Town, XX 01234-5678 ...the economic outlook remains unusually uncertain. *Federal Reserve
Chairman Ben Bernanke, testimony to Senate Banking Committee, July 21, 2010* Dear Sample A. Sample:
As the market volatility and uncertainty of the past two years show few signs of letting up, one thing
remains certain: the value of gold as a long-term investment in an unpredictable world. While gold has
traditionally been viewed as a tactical investment for difficult times, a closer look reveals an asset class
with attractive properties in any economic environment. **Plug in the enclosed gold USB drive to learn
about gold's strategic, long-term use as a: Portfolio diversifier** with extremely low correlations to
virtually every other asset class; few, if any, asset classes can match the diversification potential of gold¹
Hedge against inflation that has tended to retain its purchasing power when currencies crumble **Defense
against dollar weakness** that, all other things being equal, has tended to rise in price when the dollar
declines **Volatility hedge** that, historically, has been significantly less volatile than commodities overall

Important Information Relating to SPDR Gold Shares Trust: **The SPDR Gold Shares Trust (GLD) has filed a registration statement (including a prospectus) with the Securities and Exchange Commission (SEC) for the offering to which this communication relates. Before you invest, you should read the prospectus in that registration statement and other documents GLD has filed with the SEC for more complete information about GLD and this offering. You may get these documents for free by visiting EDGAR on the SEC website at www.sec.gov or by visiting www.spdrgoldshares.com. Alternatively, the Trust or any authorized participant will arrange to send you the prospectus if you request it by calling 866.320.4053. GLD is not an investment company registered under the Investment Company Act of 1940 (the 1940 Act) and is not subject to regulation under the Commodity Exchange Act of 1936 (the CEA). As a result, shareholders of the Trust do not have the protections associated with ownership of shares in an investment company registered under the 1940 Act or the protections afforded by the CEA.** GLD shares trade like stocks, are subject to investment risk and will fluctuate in market value. The value of GLD shares relates directly to the value of the gold held by GLD (less its expenses), and fluctuations in the price of gold could materially and adversely affect an investment in the shares. The price received upon the sale of the shares, which trade at market price, may be more or less than the value of the gold represented by them. GLD does not generate any income, and as GLD regularly sells gold to pay for its ongoing expenses, the amount of gold represented by each Share will decline over time. Investing involves risk, and you could lose money on an investment in GLD. **Please see the GLD prospectus for a detailed discussion of the risks of investing in GLD shares.** SPDR® is a registered trademark of Standard & Poor's Financial Services LLC (S&P) and has been licensed for use by State Street Corporation.
