Summary of Common Institutional ETF Uses Cash Equitization Remain fully invested while maintaining ETFs are an attractive alternative solution to liquidity. futures due to their transparency, lack of documentation and roll slippage. Liquidity Management Increase liquidity in overall asset allocation Use SPDR ETFs for a given percentage of without changing allocation. each asset class to provide a liquidity buffer across the asset allocation. Transitions Maintain market exposure while searching for invest proceeds of a manager liquidation in a new manager. SPDR ETF until new manager has been selected. Rebalancing Increase the speed and efficiency of SPDR ETFs can make rebalancing more rebalancing across the asset allocation. efficient than moving assets from illiquid managers. Asset Class Exposure: Gold Establish exposure to a certain market SPDR Gold Shares (GLD) is the most liquid, segment such as gold. cost effective means of establishing exposure to physical gold bullion. Tactical Asset Allocation Over or underweight certain market SPDR ETFs represent virtually every asset segments based on short term outlook. class and offer efficient vehicles for implementing a short term outlook. Portfolio Completion FHI any asset allocation holes without Use a SPDR ETF to gain exposure to an asset engaging a new investment manager. class that is underrepresented in the asset allocation. Fixed Income Duration and Tweak duration and credit exposure to meet Our broad array of SPDR Fixed Income ETFs Credit Adjustments specified targets. provide an efficient means to adjust duration and credit exposure. Small Institutional Plans Implement desired asset allocation Implement asset allocation efficiently using regardless of plan size. SPDR ETFs. Advantages include no minimum fees and simplified rebalancing. Institutional Uses of SPDR ETFs

Case Study 1: Cash Equitization Sample Situation: A fund manager using MSCI ACWI ex-US as benchmark would like to equitize cash holdings to minimize cash drag. Challenge; The fund manager needs to maintain a certain level of liquid assets in order to meet normal redemption requests. Utilizing futures would trigger roll costs which would outweigh the benefits of eliminating cash drag in the portfolio. ETF Solution: The SPDR MSCI ACWI ex-US ETF [ticker CWI] allows the portfolio manager to fully invest the fund's cash position daily, eliminating cash drag while maintaining liquidity to meet redemption requests. Institutional Uses of SPDR ETFs

Case Study 2: Liquidity Management Sample Situation: A pension plan would like to enhance liquidity across their asset allocation as they realized they had inadequately managed liquidity risk in the recent market cycle. Challenge: Maintaining liquid exposure to various asset classes without readjusting their asset allocation or focusing all of their liquidity in one asset class, such as Treasury Bonds. ETF Solution: Utilizing ETFs for 5 -10% of each asset class not only enhances liquidity but also allows the plan to tactically shift their allocation intraday if the market warrants. % Institutional Uses of SPDR ETFs

Case Study 3: Transition Management Sample Situation: An endowment terminates a Mid Cap Active Equity manager and will search for a new manager. Challenge: The endowment has not yet selected a new manager; however, they have made the decision to terminate the existing manager. They would like to maintain exposure to the asset class while they complete their search. ETF Solution: The endowment terminates the Mid Cap Active manager, buys a corresponding Mid Cap ETF with the proceeds of the portfolio liquidation and funds their new Active Mid Cap manager with the ETF. institutional Uses of SPDR ETFs

Case Study 4: Asset Class Exposure: Gold Sample Situation: A foundation would like to tactically hedge against future inflation while also establishing a strategic allocation to gold. Challenge: Historically it has been difficult to efficiently invest in physical gold bullion. ETF Solution: Since November 2004, SPDR Gold Shares [ticker GLD] has provided investors of all sizes an efficient means for gaining exposure to physical gold bullion. Institutional Uses of SPDR ETFs

Case Study 5: Small Institutional Plans Sample Situation: A small endowment is looking to implement a prescribed asset allocation using the most efficient exposure vehicles available. Challenge: For small institutional mandates, minimum account fees can increase the management cost to a higher bps level than desired. For example, a \$2mm account with a minimum annual fee of \$10,000 and an initial fee schedule of 5 bps would actually work out to 50 bps. ETF Solution: Select and maintain the desired asset allocation using ETFs in order to realize lower costs and greater efficiencies surrounding implementation and ongoing rebalancing, institutional Uses of SPDR ETFs

Various Ways to Execute an ETF order Secondary Market Buyers and sellers are matched through an exchange For more thinly traded ETFs, the secondary market may be a limited portion of an ETF's overall liquidity Common trades: -Market Orders - Limit Orders - Stop Loss Orders - MOC - VWAP, TWAP Liquidity Providers Liquidity providers are often able to provide greater liquidity than the secondary market, especially in thinly traded ETFs This is due to their ability to transact in the underlying securities as well as other offsetting hedges such as futures, options, highly correlated ETFs, etc Common trades: -Risk Trades -Spread to NAV Orders -Underlying VWAP Orders - Overnight underlying VWAP orders Creation/Redemption Authorized Participants can also execute creation redemption orders on behalf of clients APs receive either cash or securities from client and use the proceeds to build the underlying basket which is exchanged with the ETF sponsor for ETF shares Client receives end of day NAV plus any costs associated with the creation / redemption such as spread of underlying securities, fixed creation cost with ETF sponsor, etc Institutional Uses of SPDR ETFs

How Do SSgA Institutional Clients Buy and Sell ETFs? Does the client have an internal equity trading desk? The equity trading desk is most likely equipped to trade ETFs as they trade just like equities, in order to ensure best execution, the Execution Services Group is available to discuss best practices for trading ETFs. If there is no internal equity trading desk, move to next question. Who is the client's custodian? The State Street Global Markets specialized trading desk is responsible for equity trades on behalf of State Street custody clients. For information on an appropriate contact, please contact the Execution Services Group. The Execution Services Group is familiar with the appropriate contacts at each of the major custodians and can facilitate making an introduction. Institutional Uses of SPDR ETFs

Quoted Depth: Number of ETF shares posted at consecutive price points creating displayed liquidity. Bid / Offer Spread: Difference between the best bid and best offer. NBBO: National Best Bid and Offer. Institutional Uses of SPDR ETFs

Legal Disclosures Institutional Uses of SPDR ETFs

Disclosures FOR INVESTMENT PROFESSIONAL USE ONLY, Not for use with the public. ETFs trade like stocks, are subject to investment risk and will fluctuate in market value. Diversification or Asset Allocation does not ensure a profit or guarantee against loss. Bond funds contain interest rate risk (as interest rates rise bond prices usually fall). There are additional risks for funds that invest in mortgage-backed and asset-backed securities including the risk of issuer default; credit risk and inflation risk. Lower-quality debt securities involve greater risk of default or price changes due to potential changes in the credit quality of the issuer. Foreign investments involve greater risks than U.S. investments, including political and economic risks and the risk of currency fluctuations, all of which may be magnified in emerging markets. Past performance is no guarantee of future results. Frequent trading of ETFs could significantly increase commissions and other costs such that they may offset any savings from low fees or costs. The views expressed are the current views of State Street Global Advisors through the period of 3/15/2010 only and are subject to change based on market and other conditions. All information has been obtained from sources believed to be reliable, but its accuracy is not guaranteed. Third party data providers make no warranties or representations of any kind relating to the accuracy, completeness or timeliness of the data and have no liability for damages of any kind relating to the use of such data. The SPDR® Gold Trust (the Trust) has filed a registration statement (including a prospectus) with the SEC for the offering to which this communication relates. Before you invest, you should read the prospectus in that registration statement and other documents the Trust has filed with the SEC for more complete information about the Trust and this offering. You may get these documents for free by visiting EDGAR on the SEC Web site at www.sec.gov. Alternatively, the Trust, or any underwriter or any dealer participating in the offering, will arrange to send you the prospectus if you request it by calling toll free at 1-866-320-4053 or contacting State Street Global Markets, LLC, One Lincoln Street, Attn: SPDR® Gold Shares, 30th Floor, Boston, MA 02111. The prospectus contains information about the Trust and the SPDR® Gold Shares (the Shares) which is material and/or which may be important to you. You should read the entire prospectus, including Risk Factors before making an investment decision about the Shares.

Statement Regarding Forward-Looking Statements This document includes forward-looking statements which generally relate to future events or future performance. In some cases, you can identify forward-looking statements by terminology such as may, will, should, it is likely, expect, plan, anticipate, believe, estimate, predict, potential or the negative of these terms or other comparable terminology. All statements (other than statements of historical fact) included in this document that address activities, events or developments that will or may occur in the future, including such matters as changes in commodity prices and market conditions (for gold and the Shares), the Trust's operations, the plans of the World Gold Trust Services LLC (the Sponsor) and references to the Trust's future success and other similar matters are forward-looking statements. Investors are cautioned that these statements are only projections. Actual events or results may differ materially. These statements are based upon certain assumptions and analyses the Marketing Agent made based on its perception of historical trends, current conditions and expected future developments, as well as other factors believed appropriate in the circumstances. Whether or not actual results and developments will conform to the Marketing Agent's expectations

Institutional Uses of SPDR ETFs

Disclosures, cont. and predictions, however, is subject to a number of risks and uncertainties, including the factors identified in the Risk Factors section of the Prospectus filed with the SEC and in other filings made by the Trust from time to time with the SEC. Consequently, all the forward-looking statements made in this material are qualified by these cautionary statements, and there can be no assurance that the actual results or developments the Sponsor or Marketing Agent anticipates will be realized or, even if substantially realized, that they will result in the expected consequences to, or have the expected effects on, the Trust's operations or the value of the Shares. Neither the Sponsor, Marketing Agent nor any other person assumes responsibility for the accuracy or completeness of the forward-looking statements. Neither the Trust, Marketing Agent nor the Sponsor is under a duty to update any of the forward-looking statements to conform such statements to actual results or to reflect a change in the Sponsor's or Marketing Agent's expectation or projections. The value of the Shares relates directly to the value of the gold held by the Trust (less Trust expenses) and fluctuations in the price of gold could materially adversely affect an investment in the Shares. Investors should be aware that there is no assurance that gold will maintain its long-term value in terms of purchasing power in the future. In the event that the price of gold declines, the Sponsor and the Marketing Agent expect the value of an investment in the Shares to similarly decline proportionately. Not FDIC Insured No Bank Guarantee May Lose Value Shareholders of the Trust will not have the protections associated with ownership of shares in an investment company registered under the Investment Company Act of 1940 or the protections afforded by the Commodity Exchange Act of 1936. The Trust is not registered as an investment company under the Investment Company Act of 1940 and is not required to register under such act. Neither the Sponsor nor the Trustee of the Trust is subject to regulation by the CFTC. Shareholders will not have the regulatory protections provided to investors in CEA-regulated instruments or commodity pools.
