credits. See Note 15, *Income Taxes* to our consolidated financial statements.

Table of Contents

Higher pension expense

The increase in pension expense was primarily due to the investment losses of our plan assets in 2008 partially offset by the effect of a higher discount rate.

Changes in estimates on long-term contracts

During 2009 and 2008, we revised estimates on certain of our long-term contracts, primarily in our aerostructures and aircraft wheels and brakes businesses, resulting in lower income of approximately \$67 million compared to 2008. These revisions were primarily related to favorable cost and operational performance, changes in volume expectations and to some extent, sales pricing improvements on follow-on contracts.

Higher share-based compensation

The increase in share-based compensation was primarily due to the impact of the favorable change in our share price, which increased by 74%, for our Performance Units and Outside Director Phantom Share plans, resulting in higher expense of approximately \$30 million.

Foreign exchange

The net unfavorable foreign exchange was due to the following:

Approximately \$89 million of lower net gains on cash flow hedges settled during 2009, partially offset by approximately \$76 million of favorable foreign currency translation of net costs in currencies other than the U.S. Dollar; and

Approximately \$54 million of decreased net transaction gains relating to re-measuring monetary assets/liabilities into the local functional currency, partially offset by approximately \$45 million of higher net gains on forward contracts we entered into to offset the impact of net monetary asset gains/losses.

Higher restructuring costs

The increase in restructuring costs was primarily due to severance costs during 2009. See Note 4, Restructuring to our consolidated financial statements.

Income from discontinued operations

Income from discontinued operations increased primarily due to the favorable resolution of an insurance claim related to a past environmental matter in 2009 partially offset by a gain on the sale of a previously discontinued business in 2008 that did not recur in 2009.

Table of Contents**Results of Operations Year Ended December 31, 2008 as Compared to the Year Ended December 31, 2007**

	2008	2007	Favorable/ (Unfavorable)	
			\$ Change	% Change
	(Dollars in millions, except diluted EPS)			
Sales	\$ 7,061.7	\$ 6,392.2	\$ 669.5	10.5
Segment operating income(1)	\$ 1,216.3	\$ 1,026.6	\$ 189.7	18.5
Corporate general and administrative costs	(115.4)	(145.3)	29.9	20.6
Total operating income	1,100.9	881.3	219.6	24.9
Net interest expense	(106.7)	(115.7)	9.0	7.8
Other income (expense) net	(9.6)	(28.2)	18.6	66.0
Income from continuing operations before income taxes	984.6	737.4	247.2	33.5
Income tax expense	(293.0)	(220.9)	(72.1)	(32.6)
Income from continuing operations	691.6	516.5	175.1	33.9
Income (loss) from discontinued operations	7.6	(13.4)	21.0	156.7
Consolidated net income	699.2	503.1	196.1	39.0
Net income attributable to noncontrolling interests	(18.0)	(20.5)	2.5	12.2
Net income attributable to Goodrich	\$ 681.2	\$ 482.6	\$ 198.6	41.2
Effective tax rate	29.8%	30.0%		
Diluted EPS:				
Continuing operations	\$ 5.29	\$ 3.86	\$ 1.43	37.0
Net income attributable to Goodrich	\$ 5.35	\$ 3.75	\$ 1.60	42.7

(1) We measure each reporting segment's profit based upon operating income. Accordingly, we do not allocate net interest expense, other income (expense) net and income taxes to our reporting segments. The company-wide Enterprise Resource Planning (ERP) implementation costs that were not directly associated with a specific business were not allocated to the segments. For a reconciliation of total segment operating income to total operating income, see Note 3, Business Segment Information to our consolidated financial statements.

Sales

Our 2008 sales and income performance was driven primarily by growth in each of our major market channels as follows:

Edgar Filing: GOODRICH CORP - Form 10-K

Large commercial airplane original equipment sales increased by approximately 7%;

Regional, business and general aviation airplane original equipment sales increased by approximately 23%;

Large commercial, regional, business and general aviation airplane aftermarket sales increased by approximately 9%; and

Defense and space sales of both original equipment and aftermarket products and services increased by approximately 11%.

Table of Contents**Segment operating income**

See discussion in the Business Segment Performance section.

Corporate general and administrative costs

Corporate general and administrative costs decreased for 2008 as compared to 2007 primarily due to lower share-based compensation expense as discussed below and lower non-qualified pension expense due to a favorable discount rate in 2008 compared to 2007.

Net interest expense

Net interest expense decreased for 2008 as compared to 2007 primarily due to lower debt levels in 2008 as a result of the repayment of \$162 million of notes which matured in the second quarter of 2008.

Other income (expense) net

Other income (expense) net decreased for 2008 as compared to 2007, primarily as a result of:

A net gain of approximately \$13 million recognized in connection with the formation of a joint venture (see Note 5, Other Income (Expense) Net of our consolidated financial statements); and

Increased income of approximately \$7 million from equity in affiliated companies.

Income from continuing operations

In addition to the items described above, income from continuing operations during 2008 as compared to 2007 was also affected by the following items:

	Increase (Decrease)		
	Before	After	Diluted
	Tax	Tax	EPS
	(Dollars in millions, except diluted EPS)		
Changes in estimates on long-term contracts	\$ 35.8	\$ 22.1	\$ 0.18
Lower share-based compensation	\$ 33.6	\$ 20.4	\$ 0.15
Settlement of claims	\$ (40.1)	\$ (24.5)	\$ (0.19)
Foreign exchange rate impact, including net monetary asset remeasurement	\$ (21.1)	\$ (12.9)	\$ (0.10)

Changes in estimates on long-term contracts

During 2008 and 2007, we revised our estimates on certain of our long-term contracts, primarily in our aerostructures and aircraft wheels and brakes business units, resulting in higher income of approximately \$36 million compared to 2007. These changes were primarily due to favorable cost and operational performance.

Share-based compensation

The decrease in share-based compensation expense was primarily due to the following:

The impact of the unfavorable change in our share price, which declined by 48%, resulting in lower expense of approximately \$43 million; and

Table of Contents

Approximately \$8 million of costs in 2007 related to the 2007 special stock options (see Note 7, Share-Based Compensation, to our consolidated financial statements); partially offset by

Approximately \$17 million of additional costs for retirement eligible individuals in 2008 resulting from a change in vesting requirements.

Settlement of claims

During 2007, we settled certain claims with a customer and a claim with Northrop Grumman Corporation (Northrop), that did not recur in 2008, which resulted in operating income of approximately \$40 million.

Foreign exchange rate impact

The net unfavorable foreign exchange impact was due to the following:

Approximately \$37 million of lower net gains on cash flow hedges settled during 2008, partially offset by approximately \$7 million of favorable foreign currency translation of net costs in currencies other than the U.S. Dollar; partially offset by

Approximately \$53 million of increased net transaction gains relating to re-measuring monetary assets/liabilities into the local functional currency, partially offset by approximately \$43 million of higher net losses on forward contracts we entered into to offset the impact of net monetary asset gains/losses.

Income (loss) from discontinued operations

The income from discontinued operations for 2008 included a gain from the sale of a previously discontinued business of approximately \$6 million. The loss from discontinued operations in 2007 included the loss on the sale of ATS of approximately \$15 million.

2010 Outlook

We expect the following approximate results for the year ending December 31, 2010:

	2010 Outlook	2009 Actual
Sales	\$7.1 billion	\$6.7 billion
Diluted EPS Net Income	\$4.15 to \$4.40 per share	\$4.70 per share
Capital Expenditures	\$250 million to \$275 million	\$169 million
Operating Cash Flow minus Capital Expenditures	Exceed 85% of net income attributable to Goodrich	87% of net income from continuing operations attributable to Goodrich

Our 2010 outlook assumes, among other factors:

Pension expense is expected to remain approximately unchanged from 2009. During 2009, we achieved a return on U.S. plan assets of approximately 11 percent. We will use a discount rate of approximately 5.9 percent for our U.S. plans in 2010.

A full year 2010 effective tax rate of 29% to 30%, reducing income per diluted share by about \$0.19, compared to 2009. The 2010 effective tax rate includes a full-year benefit of approximately 1.5% related to an assumed extension of the U.S. research tax credit.

Table of Contents

Sales

Our current market assumptions, for each of our major market channels, for the full year 2010 outlook, compared to the full year 2009, include the following:

Large commercial airplane original equipment sales are expected to increase by about 5 percent. This outlook assumes that current narrowbody production rates are maintained at least through early 2011, and that Boeing 787 deliveries begin in late 2010. Additionally, part of the expected growth in sales is related to the 2008 Boeing strike, which adversely impacted first quarter 2009 sales, but will not impact 2010 sales;

Regional, business and general aviation airplane original equipment sales are expected to decrease by more than 10 percent;

Large commercial, regional, business and general aviation airplane aftermarket sales are expected to increase by about 4 to 7 percent. This outlook assumes that worldwide ASMs increase in the range of 1 to 3 percent in 2010. We expect year-over-year sales growth beginning towards the middle of 2010; and

Defense and space sales of both original equipment and aftermarket products and services are expected to increase by about 15 percent, including sales generated by Atlantic Inertial Systems (AIS), which we acquired in December 2009.

Cash Flow

We expect net cash provided by operating activities, minus capital expenditures, to exceed 85 percent of net income. This outlook reflects ongoing investments to support the current schedule for the Boeing 787 and Airbus A350 XWB airplane programs, and low-cost country manufacturing and productivity initiatives that are expected to enhance margins over the near and long term. We expect capital expenditures for 2010 to be in a range of \$250 million to \$275 million and worldwide pension plan contributions are expected to be \$100 million to \$150 million.

BUSINESS SEGMENT PERFORMANCE

Our three business segments are as follows:

The Actuation and Landing Systems segment provides systems, components and related services pertaining to aircraft taxi, take-off, flight control, landing and stopping, and engine components, including fuel delivery systems and rotating assemblies.

The Nacelles and Interior Systems segment produces products and provides maintenance, repair and overhaul services associated with aircraft engines, including thrust reversers, cowlings, nozzles and their components, and aircraft interior products, including slides, seats, cargo and lighting systems.

The Electronic Systems segment produces a broad array of systems and components that provide flight performance measurements, flight management information, engine controls, fuel controls, electrical power systems, safety data, and reconnaissance and surveillance systems.

We measure each reporting segment's profit based upon operating income. Accordingly, we do not allocate net interest expense, other income (expense) net and income taxes to the reporting segments. The company-wide ERP implementation costs that were not directly associated with a specific business were not allocated to the segments. The

accounting policies of the reportable segments are the same as those for our consolidated financial statements. For a reconciliation of total segment operating income to total operating income, see Note 3, Business Segment Information to our consolidated financial statements.

Table of Contents**Year Ended December 31, 2009 Compared with the Year Ended December 31, 2008**

	Year Ended December 31,		\$ Change	% Change	% Sales	
	2009	2008			2009	2008
	(Dollars in millions)

Actuation and Landing Systems	\$ 2,524.3	\$ 2,614.9	\$ (90.6)	(3.5)		
Nacelles and Interior Systems	2,322.6	2,485.6	(163.0)	(6.6)		
Electronic Systems	1,838.7	1,961.2	(122.5)	(6.2)		
Total Sales	\$ 6,685.6	\$ 7,061.7	\$ (376.1)	(5.3)		
SEGMENT OPERATING INCOME						
Actuation and Landing Systems	\$ 266.9	\$ 300.0	\$ (33.1)	(11.0)	10.6	11.5
Nacelles and Interior Systems	515.3	647.5	(132.2)	(20.4)	22.2	26.1
Electronic Systems	276.4	268.8	7.6	2.8	15.0	13.7
Segment Operating Income	\$ 1,058.6	\$ 1,216.3	\$ (157.7)	(13.0)	15.8	17.2

Actuation and Landing Systems: Actuation and Landing Systems segment sales for 2009 decreased from 2008 primarily due to the following:

Lower large commercial, regional, business and general aviation airplane aftermarket sales across all businesses of approximately \$107 million;

Lower regional, business and general aviation airplane OE sales across all businesses of approximately \$42 million; and

Lower other non-aerospace sales of approximately \$24 million, primarily in our engine components business; partially offset by

Higher defense and space OE and aftermarket sales across all businesses of approximately \$45 million; and

Higher large commercial airplane OE sales of approximately \$42 million, primarily in our landing gear and actuation systems businesses.

Actuation and Landing Systems segment operating income for 2009 decreased from 2008 primarily as a result of the following:

Lower sales volume and unfavorable product mix across most businesses resulting in lower income of approximately \$55 million;

Higher pension and restructuring costs across most businesses, which resulted in lower income of approximately \$39 million;

Lower income of approximately \$30 million related to changes in estimates for certain long-term contracts in our wheels and brakes business that were more favorable in 2008; and

Unfavorable foreign exchange of approximately \$9 million; partially offset by

Favorable pricing and reduced operating costs across most businesses, which resulted in higher income of approximately \$100 million.

Table of Contents

Nacelles and Interior Systems: Nacelles and Interior Systems segment sales for 2009 decreased from 2008 primarily due to the following:

Lower large commercial, regional, business and general aviation airplane aftermarket sales of approximately \$192 million, primarily in our aerostructures and interiors businesses; and

Lower regional, business, and general aviation airplane OE sales of approximately \$52 million, primarily in our aerostructures business; partially offset by

Higher large commercial airplane OE sales of approximately \$66 million, primarily in our aerostructures and interiors businesses; and

Higher defense and space OE and aftermarket sales of approximately \$21 million, primarily in our aerostructures and interiors businesses.

Nacelles and Interior Systems segment operating income for 2009 decreased from 2008 primarily due to the following:

Lower sales volume partially offset by favorable product mix, primarily in our interiors and aerostructures businesses, which resulted in lower income of approximately \$144 million;

Higher pension and restructuring costs across most businesses, which resulted in lower income of approximately \$55 million; and

Lower income of approximately \$35 million related to changes in estimates for certain long-term contracts in our aerostructures business that were more favorable in 2008; partially offset by

Favorable pricing and reduced operating costs across all businesses, which resulted in higher income of approximately \$95 million; and

Favorable foreign exchange of approximately \$7 million.

Electronic Systems: Electronic Systems segment sales for 2009 decreased from 2008 primarily due to the following:

Lower engine controls sales of approximately \$125 million which are no longer being reported by us. Sales in 2009 are recorded by the JV that was formed in the fourth quarter of 2008;

Lower large commercial, regional, business and general aviation airplane aftermarket sales primarily in our sensors and integrated systems and engine controls and electrical power businesses of approximately \$75 million; and

Lower regional, business and general aviation airplane OE sales of approximately \$76 million, primarily in our sensors and integrated systems and engine controls and electrical power businesses; partially offset by

Higher defense and space OE and aftermarket sales of approximately \$146 million, primarily in our sensors and integrated systems and intelligence, surveillance and reconnaissance systems businesses, including sales of approximately \$48 million associated with the acquisitions of Recon/Optical, Inc. (ROI) which occurred during the third quarter of 2008 and Cloud Cap Technology, Inc. (Cloud Cap) and AIS which occurred during 2009.

Table of Contents

Electronic Systems segment operating income for 2009 increased from 2008 primarily due to the following:

The favorable effect of the JV on the segment's operating income of approximately \$19 million. We recorded our portion of the JV's 2009 operating results in other income (expense) net; and

Favorable pricing and reduced operating costs across most businesses, which resulted in higher income of approximately \$53 million; partially offset by

Lower sales volume, primarily in our sensors and integrated systems and engine controls and electrical power businesses, and unfavorable product mix, primarily in our sensors and integrated systems business, which resulted in lower income of approximately \$42 million; and

Higher pension and restructuring costs across most businesses, which resulted in lower income of approximately \$23 million.

Year Ended December 31, 2008 Compared with the Year Ended December 31, 2007

	Year Ended December 31,		\$	%	% Sales	
	2008	2007			Change	Change
	(Dollars in millions)					
NET CUSTOMER SALES						
Actuation and Landing Systems	\$ 2,614.9	\$ 2,400.6	\$ 214.3	8.9		
Nacelles and Interior Systems	2,485.6	2,169.0	316.6	14.6		
Electronic Systems	1,961.2	1,822.6	138.6	7.6		
Total Sales	\$ 7,061.7	\$ 6,392.2	\$ 669.5	10.5		
SEGMENT OPERATING INCOME						
Actuation and Landing Systems	\$ 300.0	\$ 247.8	\$ 52.2	21.1	11.5	10.3
Nacelles and Interior Systems	647.5	531.0	116.5	21.9	26.1	24.5
Electronic Systems	268.8	247.8	21.0	8.5	13.7	13.6
Segment Operating Income	\$ 1,216.3	\$ 1,026.6	\$ 189.7	18.5	17.2	16.1

Actuation and Landing Systems: Actuation and Landing Systems segment sales for 2008 increased from 2007 primarily due to the following:

Higher large commercial, regional, business and general aviation airplane aftermarket sales of approximately \$66 million across all businesses;

Higher defense and space OE and aftermarket sales of approximately \$44 million, primarily in our landing gear, aircraft wheels and brakes and actuation systems businesses;

Higher other aerospace and non-aerospace sales of approximately \$43 million, primarily in our engine components and actuation systems businesses;

Higher regional, business and general aviation airplane OE sales of approximately \$40 million, primarily in our landing gear, engine components and actuation systems businesses; and

Higher large commercial airplane OE sales of approximately \$21 million, primarily in our actuation systems business. In our landing gear business unit, increased sales to Airbus were offset by decreased sales to Boeing, due primarily to the Boeing labor dispute in 2008.

Table of Contents

Actuation and Landing Systems segment operating income for 2008 increased from 2007 primarily as a result of the following:

Higher sales volume and favorable product mix, net of the impact of the Boeing labor dispute, which resulted in higher income of approximately \$57 million;

Higher pricing net of increased operating costs across all businesses, which resulted in higher income of approximately \$29 million; and

Higher income resulting from changes in estimates on certain long-term contracts in our aircraft wheels and brakes business of approximately \$11 million, primarily due to favorable operational performance; partially offset by

Settlement of certain claims with a customer and a claim with Northrop Grumman of approximately \$31 million in 2007 which did not recur in 2008; and

Unfavorable foreign exchange of approximately \$14 million.

Nacelles and Interior Systems: Nacelles and Interior Systems segment sales for 2008 increased from 2007 primarily due to the following:

Higher large commercial airplane aftermarket sales, including spare parts and MRO volume, of approximately \$118 million, primarily in our aerostructures business;

Higher large commercial airplane OE sales of approximately \$88 million, primarily in our aerostructures and interiors businesses;

Higher defense and space OE and aftermarket sales of approximately \$61 million, primarily in our aerostructures and interiors businesses; and

Higher regional, business, and general aviation airplane OE sales, primarily in our aerostructures and interiors businesses, of approximately \$47 million.

Nacelles and Interior Systems segment operating income for 2008 increased from 2007 primarily due to the following:

Increased sales volume and favorable product mix, primarily in our aerostructures and interiors businesses, which resulted in increased income of approximately \$118 million; and

Higher income resulting from changes in estimates for certain long-term contracts at our aerostructures business of approximately \$21 million; partially offset by

Higher costs of approximately \$15 million, primarily related to research and development and selling, general and administrative expenses in our aerostructures and interiors businesses;

Settlement of a customer claim in 2007 of approximately \$7 million that did not recur in 2008; and

Unfavorable foreign exchange of approximately \$6 million.

Electronic Systems: Electronic Systems segment sales for 2008 increased from 2007 primarily due to the following:

Higher defense and space OE and aftermarket sales of approximately \$65 million, primarily in our intelligence, surveillance and reconnaissance and sensors and integrated systems businesses, including sales associated with the acquisitions of TEAC Aerospace Holdings, Inc. (TEAC) and ROI of approximately \$24 million;

Higher large commercial airplane aftermarket sales of approximately \$35 million, primarily in our sensors and integrated systems and engine control and electrical power systems

Table of Contents

businesses, including sales associated with the acquisition of TEAC of approximately \$13 million;

Higher regional, business and general aviation airplane OE sales of approximately \$25 million, primarily in our sensors and integrated systems and engine control and electrical power systems businesses;

Higher large commercial OE sales of approximately \$10 million, primarily in our engine control and electrical power systems businesses; and

Higher non-aerospace sales of approximately \$10 million, primarily in our sensors and integrated systems and engine control and electrical power systems businesses.

Electronic Systems segment operating income for 2008 increased from 2007 primarily due to the following:

Higher sales volume, net of an unfavorable product mix across most businesses, resulting in higher income of approximately \$62 million; partially offset by

Higher operating costs of approximately \$34 million across all businesses primarily selling, general and administrative expenses; and

Unfavorable foreign exchange of approximately \$7 million.

INTERNATIONAL OPERATIONS

We are engaged in business worldwide. Our significant international manufacturing and service facilities are located in Australia, Canada, China, England, France, Germany, India, Indonesia, Northern Ireland, Mexico, Poland, Scotland, Singapore and the United Arab Emirates. We market our products and services through sales subsidiaries and distributors in various countries. We also have international joint venture agreements.

Currency fluctuations, tariffs and similar import limitations, price controls and labor regulations can affect our foreign operations, including foreign affiliates. Other potential limitations on our foreign operations include expropriation, nationalization, restrictions on foreign investments or their transfers and additional political and economic risks. In addition, the transfer of funds from foreign operations could be impaired by the unavailability of dollar exchange or other restrictive regulations that foreign governments could enact.

Sales to non-U.S. customers were \$3,387 million or 51% of total sales, \$3,541 million or 50% of total sales and \$3,147 million or 49% of total sales for 2009, 2008 and 2007, respectively.

LIQUIDITY AND CAPITAL RESOURCES

We currently expect to fund expenditures for capital requirements and other liquidity needs from a combination of cash, internally generated funds and financing arrangements. We believe that our internal liquidity, together with access to external capital resources, will be sufficient to satisfy existing plans and commitments, including our stock repurchase program, and also provide adequate financial flexibility due to our strong balance sheet, lack of any large near-term funding requirements and a strong banking group with a multi-year committed credit facility.

The following events affected our liquidity and capital resources during 2009:

We paid quarterly dividends of \$0.25 per share on January 2, April 1, July 1 and October 1;

On February 19, 2009, we issued \$300 million in senior notes which mature on March 1, 2019. We used a portion of the proceeds to repay \$120 million of 6.6% senior notes which matured May 15, 2009 and to make a \$137 million contribution to our U.S. defined benefit pension plan;

Table of Contents

On May 1, 2009, we completed the acquisition of Cloud Cap, a leading provider of proprietary avionics products for small, unmanned aerial vehicles and sensors for manned vehicles, for \$29.2 million in cash, net of cash acquired. Cloud Cap is reported in the Electronics Systems segment;

On December 8, 2009, we issued \$300 million in senior notes which mature on March 1, 2020. We used the net proceeds to complete the acquisition discussed below and for other general corporate purposes including defined benefit pension plan contributions;

On December 21, 2009, we completed the acquisition of AIS, a leading provider of mission-critical guidance, stabilization and navigation products and systems for the military and defense market, for \$362 million, net of cash acquired. AIS is reported in the Electronics Systems segment;

On October 13, 2009, our Board of Directors declared a quarterly dividend of \$0.27 per share of common stock, payable January 4, 2010, to shareholders of record on December 1, 2009. This dividend declaration represents an 8% increase over the previous quarterly dividend of \$0.25 per share of common stock; and

During 2009, we repurchased 0.3 million shares for approximately \$16 million under our share repurchase program.

Cash

At December 31, 2009, we had cash and cash equivalents of \$811 million, as compared to \$370.3 million at December 31, 2008.

Credit Facilities

We have the following amounts available under our credit facilities:

\$500 million committed global revolving credit facility that expires in May 2012, of which \$432 million was available at December 31, 2009; and

\$75 million of uncommitted domestic money market facilities and \$161.8 million of uncommitted and committed foreign working capital facilities with various banks to meet short-term borrowing requirements, of which \$158.4 million was available at December 31, 2009.

Long-Term Financing

At December 31, 2009, we had long-term debt and capital lease obligations, including current maturities, of \$2,008.6 million with maturities ranging from 2010 to 2046. Maturities of long-term debt and capital lease obligations occurring in the next two years include \$1.1 million maturing in 2010 and \$0.9 million maturing in 2011. We also maintain a shelf registration statement that allows us to issue debt securities, series preferred stock, common stock, stock purchase contracts and stock purchase units.

Off-Balance Sheet Arrangements

Lease Commitments

We lease certain of our office and manufacturing facilities, machinery and equipment and corporate aircraft under various committed lease arrangements provided by financial institutions. Future minimum lease payments under operating leases were \$174.9 million at December 31, 2009.

One of these arrangements allows us, rather than the lessor, to claim a deduction for tax depreciation on the asset and allows us to lease a corporate aircraft with a total commitment

Table of Contents

amount of \$43.8 million. For accounting purposes, we were deemed to be the owner of the aircraft during the construction period and recorded an asset with an offsetting lease obligation of approximately \$32 million. This lease will qualify for sales-leaseback treatment upon lease commencement in 2011 and will be priced at a spread over LIBOR.

Derivatives

We utilize certain derivative financial instruments to enhance our ability to manage risk, including foreign currency and interest rate exposures that exist as part of ongoing business operations as follows:

Foreign Currency Contracts Designated as Cash Flow Hedges: At December 31, 2009, our contracts had a notional amount of \$1,827.4 million, fair value of a \$54.2 million net asset and maturity dates ranging from January 2010 to December 2014. The amount of accumulated other comprehensive income that would be reclassified into earnings in the next 12 months will be a gain of \$1.9 million. During 2009, 2008 and 2007 we realized net losses of \$51.1 million, net gains of \$38.4 million, and net gains of \$75.6 million respectively, related to contracts that settled.

Foreign Currency Contracts not Designated as Hedges: At December 31, 2009, our contracts had a notional amount of \$57.9 million and a fair value net liability of \$2.5 million. At December 31, 2008, there were no such contracts outstanding. During 2009 and 2008, we realized net gains of \$9.8 million and net losses of \$34.8 million, respectively, for contracts entered into and settled during those periods.

Estimates of the fair value of our derivative financial instruments represent our best estimates based on our valuation models, which incorporate industry data and trends and relevant market rates and transactions. Counterparties to these financial instruments expose us to credit loss in the event of nonperformance; however, we do not expect any of the counterparties to fail to meet their obligations. Counterparties, in most cases, are large commercial banks that also provide us with our committed credit facilities. To manage this credit risk, we select counterparties based on credit ratings, limit our exposure to any single counterparty and monitor our market position with each counterparty.

Table of Contents**Contractual Obligations and Other Commercial Commitments**

The following table reflects our contractual obligations and commercial commitments as of December 31, 2009. Commercial commitments include lines of credit, guarantees and other potential cash outflows resulting from a contingent event that requires performance by us pursuant to a funding commitment.

	Total	2010	2011-2012	2013-2014	Thereafter
	(Dollars in millions)				
Contractual Obligations					
Payments Due by Period					
Short-Term and Long-Term Debt	\$ 2,005.0	\$ 3.1	\$ 261.5	\$	\$ 1,740.4
Capital Lease Obligations	10.5	1.1	1.7	1.6	6.1
Operating Leases	174.9	38.6	52.2	32.1	52.0
Purchase Obligations(1)	933.7	839.1	92.7	1.9	
Other Long-Term Obligations(2)	133.2	18.7	20.7	2.5	91.3
Total	\$ 3,257.3	\$ 900.6	\$ 428.8	\$ 38.1	\$ 1,889.8
Other Commercial Commitments					
Amount of Commitments that Expire per Period					
Lines of Credit(3)	\$	\$	\$	\$	\$
Standby Letters of Credit & Bank Guarantees	95.8	87.2	7.9	0.5	0.2
Guarantees	34.1	10.6	9.3	9.6	4.6
Standby Repurchase Obligations					
Other Commercial Commitments	8.6	4.2	3.4	1.0	
Total	\$ 138.5	\$ 102.0	\$ 20.6	\$ 11.1	\$ 4.8

- (1) Purchase obligations include an estimated amount of agreements to purchase goods or services that are enforceable and legally binding on us and that specify all significant terms, including fixed or minimum quantities to be purchased, minimum or variable price provisions and the approximate timing of the purchase.
- (2) Includes participation payments of approximately \$103 million for aircraft component delivery programs which are to be paid over the next nine years.
- (3) As of December 31, 2009, we had in place a committed syndicated revolving credit facility which expires in May 2012 and permits borrowing up to a maximum of \$500 million; \$75 million of uncommitted domestic money market facilities; and \$161.8 million of uncommitted and committed foreign working capital facilities. As of December 31, 2009, we had borrowing capacity under our committed syndicated revolving credit facility of \$432 million.

The table excludes our pension and other postretirement benefits obligations. Worldwide pension contributions were \$237.5 million and \$227.2 million in 2009 and 2008, respectively. These contributions include both voluntary and required employer contributions, as well as pension benefits paid directly by us. Of these amounts, \$182 million and

\$170 million were contributed to the qualified U.S. pension plan in 2009 and 2008, respectively. We expect to make pension contributions of \$100 million to \$150 million to our worldwide pension plans during 2010. Our postretirement benefits other than pensions are not required to be funded in advance, so benefit payments, including medical costs and life insurance, are paid as they are incurred. We made postretirement benefit payments other than pension, net of the Medicare Part D subsidy, of approximately \$34 million and \$27 million in 2009 and 2008, respectively. We expect to make net payments of approximately \$31 million during 2010. See Note 14, Pensions

Table of Contents

and Postretirement Benefits of our consolidated financial statements for a further discussion of our pension and postretirement other than pension plans.

The table also excludes our liability for unrecognized tax benefits of \$286.6 million as of December 31, 2009, since we cannot predict with reasonable reliability the timing of cash settlements to the respective taxing authorities.

CASH FLOW

The following table summarizes our cash flow activity for 2009, 2008 and 2007:

Net Cash Provided by (Used in):	Year Ended December 31,		
	2009	2008	2007
	(Dollars in millions)		
Operating activities of continuing operations	\$ 656.5	\$ 786.6	\$ 593.7
Investing activities of continuing operations	\$ (561.8)	\$ (410.0)	\$ (279.3)
Financing activities of continuing operations	\$ 304.6	\$ (414.4)	\$ (202.5)
Discontinued operations	\$ 34.1	\$ 13.1	\$ 90.1

Year Ended December 31, 2009 as Compared to December 31, 2008***Operating Activities of Continuing Operations***

The decrease in net cash provided by operating activities for 2009 compared to 2008 is primarily due to the following:

During 2008, we received \$115 million from Rolls-Royce related to the formation of the JV; and

Lower income from continuing operations and higher spending on non-product inventory partially offset by lower growth in working capital; partially offset by

Lower net tax payments of approximately \$73 million.

Investing Activities of Continuing Operations

Net cash used by investing activities for 2009 and 2008 included capital expenditures of \$169 million and \$284.7 million, respectively. We completed the following acquisitions during 2009:

Cloud Cap for \$29.2 million, net of cash acquired; and

AIS for \$362.2 million, net of cash acquired.

Financing Activities of Continuing Operations

The increase in net cash provided by financing activities for 2009 compared to 2008 consisted primarily of the following:

\$597 million in net proceeds from the issuance of senior notes; and

Lower purchases of our common stock in connection with our share repurchase program of approximately \$115 million.

Table of Contents

The Company's share repurchase program was initially approved by the Board of Directors on October 24, 2006 and increased by the Board of Directors on February 19, 2008, for \$600 million in total. The primary purpose of the program is to reduce dilution to existing shareholders from our share-based compensation plans. Repurchases under the program may be made through open market or privately negotiated transactions at times and in such amounts as we deem appropriate, subject to market conditions, regulatory requirements and other factors. Our share repurchase program does not obligate us to repurchase any particular amount of common stock and no time limit was set for completion of the program. The program may be suspended or discontinued at any time without notice. As of December 31, 2009, we have purchased approximately 6.7 million shares for approximately \$370 million at an average price of \$55.62 per share.

Discontinued Operations

Net cash provided by discontinued operations for 2009 was primarily due to the resolution of an insurance claim related to a past environmental matter. Net cash provided by discontinued operations for 2008 primarily consisted of the finalization of the purchase price for ATS which was sold during 2007 and proceeds from the sale of a previously discontinued operation.

Year Ended December 31, 2008 as Compared to December 31, 2007

Operating Activities of Continuing Operations

The increase in net cash provided by operating activities for 2008 as compared to 2007 consisted primarily of the following:

Cash flow from higher pre-tax income of approximately \$250 million; and

Cash of \$115 million received in connection with the formation of a joint venture (see Note 5, Other Income (Expense) Net, to our consolidated financial statements); partially offset by

Higher worldwide pension plan contributions of approximately \$95 million.

Investing Activities of Continuing Operations

Net cash used by investing activities for 2008 and 2007 included capital expenditures of \$284.7 million and \$282.6 million, respectively. We completed the following acquisitions during 2008:

Skyline Industries, Inc. for \$9.5 million in cash;

TEAC for approximately \$84 million in cash, net of cash acquired; and

ROI for approximately \$38 million in cash.

Financing Activities of Continuing Operations

The increase in net cash used in financing activities for 2008 from 2007 consisted primarily of the following:

Long-term debt repayments of approximately \$197 million primarily in connection with the repayment of notes which matured in April 2008; and

A decrease of proceeds from the issuance of our common stock, primarily for stock compensation programs, of approximately \$71 million; partially offset by

Lower purchases of our common stock in connection with our share repurchase program of approximately \$76 million.

Table of Contents

Discontinued Operations

Net cash provided by discontinued operations of \$13.1 million for 2008, primarily consisted of the finalization of the purchase price for ATS and proceeds from the sale of a previously discontinued business. Net cash provided by discontinued operations of \$90.1 million for 2007, primarily consisted of the net cash proceeds realized on the sale of ATS.

CONTINGENCIES

General

There are various pending or threatened claims, lawsuits and administrative proceedings against us or our subsidiaries, arising in the ordinary course of business which seek remedies or damages. Although no assurance can be given with respect to the ultimate outcome of these matters, we believe that any liability that may finally be determined with respect to commercial and non-asbestos product liability claims should not have a material effect on our consolidated financial position, results of operations or cash flows. Legal costs are expensed when incurred.

Environmental

We are subject to environmental laws and regulations which may require that we investigate and remediate the effects of the release or disposal of materials at sites associated with past and present operations. At certain sites we have been identified as a potentially responsible party under the federal Superfund laws and comparable state laws. We are currently involved in the investigation and remediation of a number of sites under applicable laws.

Estimates of our environmental liabilities are based on current facts, laws, regulations and technology. These estimates take into consideration our prior experience and professional judgment of our environmental specialists. Estimates of our environmental liabilities are further subject to uncertainties regarding the nature and extent of site contamination, the range of remediation alternatives available, evolving remediation standards, imprecise engineering evaluations and cost estimates, the extent of corrective actions that may be required and the number and financial condition of other potentially responsible parties, as well as the extent of their responsibility for the remediation.

Accordingly, as investigation and remediation proceed, it is likely that adjustments in our accruals will be necessary to reflect new information. The amounts of any such adjustments could have a material adverse effect on our results of operations or cash flows in a given period. Based on currently available information, however, we do not believe that future environmental costs in excess of those accrued with respect to sites for which we have been identified as a potentially responsible party are likely to have a material adverse effect on our financial condition.

Environmental liabilities are recorded when the liability is probable and the costs are reasonably estimable, which generally is not later than at completion of a feasibility study or when we have recommended a remedy or have committed to an appropriate plan of action. The liabilities are reviewed periodically and, as investigation and remediation proceed, adjustments are made as necessary. Liabilities for losses from environmental remediation obligations do not consider the effects of inflation and anticipated expenditures are not discounted to their present value. The liabilities are not reduced by possible recoveries from insurance carriers or other third parties, but do reflect anticipated allocations among potentially responsible parties at federal Superfund sites or similar state-managed sites, third party indemnity obligations, and an assessment of the likelihood that such parties will fulfill their obligations at such sites.

Our consolidated balance sheet included an accrued liability for environmental remediation obligations of \$66.1 million and \$62.3 million at December 31, 2009 and 2008, respectively. At December 31, 2009 and 2008, \$11.3 million and \$20.9 million, respectively, of the accrued

Table of Contents

liability for environmental remediation were included in current liabilities as accrued expenses. At December 31, 2009 and 2008, \$25.3 million and \$24 million, respectively, was associated with ongoing operations and \$40.8 million and \$38.3 million, respectively, was associated with previously owned businesses.

We expect that we will expend present accruals over many years, and will generally complete remediation in less than 30 years at sites for which we have been identified as a potentially responsible party. This period includes operation and monitoring costs that are generally incurred over 15 to 25 years.

Certain states in the U.S. and countries globally are promulgating or proposing new or more demanding regulations or legislation impacting the use of various chemical substances by all companies. We are currently evaluating the potential impact, if any, of complying with such regulations and legislation.

During 2009, a judgment in our favor became final when the initial verdict was upheld on appeal. As a result, we received \$79.3 million from Commercial Union Insurance Company for reimbursement of environmental remediation costs, attorney fees and interest; however, we paid a portion of the insurance proceeds to a former subsidiary. See Note 6, *Discontinued Operations* to our consolidated financial statements.

Asbestos

We and some of our subsidiaries have been named as defendants in various actions by plaintiffs alleging damages as a result of exposure to asbestos fibers in products or at our facilities. A number of these cases involve maritime claims, which have been and are expected to continue to be administratively dismissed by the court. We believe that pending and reasonably anticipated future actions are not likely to have a material adverse effect on our financial condition, results of operations or cash flows. There can be no assurance, however, that future legislative or other developments will not have a material adverse effect on our results of operations or cash flows in a given period.

Insurance Coverage

We maintain a comprehensive portfolio of insurance policies, including aviation products liability insurance which covers most of our products. The aviation products liability insurance typically provides first dollar coverage for defense and indemnity of third party claims.

A portion of our historical primary and excess layers of pre-1986 insurance coverage for third party claims was provided by certain insurance carriers who are either insolvent, undergoing solvent schemes of arrangement or in run-off. We have entered into settlement agreements with a number of these insurers pursuant to which we agreed to give up our rights with respect to certain insurance policies in exchange for negotiated payments. These settlements represent negotiated payments for our loss of insurance coverage, as we no longer have this insurance available for claims that may have qualified for coverage. A portion of these settlements was recorded as income for reimbursement of past claim payments under the settled insurance policies and a portion was recorded as a deferred settlement credit for future claim payments.

At December 31, 2009 and 2008, the deferred settlement credit was \$45 million and \$49.4 million, respectively, for which \$6.1 million and \$6.4 million, respectively, was reported in accrued expenses and \$38.9 million and \$43 million, respectively, was reported in other non-current liabilities. The proceeds from such insurance settlements were reported as a component of net cash provided by operating activities in the period payments were received.

Table of Contents

Liabilities of Divested Businesses

Asbestos

In May 2002, we completed the tax-free spin-off of our Engineered Industrial Products (EIP) segment, which at the time of the spin-off included EnPro Industries, Inc. (EnPro) and Coltec Industries Inc (Coltec). At that time, two subsidiaries of Coltec were defendants in a significant number of personal injury claims relating to alleged asbestos-containing products sold by those subsidiaries prior to our ownership. It is possible that asbestos-related claims might be asserted against us on the theory that we have some responsibility for the asbestos-related liabilities of EnPro, Coltec or its subsidiaries. A limited number of asbestos-related claims have been asserted against us as successor to Coltec or one of its subsidiaries. We believe that we have substantial legal defenses against these and other such claims. In addition, the agreement between EnPro and us that was used to effectuate the spin-off provides us with an indemnification from EnPro covering, among other things, these liabilities. We believe that such claims would not have a material adverse effect on our financial condition, but could have a material adverse effect on our results of operations and cash flows in a particular period.

Other

In connection with the divestiture of our tire, vinyl and other businesses, we have received contractual rights of indemnification from third parties for environmental and other claims arising out of the divested businesses. Failure of these third parties to honor their indemnification obligations could have a material adverse effect on our financial condition, results of operations and cash flows.

Guarantees

At December 31, 2009, we had letters of credit and bank guarantees of \$95.8 million and residual value guarantees of lease obligations of \$27.3 million. See Note 12, Financing Arrangements and Note 16, Supplemental Balance Sheet Information to our consolidated financial statements. At December 31, 2009, we were a guarantor on a revolving credit agreement totaling £20 million between Rolls-Royce Goodrich Engine Control Systems Limited (JV) and a financial institution. In addition, we guarantee the JV's foreign exchange credit line and we are indemnified by Rolls-Royce for 50%.

Aerostructures Long-term Contracts

Our aerostructures business in the Nacelles and Interior Systems segment has several long-term contracts in the pre-production phase including the Boeing 787 and Airbus A350 XWB, and in the early production phase including the Airbus A380. These contracts are accounted for in accordance with long-term construction contract accounting.

The pre-production phase includes design of the product to meet customer specifications as well as design of the processes to manufacture the product. Also involved in this phase is securing the supply of material and subcomponents produced by third party suppliers that are generally accomplished through long-term supply agreements.

Contracts in the early production phase include excess-over-average inventories, which represent the excess of current manufactured cost over the estimated average manufactured cost during the life of the contract.

Cost estimates over the lives of contracts are affected by estimates of future cost reductions including learning curve efficiencies. Because these contracts cover manufacturing periods of up to 20 years or more, there is risk associated with the estimates of future costs made during the

Table of Contents

pre-production and early production phases. These estimates may be different from actual costs due to the following:

Ability to recover costs incurred for change orders and claims;

Costs, including material and labor costs and related escalation;

Labor improvements due to the learning curve experience;

Anticipated cost productivity improvements related to new manufacturing methods and processes;

Supplier pricing, including escalation where applicable, potential supplier claims, the supplier's financial viability and the supplier's ability to perform;

The cost impact of product design changes that frequently occur during the flight test and certification phases of a program; and

Effect of foreign currency exchange fluctuations.

Additionally, total contract revenue is based on estimates of future units to be delivered to the customer, the ability to recover costs incurred for change orders and claims and sales price escalation, where applicable. There is a risk that there could be differences between the actual units delivered and the estimated total units to be delivered under the contract and differences in actual revenues compared to estimates. Changes in estimates could have a material impact on our results of operations and cash flows.

Provisions for estimated losses on uncompleted contracts are recorded in the period such losses are determined to the extent total estimated costs exceed total estimated contract revenues.

Boeing 787 Contract

During 2004, our aerostructures business entered into a long-term supply contract with Boeing on the 787 program. Our latest outlook projects approximately \$5 billion of original equipment sales for this contract. At December 31, 2009, we had approximately \$638 million recorded as in-process inventory related to this contract. Aftermarket sales associated with this program are not accounted for using the percentage-of-completion method of accounting.

The Boeing 787 program has experienced delays in its development schedule and Boeing has requested numerous changes in the design of our product and scope of our work. Under the terms of our contract, we are entitled to reimbursement of certain costs and equitable price adjustments under certain circumstances. We have asserted changes to our pricing that are material. Discussions with Boeing are ongoing. In our evaluation of the contract, we have included an estimate of the probable revenues related to these assertions.

If we are unable to reach a fair and equitable resolution with Boeing, if any key suppliers on the 787 program fail to comply with the material terms of their supply contracts, or if any of the actual costs or revenues differ from the estimates, it could have a material adverse effect on our financial position, results of operations and/or cash flows in a given period.

During 2009, we entered into an agreement to settle the previously disclosed arbitration with Alenia Aermacchi, S.p.A. (AAeM), a supplier of fan cowls used in the nacelles that we provide to Boeing on the 787 program. The material terms of the settlement agreement include: (a) termination of the underlying program contracts between AAeM and us and the orderly transfer of the 787 fan cowl program to another supplier; (b) the supply of a specified

number of fan cowls during the transfer period; (c) installment payments to AAeM over an approximately two-year period, subject to AAeM's continued support for testing and certification and execution of the program transfer; and (d) termination of the arbitration with a mutual release of claims and covenant not to sue. The payments to be made to AAeM under the settlement agreement are

Table of Contents

not material to our results of operations, financial condition or cash flows. As a result of the settlement with AAeM, we identified a preferred supplier for future fan cowl support and negotiated pricing on the 787 and several other programs, taking into account the supplier's position as a preferred supplier.

JSTARS Program

In 2002, Seven Q Seven, Ltd. (7Q7) was selected by Northrop Grumman Corporation to provide propulsion pods for the re-engine program for the JT3D engines used by the U.S. Air Force. We were selected by 7Q7 as a supplier for the inlet, thrust reverser, exhaust, EBU, strut systems and wing interface systems. As of December 31, 2009, we have \$26.3 million of pre-production costs related to this program.

Funding for the JSTARS program for the 2010 budget cycle was approved. Future funding remains uncertain. While we believe that program funding will continue, there can be no assurances of such. If the program were to be cancelled, we would need to write-off our pre-production costs.

Tax

We are continuously undergoing examination by the United States Internal Revenue Service (IRS), as well as various state and foreign jurisdictions. The IRS and other taxing authorities routinely challenge certain deductions and credits reported by us on our income tax returns.

Tax Years 2005 and 2006

During 2009, the IRS issued a Revenue Agent's Report for the tax years 2005 and 2006. In July 2009, we submitted a protest to the Appeals Division of the IRS with respect to certain unresolved issues which involve the proper timing of deductions. Although it is reasonably possible that these matters could be resolved during the next 12 months, the timing or ultimate outcome is uncertain.

Tax Years 2000 to 2004

During 2007, we reached agreement with the IRS on substantially all of the issues raised with respect to the examination of taxable years 2000 to 2004. We submitted a protest to the Appeals Division of the IRS with respect to the remaining unresolved issues which involve the proper timing of certain deductions. We were unable to reach agreement with the IRS on the remaining issues and in December 2009, we filed a petition to the U.S. Tax Court. If the IRS were to prevail, we believe the amount of the estimated tax liability is fully reserved. We cannot predict the timing or ultimate outcome of a final resolution of the remaining unresolved issues.

Tax Years Prior to 2000

The previous examination cycle included the consolidated income tax groups for the audit periods identified below:

Coltec Industries Inc. and Subsidiaries	December, 1997 – July, 1999 (through date of acquisition)
Goodrich Corporation and Subsidiaries	1998 – 1999 (including Rohr, Inc. (Rohr) and Coltec)

We previously reached final settlement with the IRS on all but one of the issues raised in this examination cycle. We received statutory notices of deficiency dated June 14, 2007 related to the remaining unresolved issue which involves the proper timing of certain deductions. We filed a petition with the U.S. Tax Court in September 2007 to contest the

notices of deficiency. If the IRS were to prevail, we believe the amount of the estimated tax liability is fully reserved.

Table of Contents

Although it is reasonably possible that these matters could be resolved during the next 12 months, the timing or ultimate outcome is uncertain.

Rohr was examined by the State of California for the tax years ended July 31, 1985, 1986 and 1987. The State of California disallowed certain expenses incurred by one of Rohr's subsidiaries in connection with the lease of certain tangible property. California's Franchise Tax Board held that the deductions associated with the leased equipment were non-business deductions. The additional tax associated with the Franchise Tax Board's position is \$4.5 million. The amount of accrued interest associated with the additional tax is approximately \$29 million at December 31, 2009. In addition, the State of California enacted an amnesty provision that imposes nondeductible penalty interest equal to 50% of the unpaid interest amounts relating to taxable years ended before 2003. The penalty interest is approximately \$14.5 million at December 31, 2009. The tax and interest amounts continue to be contested by Rohr. No payment has been made for the \$29 million of interest or \$14.5 million of penalty interest. In April 2009, the Superior Court of California issued a ruling granting our motion for summary judgment. In August 2009 the State of California appealed the ruling. Once the State's appeals have been exhausted and if the Superior Court's decision is not overturned, we will be entitled to a refund of the \$4.5 million of tax, together with interest from the date of payment.

Following settlement of the U.S. Tax Court for Rohr's tax years 1986 to 1997, California audited our amended tax returns and issued an assessment based on numerous issues including proper timing of deductions and allowance of tax credits. We submitted a protest of the assessment to the California Franchise Tax Board in November 2008. We believe that we are adequately reserved for this contingency. Although it is reasonably possible that these matters could be resolved during the next 12 months, the timing or ultimate outcome is uncertain.

NEW ACCOUNTING STANDARDS NOT YET ADOPTED

In June 2009, new accounting guidance was issued that is included in Accounting Standards Codification Topic 810, Consolidation. This statement amends the consolidation guidance applicable to variable interest entities and is effective as of the beginning of the first annual reporting period that begins after November 15, 2009. Upon adoption, we do not expect this standard to have a material impact on our financial condition or results of operations.

CRITICAL ACCOUNTING POLICIES

Our discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates, including those related to customer programs and incentives, product returns, bad debts, inventories, investments, goodwill and intangible assets, income taxes, financing obligations, warranty obligations, excess component order cancellation costs, restructuring, long-term service contracts, share-based compensation, pensions and other postretirement benefits, and contingencies and litigation. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

Table of Contents

Contract Accounting-Percentage of Completion

We have sales under long-term contracts, many of which contain escalation clauses, requiring delivery of products over several years and frequently providing the buyer with option pricing on follow-on orders. Sales and profits on each contract are recognized in accordance with the percentage-of-completion method of accounting, primarily using the units-of-delivery method. We use the cumulative catch-up method in accounting for revisions in estimates. Under the cumulative catch-up method, the impact of revisions in estimates related to units shipped to date is recognized immediately when changes in estimated contract profitability are known. Amounts representing contract claims or change orders are considered in estimating revenues, costs, and profits when they can be reliably estimated and realization is considered probable.

Estimates of revenue and cost for our contracts span a period of many years from the inception of the contracts to the date of actual shipments and are based on a substantial number of underlying assumptions. We believe that the underlying factors are sufficiently reliable to provide a reasonable estimate of the profit to be generated. However, due to the significant length of time over which revenue streams will be generated, the variability of the assumptions of the revenue and cost streams can be significant if the factors change. The factors include but are not limited to estimates of the following:

Escalation of future sales prices under the contracts;

Ability to recover costs incurred for change orders and claims;

Costs, including material and labor costs and related escalation;

Labor improvements due to the learning curve experience;

Anticipated cost productivity improvements related to new manufacturing methods and processes;

Supplier pricing, including escalation where applicable, potential supplier claims, the supplier's financial viability and the supplier's ability to perform;

The cost impact of product design changes that frequently occur during the flight test and certification phases of a program; and

Effect of foreign currency exchange fluctuations.

Inventory

Inventoried costs on long-term contracts include certain pre-production costs, consisting primarily of tooling and design costs and production costs, including applicable overhead. The costs attributed to units delivered under long-term commercial contracts are based on the estimated average cost of all units expected to be produced and are determined under the learning curve concept, which anticipates a predictable decrease in unit costs as tasks and production techniques become more efficient through repetition. During the early years of a contract, manufacturing costs per unit delivered are typically greater than the estimated average unit cost for the total contract. This excess manufacturing cost for units shipped results in an increase in inventory (referred to as excess-over-average) during the early years of a contract.

If in-process inventory plus estimated costs to complete a specific contract exceed the anticipated remaining sales value of such contract, such excess is charged to cost of sales in the period identified, thus reducing inventory to

estimated realizable value.

Unbilled Receivables

Our aerostructures business is party to a long-term supply arrangement whereby we receive cash payments for our performance over a period that extends beyond our performance period of the

Table of Contents

contract. The contract is accounted for using the percentage-of-completion method of contract accounting. Unbilled receivables include revenue recognized that will be realized from cash payments to be received beyond the period of performance. In estimating our revenues to be received under the contract, cash receipts that are expected to be received beyond the performance period are included at their present value as of the end of the performance period.

Product Maintenance Arrangements

We have entered into long-term product maintenance arrangements to provide specific products and services to customers for a specified amount per flight hour, brake landing and/or aircraft landings. Revenue is recognized as the service is performed and the costs are incurred. We have sufficient historical evidence that indicates that the costs of performing the service under the contract are incurred on other than a straight line basis.

Income Taxes

As of each interim reporting period, we estimate an effective income tax rate that is expected to be applicable for the full fiscal year. In addition, we establish reserves for uncertain tax positions. The estimate of our effective income tax rate involves significant judgments regarding the application of complex tax regulations across many jurisdictions and estimates as to the amount and jurisdictional source of income expected to be earned during the full fiscal year. Further influencing this estimate are evolving interpretations of new and existing tax laws, rulings by taxing authorities and court decisions. Due to the subjective and complex nature of these underlying issues, our actual effective tax rate and related tax liabilities may differ from our initial estimates. Differences between our estimated and actual effective income tax rates and related liabilities are recorded in the period they become known. The resulting adjustment to our income tax expense could have a material effect on our results of operations in the period the adjustment is recorded.

Goodwill and Identifiable Intangible Assets

Impairments of identifiable intangible assets are recognized when events or changes in circumstances indicate that the carrying amount of the asset, or related groups of assets, may not be recoverable and our estimate of undiscounted cash flows over the assets' remaining useful lives is less than the carrying value of the assets. The determination of undiscounted cash flow is based on our segments' plans. The revenue growth is based upon aircraft build projections from aircraft manufacturers and widely available external publications. The profit margin assumption is based upon the current cost structure and anticipated cost reductions. Changes to these assumptions could result in the recognition of impairment.

Goodwill is not amortized but is tested for impairment annually, or when an event occurs or circumstances change such that it is reasonably possible that an impairment may exist. Our annual testing date is November 30. We test goodwill for impairment by first comparing the book value of net assets to the fair value of the related reporting units. If the fair value is determined to be less than book value, a second step is performed to compute the amount of the impairment. In this process, a fair value for goodwill is estimated, based in part on the fair value of the operations, and is compared to its carrying value. The amount of the fair value below carrying value represents the amount of goodwill impairment. As of our November 30 testing date, none of our reporting units were at risk of their book value of net assets exceeding their respective fair value.

We estimate the fair values of the reporting units using discounted cash flows. Forecasts of future cash flows are based on our best estimate of future sales and operating costs, based primarily on existing firm orders, expected future orders, contracts with suppliers, labor agreements and general market conditions. Changes in these forecasts could significantly change the amount of impairment recorded, if any impairment exists. The cash flow forecasts

Table of Contents

are adjusted by a long-term growth rate and a discount rate derived from our weighted-average cost of capital at the date of evaluation.

Other Assets

As with any investment, there are risks inherent in recovering the value of participation payments, sales incentives, flight certification costs and entry fees. Such risks are consistent with the risks associated in acquiring a revenue-producing asset in which market conditions may change or the risks that arise when a manufacturer of a product on which a royalty is based has business difficulties and cannot produce the product. Such risks include but are not limited to the following:

Changes in market conditions that may affect product sales under the program, including market acceptance and competition from others;

Performance of subcontract suppliers and other production risks;

Bankruptcy or other less significant financial difficulties of other program participants, including the aircraft manufacturer, the OE manufacturers (OEM) and other program suppliers or the aircraft customer; and

Availability of specialized raw materials in the marketplace.

Participation Payments

Certain of our businesses make cash payments under long-term contractual arrangements to OEM or system contractors in return for a secured position on an aircraft program. Participation payments are capitalized, when a contractual liability has been incurred, as other assets and amortized as a reduction to sales, as appropriate. At December 31, 2009 and 2008, the carrying amount of participation payments was \$117.4 million and \$118 million, respectively. The carrying amount of participation payments is evaluated for recovery at least annually or when other indicators of impairment exist, such as a change in the estimated number of units or a revision in the economics of the program. If such estimates change, amortization expense is adjusted and/or an impairment charge is recorded, as appropriate, for the effect of the revised estimates. No such impairment charges were recorded in 2009, 2008 or 2007. See Note 16, Supplemental Balance Sheet Information to our consolidated financial statements.

Sales Incentives

We offer sales incentives such as up-front cash payments, merchandise credits and/or free products to certain airline customers in connection with sales contracts. The cost of these incentives is recognized in the period incurred unless recovery of these costs is specifically guaranteed by the customer in the contract. If the contract contains such a guarantee, then the cost of the sales incentive is capitalized as other assets and amortized to cost of sales, or as a reduction to sales, as appropriate. At December 31, 2009 and 2008, the carrying amount of sales incentives was \$60.4 million and \$62.4 million, respectively. The carrying amount of sales incentives is evaluated for recovery when indicators of potential impairment exist. The carrying value of the sales incentives is also compared annually to the amount recoverable under the terms of the guarantee in the customer contract. If the amount of the carrying value of the sales incentives exceeds the amount recoverable in the contract, the carrying value is reduced. No such impairment charges were recorded in 2009, 2008 or 2007. See Note 16, Supplemental Balance Sheet Information to our consolidated financial statements.

Flight Certification Costs

When a supply arrangement is secured, certain of our businesses may agree to supply hardware to an OEM to be used in flight certification testing and/or make cash payments to reimburse an

Table of Contents

OEM for costs incurred in testing the hardware. The flight certification testing is necessary to certify aircraft systems/components for the aircraft's airworthiness and allows the aircraft to be flown and thus sold in the country certifying the aircraft. Flight certification costs are capitalized in other assets and are amortized to cost of sales, or as a reduction to sales, as appropriate. At December 31, 2009 and 2008, the carrying amount of sales flight certification costs was \$45 million and \$34 million, respectively. The carrying amount of flight certification costs is evaluated for recovery when indicators of impairment exist or when the estimated number of units to be manufactured changes. No such impairment charges were recorded in 2009, 2008 or 2007. See Note 16, Supplemental Balance Sheet Information to our consolidated financial statements.

Entry Fees

Our aerostructures business in our Nacelles and Interior Systems segment made a cash payment to an OEM under a long-term contractual arrangement related to a new engine program. The payments are referred to as entry fees and entitle us to a controlled access supply contract and a percentage of total program revenue generated by the OEM. Entry fees are capitalized in other assets and are amortized over units of delivery as a reduction to sales. At December 31, 2009 and 2008, the carrying amount of entry fees was \$24.5 million and \$25.5 million, respectively. The carrying amount of entry fees is evaluated for recovery at least annually or when other significant assumptions or economic conditions change. Recovery of entry fees is assessed based on the expected cash flow from the program over the remaining program life as compared to the recorded amount of entry fees. If the carrying value of the entry fees exceeds the cash flow to be generated from the program, a charge would be recorded to reduce the entry fees to their recoverable amounts. No such impairment charges were recorded in 2009, 2008 or 2007. See Note 16, Supplemental Balance Sheet Information to our consolidated financial statements.

Service and Product Warranties

We provide service and warranty policies on certain of our products. We accrue liabilities under service and warranty policies based upon specific claims and a review of historical warranty and service claim experience. Adjustments are made to accruals as claim data and historical experience change. In addition, we incur discretionary costs to service our products in connection with product performance issues. Our service and product warranty reserves are based upon a variety of factors. Any significant change in these factors could have a material impact on our results of operations. Such factors include but are not limited to the following:

The historical performance of our products and changes in performance of newer products;

The mix and volumes of products being sold; and

The impact of product changes.

Share-Based Compensation

We utilize the fair value method of accounting to account for share-based compensation awards. See Note 7, Share-Based Compensation .

Assumptions

Stock Options

We use the Black-Scholes-Merton formula to estimate the expected value that our employees will receive from the options based on a number of assumptions, such as interest rates,

Table of Contents

employee exercises, our stock price and expected dividend yield. Our weighted-average assumptions included:

	2009	2008	2007
Risk-free interest rate %	1.8	3.3	4.5
Expected dividend yield %	2.6	1.3	1.7
Historical volatility factor %	33.3	31.2	34.6
Weighted-average expected life of the options (years)	5.6	5.6	5.5

The expected life is a significant assumption as it determines the period for which the risk-free interest rate, historical volatility and expected dividend yield must be applied. The expected life is the period over which our employees are expected to hold their options. It is based on our historical experience with similar grants. The risk-free interest rate is based on the expected U.S. Treasury rate over the expected life. Historical volatility reflects movements in our stock price over the most recent historical period equivalent to the expected life. Expected dividend yield is based on the stated dividend rate as of the date of grant.

Restricted Stock Units

The fair value of the restricted stock units is determined based upon the average of the high and low grant date fair value. The weighted-average grant date fair value during 2009, 2008 and 2007 was \$38.39, \$69.48 and \$46.20 per unit, respectively.

Performance Units

The value of each award is determined based upon the average of the high and low price of our stock on the last day of each reporting period, as adjusted for a performance condition and a market condition. The performance condition is applied to 50% of the awards and is based upon our actual return on invested capital (ROIC) as compared to a target ROIC. The market condition is applied to 50% of the awards and is based on our relative total shareholder return (RTSR) as compared to the RTSR of a peer group of companies. Since the awards will be paid in cash, they are recorded as a liability award and are marked to market each reporting period. As such, assumptions are evaluated for each award on an ongoing basis.

Pension and Postretirement Benefits Other Than Pensions

We consult with an outside actuary as to the appropriateness for many of the assumptions used in determining the benefit obligations and the annual expense for our worldwide pension and postretirement benefits other than pensions. All significant assumptions are evaluated at least annually. Assumptions such as the rate of compensation increase, health care cost projections, the mortality rate assumption, and the long-term rate of return on plan assets are based upon our historical and benchmark data, as well as our outlook for the future. Plan assets have been valued at fair value. See Note 14, Pensions and Postretirement Benefits .

The U.S. discount rate was determined based on a customized yield curve approach. Our projected pension and postretirement benefit payment cash flows were each plotted against a yield curve composed of a large, diverse group of Aa-rated corporate bonds. The resulting discount rates were used to determine the benefit obligations. In Canada and the U.K., a similar approach to determining discount rates in the U.S. was utilized. The appropriate benchmarks by applicable country were used for pension plans other than those in the U.S., U.K. and Canada to determine the discount rate assumptions.

Table of Contents***Sensitivity Analysis***

The table below quantifies the approximate impact at December 31, 2009 of a one-quarter percentage point change in the assumed discount rate and expected long-term rate of return on plan assets for our pension plan cost and liability, holding all other assumptions constant. The discount rate assumption is selected each year based on market conditions in effect as of the disclosure date. The rate selected is used to measure liabilities as of the disclosure date and for calculating the following year's pension expense. The expected long-term rate of return on plan assets assumption, although reviewed each year, is changed less frequently due to the long-term nature of the assumption. This assumption does not impact the measurement of assets or liabilities as of disclosure date; rather, it is used only in the calculation of pension expense.

	.25 Percentage Point Increase	.25 Percentage Point Decrease
	(Dollars in millions)	
Increase (decrease) in annual costs		
Discount rate	\$ (14.0)	\$ 14.2
Expected long-term rate of return	\$ (7.1)	\$ 7.1
Increase (decrease) in projected benefit obligation		
Discount rate	\$ (116.1)	\$ 120.4

The table below quantifies the impact of a one-percentage point change in the assumed health care cost trend rate on our annual cost and balance sheet liability for postretirement benefits other than pension obligations holding all other assumptions constant.

	One Percentage Point Increase	One Percentage Point Decrease
	(Dollars in millions)	
Increase (decrease) in total of service and interest cost components		
Health care cost trend rate	\$ 1.2	\$ (1.1)
Increase (decrease) in accumulated postretirement benefit obligation		
Health care cost trend rate	\$ 21.7	\$ (19.2)

FORWARD-LOOKING INFORMATION IS SUBJECT TO RISK AND UNCERTAINTY

Certain statements made in this document are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 regarding our future plans, objectives and expected performance. Specifically, statements that are not historical facts, including statements accompanied by words such as believe, expect, anticipate, intend, should, estimate, or plan, are intended to identify forward-looking statements and convey the uncertainty of future events or outcomes. We caution readers that any such forward-looking statements are based on assumptions that we believe are reasonable, but are subject to a wide range of risks, and actual results may differ materially.

Important factors that could cause actual results to differ from expected performance include, but are not limited to:

demand for and market acceptance of new and existing products, such as the Airbus A350 XWB and A380, the Boeing 787 Dreamliner, the EMBRAER 190, the Mitsubishi Regional Jet (MRJ), the Bombardier CSeries, the

Dassault Falcon 7X and the Lockheed Martin F-35 Lightning II and the Northrop Grumman Joint STARS re-engining program;

our ability to extend our commercial OE contracts beyond the initial contract periods;

Table of Contents

cancellation or delays of orders or contracts by customers or with suppliers, including delays or cancellations associated with the Boeing 787 Dreamliner, the Airbus A380 and A350 XWB aircraft programs, and major military programs;

our ability to obtain price adjustments pursuant to certain of our long-term contracts;

the financial viability of key suppliers and the ability of our suppliers to perform under existing contracts;

the extent to which we are successful in integrating and achieving expected operating synergies for AIS and other potential acquisitions;

successful development of products and advanced technologies;

the health of the commercial aerospace industry, including the impact of bankruptcies and/or consolidations in the airline industry;

global demand for aircraft spare parts and aftermarket services;

changing priorities or reductions in the defense budgets in the U.S. and other countries, U.S. foreign policy and the level of activity in military flight operations;

the possibility of restructuring and consolidation actions;

threats and events associated with and efforts to combat terrorism;

the extent to which changes in regulation and/or assumptions result in changes to expenses relating to employee and retiree medical and pension benefits;

competitive product and pricing pressures;

our ability to recover under contractual rights of indemnification for environmental and other claims arising out of the divestiture of our tire, vinyl and other businesses;

possible assertion of claims against us on the theory that we, as the former corporate parent of Coltec Industries Inc, bear some responsibility for the asbestos-related liabilities of Coltec and its subsidiaries;

the effect of changes in accounting policies or tax legislation;

cumulative catch-up adjustments or loss contract reserves on long-term contracts accounted for under the percentage of completion method of accounting;

domestic and foreign government spending, budgetary and trade policies;

economic and political changes in international markets where we compete, such as changes in currency exchange rates, inflation, fuel prices, deflation, recession and other external factors over which we have no control;

the outcome of contingencies including completion of acquisitions, divestitures, tax audits, litigation and environmental remediation efforts; and

the impact of labor difficulties or work stoppages at our, a customer's or a supplier's facilities.

We caution you not to place undue reliance on the forward-looking statements contained in this document, which speak only as of the date on which such statements are made. We undertake no obligation to release publicly any revisions to these forward-looking statements to reflect events or circumstances after the date on which such statements were made or to reflect the occurrence of unanticipated events.

Table of Contents**Item 7A. Quantitative and Qualitative Disclosures About Market Risk**

We are exposed to certain market risks as part of our ongoing business operations, including risks from changes in interest rates and foreign currency exchange rates, which could impact our financial condition, results of operations and cash flows. We manage our exposure to these and other market risks through regular operating and financing activities and through the use of derivative financial instruments. We use such derivative financial instruments as risk management tools and not for speculative investment purposes. See Note 18, Derivatives and Hedging Activities in our consolidated financial statements for a description of current developments involving our hedging activities.

We are exposed to interest rate risk as a result of our outstanding variable rate debt obligations and interest rate swaps. The table below provides information about our financial instruments that are sensitive to changes in interest rates. At December 31, 2009, a hypothetical 100 basis point unfavorable change in interest rates would increase annual interest expense by approximately \$0.2 million. At December 31, 2009 we had no interest rate swaps outstanding.

The table represents principal cash flows and related weighted-average interest rates by expected (contractual) maturity dates.

Debt	Expected Maturity Dates						Total	Fair Value
	2010	2011	2012	2013	2014	Thereafter		
Fixed Rate	\$	\$	\$ 261.5	\$	\$	\$ 1,723.9	\$ 1,985.4	\$ 2,127.5
Average Interest Rate			7.5%			6.4%	6.5%	
Variable Rate	\$ 3.1					\$ 16.5	\$ 19.6	\$ 19.6
Average Interest Rate	3.8%					0.3%	0.8%	
Capital Lease Obligations	\$ 1.1	\$ 0.9	\$ 0.8	\$ 0.8	\$ 0.8	\$ 6.1	\$ 10.5	\$ 6.7

Foreign Currency Exposure

We are exposed to foreign currency risks that arise from normal business operations. These risks include transactions denominated in foreign currencies, the translation of monetary assets and liabilities denominated in currencies other than the relevant functional currency and translation of income and expense and balance sheet amounts of our foreign subsidiaries to the U.S. Dollar. Our objective is to minimize our exposure to transaction and income risks through our normal operating activities and, where appropriate, through foreign currency forward exchange contracts.

Foreign exchange negatively impacted our business segments' financial results in 2009. Approximately 7% of our revenues and approximately 20% of our costs are denominated in currencies other than the U.S. Dollar. Approximately 94% of these net costs are in Euros, Great Britain Pounds Sterling and Canadian Dollars. We hedge a portion of our exposure of U.S. Dollar sales on an ongoing basis.

As currency exchange rates fluctuate, translation of the income statements of our international businesses into U.S. Dollars will affect comparability of revenues and expenses between years.

We have entered into foreign exchange forward contracts to sell U.S. Dollars for Great Britain Pounds Sterling, Canadian Dollars, Euros and Polish Zlotys. These forward contracts are used to

Table of Contents

mitigate a portion of the potential volatility of earnings and cash flows arising from changes in currency exchange rates. As of December 31, 2009 we had the following forward contracts:

Currency	Notional Amount (Dollars in millions)	Buy/Sell
Great Britain Pounds Sterling	\$ 667.7	Buy
Canadian Dollars	\$ 489.1	Buy
Euros	\$ 612.7	Buy
Polish Zlotys	\$ 57.9	Buy

These forward contracts mature on a monthly basis with maturity dates that range from January 2010 to December 2014.

At December 31, 2009, a hypothetical 10 percent strengthening of the U.S. Dollar against other foreign currencies would decrease the value of the forward contracts described above by \$194.9 million. The fair value of these foreign currency forward contracts was an asset of \$54.2 million at December 31, 2009. Because we hedge only a portion of our exposure, a strengthening of the U.S. Dollar as described above would have a more than offsetting benefit to our financial results in future periods.

In addition to the foreign exchange cash flow hedges, we enter into foreign exchange forward contracts to manage foreign currency risk related to the translation of monetary assets and liabilities denominated in currencies other than the relevant functional currency. These forward contracts generally mature monthly and the notional amounts are adjusted periodically to reflect changes in net monetary asset balances. As of December 31, 2009, our contracts had a notional amount of \$57.9 million and a fair value of a \$2.5 million net liability.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Goodrich Corporation (Goodrich) is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. Goodrich's internal control system over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. The Company's internal control over financial reporting includes those policies and procedures that:

- (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to risk that controls may become inadequate because of changes in condition, or that the degree of compliance with the policies or procedures may deteriorate.

Goodrich's management assessed the effectiveness of Goodrich's internal control over financial reporting as of December 31, 2009. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control – Integrated Framework. Based on management's assessment and those criteria, management believes that Goodrich maintained effective internal control over financial reporting as of December 31, 2009.

Goodrich's independent registered public accounting firm, Ernst & Young LLP, has issued an audit report on the effectiveness of Goodrich's internal control over financial reporting. This report appears on page 59.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Shareholders and Board of Directors of Goodrich Corporation

We have audited the accompanying consolidated balance sheets of Goodrich Corporation as of December 31, 2009 and 2008, and the related consolidated statements of income, cash flows, and equity for each of the three years in the period ended December 31, 2009. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Goodrich Corporation at December 31, 2009 and 2008, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2009, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), Goodrich Corporation's internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 16, 2010 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Shareholders and Board of Directors of Goodrich Corporation

We have audited Goodrich Corporation's internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Goodrich Corporation's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Goodrich Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Goodrich Corporation as of December 31, 2009 and 2008 and the related consolidated statements of income, cash flows and equity for each of the three years in the period ended December 31, 2009 of Goodrich Corporation and our report dated February 16, 2010 expressed an unqualified opinion thereon.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Significant Accounting Policies

Basis of Presentation. The consolidated financial statements reflect the accounts of Goodrich Corporation and its majority-owned subsidiaries (the Company or Goodrich). Investments in 20 to 50 percent-owned affiliates are accounted for using the equity method. Equity in earnings (losses) from these businesses is included in other income (expense) net. Intercompany accounts and transactions are eliminated.

As discussed in Note 6, Discontinued Operations , Goodrich Aviation Technical Services, Inc. (ATS) has been accounted for as a discontinued operation. Unless otherwise noted, disclosures herein pertain to the Company s continuing operations.

Cash Equivalents. Cash equivalents consist of highly liquid investments with a maturity of three months or less at the time of purchase.

Allowance for Doubtful Accounts. The Company evaluates the collectibility of trade receivables based on a combination of factors. The Company regularly analyzes significant customer accounts and, when the Company becomes aware of a specific customer s inability to meet its financial obligations to the Company, which may occur in the case of bankruptcy filings or deterioration in the customer s operating results or financial position, the Company records a specific reserve for bad debt to reduce the related receivable to the amount the Company reasonably believes is collectible. The Company also records reserves for bad debts for all other customers based on a variety of factors including the length of time the receivables are past due, the financial health of the customer, macroeconomic considerations and historical experience. If circumstances related to specific customers change, the Company s estimates of the recoverability of receivables could be further adjusted. See Note 16, Supplemental Balance Sheet Information .

Inventories. Inventories are stated at the lower of cost or market. Certain U.S. inventories are valued by the last-in, first-out (LIFO) cost method. Inventories not valued by the LIFO method are valued principally by the average cost method. See Note 10, Inventories .

Inventoried costs on long-term contracts include certain pre-production costs, consisting primarily of tooling and engineering design and production costs, including applicable overhead. The costs attributed to units delivered under long-term commercial contracts are based on the estimated average cost of all units expected to be produced and are determined under the learning curve concept, which anticipates a predictable decrease in unit costs as tasks and production techniques become more efficient through repetition. This usually results in an increase in inventory (referred to as excess-over average) during the early years of a contract. If in-process inventory plus estimated costs to complete a specific contract exceed the anticipated remaining sales value of such contract, the excess is charged to cost of sales in the period identified.

In accordance with industry practice, costs in inventory include amounts relating to contracts with long production cycles, some of which are not expected to be realized within one year.

Long-Lived Assets. Property, plant and equipment, including amounts recorded under capital leases, are recorded at cost. Depreciation and amortization is computed principally using the straight-line method over the following estimated useful lives: buildings and improvements, 15 to 40 years; machinery and equipment, 5 to 15 years; and internal use software, 2 to 10 years. In the case of capitalized lease assets, amortization is recognized over the lease

term if shorter. Repairs and maintenance costs are expensed as incurred. See Note 16, Supplemental Balance Sheet Information .

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Goodwill. Goodwill represents the excess of the purchase price over the fair value of the net assets of acquired businesses. Intangible assets deemed to have indefinite lives and goodwill are not subject to amortization, but are reviewed for impairment annually, or more frequently, if indicators of potential impairment exist. See Note 11, Goodwill and Identifiable Intangible Assets .

Identifiable Intangible Assets. Identifiable intangible assets are recorded at cost or, when acquired as part of a business combination, at estimated fair value. These assets include patents and other technology agreements, sourcing contracts, trademarks, licenses, customer relationships and non-compete agreements. Identifiable intangible assets are generally amortized over their useful life using undiscounted cash flows, a method that reflects the pattern in which the economic benefits of the intangible assets are consumed, or the straight-line method.

Impairments of identifiable intangible assets are recognized when events or changes in circumstances indicate that the carrying amount of the asset, or related groups of assets, may not be recoverable and the Company's estimate of undiscounted cash flows over the assets' remaining useful lives is less than the carrying value of the assets. Measurement of the amount of impairment may be based upon an appraisal, market values of similar assets or estimated discounted future cash flows resulting from the use and ultimate disposition of the asset. See Note 11, Goodwill and Identifiable Intangible Assets .

Revenue and Income Recognition. For revenues not recognized under the contract method of accounting or separately priced extended warranty or product maintenance contracts, the Company recognizes revenues from the sale of products at the point of passage of title, which is generally at the time of shipment. Revenues earned from providing maintenance service are recognized when the service is complete.

The Company has entered into long-term product maintenance arrangements to provide specific products and services to customers for a specified amount per flight hour, brake landing and/or aircraft landings. Revenue is recognized for these arrangements as the service is performed and the costs are incurred. The Company has sufficient historical evidence that indicates that the costs of performing the service under the contract are incurred on other than a straight-line basis.

For revenues recognized under the contract method of accounting, the Company recognizes sales and profits on each contract in accordance with the percentage-of-completion method, generally using units-of-delivery as the basis to measure progress towards completing the contract and recognizing revenue and profit. This method requires estimates that involve various assumptions and projections relative to the outcome of future events, including the quantity and timing of product deliveries. Projected revenues over the contract period may include estimates of recoveries asserted against the customer for delays, changes in specifications and designs or other unanticipated costs. Amounts related to contract claims or change orders are included in projected revenues when they can be reliably estimated and realization is considered probable. The contract method of accounting also involves the use of various estimating techniques to project costs at completion. Estimates include assumptions relative to future labor performance and rates, and projections relative to material and overhead costs. These assumptions involve various levels of expected performance improvements.

The Company re-evaluates its contract estimates periodically and reflects changes in estimates in the current period using the cumulative catch-up method. A significant portion of the Company's sales in its aerostructures business in the Nacelles and Interior Systems segment are long-term, fixed-priced contracts, many of which contain escalation clauses, requiring delivery of products over several years and frequently providing the buyer with option pricing on follow-on orders.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Included in Accounts Receivable at December 31, 2009 and 2008, were receivable amounts under contracts in progress of \$190.8 million and \$164.7 million, respectively, that represent amounts earned but not billable. These amounts become billable according to their contract terms, which usually consider the passage of time, achievement of milestones or completion of the project. Of the \$190.8 million at December 31, 2009, \$104.1 million is expected to be collected after December 31, 2010.

The Company had no receivable balances that had been billed but not paid by customers under retainage provisions in contracts. The Company also did not have any receivable balances, billed or unbilled, that represented claims or other disagreements with customers subject to uncertainty concerning their determination or ultimate realization.

The Company's aerostructures business is party to a long-term supply arrangement whereby it receives cash payments for its performance over a period that extends beyond the Company's performance period of the contract. The contract is accounted for using the percentage of completion method of contract accounting. Unbilled receivables include revenue recognized that will be realized from cash payments to be received beyond the period of performance. In estimating its revenues to be received under the contract, cash receipts that are expected to be received beyond the performance period are included at their present value as of the end of the performance period.

Income Taxes. Income tax expense for federal, foreign, state and local income taxes are calculated on reported financial reporting pre-tax income based on current tax law and include the cumulative effect of any changes in tax rates from those used previously in determining deferred tax assets and liabilities. Deferred taxes and liabilities are based on differences between financial reporting and tax bases of assets and liabilities and are measured using enacted tax laws and rates. A valuation allowance is provided on deferred tax assets if it is determined that it is more likely than not that the asset will not be realized. The Company records interest (net of any applicable tax benefit) on potential tax contingencies as a component of its tax expense. See Note 15, *Income Taxes*.

The Company establishes reserves for uncertain tax positions in accordance with the Income Taxes subtopic of the Financial Accounting Standards Board Accounting Standards Codification. The subtopic prescribes the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. Additionally, the subtopic provides guidance on derecognition, measurement, classification, interest and penalties, and transition of uncertain tax positions.

Rotable Assets. Rotable assets are components, which are held for the purpose of exchanging with a customer for used components in conjunction with an overhaul service transaction. Rotable assets are recorded as other assets and depreciated over their estimated economic useful life. Because rotatable assets are generally overhauled during each cycle, the overhaul cost is charged to cost of sales in the period of the overhaul. See Note 16, *Supplemental Balance Sheet Information*.

Participation Payments. Certain businesses make cash payments under long-term contractual arrangements to original equipment manufacturers (OEM) or system contractors in return for a secured position on an aircraft program. Participation payments are capitalized as other assets when a contractual liability has been incurred, and are amortized as a reduction to sales, as appropriate. Participation payments are amortized over the estimated number of production units to be shipped over the program's production life which reflects the pattern in which the economic benefits of the participation payments are consumed. The carrying amount of participation payments is evaluated for recovery at least annually or when other indicators of impairment occur such as a change in the estimated number of units or the economics of the

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

program. If such estimates change, amortization expense is adjusted and/or an impairment charge is recorded, as appropriate, for the effect of the revised estimates. No such impairment charges were recorded in 2009, 2008 or 2007. See Note 16, Supplemental Balance Sheet Information .

Sales Incentives. The Company offers sales incentives to certain airline customers in connection with sales contracts. These incentives may consist of up-front cash payments, merchandise credits and/or free products. The cost of these incentives is recognized as an expense in the period incurred unless recovery of these costs is specifically guaranteed by the customer in the contract. If the contract contains such a guarantee, then the cost of the sales incentive is capitalized as other assets and amortized to cost of sales, or as a reduction to sales, as appropriate, using the straight-line method over the remaining contract term. The carrying amount of sales incentives is evaluated for recovery when indicators of potential impairment exist. The carrying value of sales incentives is also compared annually to the amount recoverable under the terms of the guarantee in the customer contract. If the amount of the carrying value of the sales incentives exceeds the amount recoverable in the contract, the carrying value is reduced. No such charges were recorded in 2009, 2008 or 2007. See Note 16, Supplemental Balance Sheet Information .

Flight Certification Costs. When a supply arrangement is secured, certain businesses may agree to supply hardware to an OEM to be used in flight certification testing and/or make cash payments to reimburse an OEM for costs incurred in testing the hardware. The flight certification testing is necessary to certify aircraft systems/components for the aircraft's airworthiness and allows the aircraft to be flown and thus sold in the country certifying the aircraft. Flight certification costs are capitalized in other assets and are amortized to cost of sales, or as a reduction to sales, as appropriate, over the projected number of aircraft to be manufactured. The carrying amount of flight certification costs is evaluated for recovery when indicators of impairment exist. The carrying value of the asset and amortization expense is adjusted when the estimated number of units to be manufactured changes. No impairment charges were recorded in 2009, 2008 or 2007. See Note 16, Supplemental Balance Sheet Information .

Entry Fees. The aerostructures business in the Company's Nacelles and Interior Systems segment made cash payments to an OEM under a long-term contractual arrangement related to a new engine program. The payments are referred to as entry fees and entitle the Company to a controlled access supply contract and a percentage of total program revenue generated by the OEM. Entry fees are capitalized in other assets and are amortized over units of delivery as a reduction to sales. The carrying amount of entry fees is evaluated for recovery at least annually or when other significant assumptions or economic conditions change. Recovery of entry fees is assessed based on the expected cash flow from the program over the remaining program life as compared to the recorded amount of entry fees. If the carrying value of the entry fees exceeds the cash flow to be generated from the program, a charge would be recorded to reduce the entry fees to their recoverable amounts. No such impairment charges were recorded in 2009, 2008 or 2007. See Note 16, Supplemental Balance Sheet Information .

Shipping and Handling. Shipping and handling costs are recorded in cost of sales.

Financial Instruments. The Company's financial instruments include cash and cash equivalents, accounts and notes receivable, foreign currency forward contracts, accounts payable and debt. Because of their short maturity, the carrying amount of cash and cash equivalents, accounts and notes receivable, accounts payable and short-term bank debt approximates fair value. Fair value of long-term debt is based on quoted market prices or rates available to the Company for debt with similar terms and maturities.

Derivative financial instruments are carried on the consolidated balance sheet at fair value. The fair value of derivatives and other forward contracts is based on quoted market prices.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Share-Based Compensation. The Company utilizes the fair value method of accounting to account for share-based compensation awards. See Note 7, Share-Based Compensation .

Pension and Postretirement Benefits. The Company recognizes the funded status of the Company's pension plans and postretirement benefits plans other than pension (OPEB) on its consolidated balance sheet, with a corresponding adjustment to accumulated other comprehensive income (loss), net of tax. The measurement date used to determine the pension and OPEB obligations and assets for all plans was December 31. Plan assets have been valued at fair value. See Note 14, Pensions and Postretirement Benefits .

Research and Development. The Company performs research and development under company-funded programs for commercial products and under contracts with others. Research and development under contracts with others is performed on both military and commercial products. Company-funded research and development programs are expensed as incurred and included in selling and administrative costs. Customer funding of the Company's research and development efforts is recorded as an offset to research and development expense. Total research and development expenditures from continuing operations in 2009, 2008 and 2007 were approximately \$239 million, \$284 million and \$280 million, respectively. These amounts are net of approximately \$101 million, \$133 million and \$124 million, respectively, which were funded by customers.

Earnings Per Share. See Note 8, Earnings Per Share .

Reclassifications. Certain amounts in prior year financial statements have been reclassified to conform to the current year presentation.

Use of Estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. During 2009, 2008 and 2007, the Company changed its estimates of revenues and costs on certain long-term contracts, primarily in its aerostructures and aircraft wheels and brakes businesses which increased income from continuing operations before income taxes during 2009, 2008 and 2007 by \$45.1 million (\$28.3 million after tax or \$0.23 per diluted share), \$111.9 million (\$70.1 million after tax or \$0.56 per diluted share) and \$76.1 million (\$48 million after tax or \$0.38 per diluted share), respectively.

Environmental Liabilities. The Company establishes environmental liabilities when it is probable that an obligation has been incurred and the Company has the ability to reasonably estimate the liability. The Company capitalizes environmental costs only if the costs are recoverable and (1) the costs extend the life, increase the capacity, or improve the safety or efficiency of property owned by the Company as compared with the condition of that property when originally constructed or acquired; (2) the costs mitigate or prevent environmental contamination that has yet to occur and that otherwise may result from future operations or activities and the costs improve the property compared with its condition when constructed or acquired; or (3) the costs are incurred in preparing the property for sale. All other environmental costs are expensed. See Note 17, Contingencies .

Toxic Tort. The Company establishes toxic tort liabilities, including asbestos, when it is probable that an obligation has been incurred and the Company has the ability to reasonably estimate the liability. The Company typically records a liability for toxic tort when legal actions are in advanced stages (proximity to trial or settlement). The Company expenses legal costs for toxic tort issues when incurred. See Note 17, Contingencies .

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Service and Product Warranties. The Company provides service and warranty policies on certain of its products. The Company accrues liabilities under service and warranty policies based upon specific claims and a review of historical warranty and service claim experience. Adjustments are made to accruals as claim data and historical experience change. In addition, the Company incurs discretionary costs to service its products in connection with product performance issues, which are expensed as incurred. See Note 16, Supplemental Balance Sheet Information .

Deferred Settlement Credits. The Company reached agreements with several of its insurance carriers that are in run-off, insolvent or are undergoing solvent schemes of arrangements to receive negotiated payments in exchange for loss of insurance coverage for third party claims against the Company. The portion of these negotiated payments related to past costs was recognized in income. The portion related to future claims is recorded as a deferred settlement credit and reported within accrued expenses and other non-current liabilities. The deferred settlement credits will be recognized in income in the period the applicable insurance would have been realized. See Note 17, Contingencies .

Note 2. New Accounting Standards**New Accounting Standards Adopted in 2009*****Accounting Standards Codification***

The Accounting Standards Codification (ASC) has become the source of authoritative United States generally accepted accounting principles (U.S. GAAP). ASC changed the referencing of financial accounting standards and did not change or alter existing U.S. GAAP.

Fair Value Measurements

The Company adopted a new accounting standard included in ASC 820, Fair Value Measurements and Disclosures , which delayed the effective date for disclosing all non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value on a recurring basis (at least annually). This standard did not have a material impact on the Company's financial condition and results of operations. See Note 9, Fair Value Measurements .

The Company adopted a new accounting standard included in ASC 715, Compensation-Retirement Benefits , which requires additional disclosures about assets held in an employer's defined benefit pension or other postretirement plan. This standard requires annual disclosures about the Company's pension and other postretirement plan assets. The adoption of this standard did not affect the Company's financial condition or results of operations. See Note 14, Pensions and Postretirement Benefits .

Two-class Method of Computing Earnings Per Share

The Company adopted a new accounting standard included in ASC 260, Earnings Per Share , whereby unvested share-based payment awards that contain rights to receive nonforfeitable dividends or dividend equivalents (whether paid or unpaid) are considered participating securities, and thus, should be included in the two-class method of computing earnings per share (EPS). The adoption of this standard did not have a material impact on the Company's disclosure of EPS. See Note 8, Earnings Per Share .

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Disclosures about Derivative Instruments and Hedging Activities

The Company adopted a new accounting standard included in ASC 815, *Derivatives and Hedging* requiring the Company to provide greater transparency through additional disclosures about (1) how and why the Company uses derivative instruments, (2) how derivative instruments and related hedged items are accounted for under U.S. GAAP, and (3) how derivative instruments and related hedged items affect the Company's financial position, results of operations and cash flows. See Note 18, *Derivatives and Hedging Activities*.

Business Combinations and Noncontrolling Interests

The Company adopted a new accounting standard included in ASC 810, *Consolidation*, and changed the presentation of its noncontrolling (minority) interests. The Company's noncontrolling interests in its consolidated subsidiaries are presented separately within equity in the Consolidated Balance Sheet and within net income attributable to noncontrolling interests in the Consolidated Statement of Income.

The Company adopted a new accounting standard included in ASC 805, *Business Combinations* which significantly changed the accounting for and reporting of business combination transactions. This standard was effective for the Company for business combination transactions for which the acquisition date was on or after January 1, 2009. See Note 11, *Goodwill and Identifiable Intangible Assets*, for business combinations consummated during 2009.

Subsequent Events

The Company adopted a new accounting standard included in ASC 855, *Subsequent Events* which requires the Company to recognize in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the balance sheet. For nonrecognized subsequent events that must be disclosed to keep the financial statements from being misleading, the Company will be required to disclose the nature of the event as well as an estimate of its financial effect, or a statement that such an estimate cannot be made. In addition, this standard requires the Company to disclose the date through which subsequent events have been evaluated. The Company has evaluated subsequent events through the time of filing of these consolidated financial statements.

New Accounting Standards Not Yet Adopted

In June 2009, new accounting guidance was issued that is included in ASC 810, *Consolidation*. This statement amends the consolidation guidance applicable to variable interest entities and is effective as of the beginning of the first annual reporting period that begins after November 15, 2009. Upon adoption, the Company does not expect this standard to have a material impact on its financial condition or results of operations.

Note 3. Business Segment Information

The Company's three business segments are as follows:

The Actuation and Landing Systems segment provides systems, components and related services pertaining to aircraft taxi, take-off, flight control, landing and stopping, and engine components, including fuel delivery systems and rotating assemblies.

The Nacelles and Interior Systems segment produces products and provides maintenance, repair and overhaul services associated with aircraft engines, including thrust reversers, cowlings, nozzles and their components, and aircraft interior products, including slides, seats, cargo and lighting systems.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Electronic Systems segment produces a wide array of systems and components that provide flight performance measurements, flight management, fuel controls, electrical systems, and control and safety data, and reconnaissance and surveillance systems.

The Company measures each reporting segment's profit based upon operating income. Accordingly, the Company does not allocate net interest expense, other income (expense) net and income taxes to its reporting segments. The company-wide Enterprise Resource Planning (ERP) implementation costs that are not directly associated with a specific business were not allocated to the segments. The accounting policies of the reportable segments are the same as those for the Company's consolidated financial statements.

	Year Ended December 31,

(1) Sales to customers in France in 2009, 2008 and 2007 represented 50%, 42% and 41%, respectively, of European sales. Sales to customers in the United Kingdom in 2009, 2008 and 2007 represented 20%, 26% and 25%, respectively, of European sales. Sales were reported in the geographic areas based on the country to which the product was shipped.

(2) Corporate assets primarily include cash, deferred income tax assets, ERP and Rabbi Trust assets. The increase in the corporate assets from 2008 to 2009 was due to an increase in cash.

In 2009, 2008 and 2007, direct and indirect sales to Airbus S.A.S. (Airbus) were approximately 17%, 15% and 15% of consolidated sales, respectively.

In 2009, 2008 and 2007, direct and indirect sales to The Boeing Company (Boeing) were approximately 16%, 14% and 15%, respectively, of consolidated sales. Indirect sales to the U.S. Government include a portion of the direct and indirect sales to Boeing referred to in the following paragraph.

In 2009, 2008 and 2007, direct and indirect sales to the U.S. Government were approximately 22%, 17% and 17%, respectively, of consolidated sales. Indirect sales to the U.S. Government include a portion of the direct and indirect sales to Boeing referred to in the preceding paragraph.

The Company has five categories of substantially similar products that share common customers, similar technologies and similar end-use applications and share similar risks and growth opportunities. Product categories cross the Company's business segments and do not reflect the

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

management structure of the Company. The Company's sales by these product categories are as follows:

	Year Ended December 31,		
	2009	2008	2007
	(Dollars in millions)		
Engine Products & Services	\$ 2,438.9	\$ 2,799.2	\$ 2,541.3
Landing System Products & Services	1,471.1	1,512.6	1,391.6
Airframe Products & Services	856.9	858.5	768.9
Electrical and Optical Products & Services	1,288.7	1,205.1	1,107.0
Safety Products & Services	509.9	567.4	467.2
Other Products & Services	120.1	118.9	116.2
Total Sales	\$ 6,685.6	\$ 7,061.7	\$ 6,392.2

Note 4. Restructuring

The Company incurred \$21.6 million, \$2.1 million and \$1 million of restructuring costs for 2009, 2008 and 2007, respectively. The restructuring actions were primarily related to severance costs and the goal of these programs was to reduce operating costs. Restructuring costs by segment and by income statement category were as follows:

	Year Ended December 31,		
	2009	2008	2007
	(Dollars in millions)		
Segment			
Actuation and Landing Systems	\$ 5.2	\$	\$
Nacelles and Interior Systems	13.0	2.1	0.5
Electronic Systems	3.4		0.5
	\$ 21.6	\$ 2.1	\$ 1.0
Income Statement Category			
Cost of sales	\$ 12.3	\$ 1.7	\$ 0.2
Selling and administrative costs	9.3	0.4	0.8
	\$ 21.6	\$ 2.1	\$ 1.0

Note 5. Other Income (Expense) Net

Other Income (Expense) Net consisted of the following:

	Year Ended December 31,		
	2009	2008	2007
	(Dollars in millions)		
Retiree health care expenses related to previously owned businesses	\$ (12.3)	\$ (17.0)	\$ (18.4)
Expenses related to previously owned businesses	(9.1)	(9.0)	(7.7)
Equity in affiliated companies	(3.5)	2.7	(3.8)
Net gain recognized in the formation of a joint venture		12.8	
Other net	(0.3)	0.9	1.7
Other income (expense) net	\$ (25.2)	\$ (9.6)	\$ (28.2)

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Expenses related to previously owned businesses primarily relates to environmental litigation costs, net of settlements, and costs to remediate environmental issues.

On December 31, 2008, the Company formed Rolls-Royce Goodrich Engine Control Systems Limited, a joint venture with Rolls-Royce Group plc (R-R), operating as Aero Engine Controls (JV). The Company recognized a net gain upon formation of the JV for the modification of arrangements with R-R and a pension curtailment gain net of transaction costs.

Note 6. Discontinued Operations

The following summarizes the results of discontinued operations:

	Year Ended December 31,		
	2009	2008	2007
	(Dollars in millions)		
Sales ATS	\$	\$	\$ 143.6
Operations ATS net of income tax expense of \$1.6 in 2007	\$	\$	\$ 2.8
Loss on the sale of ATS net of income tax benefit of \$37.8 in 2007			(15.4)
Previously discontinued operations net of tax expense of \$20.8 and \$0.7 in 2009 and 2008, respectively and net of tax benefit of \$0.6 in 2007	34.5	7.6	(0.8)
Income (loss) from discontinued operations net of income taxes	\$ 34.5	\$ 7.6	\$ (13.4)

During 2009, the income from discontinued operations related primarily to the resolution of litigation for an environmental matter at a divested business that had been previously reported as a discontinued operation and favorable resolution of other divestiture liabilities. See Note 17, Contingencies for a discussion of this matter.

During 2008, the Company sold a previously discontinued business for a gain of \$6.1 million.

During 2007, the Company completed the sale of ATS for \$55.3 million in cash, net of expenses, for a loss on the sale of \$15.4 million after tax. All periods have been reclassified to reflect ATS as a discontinued operation. The costs and revenues, assets and liabilities, and cash flows of ATS have been reported as a discontinued operation in the Company's consolidated financial statements.

Note 7. Share-Based Compensation

The compensation cost recorded for share-based compensation plans during 2009, 2008 and 2007 is presented below:

	Year Ended December 31,		
	2009	2008	2007
	(Dollars in millions, except per share amount)		

Compensation cost	\$ 66.7	\$ 36.4	\$ 70.0
Compensation cost net of tax benefit	\$ 43.2	\$ 23.9	\$ 43.4
Compensation cost per diluted share net of tax benefit	\$ 0.35	\$ 0.19	\$ 0.34

The increase of \$30.3 million from 2008 to 2009 and the decrease of \$33.6 million from 2007 to 2008 was primarily due to changes in the Company's share price for the Performance Units and Outside Director Phantom Share plans.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The total income tax benefit recognized in the income statement for share-based compensation awards was \$23.5 million, \$12.5 million and \$26.6 million for 2009, 2008 and 2007, respectively. There was no share-based compensation cost capitalized as part of inventory and fixed assets. As of December 31, 2009, total compensation cost related to nonvested share-based compensation awards not yet recognized was \$44.7 million, which is expected to be recognized over a weighted-average period of 2.1 years.

The Company administers the Goodrich Equity Compensation Plan (the Plan) as part of its long-term incentive compensation program. The Plan, as approved by the Company's shareholders, permits the Company to issue stock options, performance shares, restricted stock awards, restricted stock units and other equity-based compensation awards. Currently, the Plan which expires on April 17, 2011, unless renewed, makes 14,500,000 shares of common stock of the Company available for grant, together with shares of common stock available as of April 17, 2001 for future awards under the Company's 1999 Stock Option Plan, and any shares of common stock representing outstanding 1999 Stock Option Plan awards as of April 17, 2001 that are not issued or otherwise are returned to the Company after that date. Historically, the Company has issued shares upon exercise of options or vesting of other share-based compensation awards. During 2009, the Company repurchased shares under the plan to the extent required to meet the minimum statutory tax withholding requirements.

Stock Options

Generally, options granted on or after January 1, 2004 are exercisable at the rate of 33¹/₃% after one year, 66²/₃% after two years and 100% after three years. Prior to the 2008 grant, the expense related to options granted to retirement eligible individuals was recorded on the date the grants were approved since no future substantive service was required. Beginning with the 2008 grant, a one-year service period was required, whereby individuals who are retirement eligible and retire during the grant year will have their awards prorated based on their length of service during the year. Therefore, expense is recorded ratably over the grant year. Options granted to employees who will become retirement eligible prior to the end of the vesting term are expensed over the period through which the employee will become retirement eligible or the one year required service period, whichever is longer. Compensation expense for options granted to employees who are not retirement eligible is recognized on a straight-line basis over three years. The term of each stock option cannot exceed 10 years from the date of grant. All options granted under the Plan have an exercise price that is not less than 100% of the market value of the stock on the date of grant, as determined pursuant to the plan. Dividends are not paid or earned on stock options.

In January 2007, the Company granted special stock options with a seven-year term that included a market condition whereby the options vest when the price per share of the Company's stock closes at or above \$65.00 per share for any 5 business days during a 20 consecutive-business-day period. The fair value of each option award was estimated on the date of grant using a Monte Carlo simulation approach. The implicit service period was 1.5 years. During 2007, the market condition was met. Compensation cost recorded for the special stock options during 2007 was \$8.2 million.

The fair value of all other option awards is estimated on the date of grant using the Black-Scholes-Merton formula. The expected term of the options represents the estimated period of time until exercise and is based on historical experience of similar options. The Company does not issue traded options. Accordingly, the Company uses historical volatility instead of implied volatility. The historical volatility is calculated over a term commensurate with the expected term of the options. The risk-free rate during the option term is based on the U.S. Treasury yield curve in effect at the time of grant. The expected dividend yield is based on the expected

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

annual dividends during the term of the options divided by the fair value of the stock on the grant date. The fair value for options issued during 2009, 2008 and 2007 was based upon the following weighted-average assumptions:

	2009	2008	2007
Risk-free interest rate (%)	1.8	3.3	4.5
Expected dividend yield (%)	2.6	1.3	1.7
Historical volatility factor (%)	33.3	31.2	34.6
Weighted-average expected life of the options (years)	5.6	5.6	5.5

A summary of option activity during 2009 is presented below:

	Shares (In thousands)	Weighted Average Exercise Price	Weighted- Average Remaining Contractual Term	Aggregate Intrinsic Value (In millions)
Outstanding at January 1, 2009	4,547.3	\$ 42.90		
Granted	900.3	38.40		
Exercised	(817.3)	30.66		
Forfeited or expired	(38.5)	46.41		
Outstanding at December 31, 2009	4,591.8	\$ 44.16	6.5 years	\$ 78.0
Vested or expected to vest(1)	4,569.3	\$ 44.17	6.5 years	\$ 77.6
Exercisable at December 31, 2009	2,924.6	\$ 40.68	5.5 years	\$ 57.1

(1) Represents outstanding options reduced by expected forfeitures.

As of December 31, 2009, the compensation expense related to nonvested options not yet recognized was \$6.8 million. The weighted-average grant date fair value of options granted was \$9.68, \$21.35, and \$15.30 per option during 2009, 2008 and 2007, respectively.

During 2009, the amount of cash received from exercise of stock options was \$24.1 million and the tax benefit realized from stock options exercised was \$7.3 million. The total intrinsic value of options exercised during 2009, 2008 and 2007 was \$21 million, \$14 million and \$71.5 million, respectively.

Restricted Stock Units

Generally, 50% of the Company's restricted stock units vest and are converted to stock at the end of the third year, an additional 25% at the end of the fourth year and the remaining 25% at the end of the fifth year. In certain circumstances, the vesting term is a three or five-year cliff. Prior to the 2008 grant, the expense related to restricted stock units granted to retirement eligible individuals was recorded on the date the grants were approved since no future substantive service is required. Beginning with the 2008 grant, a one-year service period was required, whereby individuals who are retirement eligible and retire during the grant year will have their awards prorated based on their length of service during the grant year. Therefore, expense is recorded ratably over the grant year. Restricted stock units granted to employees who will become retirement eligible prior to the end of the vesting term are expensed over the period through which the employee will become retirement eligible or the one-year required service period, whichever is longer. Compensation expense for restricted stock units granted to employees who are not retirement eligible is recognized on a straight-line basis over the vesting

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

period. Cash dividend equivalents are paid to participants and are recognized as a reduction in retained earnings.

The fair value of the restricted stock units is determined based upon the average of the high and low grant date fair value. The weighted-average grant date fair value during 2009, 2008 and 2007 was \$38.39, \$69.48 and \$46.20 per unit, respectively.

A summary of the status of the Company's restricted stock units as of December 31, 2009 and changes during 2009 is presented below:

	Shares (In thousands)	Weighted- Average Grant Date Fair Value
Outstanding at January 1, 2009	1,730.6	\$ 48.56
Granted	533.5	38.39
Vested	(467.4)	37.10
Forfeited	(35.6)	49.19
Outstanding at December 31, 2009	1,761.1	\$ 48.51

As of December 31, 2009, there was \$27.3 million of total unrecognized compensation cost related to nonvested restricted stock units, which is expected to be recognized over a weighted-average period of 2.4 years. The total fair value of units vested during 2009, 2008 and 2007 was \$17.3 million, \$16.1 million and \$9.7 million, respectively. The tax benefit realized from vested restricted stock units was \$6.9 million during 2009.

Performance Units

Performance share units are paid in cash and are recorded as a liability and are marked to market each period. As such, assumptions are revalued for each award on an ongoing basis. The value of each award is determined based upon the fair value of the Company's stock at the end of the three-year term, as adjusted for both a performance condition and a market condition.

The performance condition is applied to 50% of the awards and is based upon the Company's actual return on invested capital (ROIC) as compared to a target ROIC, which is approved by the Compensation Committee of the Board of Directors. At each reporting period, the fair value represents the fair market value of the Company's stock as adjusted by expectations regarding the achievement of the ROIC target. Changes in expectations are recognized as cumulative adjustments to compensation expense.

The market condition is applied to the other 50% of the awards and is based on the Company's relative total shareholder return (RTSR) as compared to the RTSR of a peer group of companies, which is approved by the Compensation Committee of the Board of Directors. Because the awards have a market condition, it must be considered in the calculation of the fair value. The fair value of each award was estimated by an independent valuation

each reporting period using a Monte Carlo Simulation approach in a risk-neutral framework based upon historical volatility, risk free rates and correlation matrix. Because the award is recorded as a liability, the fair value is updated quarterly.

The units vest over a three-year term. Participants who are eligible for retirement are entitled to the pro rata portion of the units earned through the date of retirement, death or disability. Units due to retirees are not paid out until the end of the original three-year term at the fair

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

value calculated at the end of the term. Dividends accrue on performance units during the measurement period and are reinvested in additional performance units.

A summary of performance share unit activity during 2009 is presented below:

	Shares (In thousands)	Weighted- Average Fair Value	Weighted- Average Remaining Contractual Term	Aggregate Fair Value (In millions)
Outstanding at January 1, 2009	673.5	\$ 44.71		
Units granted, dividends reinvested and additional shares due to performance condition	173.0	45.80		
Converted and paid out	(268.6)	36.77		
Forfeited/canceled	(3.7)	38.06		
Outstanding at December 31, 2009	574.2	\$ 48.80	1.0 years	\$ 28.0
Vested or expected to vest(1)	571.2	\$ 48.71	1.0 years	\$ 27.8

(1) Represents outstanding units reduced by expected forfeitures.

As of December 31, 2009, the total compensation cost related to nonvested performance units not yet recognized was \$10.6 million. The weighted-average grant date fair value of units granted was \$42.64, \$77.12 and \$51.46 per unit during 2009, 2008 and 2007, respectively. The total payments during 2009, 2008 and 2007 were \$9.9 million, \$22.3 million and \$11.9 million, respectively.

Employee Stock Purchase Plan

The Company administers the Goodrich Corporation 2008 Global Employee Stock Purchase Plan. This plan is an umbrella plan under which sub-plans may be adopted for employees in different countries. Currently, there are two sub-plans; one for U.S. and Canadian employees and one for U.K. employees.

Under the U.S. and Canadian sub-plan, employees with two months of continuous service prior to an offering period are eligible to participate in the plan. Eligible employees may elect to become participants in the plan and may contribute up to \$12,000 per year through payroll deductions to purchase stock purchase rights. Participants may, at any time prior to December, cancel their payroll deduction authorizations and have the cash balance in their stock purchase rights account refunded. The offering period begins on January 1, or July 1 for new employees, and ends on December 31 of each year. The stock purchase rights are used to purchase the common stock of the Company at the lesser of: (i) 85% of the fair market value of a share as of the grant date applicable to the participant or (ii) 85% of the

fair market value of a share as of the last day of the offering period. The fair market value of a share is defined as the average of the closing price per share as reflected by composite transactions on the New York Stock Exchange throughout a period of ten trading days ending on the determination date. Dividends are not paid or earned on stock purchase rights.

The fair value of the stock purchase rights are calculated as follows: 15% of the fair value of a share of nonvested stock plus 85% of the fair value (call) of a one-year share option plus 15% of the fair value (put) of a one-year share option. The fair value of a one-year share option was

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

estimated at the date of grant using the Black-Scholes-Merton formula and the following assumptions:

	2009	2008	2007
Risk-free interest rate (%)	0.4	3.1	4.8
Expected dividend yield (%)	2.6	1.3	1.7
Historical volatility factor (%)	31.2	27.5	44.6
Weighted-average expected life of the option (years)	1.0	1.0	1.0

During 2009, 2008 and 2007, the weighted-average grant date fair value of rights granted was \$10.20, \$18.12 and \$11.98, respectively. The total intrinsic value of rights exercised during 2009, 2008 and 2007 was \$13.9 million, \$2.4 million and \$7.3 million, respectively. The annual employee contributions under the plan were \$12.3 million, \$10.4 million, and \$9 million during 2009, 2008 and 2007, respectively. The 2008 contributions were used to purchase stock during 2009.

In addition, the Company has a U.K. sub-plan for which employees with 90 days of continuous service prior to an invitation period are eligible to participate. Eligible employees that elect to become participants in the plan, can choose either a 3-year or a 5-year savings period, and may contribute up to £3,000 per year through payroll deductions to purchase stock purchase rights. Participants may, at any time prior to the end of the savings period, cancel their payroll deduction authorizations. The Company has the discretion to set the savings period each year. For 2009, the savings period began in April and will last for either three or five years depending on the savings period elected by the participant. Employee contributions in 2009 were \$2.4 million. The stock purchase rights are used to purchase the common stock of the Company at 80% of the market value of a share as of the invitation date applicable to the participant. The market value of a share is defined as the average of the closing price per share as reflected by the New York Stock Exchange for the three trading days immediately preceding the invitation date. Dividends are not paid or earned on stock purchase rights.

Other Plans***Outside Director Phantom Share Plan***

Each non-management Director receives an annual grant of phantom shares under the Outside Director Phantom Share Plan equal in value to \$90,000. Phantom shares are paid in cash and are recorded as a liability and are marked to market each period. Dividend equivalents accrue on all phantom shares and are credited to a Director's account. All phantom shares fully vest on the date of grant. Following termination of service as a Director, the cash value of the phantom shares will be paid to each Director in a single lump sum or in five or ten annual installments. The value of each phantom share is determined on the relevant date as the fair market value of the common stock of the Company on such date.

The phantom shares outstanding are recorded at fair market value. At December 31, 2009, the intrinsic value was \$11.3 million on approximately 174,000 phantom shares outstanding, reflecting a per share fair value of \$64.78. At December 31, 2008, the intrinsic value was \$5.5 million on approximately 149,000 phantom shares outstanding, reflecting a per share fair value of \$36.77. At December 31, 2007, the intrinsic value was \$9.6 million on approximately 136,000

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

phantom shares outstanding, reflecting a per share fair value of \$70.88. Cash payments during 2009, 2008 and 2007 were \$0.1 million, \$0.4 million and \$0.6 million, respectively.

Outside Director Deferral Plan

Non-management Directors may elect to defer annual retainer and meeting fees under the Outside Director Deferral Plan. The plan permits non-management Directors to defer a portion or all of the annual retainer and meeting fees into a phantom share account. Amounts deferred into the phantom share account accrue dividend equivalents. The plan provides that amounts deferred into the phantom share account are paid out in shares of common stock of the Company following termination of service as Director in a single lump sum, or five or ten annual installments.

The shares outstanding under the plan are recorded at the grant date fair value, which is the fair value of the common stock of the Company on the date the deferred fees would ordinarily be paid in cash. At December 31, 2009, approximately 100,000 shares were outstanding. The weighted-average grant date fair value per share was \$51.34, \$51.85 and \$62.29 during 2009, 2008 and 2007, respectively. During 2009, there were no awards converted to shares under this plan.

Note 8. Earnings Per Share

The computation of basic and diluted EPS for income from continuing operations is as follows:

	2009	2008	2007
	(In millions, except per share amounts)		
Numerator			
Numerator for basic and diluted EPS income from continuing operations attributable to Goodrich	\$ 562.8	\$ 673.6	\$ 496.0
Percentage allocated to common shareholders(1)	98.6%	98.6%	98.6%
Numerator for basic and diluted EPS	\$ 555.0	\$ 664.3	\$ 489.1
Denominator			
Denominator for basic EPS weighted-average shares	124.1	124.4	125.1
Effect of dilutive securities:			
Stock options, employee stock purchase plan and other deferred compensation shares	1.1	1.1	1.7
Denominator for diluted EPS adjusted weighted-average shares and assumed conversion	125.2	125.5	126.8
Per common share income from continuing operations			
Basic	\$ 4.47	\$ 5.34	\$ 3.91
Diluted	\$ 4.43	\$ 5.29	\$ 3.86

(1) Basic weighted-average common shares outstanding	124.1	124.4	125.1
Basic weighted-average common shares outstanding and unvested restricted share units expected to vest	125.8	126.2	126.8
Percentage allocated to common shareholders	98.6%	98.6%	98.6%

The Company's unvested restricted share units contain rights to receive nonforfeitable dividend equivalents, and thus, are participating securities requiring the two-class method of computing

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

EPS. The calculation of EPS for common stock shown above excludes the income attributable to the unvested restricted share units from the numerator and excludes the dilutive impact of those units from the denominator.

At December 31, 2009, 2008 and 2007, the Company had 4.6 million, 4.5 million and 4.2 million respectively, of outstanding stock options. Stock options are included in the diluted EPS calculation using the treasury stock method, unless the effect of including the stock options would be anti-dilutive. At December 31, 2009 and 2008, 0.9 million and 3 million anti-dilutive stock options, respectively, were excluded from the diluted EPS calculation. No stock options were excluded from the diluted EPS calculation at December 31, 2007.

Note 9. Fair Value Measurements

The Company defines fair value as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The following three levels of inputs are used to measure fair value:

Level 1 quoted prices in active markets for identical assets and liabilities.

Level 2 observable inputs other than quoted prices in active markets for identical assets and liabilities.

Level 3 unobservable inputs in which there is little or no market data available, which require the reporting entity to develop its own assumptions.

The Company's financial assets and (liabilities) measured at fair value on a recurring basis were as follows:

	Fair Value December 31,			Fair Value December 31,			Level 3	
	2009	Level 1	Level 2	Level 3	2008	Level 1		Level 2
	(Dollars in millions)							
Cash Equivalents(1)	\$ 470.1	\$ 470.1	\$	\$	\$ 291.5	\$ 291.5	\$	
Derivative Financial Instruments(2)								
Cash Flow Hedges	54.2		54.2		(156.1)		(156.1)	
Other Forward Contracts	(2.5)		(2.5)					
Rabbi Trust Assets(3)	45.0	45.0			41.9	41.9		
Long-term debt(4)	(2,144.0)		(2,144.0)		(1,418.5)		(1,418.5)	

(1) Because of their short maturities, the carrying value of these assets approximates fair value.

(2) See Note 18, Derivatives and Hedging Activities. Estimates of the fair value of the derivative financial instruments represent the Company's best estimates based on its valuation models, which incorporate industry

data and trends and relevant market rates and transactions.

- (3) Rabbi trust assets include mutual funds and cash equivalents for payment of certain non-qualified benefits for retired, terminated and active employees. The fair value of these assets was based on quoted market prices.
- (4) The carrying amount of the Company's long-term debt was \$2,001.9 million and \$1,404.3 million at December 31, 2009 and 2008, respectively. The fair value of long-term debt is based on quoted market prices or on rates available to the Company for debt with similar terms and maturities.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 10. Inventories**

Inventories consist of the following:

	December 31,	
	2009	2008
	(Dollars in millions)	
Average or actual cost (which approximates current costs):		
Finished products	\$ 225.6	\$ 225.2
In-process	1,485.6	1,253.6
Raw materials and supplies	667.6	595.7
	2,378.8	2,074.5
Less:		
Reserve to reduce certain inventories to LIFO basis	(51.5)	(56.2)
Progress payments and advances	(36.9)	(43.6)
Total	\$ 2,290.4	\$ 1,974.7

Approximately 6% and 9% of the inventory was valued under the LIFO method of accounting at December 31, 2009 and 2008, respectively. All other inventory is valued under the FIFO method of accounting. LIFO reserve adjustments, recorded as costs of sales, were a \$5 million gain, \$7 million loss and \$1 million loss for 2009, 2008 and 2007, respectively. The Company uses the LIFO method of valuing inventory for certain of the Company's legacy aerospace manufacturing businesses, primarily the aircraft wheels and brakes business unit in the Actuation and Landing Systems segment.

At December 31, 2009 and 2008, the amount of inventory consigned to customers and suppliers was approximately \$70 million and \$72 million, respectively.

In-process inventory includes \$827.7 million and \$633.1 million as of December 31, 2009 and 2008, respectively, for the following: (1) pre-production and excess-over-average inventory accounted for under long-term contract accounting; and (2) engineering costs recoverable under long-term contractual arrangements. The December 31, 2009 balance of \$827.7 million included \$454.6 million related to the Boeing 787 contract and \$139.8 million related to the Airbus A350 XWB contract.

In-process inventories which include deferred costs, are summarized by platform as follows (dollars in millions, except quantities which are number of aircraft or number of engines if the engine is used on multiple aircraft platforms):

December 31, 2009

Aircraft Order Status(1) (Unaudited)	Company Order Status (Unaudited)						In-Process Inventory			
	Delivered to Airlines	Unfilled Orders	Unfilled Options	Contract Quantity (2)	Firm Unfilled Orders (3)	Year Complete (4)	Production	Pre- Production and Excess- Over- Average	Total	
										number of aircraft
Aircraft Platforms										
787	851	226	1,861	26	2023	183.2	454.6	637.8		
A350 XWB	505	111	1,884		2030		139.8	139.8		
7Q7			19	2	2014		26.3	26.3		
Engine Type	number of engines (engines are used on multiple aircraft platforms)									
CF34-10	620	450	666	1,326	683	57	2013	6.4	29.6	36.0
Trent 900	60	300	88	945	117	271	2025	25.9	19.5	45.4
PW 1000G		230	110	1,880			2028		53.8	53.8
Other								102.1	39.1	141.2
Total in-process inventory related to long-term contracts under the contract accounting method of accounting							317.6	762.7	1,080.3	
A380 production and pre-production inventory							49.9	50.6	100.5	
Other in-process inventory							290.4	14.4	304.8	
Total							340.3	65.0	405.3	
Balance at December 31, 2009							\$ 657.9	\$ 827.7	\$ 1,485.6	

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****December 31, 2008**

	Aircraft Order Status(1) (Unaudited)			Company Order Status (Unaudited)			In-Process Inventory Pre- Production and Excess- Over- Average			Total
	Delivered to Airlines	Unfilled Orders	Unfilled Options	Contract Quantity (2)	Firm Unfilled Orders(3)	Year Complete(4)	Production	Average

Other								47.2	12.9	60.1
Total in-process inventory related to long-term contracts under the contract accounting method of accounting								257.4	585.0	842.4
A380 production and pre-production inventory								12.7	27.4	40.1
Other in-process inventory								350.4	20.7	371.1
Total								363.1	48.1	411.2
Balance at December 31, 2008								\$ 620.5	\$ 633.1	\$ 1,253.6

(1) Represents the aircraft order status as reported by independent sources for options of the related number of aircraft or the number of engines as noted.

(2) Represents the number of aircraft or the number of engines as noted used to obtain average unit cost.

(3) Represents the number of aircraft or the number of engines as noted for which the Company has firm unfilled orders.

(4) The year presented represents the year in which the final production units included in the contract quantity are expected to be delivered. The contract may continue in effect beyond this date.

(5) Amounts for these programs are reported in Other for the 2009 presentation.

Note 11. Goodwill and Identifiable Intangible Assets

The changes in goodwill by segment are as follows:

	Balance December 31, 2008	Business Combinations (Dollars in millions)	Foreign Currency Translation	Balance December 31, 2009
Actuation and Landing Systems	\$ 289.6	\$	\$ 13.0	\$ 302.6
Nacelles and Interior Systems	439.8		1.4	441.2
Electronic Systems	660.8	179.1(1)	3.3	843.2
	\$ 1,390.2	\$ 179.1	\$ 17.7	\$ 1,587.0

(1) On May 1, 2009, the Company acquired Cloud Cap Technology, Inc. (Cloud Cap) for \$29.2 million in cash, net of cash acquired. Based upon an independent valuation, identifiable intangibles were \$13.6 million and will be amortized over a weighted-average useful life of 11 years.

On December 21, 2009, the Company acquired AIS Global Holdings LLC (AIS), for \$362.2 million in cash, net of cash acquired. Based on the Company's preliminary purchase price allocation, \$228.2 million was identifiable intangible assets, \$165 million was goodwill

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

and \$76.8 million was net deferred tax liabilities primarily related to the intangible assets. The fair value of the intangible assets was based upon an independent valuation and will be amortized over a weighted-average useful life of 19 years. The ultimate purchase price allocation will be based on information that provides a better estimate of the fair value of assets acquired and liabilities assumed.

Goodwill and identifiable intangible assets are tested for impairment annually or when an event occurs or circumstances change such that it is reasonably possible that an impairment may exist. This testing requires comparison of carrying values to fair values, and when appropriate, the carrying value of impaired assets is reduced to fair value. There was no impairment of goodwill or identifiable intangible assets in 2009, 2008 or 2007.

Identifiable intangible assets as of December 31, 2009 consisted of:

	Gross Amount	Accumulated Amortization	Net
	(Dollars in millions)		
Patents, trademarks and licenses	\$ 171.8	\$ (108.3)	\$ 63.5
Customer relationships	469.8	(75.2)	394.6
Technology	194.6	(20.0)	174.6
Non-compete agreements	1.7	(1.2)	0.5
	\$ 837.9	\$ (204.7)	\$ 633.2

Identifiable intangible assets as of December 31, 2008 consisted of:

	Gross Amount	Accumulated Amortization	Net
	(Dollars in millions)		
Patents, trademarks and licenses	\$ 173.4	\$ (103.2)	\$ 70.2
Customer relationships	299.7	(59.4)	240.3
Technology	105.3	(13.6)	91.7
Non-compete agreements	1.7	(1.1)	0.6
	\$ 580.1	\$ (177.3)	\$ 402.8

Amortization expense related to these intangible assets for 2009, 2008 and 2007 was \$30.8 million, \$28.4 million and \$25.4 million, respectively. Amortization expense for these intangible assets is estimated to be approximately \$43 million per year from 2010 to 2014. There were no indefinite lived identifiable intangible assets as of December 31, 2009.

Note 12. Financing Arrangements

The Company has a \$500 million committed global syndicated revolving credit facility, which expires in May 2012. Interest rates under this facility vary depending upon:

The amount borrowed;

The Company's public debt rating by Standard & Poor's, Moody's and Fitch; and

At the Company's option, rates tied to the agent bank's prime rate or, for U.S. Dollar and Great Britain Pounds Sterling borrowings, the London Interbank Offered Rate and for Euro Dollar borrowings, the Euro Interbank Offered Rate.

At December 31, 2009, there were no borrowings and \$68 million in letters of credit outstanding under the facility. At December 31, 2008, there were no borrowings and \$35.6 million in letters of credit outstanding under the facility. The level of unused borrowing capacity varies from time

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

to time depending, in part, upon the Company's compliance with financial and other covenants set forth in the related agreement, including the consolidated net worth requirement and maximum leverage ratio. The Company is currently in compliance with all such covenants. Under the most restrictive of these covenants, \$1,772.5 million of income retained in the business and additional paid-in capital was free from such limitations at December 31, 2009. At December 31, 2009, the Company had borrowing capacity under this facility of \$432 million, after reductions for borrowings and letters of credit outstanding under the facility.

At December 31, 2009, the Company had letters of credit and bank guarantees of \$95.8 million, inclusive of \$68 million in letters of credit outstanding under the Company's syndicated revolving credit facility, as discussed above.

At December 31, 2009, the Company also maintained \$75 million of uncommitted U.S. money market facilities and \$161.8 million of uncommitted and committed foreign working capital facilities with various banks to meet short-term borrowing requirements. At December 31, 2009 and 2008, there were \$3.1 million and \$37.7 million, respectively, in borrowings outstanding under these facilities. These credit facilities are provided by a small number of commercial banks that also provide the Company with committed credit through the syndicated revolving credit facility described above and with various cash management, trust and other services.

In February 2009, the Company issued \$300 million principal amount of 6.125% senior notes due 2019, which were issued below par at \$297.7 million. The Company deferred approximately \$2 million of transaction costs. The discount and transaction costs will be amortized over the life of the senior notes.

In December 2009, the Company issued \$300 million principal amount of 4.875% senior notes due 2020, which were issued below par at \$299.3 million. The Company deferred approximately \$2.7 million of transaction costs. The discount and transaction costs will be amortized over the life of the senior notes.

Long-term Debt

At December 31, 2009 and 2008, long-term debt and capital lease obligations, excluding the current maturities, consisted of:

	December 31,	
	2009	2008
	(Dollars in millions)	
Medium-term notes payable (interest rates from 6.8% to 8.7)%	\$ 598.0	\$ 598.0

-------	--	------------	------------

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Aggregate maturities of long-term debt, exclusive of capital lease obligations, during the five years subsequent to December 31, 2009, are as follows (in millions): 2010 \$0 (classified as current maturities of long-term debt); 2011 \$0; 2012 \$261.5; 2013 \$0; and 2014 \$0.

The Company maintains a registration statement that allows the Company to issue debt securities, series preferred stock, common stock, stock purchase contracts and stock purchase units.

The Company has periodically issued long-term debt securities in the public markets through a medium-term note program (MTN), which commenced in 1995. MTN notes outstanding at December 31, 2009, consisted entirely of fixed-rate non-callable debt securities. All MTN notes outstanding were issued between 1995 and 1998.

Long-term Debt Repayments

The Company used a portion of the proceeds from the issuance of the \$300 million 6.125% senior notes to repay \$120 million for the 6.6% senior dues, which matured on May 15, 2009.

Note 13. Lease Commitments

The Company leases certain of its office and manufacturing facilities, machinery and equipment and corporate aircraft under various committed lease arrangements provided by financial institutions.

One of these arrangements allows the Company, rather than the lessor, to claim a deduction for tax depreciation on the asset and allows the Company to lease a corporate aircraft with a total commitment amount of \$43.8 million. For accounting purposes, the Company was deemed to be the owner of the aircraft during the construction period and recorded an asset with an offsetting lease obligation of approximately \$32 million. This lease will qualify for sales-leaseback treatment upon lease commencement in 2011 and will be priced at a spread over LIBOR.

The future minimum lease payments from continuing operations, by year and in the aggregate, under capital leases and under noncancelable operating leases with initial or remaining noncancelable lease terms in excess of one year, consisted of the following at December 31, 2009:

	Capital Leases	Noncancelable Operating Leases
	(Dollars in millions)	
2010	\$ 1.1	\$ 38.6
2011	0.9	30.5
2012	0.8	21.7
2013	0.8	18.3
2014	0.8	13.8
Thereafter	6.1	52.0
Total minimum payments	10.5	\$ 174.9

Amounts representing interest	(3.8)
Present value of net minimum lease payments	6.7
Current portion of capital lease obligations	(0.5)
Long-term portion of capital lease obligations	\$ 6.2

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Net rent expense from continuing operations for 2009, 2008 and 2007 was \$46.2 million, \$48.8 million and \$49.3 million, respectively. These amounts are net of immaterial amounts of sublease rental income.

Note 14. Pensions and Postretirement Benefits

The Company has several defined benefit pension plans covering eligible employees. U.S. plans covering salaried and non-union hourly employees generally provide benefit payments using a formula that is based on an employee's compensation and length of service. Plans covering union employees generally provide benefit payments of stated amounts for each year of service. Plans outside of the U.S. generally provide benefit payments to eligible employees that relate to an employee's compensation and length of service. The Company also sponsors several unfunded defined benefit postretirement plans that provide certain health care and life insurance benefits to eligible employees in the U.S. and Canada. The health care plans are both contributory, with retiree contributions adjusted periodically, and non-contributory and can contain other cost-sharing features, such as deductibles and coinsurance. The life insurance plans are generally noncontributory.

Amortization of prior service cost is recognized on a straight-line basis over the average remaining service period of active employees. Amortization of actuarial gains and losses is recognized using the corridor approach, which is the minimum amortization required. Under the corridor approach, actuarial net gain or loss in excess of 10% of the greater of the projected benefit obligation or the market-related value of the assets is amortized on a straight-line basis over the average remaining service period of the active employees.

Pension plans, defined contribution plans and postretirement benefits other than pensions include amounts related to divested and discontinued operations.

Amounts Recognized in Accumulated Other Comprehensive Income (Loss)

Following are the amounts included in accumulated other comprehensive income (loss) as of December 31, 2009 and 2008 and the amounts arising during 2009 and 2008. There are no transition obligations.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

	Net Actuarial Loss	Prior Service Cost	Before Tax	Total Tax	After Tax
	(Dollars in millions)				
AMOUNTS RECOGNIZED IN ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS):					
Unrecognized (loss) at December 31, 2007	\$ (706.2)	\$ (12.2)	\$ (718.4)	\$ 285.6	\$ (432.8)
Amount recognized in net periodic benefit cost	52.2	4.4	56.6		
Amount due to January 1, 2008 valuation	(15.8)		(15.8)		
Amount due to plan changes		(12.2)	(12.2)		
Amount due to mid-year remeasurement	1.1		1.1		
Amount due to curtailment	11.2	(3.4)	7.8		
Amount due to settlement	(0.6)		(0.6)		
Foreign currency gain/(loss)	3.6	(3.0)	0.6		
Amount due to year end remeasurement	(711.7)		(711.7)		
Unrecognized (loss) at December 31, 2008	\$ (1,366.2)	\$ (26.4)	\$ (1,392.6)	\$ 487.1	\$ (905.5)
Amount recognized in net periodic benefit cost	113.8	7.4	121.2		
Amount due to January 1, 2009 valuation	4.9		4.9		
Amount due to plan changes		(2.7)	(2.7)		
Amount due to settlement	(0.4)		(0.4)		
Foreign currency gain/(loss)	(18.0)	0.3	(17.7)		
Amount due to year end remeasurement	(105.2)		(105.2)		
Unrecognized (loss) at December 31, 2009	\$ (1,371.1)	\$ (21.4)	\$ (1,392.5)	\$ 524.2	\$ (868.3)

The unrecognized loss at December 31, 2009 includes \$0.9 million for the Company's share of the accumulated other comprehensive loss from a JV. This loss decreased our investment in the JV.

The amount of actuarial loss and prior service cost expected to be recognized in net periodic benefit cost during 2010 are approximately \$120 million (\$75 million after tax) and approximately \$6 million (\$4 million after tax) respectively.

PENSIONS

The following table sets forth the Company's defined benefit pension plans as of December 31, 2009 and 2008 and the amounts recorded in the consolidated balance sheet. Company contributions include amounts contributed directly to plan assets and indirectly as benefits are paid from the Company's assets. Benefit payments reflect the total benefits paid from the plan and the Company's assets. Information on the U.S. plans includes both the qualified and non-qualified plans. The fair value of assets for the U.S. plans excludes \$61 million and \$71 million held in a rabbi

trust, which includes cash surrender value of life insurance policies, equity and fixed

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

income mutual funds and cash and cash equivalents, designated for the non-qualified plans as of December 31, 2009 and 2008, respectively.

Rate of compensation increase	4.10%	4.10%	3.86%	3.75%	3.75%	3.50%	3.31%	3.38%	3.36%

The special termination benefit charges in 2009 and 2007 related primarily to reductions in force in several businesses in the U.K.

Pension assumptions were reevaluated on September 12, 2008 and on December 5, 2008 for the remeasurement of a U.S. nonqualified plan for retirement settlements resulting in a settlement loss of \$0.6 million. On December 31, 2008, in connection with the formation of a JV as described in Note 5, Other Income (Expense) Net, the Company recorded a curtailment gain of \$3.4 million in the U.K. Goodrich Pension Scheme. The curtailment and remeasurement decreased accumulated other comprehensive income by \$7.8 million before tax or \$5.1 million after tax. Also, a change to a French pension plan resulted in a settlement gain of \$0.4 million and \$1.2 million for 2009 and 2008 respectively.

On September 21, 2007, a definitive agreement to divest ATS was reached and assumptions for the U.S. qualified pension plans were reevaluated to remeasure the plan obligations and assets. In connection with the remeasurement, there was a curtailment loss of \$6 million reported in discontinued operations for 2007. The remeasurement and curtailment increased accumulated other comprehensive income by \$150.5 million before tax, or \$91.9 million after tax.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Expected Pension Benefit Payments**

Pension benefit payments, which reflect expected future service, are estimated to be as follows:

Year	U.S. Plans	U.K. Plans	Other Plans
	(Dollars in millions)		
2010	\$ 191.2	\$ 6.8	\$ 3.5
2011	195.3	7.0	3.8
2012	194.7	7.2	4.3
2013	204.7	7.4	5.2
2014	199.6	7.6	5.5
2015 to 2019	1,053.0	41.8	40.5

Asset Valuation

The assets of the Company's worldwide defined benefit plans (Global Plans) are measured at fair value (FV). FV and the FV measurement levels are explained in Note 9, "Fair Value Measurements". For pension assets, FV is principally determined using a market approach based on quoted prices or other relevant information from observable market transactions involving identical or comparable assets. When market prices are not available, FV is estimated using an income approach to discount future cash flows combined with current observable market inputs for similar assets with comparable terms and credit quality.

Following is a description of the various classes of the Global Plans' assets categorized by the methods and inputs used for valuing them.

Derivatives Level 2

Derivatives are related to futures and forward contracts used to manage a portion of the interest rate and currency exposure. The derivative financial instruments are valued using a market approach based on prices obtained from primary or secondary exchanges for exchange-traded derivatives or using proprietary pricing models which incorporate observable inputs including volatility, index levels, interest rates, yield curves, prepayment speeds, default rates and other market-corroborated inputs.

Common Stock and Real Estate Investment Trusts (REITs) Level 1

These are individual equities traded on an open market where quoted prices are determinable and available. The investments are valued using a market approach primarily based on prices obtained from the primary or secondary exchanges on which they are traded.

Commingled Funds (Applicable to Money Market, Equity and Fixed Income Investments) Level 2

The commingled funds are institutional investment instruments valued at the FV of the ownership interests in the funds. The Net Asset Value (NAV) per unit (provided by the fund administrator) is the primary input into the valuation of the ownership interest. The NAV is based on the FV of the underlying assets owned by the fund, minus its liabilities, divided by the number of shares outstanding. Commingled investment funds generally are leveled based upon the observability of the prices or inputs used to value the underlying portfolio instruments, which are money market, U.S. and international equity, and fixed income securities. These instruments are valued using a market approach with either unadjusted quotes in active markets (Level 1) or quoted prices for similar assets or other observable inputs (Level 2). The Company is required to

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

classify these assets according to the lowest level used in their valuation, which accordingly classifies them within Level 2. In addition to the NAV, consideration is given to any specific rights or obligations that pertain to investments in the commingled investment fund, which if deemed significant, may adjust the FV of the ownership interest and result in a lower, less observable FV hierarchy level. There are no significant specific rights or obligations pertaining to these commingled funds that require an adjustment to the FV.

A portion of the assets are invested in a global tactical asset allocation (GTAA) fund. The GTAA is a specialized commingled fund which utilizes a variety of daily valued funds to tactically gain exposure to certain U.S. and international equity and fixed income markets. For reporting classes, the component investments of the GTAA are separated into the equity or fixed income commingled fund classifications, as applicable.

United States Treasuries Level 1

U.S. Treasury bonds, bills and STRIPS are valued using a market approach primarily based on prices obtained from the primary or secondary exchanges on which they are traded.

Government, Corporate and Asset Backed Obligations Level 2

Individual fixed income securities, primarily government, corporate and asset and mortgage backed obligations, are valued either (1) based on market transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders, including consideration of yield or price of securities of comparable quality, coupon, maturity and type or (2) based on quotes from bankers, brokers, dealers or other qualified appraisers. FV is within a bid-ask spread and is considered to be the price at which the security would be exited. These investments are valued principally using a market approach, which may include matrix pricing to value securities on quoted prices combined with their relationships to other benchmark quoted securities and indices. Certain securities may be valued using an income approach based on cash flows and observable inputs such as discount rates, industry research reports, the value of underlying assets or guarantees and issue structure.

Real Estate Level 3

The assets are two institutional real estate commingled funds valued using the NAV. The underlying assets are valued using unobservable inputs from the fund manager principally annual third party appraisals based on market, income or cost valuation techniques. Unobservable inputs would include prices of sales of similar properties, estimates of operating income, discount rates and estimates of reproduction or replacements costs.

Securities Lending Collateral Fund Level 2

The Company participates in a securities lending program which uses a money market commingled fund as the collateral fund which is invested in liquid assets of investment grade companies. The entire collateral fund is valued using a NAV derived from the FV of the underlying securities. Please see above discussion in Commingled Funds.

During 2008, certain investments in the collateral fund became impaired due to the bankruptcy of those investments. The value of these securities will not be known until the bankruptcy proceedings are concluded. However, the fund administrator entered into support agreements with investors, including the Company, that segregated these assets from the rest of the collateral fund and created floor values for the valuation of these impaired investments. The impaired assets are valued using the greater of the average of street broker quotes or the support agreement price of

80%.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Guaranteed Investment Contracts (GICs) Level 2**

GICs are insurance contracts that guarantee the owner principal repayment and a fixed or floating interest rate for a pre-determined amount of time. GICs provide institutional investors with guaranteed returns. The fund is valued using a NAV derived from the FV of the underlying securities. Please see above discussion in Commingled Funds.

Balanced Funds Level 2

These funds invest across all asset types within one mutual fund portfolio, including U.S. and international equities, fixed income securities, property, alternative assets and cash. The fund is valued using a NAV derived from the FV of the underlying securities. Please see above discussion in Commingled Funds.

The table below presents the classes and FV levels for the Global Plans assets as of December 31, 2009 and 2008.

	December 31, 2009			December 31, 2008

FV December 31, 2009	\$	125.9

Asset Allocation and Investment Policy***U.S. Qualified Pension Plans***

The Company's U.S. qualified pension plans were underfunded at December 31, 2009. Approximately 69% of the plans' liabilities related to retired and inactive employees. Benefit payments from the plans were \$176 million and \$179 million in 2009 and 2008, respectively.

The Company's asset allocation strategy for the plans is designed to balance the objectives of achieving high rates of return while reducing the volatility of the plans' funded status and the Company's pension expense and contribution requirements. The expected long-term rate of return assumptions used for 2009 and 2008 were 8.75% and 9% per year, respectively.

No Company common stock was held directly by the plans at December 31, 2009 and 2008.

The plans' fixed income assets have a target duration of 100% to 150% of the plans' liabilities and are designed to offset 30% to 60% of the effect of interest rate changes on the plans' funded status. By investing in long-duration bonds, the plans are able to invest more assets in equities and real estate, which historically have generated higher returns over time, while reducing the volatility of the plans' funded status.

The table below sets forth the U.S. Trust's 2010 target asset allocation and the actual asset allocations at December 31, 2009 and 2008.

Asset Category	Target Allocation	Actual Allocation At December 31, 2009	Actual Allocation At December 31, 2008
Equities U.S. Large Cap	30-40%	34%	29%
Equities U.S. Mid Cap	3-5%	4%	3%
Equities U.S. Small Cap	3-5%	4%	3%
Equities International	10-15%	12%	7%
Equities Total	50-60%	54%	42%
Fixed Income U.S.	30-40%	37%	48%
Real Estate	5-10%	6%	10%
Cash	0-1%	3%	0%
Total	100%	100%	100%

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The majority of the portfolio assets are invested in U.S. and international equities, fixed income securities and real estate, consistent with the target asset allocation, and is rebalanced to the target on a periodic basis. A portion of the assets, typically between 10% and 15%, is actively managed in a global tactical asset allocation strategy, where day-to-day allocation decisions are made by the investment manager based on relative expected returns of stocks, bonds and cash in the U.S. and various international markets. The global tactical asset allocation strategy also has a currency management component that is unrelated to the asset allocation positioning of the portfolio.

Tactical changes to the duration of the fixed income portfolio are made periodically. The actual duration of the fixed income portfolio was approximately 12 and 15 years at December 31, 2009 and 2008, respectively.

U.K. Pension Plan

The Company's U.K. defined benefit pension plans were underfunded at December 31, 2009. Approximately 41% of the U.K. defined benefit pension plans' liabilities related to retired and inactive employees. Benefit payments from the plans were \$15.8 million and \$8.5 million in 2009 and 2008, respectively.

The primary asset allocation objective is to generate returns that, over time, will meet the future payment obligations of the plan without requiring material levels of cash contributions. Since the plan's obligations are paid in Great Britain Pounds Sterling, the plan invests approximately 75% of its assets in U.K.-denominated securities. Fixed income assets have a duration of about 13 years and are designed to offset approximately 15% to 20% of the effect of interest rate changes on the plan's funded status. The plan assets are rebalanced to the target on a periodic basis.

The table below sets forth the plan's target asset allocation for 2010 and the actual asset allocations at December 31, 2009 and 2008.

Asset Category	Target Allocation	Actual Allocation At December 31, 2009	Actual Allocation At December 31, 2008
	2010		
Equities U.K.	25-30%	34%	33%
Equities Global including-U.K.	25-30%	28%	29%
Equities Total	50-60%	62%	62%
Fixed Income U.K.	32-38%	35%	37%
Real Estate	8-12%	0%	0%
Cash	0%	3%	1%
Total	100%	100%	100%

Assumptions***U.S. Qualified Pension Plans***

The U.S. discount rate determined at December 31, 2009 and 2008 was based on a customized yield curve approach. The Company's pension and postretirement benefit payment cash flows were each plotted against a U.S. yield curve composed of a large, diverse group of Aa-rated corporate bonds. The resulting discount rates were used to determine

the benefit obligations as of December 31, 2009 and 2008.

The long-term asset return assumption for the U.S. plans for 2009 and 2008 was 8.75% and 9% per annum, respectively. Due to the risk that fundamental changes in the capital markets will result in lower future long term returns, the assumption was lowered for 2009. This assumption is based on an analysis of historical returns for equity, fixed income and real estate

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

markets and the Company's strategic portfolio allocation. Equity and real estate returns were determined by analysis of historical benchmark market data. Returns in each equity class were developed from up to 54 years of historical data. The weighted-average return of all equity classes was 10% per annum. Real estate returns were developed from up to 32 years of historical data. The resulting return was 9.2% per annum. The return estimate for the fixed income portion of the trust portfolio is based on the average yield to maturity of the assets as of December 1, 2009 and was 5.7% per annum. The fixed income portion of the portfolio is based on a long duration strategy. As a result, the yield on this portfolio may be higher than that of a typical fixed income portfolio in a normal yield curve environment.

The RP2000 mortality table with projected improvements for life expectancy using Scale AA phased-out by the year 2015 was used for determination of the benefit obligations as of December 31, 2009 and 2008.

U.K. Pension Plan

The U.K. discount rate at December 31, 2009 and 2008 was determined based on cash flows from a benchmark plan with similar duration as the U.K. Plan, plotted against a yield curve of a large diverse group of Aa-rated corporate bonds.

The long-term asset return assumption for the plan is 8.5% per annum, based on an analysis of historical returns for equity and fixed income securities denominated in Great Britain Pounds Sterling. Equity returns were determined by analysis of historical benchmark market data. Returns in each equity class were developed from up to 40 years of historical data. The weighted-average return of all equity classes was 9.3% per annum. The return estimate for the fixed income portion of the portfolio is based on the average yield to maturity of the assets as of December 1, 2009 of approximately 2.1% per annum.

Anticipated Contributions to Defined Benefit Plans and Trusts

During 2010, the Company expects to contribute \$100 million to \$150 million to its worldwide qualified and non-qualified pension plans.

U.S. Non-Qualified Pension Plan Funding

The Company maintains non-qualified pension plans in the U.S. to accrue retirement benefits in excess of Internal Revenue Code limitations and other contractual obligations. For December 31, 2009 and 2008, \$61 million and \$71 million, respectively, was held in a rabbi trust for payment of future non-qualified pension benefits for certain retired, terminated and active employees. The assets consist of cash surrender value of life insurance policies, equity and fixed income mutual funds and cash and cash equivalents. The assets of the rabbi trust, which do not qualify as plan assets and, therefore, are not included in the tables in this note, are available to pay pension benefits to these individuals, but are otherwise unavailable to the Company. The assets, other than approximately \$28 million as of December 31, 2009 and 2008 which are assigned to certain individuals if benefit payments to these individuals are not made when due, are available to the Company's general creditors in the event of insolvency.

Defined Contribution Plans

In the U.S., the Company maintains voluntary U.S. retirement savings plans for salaried and wage employees. For 2009, 2008 and 2007, the Company's cost was \$49.8 million, \$47.1 million and \$42.8 million, respectively.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company also maintains defined contribution retirement plans for certain non-U.S. subsidiaries. For 2009, 2008 and 2007, the Company's contributions were \$6.8 million, \$5.3 million and \$3.6 million, respectively.

POSTRETIREMENT BENEFITS OTHER THAN PENSIONS

The following table sets forth the status of the Company's defined benefit postretirement plans other than pension as of December 31, 2009 and 2008, and the amounts recorded in the Company's consolidated balance sheet. The postretirement benefits related to divested and discontinued operations retained by the Company are included in the amounts below.

	2009	2008
	(Dollars in millions)	
Change in Projected Benefit Obligations		
Projected benefit obligation at beginning of year	\$ 342.3	\$ 394.1
Service cost	1.4	1.7
Interest cost	19.6	22.0
Amendments		(0.4)
Actuarial (gains) losses	2.3	(47.8)
Foreign currency translation/Other	0.2	0.2
Gross benefits paid	(37.7)	(30.7)
Federal subsidy received	3.4	3.2
Projected benefit obligation at end of year	\$ 331.5	\$ 342.3
Weighted-Average Assumptions used to Determine Benefit Obligations as of December 31		
Discount rate	5.55%	6.38%
Change in Plan Assets		
Fair value of plan assets at beginning of year	\$	\$
Company contributions	37.7	30.7
Gross benefits paid	(37.7)	(30.7)
Fair value of plan assets at end of year	\$	\$
Funded Status (Underfunded)	\$ (331.5)	\$ (342.3)
Amounts Recognized in the Balance Sheet Consist of:		
Accrued expenses – current liability	\$ (30.4)	\$ (32.9)
Postretirement benefits other than pensions – non-current liability	(301.1)	(309.4)
Net liability recognized	\$ (331.5)	\$ (342.3)
Accumulated other comprehensive income (loss) – before tax	\$ (23.2)	\$ (20.7)

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

For measurement purposes, a 7.3% annual rate of increase in the per capita cost of covered health care benefits was assumed for 2010. The rate was assumed to decrease gradually to 5% in 2015 and remain at that rate thereafter.

	Year Ended December 31,		
	2009	2008	2007
	(Dollars in millions)		
Components of Net Periodic Benefit Cost:			
Service cost	\$ 1.4	\$ 1.7	\$ 2.0
Interest cost	19.6	22.0	22.9
Amortization of prior service cost	(0.2)	(0.2)	(0.2)
Recognized net actuarial (gain) loss		2.3	3.6
Net periodic benefit cost	\$ 20.8	\$ 25.8	\$ 28.3
Weighted-Average Assumptions used to Determine Net Periodic Benefit Cost			
Discount rate	6.38%	6.12%	5.79%

The table below quantifies the impact of a one-percentage point change in the assumed health care cost trend rate.

	One Percentage Point Increase	One Percentage Point Decrease
	(Dollars in millions)	
Increase (Decrease) in		
Total of service and interest cost components in 2009	\$ 1.2	\$ (1.1)
Accumulated postretirement benefit obligation as of December 31, 2009	\$ 21.7	\$ (19.2)

Expected Postretirement Benefit Payments Other Than Pensions

Benefit payments for other postretirement obligations other than pensions, which reflect expected future service are expected to be paid as follows:

Year	Expected Employer Payments	Medicare Subsidy	Net Payments
	(Dollars in millions)		
2010	\$ 33.7	\$ (2.5)	\$ 31.2
2011	33.7	(2.5)	31.2

Edgar Filing: GOODRICH CORP - Form 10-K

2012	33.3	(2.5)	30.8
2013	32.7	(2.5)	30.2
2014	32.1	(2.5)	29.6
2015 to 2019	146.0	(11.8)	134.2

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 15. Income Taxes**

Income from continuing operations before income taxes as shown in the consolidated statement of income consists of the following:

	Year Ended December 31,		
	2009	2008	2007
	(Dollars in millions)		
Domestic	\$ 552.2	\$ 738.4	\$ 524.4
Foreign	231.9	246.2	213.0
TOTAL	\$ 784.1	\$ 984.6	\$ 737.4

A summary of income tax (expense) benefit from continuing operations in the consolidated statement of income is as follows:

	Year Ended December 31,		
	2009	2008	2007
	(Dollars in millions)		
Current			
Federal	\$ (43.9)	\$ (118.4)	\$ (62.0)
Foreign	(18.4)	(4.1)	9.7
State	(6.8)	(18.8)	(13.7)
	(69.1)	(141.3)	(66.0)
Deferred			
Federal	(128.9)	(141.6)	(109.5)
Foreign	(7.4)	(22.9)	(35.2)
State	(2.4)	12.8	(10.2)
	(138.7)	(151.7)	(154.9)
TOTAL	\$ (207.8)	\$ (293.0)	\$ (220.9)

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Significant components of deferred income tax assets and liabilities at December 31, 2009 and 2008 are as follows:

	2009	2008
	(Dollars in millions)	
Deferred income tax assets		
Pensions	\$ 309.7	\$ 313.2
Tax credit and net operating loss carryovers	100.1	112.8
Postretirement benefits other than pensions	137.8	142.1
Inventories	49.6	55.8
Other nondeductible accruals	156.1	145.6
Foreign currency hedges		65.8
Employee benefits plans	56.4	54.1
Other	8.6	1.9
Deferred income tax assets	818.3	891.3
Less: valuation allowance	(54.9)	(50.7)
Total deferred income tax assets	763.4	840.6
Deferred income tax liabilities		
Tax over book depreciation	(125.3)	(114.3)
Intangible assets	(367.3)	(272.1)
Foreign currency hedges	(9.8)	
Pre-production and contract accounting	(327.4)	(259.7)
Other	(32.7)	(36.3)
Total deferred income tax liabilities	(862.5)	(682.4)
Net deferred income tax asset (liability)	\$ (99.1)	\$ 158.2

Deferred tax assets and liabilities are recorded for tax carryforwards and the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting and income tax purposes and are measured using enacted tax laws and rates. A valuation allowance is provided on deferred tax assets if it is determined that it is more likely than not that the asset will not be realized.

At December 31, 2009, the Company had net operating loss and tax credit carryforward benefits of approximately \$100.1 million which will expire in the years 2010 through 2030. For financial reporting purposes a valuation allowance of \$55 million was recognized to offset the deferred tax asset relating to those carryforward benefits. The net change in the total valuation allowance for 2009 was an increase of \$4 million.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company adopted the provisions included within the Income Taxes subtopic of the ASC related to the accounting for uncertain income tax positions on January 1, 2007. A reconciliation of the beginning and ending amount of unrecognized tax benefits, in millions of dollars, was as follows:

Balance at January 1, 2008	\$ 106.3
Additions based on tax positions related to current year	9.6
Additions for tax positions of prior years	45.2
Reductions for tax positions of prior years	(24.3)
Settlements	(5.5)
Balance at December 31, 2008	\$ 131.3
Additions based on tax positions related to current year	9.9
Additions for tax positions of prior years	3.1
Reductions for tax positions of prior years	(1.4)
Settlements	(4.9)
Balance at December 31, 2009	\$ 138.0

Included in the balance at December 31, 2009, are \$0.8 million of tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility. Because of the impact of deferred tax accounting, other than interest and penalties, the disallowance of the shorter deductibility period would not affect the annual effective tax rate but would accelerate the payment of cash to the taxing authority to an earlier period. The total amount of unrecognized benefits that, if recognized, would have affected the effective tax rate was \$210.3 million. The Company recognizes interest and penalties related to unrecognized tax benefits in income tax expense. During 2009, 2008, and 2007, the Company recognized adjustments to income tax expense for interest and penalties of a \$9.5 million gain, a \$22.5 million loss, and a \$17.6 million loss, respectively. The Company had approximately \$148.6 million and \$158.1 million for the payment of interest and penalties accrued at December 31, 2009 and 2008, respectively.

The Company or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction, various U.S. state jurisdictions and foreign jurisdictions. The Company is no longer subject to U.S. federal examination for years before 2006 and with few exceptions, state and local examinations for years before 2000 and non-U.S. income tax examinations for years before 2002. In late 2009, the U.S. Internal Revenue Service (IRS) began examination of the tax years 2007 and 2008. For a discussion of uncertainties related to tax matters see Note 17, Contingencies .

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The effective income tax rate from continuing operations varied from the statutory federal income tax rate as follows:

	2009		2008		2007	
	%	(Dollars in millions)	%	(Dollars in millions)	%	(Dollars in millions)
Income from continuing operations before income taxes		\$ 784.1		\$ 984.6		\$ 737.4
Statutory federal income tax rate	35.0%		35.0%		35.0%	
State and local taxes	0.9%	\$ 7.1	(0.1)%	\$ (0.9)	2.8%	\$ 20.9
Tax benefits related to domestic manufacturing	(0.9)%	\$ (7.4)	(0.8)%	\$ (8.2)	(2.3)%	\$ (17.2)
Tax credits	(3.0)%	\$ (23.8)	(2.2)%	\$ (21.3)	(2.7)%	\$ (19.8)
Deemed repatriation of non-U.S. earnings	1.8%	\$ 14.0	0.9%	\$ 8.8	1.5%	\$ 11.3
Differences in rates on foreign subsidiaries	(4.3)%	\$ (33.8)	(4.8)%	\$ (47.9)	(3.8)%	\$ (27.9)
Interest on potential tax liabilities	(1.0)%	\$ (7.7)	0.8%	\$ 8.2	0.8%	\$ 6.2
Tax settlements and other adjustments to tax reserves (See Note 17)	1.0%	\$ 7.5	1.8%	\$ 18.2	1.1%	\$ 7.8
Other items	(3.0)%	\$ (22.6)	(0.8)%	\$ (8.5)	(2.4)%	\$ (18.4)
Effective income tax rate	26.5%		29.8%		30.0%	

The Company has not provided for U.S. deferred income taxes or foreign withholding tax on basis differences in its non-U.S. subsidiaries of approximately \$591 million that result primarily from the remaining undistributed earnings the Company intends to reinvest indefinitely. Determination of the potential liability on these basis differences is not practicable because such liability, if any, is dependent on circumstances existing if and when remittance occurs.

Note 16. Supplemental Balance Sheet Information**Allowance for Doubtful Accounts**

The changes in accounts receivable allowances for doubtful accounts were as follows:

Balance Beginning of Year	Charged to Expense	Foreign Currency Translation and Other	Write-Off of Doubtful Accounts	Balance at end of Year
(Dollars in millions)				

Edgar Filing: GOODRICH CORP - Form 10-K

Short-Term	\$ 14.3	\$ 8.1	\$ (1.9)	\$ (3.3)	\$ 17.2
Long-Term(1)	28.9			(28.9)	
Year ended December 31, 2008	\$ 43.2	\$ 8.1	\$ (1.9)	\$ (32.2)	\$ 17.2
Year ended December 31, 2009	\$ 17.2	\$ 2.9	\$ 0.2	\$ (2.3)	\$ 18.0

(1) Long-term allowance is related to the Company's notes receivable in other assets from a receivable obligor. This note receivable was written off in 2008.
