Annual information form

Audited annual financial statements

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

At December 31, 2010, 169,175,058 Common Shares of Canadian Pacific Railway Limited ( CPRL ) were issued and outstanding. At December 31, 2010, 347,170,009 Ordinary Shares of Canadian Pacific Railway Company ( CPRC ) were issued and outstanding. All of the ordinary shares of CPRC are held by CPRL.

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 (the Exchange Act ) during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES

NO

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (s.232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files).

YES

NO

**PRIOR FILINGS MODIFIED AND SUPERSEDED**

The Registrants' Annual Report on Form 40-F for the year ended December 31, 2010, at the time of filing with the Securities and Exchange Commission (the Commission), modifies and supersedes all prior documents filed pursuant to Sections 13 and 15(d) of the Exchange Act for purposes of any offers or sales of any securities after the date of such filing pursuant to any Registration Statement under the Securities Act of 1933 of either Registrant which incorporates by reference such Annual Report, including without limitation the following: Form S-8 No. 333-13962 (Canadian Pacific Railway Limited); Form S-8 No. 333-127943 (Canadian Pacific Railway Limited) and Form S-8 No. 333-140955 (Canadian Pacific Railway Limited).

In addition, this Annual Report on Form 40-F is incorporated by reference into or as an exhibit to, as applicable, the Registration Statement on Form F-9 No. 333-159943 (Canadian Pacific Railway Company), and the Registration Statement on Form F-10 No. 333-159945 (Canadian Pacific Railway Limited).

**ANNUAL INFORMATION FORM, CONSOLIDATED AUDITED ANNUAL FINANCIAL STATEMENTS AND MANAGEMENT'S DISCUSSION AND ANALYSIS**

**A. Annual Information Form**

For the Annual Information Form of the Registrant for the year ended December 31, 2010 see pages 1 through 42 of the Registrant's 2010 Annual Information Form incorporated by reference and included herein.

**B. Audited Annual Financial Statements**

For consolidated audited financial statements (U.S. GAAP), including the report of the auditors with respect thereto, see pages 49 through 108 of the Registrant's 2010 Annual Report incorporated by reference and included herein.

**C. Management's Discussion and Analysis**

For management's discussion and analysis, see pages 3 through 48 of the Registrant's 2010 Annual Report incorporated by reference and included herein.

For the purposes of this Annual Report on Form 40-F, only pages 3 through 108 of the Registrant's 2010 Annual Report referred to above shall be deemed filed, and the balance of such 2010 Annual Report, except as it may be otherwise specifically incorporated by reference in the Registrant's Annual Information Form, shall be deemed not filed with the Securities and Exchange Commission as part of this Annual Report on Form 40-F under the Exchange Act.

**DISCLOSURE CONTROLS AND PROCEDURES**

As of December 31, 2010, an evaluation was carried out under the supervision of and with the participation of the Registrants' management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Registrants' disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that these disclosure controls and procedures were effective as of December 31, 2010, to ensure that information required to be disclosed by the Registrants in reports that they file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the Commission rules and forms and (ii) accumulated and communicated to the Registrants' management, including their Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

It should be noted that while the Registrants' Chief Executive Officer and Chief Financial Officer believe that the Registrants' disclosure controls and procedures provide a reasonable level of assurance that they are effective, they do not expect that the Registrants' disclosure controls and procedures or internal control over financial reporting will prevent all errors and fraud. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met.

**MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

For management's report on internal control over financial reporting, see page 50 of the Registrants' 2010 Annual Report, incorporated by reference and included herein.

**ATTESTATION REPORT OF THE REGISTERED PUBLIC ACCOUNTING FIRM**

The effectiveness of the Registrants' internal control over financial reporting as of December 31, 2010 has been audited by PricewaterhouseCoopers LLP, independent auditors, as stated in their report on pages 51 through 52 of the Registrants' 2010 Annual Report.

**CHANGES IN INTERNAL CONTROLS OVER FINANCIAL REPORTING**

During the period covered by this Annual Report on Form 40-F, no changes occurred in the Registrants' internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Registrants' internal control over financial reporting.

**NOTICES PURSUANT TO REGULATION BTR**

None.

**CODE OF ETHICS**

**A.** The Registrants' Code of Business Ethics specifically addresses, among other things, conflicts of interest, protection and proper use of corporate assets and opportunities, confidentiality of corporate information, fair dealing with third parties, compliance with laws, rules and regulations and reporting of illegal or unethical behavior. The Code applies to all directors, officers and employees, both unionized and non-unionized, of the Registrants and their subsidiaries in Canada, the U.S. and elsewhere, and forms part of the terms and conditions of employment of all such individuals. All Directors have signed acknowledgements that they have read, understood and agree to comply with the Code. The Registrant conducts mandatory on-line ethics training for officers and non-union employees. As part of the on-line ethics training, officers and non-union employees are required to acknowledge that they have read, understood and agree to comply with the Code. Contractors engaged on behalf of the Registrants or their subsidiaries must undertake, as a condition of their engagement, to adhere to principles and standards of business conduct consistent with those set forth in the Code. The Code is available on the Registrants' web site at [www.cpr.ca](http://www.cpr.ca) and in print to any shareholder who requests it. All amendments to the Code, and all waivers of the Code with respect to any director or executive officer of the Registrants, will be posted on the Registrants' web site and provided in print to any shareholder who requests them.

**B.** In addition, the Registrants adopted a Code of Ethics for Chief Executive Officer and Senior Financial Officers in 2003. This code applies to the Registrants' President and Chief Executive Officer, the Executive Vice-President and Chief Financial Officer and the Senior Vice-President Finance and Comptroller. It is available on the Registrants' web site at [www.cpr.ca](http://www.cpr.ca) and in print to any shareholder who requests it. All amendments to the code, and all waivers of the code with respect to any of the officers covered by it, will be posted on the Registrants' web site and provided in print to any shareholder who requests them.

### **CORPORATE GOVERNANCE PRINCIPLES AND GUIDELINES**

The Registrants amended their Corporate Governance Principles and Guidelines in December 2010 to include shareholders engagement, shareholder advisory votes on executive compensation, director attendance at the Registrants annual meeting and performance reviews for the Chairman of the Board. These principles and guidelines pertain to such matters as, but are not limited to: director qualification standards and responsibilities; election of directors; discretionary term limits for service as Board or Board Committee Chairs; access by directors to management and independent advisors; director compensation; director retirement age; director orientation and continuing education; management succession; and annual performance evaluations of the board, including its committees and individual directors, and of the Chief Executive Officer. The Corporate Governance Principles and Guidelines are available on the Registrants web site at [www.cpr.ca](http://www.cpr.ca) and in print to any shareholder who requests them.

### **COMMITTEE TERMS OF REFERENCE**

The terms of reference of each of the following committees of the Registrants are available on the Registrants web site at [www.cpr.ca](http://www.cpr.ca) and in print to any shareholder who requests them: the Audit, Finance and Risk Management Committee; the Corporate Governance and Nominating Committee; the Management Resources and Compensation Committee; the Health, Safety, Security and Environment Committee; and the Pension Committee.

### **DIRECTOR INDEPENDENCE**

The boards of the Registrants have adopted standards for director independence: (a) prescribed by Section 10A(m)(3) of the Exchange Act and Rule 10A-3(b)(1) promulgated thereunder and National Instrument 52-110 for members of public company audit committees; and (b) set forth in the NYSE Listed Company Manual (the NYSE Standards ), the Canadian corporate governance standards set forth in National Instrument 58-101 and National Instrument 52-110 in respect of public company directors. The boards also conducted a comprehensive assessment of each of their members as against these standards and determined that all current directors, except F.J. Green, have no material relationship with the Registrants and are independent. Mr. Green is not independent by virtue of the fact that he is the Chief Executive Officer of the Registrants.

### **EXECUTIVE SESSIONS OF NON-MANAGEMENT DIRECTORS**

The independent directors met in executive sessions without management present at the beginning and end of each meeting of the board of directors as well as at the beginning and end of each committee meeting.

Interested parties may communicate directly with Mr. J.E. Cleghorn, the chair of the boards of the Registrants, who presided at such executive sessions, by writing to him at the following address, and all communications received at this address will be forwarded to him:

Office of the Corporate Secretary  
Canadian Pacific Railway  
Suite 920, 401 Avenue S.W.  
Calgary, Alberta  
Canada, T2P 4Z4

**IDENTIFICATION OF AUDIT COMMITTEE AND AUDIT COMMITTEE FINANCIAL EXPERT**

The following individuals comprise the current membership of the Registrants' Audit, Finance and Risk Management Committees ( Audit Committees ), which have been established in accordance with Section 3(a)(58)(A) of the Exchange Act:

Krystyna T. Hoeg  
Richard C. Kelly  
John P. Manley  
Linda J. Morgan  
Roger Phillips  
Michael W. Wright

Each of the aforementioned directors with the exception of Ms. Morgan has been determined by the boards of the Registrants to meet the audit committee financial expert criteria prescribed by the Securities and Exchange Commission and has been designated as an audit committee financial expert for the Audit Committees of the boards of both Registrants. Each of the aforementioned directors has been determined by the boards of the Registrants to be independent within the criteria referred to above under the subheading Director Independence , including the NYSE Standards.

**FINANCIAL LITERACY OF AUDIT COMMITTEE MEMBERS**

The boards of the Registrants have determined that all members of the Audit Committees have accounting or related financial management expertise within the meaning of the NYSE Standards. The boards have determined that all members of the Audit Committees are financially literate within the definition contained in, and as required by, National Instrument 52-110 and the NYSE Standards.

**SERVICE ON OTHER PUBLIC COMPANY AUDIT COMMITTEES**

Each Registrant's board has determined that no director who serves on more than two public company audit committees in addition to its own Audit Committee shall be eligible to serve as a member of the Audit Committee of that Registrant, unless that Registrant's board determines that such simultaneous service would not impair the ability of such member to effectively serve on that Registrant's Audit Committee. For purposes of calculating the aggregate number of public company audit committees on which a director serves, each Registrant is counted as a separate public company.

No member of the Audit Committees of the Registrants serves on more than two public company audit committees in addition to the Audit Committee of either Registrant.

**PRINCIPAL ACCOUNTANT FEES AND SERVICES**

Fees payable to the Registrants' independent auditors, PricewaterhouseCoopers LLP for the years ended December 31, 2010, and December 31, 2009, totaled \$2,525,200 and \$3,396,200, respectively, as detailed in the following table:

	<b>Year ended December 31, 2010</b>	<b>Year ended December 31, 2009</b>
<b>Audit Fees</b>	\$1,795,600	\$2,176,800
<b>Audit-Related Fees</b>	\$388,400	\$794,800
<b>Tax Fees</b>	\$341,200	\$424,600
<b>All Other Fees</b>	\$	\$
<b>TOTAL</b>	<b>\$2,525,200</b>	<b>\$3,396,200</b>

The nature of the services provided by PricewaterhouseCoopers LLP under each of the categories indicated in the table is described below.

***Audit Fees***

Audit fees were for professional services rendered for the audit of the Registrants' annual financial statements and services provided in connection with statutory and regulatory filings or engagements, including the attestation engagement for the independent auditor's report on the effectiveness of internal control over financial reporting.

***Audit-Related Fees***

Audit-related fees were for attestation and related services reasonably related to the performance of the audit or review of the annual financial statements, but which are not reported under *Audit Fees* above. These services consisted of: the audit or review of financial statements of certain subsidiaries and of various pension and benefits plans of the Registrants; special attestation services as may be required by various government entities; access fees for technical accounting database resources; and general advice and assistance related to accounting and/or disclosure matters with respect to new and proposed Canadian, US and International accounting standards, securities regulations, and/or laws.

***Tax Fees***

Tax fees were for professional services related to tax compliance, tax planning and tax advice. These services consisted of: tax compliance including the review of tax returns; assistance with questions regarding corporate tax audits; tax planning and advisory services relating to common forms of domestic and international taxation (i.e. income tax, capital tax, goods and services tax, and valued added tax); and access fees for taxation database resources.

***All Other Fees***

Fees disclosed under this category would be for products and services other than those described under *Audit Fees*, *Audit-Related Fees* and *Tax Fees* above. In both 2010 and 2009, there were no services in this category.

**PRE-APPROVAL OF AUDIT AND NON-AUDIT SERVICES PROVIDED BY  
INDEPENDENT AUDITORS**

The Audit Committee of each Registrant has adopted a written policy governing the pre-approval of audit and non-audit services to be provided to the Registrants by their independent auditors. The policy is reviewed annually and the audit and non-audit services to be provided by their independent auditors, as well as the budgeted amounts for such services, are pre-approved at that time. The Vice-President and Comptroller of the Registrants must submit to the Audit Committee at least quarterly a report of all services performed or to be performed by the independent auditors pursuant to the policy. Any additional audit or non-audit services to be provided by the independent auditors either not included among the pre-approved services or exceeding the budgeted amount for such pre-approved services by more than 10% must be individually pre-approved by the Audit Committee or its Chairman, who must report all such additional pre-approvals to the Audit Committee at its next meeting following the granting thereof. The independent auditors' annual audit services engagement terms and fees are subject to the specific pre-approval of the Audit Committee. In addition, prior to the granting of any pre-approval, the Audit Committee or its Chairman, as the case may be, must be satisfied that the performance of the services in question will not compromise the independence of the independent auditors. The Chief Internal Auditor for the Registrants monitors compliance with this policy.

**OFF-BALANCE SHEET ARRANGEMENTS**

A description of the Registrants' off-balance sheet arrangements is set forth on page 34 of the Registrants' 2010 Annual Report incorporated by reference and included herein.

**TABLE OF CONTRACTUAL COMMITMENTS**

The table setting forth the Registrants' contractual commitments is set forth on page 34 of the Registrants' 2010 Annual Report incorporated by reference and included herein.

**INTERACTIVE DATA FILE**

The Registrants, within 30 days, will submit to the Commission in Exhibit 101 of an amendment to this Form 40-F, and concurrently post on its corporate Web site, an Interactive Data File.

**UNDERTAKING AND CONSENT TO SERVICE OF PROCESS**

**A. Undertaking**

Each Registrant undertakes to make available, in person or by telephone, representatives to respond to inquiries made by the Commission staff, and to furnish promptly, when requested to do so by the Commission staff, information relating to: the securities registered pursuant to Form 40-F; the securities in relation to which the obligation to file an annual report on Form 40-F arises; or transactions in said securities.

**B. Consent to Service of Process**

Each Registrant has previously filed a Form F-X in connection with the class of securities to which the obligation to file this report arises. Any change to the name or address of the agent for service of process of either Registrant shall be communicated promptly to the Commission by an amendment to the Form F-X referencing the file number of such Registrant.

**SIGNATURES**

Pursuant to the requirements of the Exchange Act, each Registrant certifies that it meets all of the requirements for filing on Form 40-F and has duly caused this Annual Report on Form 40-F to be signed on its behalf by the undersigned, thereto duly authorized, in the City of Calgary, Province of Alberta, Canada.

## SECTION 1: CORPORATE STRUCTURE

*In this AIF, our , us , we , CP and the Company refer to Canadian Pacific Railway Limited ( CPRL ), CPRL subsidiaries, CPRL and one or more of its subsidiaries, or one or more of CPRL s subsidiaries, as the context may require.*

### **1.1 Name, Address and Incorporation Information**

Canadian Pacific Railway Limited was incorporated on June 22, 2001, as 3913732 Canada Inc. pursuant to the *Canada Business Corporations Act* ( the CBCA ). On July 20, 2001, CP amended its Articles of Incorporation to change its name to Canadian Pacific Railway Limited. On October 1, 2001, Canadian Pacific Limited ( CPL ) completed an arrangement ( the Arrangement ) pursuant to section 192 of the CBCA whereby it distributed to its common shareholders all of the shares of newly formed corporations holding the assets of four of CPL s five primary operating divisions. The transfer of Canadian Pacific Railway Company ( CPRC ), previously a wholly owned subsidiary of CPL, to CPRL was accomplished as part of a series of steps, pursuant to the terms of the Arrangement. Our registered, executive and head office is located at Suite 500, 401 9th Avenue S.W., Calgary, Alberta T2P 4Z4.

**SECTION 2: INTERCORPORATE RELATIONSHIPS****2.1 Principal Subsidiaries**

The table below sets out our principal subsidiaries, including the jurisdiction of incorporation and the percentage of voting and non-voting securities we currently own directly or indirectly:

<b>Principal Subsidiary<sup>(1)</sup></b>	<b>Incorporated under the Laws of</b>	<b>Percentage of Voting Securities Held Directly or Indirectly</b>	<b>Percentage of Non-Voting Securities Beneficially Owned, or over which Control or Direction is Exercised</b>
Canadian Pacific Railway Company	Canada	100%	Not applicable
Soo Line Corporation <sup>(2)</sup>	Minnesota	100%	Not applicable
Soo Line Railroad Company <sup>(3)</sup>	Minnesota	100%	Not applicable
Dakota, Minnesota & Eastern Railroad Corporation <sup>(4)</sup>	Delaware	100%	Not applicable
Delaware and Hudson Railway Company, Inc. <sup>(2)</sup>	Delaware	100%	Not applicable
Mount Stephen Properties Inc. <sup>(5)</sup>	Canada	100%	Not applicable

(1) This table does not include all of our subsidiaries. The assets and revenues of unnamed subsidiaries did not exceed 10% of the total consolidated assets or total consolidated revenues of CP individually, or 20% of the total consolidated assets or total consolidated revenues of CP in aggregate.

(2) Indirect wholly owned subsidiary of Canadian Pacific Railway Company.

(3) Wholly owned subsidiary of Soo Line Corporation.

(4) Indirect wholly owned subsidiary of the Soo Line Corporation.

(5) Wholly owned subsidiary of Canadian Pacific Railway Company.

Dakota, Minnesota & Eastern Railroad Corporation ( DM&E ) was acquired in October 2007 subject to approval by the U.S. Surface Transportation Board ( STB ) and is an indirect wholly owned subsidiary of the Soo Line Corporation. The STB approved the application to acquire control on September 30, 2008. The official effective date of the final decision was October 30, 2008.

## SECTION 3: GENERAL DEVELOPMENTS OF THE BUSINESS

### 3.1 Recent Developments

We continually seek to grow the value and scale of our core business through infrastructure-sharing and joint-service programs with other railways, strategic capital investment programs, strategic additions and operating plan strategies. Combined with the ongoing improvement of our locomotive fleet, these strategies facilitate more predictable and fluid train operations between major terminals. In line with our strategic vision, CP accomplished the following initiatives in 2010:

CP announced a ten-year agreement with Teck Resources Limited ( Teck ). The agreement reflects the companies commitment to work together to achieve growth in the volume of coal shipped through a range of economic and marketplace dynamics and provides flexibility critical for a long term agreement.

We made significant progress re-organizing the Company to reduce the total number of management layers. The new organizational structure is based on ensuring clear accountability and alignment and will facilitate more efficient decision making consistent with delivering on our multi-year service reliability, productivity and asset velocity objectives. The redesign has reduced the number of operating regions, and the Operations side of the business is complete.

During 2010, CP took on new initiatives targeted at permanently reducing structural costs. This included the consolidation of certain offices, as well as the consolidation of locomotive and freight car repair facilities.

In addition, we took further actions to strengthen our balance sheet and create and enhance the organization s financial flexibility. CP took advantage of low cost debt markets and used both debt and funds from operations to pre-fund the main Canadian defined benefit pension plan. This effectively puts our cash to work more quickly and reduces expected future pension contributions. The actions taken have given the company significant flexibility in pension funding levels over the next 3-5 years.

Finally, with the strengthening economy in 2010, CP enjoyed a 12.6% increase in volumes (as measured by carloads) and delivered on the key objective of sustaining long train improvements while managing a busier network. Our multi-year capital plan includes the intention to expand and increase the number of sidings that can accommodate long trains to allowing further productivity improvements. Our 2011 capital plan includes key improvements in productive IT and investment to support growth.

### 2009 Highlights

In 2009, CP was focused on evaluating the structure of our business. We continued with cost reduction strategies including Execution Excellence for Efficiency (or E3 ), which was the beginning of our larger variable cost initiatives, our structural cost reduction initiative and the application of lean management techniques to our core operation processes.

2009 was also a year where we focused on strengthening our balance sheet which included issuing equity in the first quarter. As well, we made a cash tender for outstanding debt and issued new debt to lengthen our maturity profile, smooth our repayment profile and strengthen near term liquidity. CP focused on managing working capital, which included selling certain non-core assets.

In the fourth quarter of 2009, CP terminated a contract with a lessee in order to cease through-train operations over the CP owned rail branch line between Smiths Falls and Sudbury, Ontario. Improved train efficiencies allowed us to move this service over our main line rather than using this bypass route. CP also made a voluntary prepayment to our defined benefit pension plan to reduce the volatility of future pension funding requirements.

In the third quarter of 2009, the Company sold certain non-core assets. Several significant properties were sold, including Windsor Station in Montreal, Quebec and land in Western Canada for transit purposes. After the sale, CP will continue to occupy a portion of Windsor Station through a lease for a 10-year period.

Also in 2009, the Company completed a sale of a portion of its investment in the Detroit River Tunnel Partnership ( DRTP ) to its existing partner, reducing the Company s ownership from 50% to 16.5%. Effective April 1, 2009, the Company discontinued proportionate consolidation and is accounting for its remaining investment in the DRTP under the equity method of accounting. Running rights remain unchanged.

### **SECTION 3: GENERAL DEVELOPMENTS OF THE BUSINESS**

#### **2008 Highlights**

The Company assumed control of DM&E on October 30, 2008 following approval of its acquisition of DM&E by the STB. The addition of DM&E extended CP's reach and increased its rail network, added new customers and expanded the service available to customers of both DM&E and CP. Freight revenues from DM&E are derived principally from transporting grain, industrial products, and coal. DM&E has the option, but not the obligation, to construct a railway line into the Powder River Basin ( PRB ) located in Wyoming, the largest thermal coal producing region in the U.S. The decision to construct a railway line into the PRB will be made by the Company based on economic viability and supported by certain key conditions being met. In 2009 we integrated DM&E into most of our major operating systems.

In mid 2008, CP commenced a review of opportunities to accelerate the realization of benefits achievable from operating plan efficiency improvements. Known as E3 , this initiative is intended to identify opportunities to reduce costs and improve product reliability. Train productivity, asset utilization, yard and terminal operations, maintenance and product reliability have been the focus of this review.

## SECTION 4: DESCRIPTION OF THE BUSINESS

### 4.1 Our Background and Network

CPRC was incorporated by Letters Patent in 1881 pursuant to an Act of the Parliament of Canada. CPRC is one of Canada's oldest corporations. From our inception 130 years ago, we have developed into a fully integrated and technologically advanced Class I railway (a railroad earning a minimum of US\$378.8 million in revenues annually) providing rail and intermodal freight transportation services over a 14,800-mile network serving the principal business centres of Canada, from Montreal to Vancouver, British Columbia ( B.C. ), and the U.S. Midwest and Northeast regions.

We own approximately 10,700 miles of track. An additional 4,100 miles of track are owned jointly, leased or operated under trackage rights. Of the total mileage operated, approximately 6,100 miles are located in western Canada, 2,200 miles in eastern Canada, 5,400 miles in the U.S. Midwest and 1,100 miles in the U.S. Northeast. Our business is based on funnelling railway traffic from feeder lines and connectors, including secondary and branch lines, onto our high-density mainline railway network. We have extended our network reach by establishing alliances and connections with other major Class I railways in North America, which allow us to provide competitive services and access to markets across North America beyond our own rail network. We also provide service to markets in Europe and the Pacific Rim through direct access to the Port of Montreal and the Port Metro Vancouver in Vancouver, B.C., respectively.

Our network accesses the U.S. market directly through three wholly owned subsidiaries: Soo Line Railroad Company ( Soo Line ), a Class I railway operating in the U.S. Midwest; DM&E, a wholly owned subsidiary of the Soo Line, which operates in the U.S. Midwest; and the Delaware and Hudson Railway Company, Inc. ( D&H ), which operates between eastern Canada and major U.S. Northeast markets, including New York City, New York; Philadelphia, Pennsylvania; and Washington, D.C.

### 4.2 Strategy

Our vision is to become the safest and most fluid railway in North America. Through the ingenuity of our people, it is our objective to create long-term value for customers, shareholders and employees. We seek to accomplish this objective through the following three-part strategy:

- generating quality revenue growth by realizing the benefits of demand growth in our bulk, intermodal and merchandise business lines with targeted infrastructure capacity investments linked to global trade opportunities;
- improving productivity by leveraging strategic marketing and operating partnerships, executing a scheduled railway through our Integrated Operating Plan ( IOP ) and driving more value from existing assets and resources by improving fluidity ; and
- continuing to develop a dedicated, professional and knowledgeable workforce that is committed to safety and sustainable financial performance through steady improvement in profitability, increased free cash flow and a competitive return on investment.

### 4.3 Partnerships, Alliances and Network Efficiency

Some customers' goods may have to travel on more than one railway to reach their final destination. The transfer of goods between railways can cause delays and service interruptions. Our rail network connects to other North American rail carriers and, through partnerships, we continue to co-develop processes and products designed to provide seamless and efficient scheduled train service to these customers.

We continue to increase the capacity and efficiency of our core franchise through infrastructure-sharing and joint-service programs with other railways and third parties, strategic capital investment programs, and operating plan strategies. Combined with the continued improvement of our locomotive and rail car fleets, these strategies enable us to achieve more predictable and fluid train operations between major terminals.

## SECTION 4: DESCRIPTION OF THE BUSINESS

Over the past few years, Class I railway initiatives have included:

co-operation initiatives with the Canadian National Railway Company ( CN ) in the Port Metro Vancouver Terminal and B.C. Lower Mainland;

working very closely with all the Class I and other carriers that serve Chicago, Illinois under the Chicago Region Environmental and Transportation Efficiency ( CREATE ) program. Class Is, Amtrak, Metra and switching carriers Indiana Harbor Belt Railroad ( IHB ) and Belt Railway of Chicago ( BRC ) have partnered in CREATE to initiate operating and structural changes that will improve operating efficiency and fluidity in and around Chicago, creating the largest railroad hub in North America.

CP working with the State Departments of Transportation of New York, Illinois, Wisconsin and Minnesota to develop plans for improved track infrastructure to support intercity passenger rail. Work on the improvements is expected to commence during the 2011 construction season and be complete by 2013. The improvements will improve the fluidity of passenger and freight traffic on shared CP track.

We also develop mutually beneficial arrangements with smaller railways, including shortline and regional carriers.

### 4.4 Network and Right-of-Way

Our 14,800-mile network extends from the Port Metro Vancouver on Canada's Pacific Coast to the Port of Montreal in eastern Canada, and to the U.S. industrial centres of Chicago; Detroit, Michigan; Newark, New Jersey; Philadelphia; New York City and Buffalo, New York; Kansas City, Missouri; and Minneapolis, Minnesota.

Our network is composed of four primary corridors: Western, Eastern, Central and the Northeast U.S.

#### 4.4.1 The Western Corridor: Vancouver-Thunder Bay

*Overview* The Western Corridor links Vancouver with Thunder Bay, Ontario, which is the western Canadian terminus of our Eastern corridor. With service through Calgary, Alberta the Western Corridor is an important part of our routes between Vancouver and the U.S. Midwest, and between Vancouver and eastern Canada. The Western Corridor provides access to the Port of Thunder Bay, Canada's primary Great Lakes bulk terminal.

*Products* The Western Corridor is our primary route for bulk and resource products traffic from western Canada to the Port Metro Vancouver for export. We also handle significant volumes of international intermodal containers and domestic general merchandise traffic.

*Feeder Lines* We support our Western Corridor with four significant feeder lines: the Coal Route , which links southeastern B.C. coal deposits to the Western Corridor and to the Roberts Bank terminal at the Port Metro Vancouver; the Calgary-

## SECTION 4: DESCRIPTION OF THE BUSINESS

Edmonton-Scotford Route , which provides rail access to central Alberta 's Industrial Heartland in addition to the petrochemical facilities in central Alberta; the Pacific CanAm Route , which connects Calgary and Medicine Hat, Alberta, with Union Pacific Corporation ( UP ) at Kingsgate, B.C.; and the North Route that provides rail service to customers from Winnipeg, Manitoba to Calgary through Portage la Prairie, Saskatoon and Wetaskiwin. This line is an important collector of Canadian grain and fertilizer, serving the potash mines located east and west of Saskatoon. In addition, this line provides direct access to refining and upgrading facilities in Alberta 's Industrial Heartland and at Lloydminster, Alberta.

*Connections* Our Western Corridor connects with UP at Kingsgate and with Burlington Northern Santa Fe, LLC ( BNSF ) at Coutts, Alberta, and at New Westminster and Huntingdon in B.C. This corridor also connects with CN at many locations including Thunder Bay, Winnipeg, Regina and Saskatoon, Saskatchewan, Red Deer, Calgary, and Edmonton, Alberta; and several locations in the Greater Vancouver area.

*Yards and Repair Facilities* We support rail operations on the Western Corridor with main rail yards at Vancouver, Calgary, Edmonton, Moose Jaw, Saskatchewan, Winnipeg and Thunder Bay. We also have major intermodal terminals at Vancouver, Calgary, Edmonton, Regina and Winnipeg. We have locomotive and rail car repair facilities at Golden, B.C., Vancouver, Calgary, Moose Jaw and Winnipeg.

### 4.4.2 The Central Corridor: Moose Jaw-Chicago-Kansas City

*Overview* The Central Corridor connects with the Western Corridor at Moose Jaw. By running south to Chicago and Kansas City through the twin cities of Minneapolis and St. Paul in Minnesota, and Milwaukee, Wisconsin, we provide a direct, single-carrier route between western Canada and the U.S. Midwest. The west end of the Central Corridor is proximate to the PRB located in Wyoming, the largest thermal coal producing region in the U.S.

*Products* Primary traffic categories transported on the Central Corridor include intermodal containers from the Port Metro Vancouver, fertilizers, chemicals, grain, coal, automotive and other agricultural products.

*Feeder Lines* We have operating rights over the BNSF line between Minneapolis and the twin ports of Duluth, Minnesota and Superior, Wisconsin. CP maintains its own yard facilities at the twin ports that provide an outlet for grain from the U.S. Midwest to the grain terminals at these ports, and a strategic entry point for large dimensional shipments that can be routed via CP 's network to locations such as Alberta 's Industrial Heartland to serve the needs of the oil sands and energy industry. The DM&E route from Winona, Minnesota to Colony, Wyoming and Crawford, Nebraska provides access to key agricultural and industrial commodities. The Iowa, Chicago and Eastern Railroad ( ICE ) route from River Junction Minnesota and Sabula Junction, Iowa provides a key connection between the twin cities and Kansas City.

*Connections* Our Central Corridor connects with all major railways at Chicago. Outside of Chicago, we have major connections with BNSF at Minneapolis and at Minot, North Dakota and with UP at St. Paul. We connect with CN at Minneapolis, Milwaukee and Chicago. At Kansas City we connect with Kansas City Southern ( KCS ), BNSF and UP. Our Central Corridor also links to several shortline railways that primarily serve grain and coal producing areas in the U.S.

*Yards and Repair Facilities* We support rail operations on the Central Corridor with main rail yards in Chicago, Milwaukee, Wisconsin, St. Paul and Glenwood, Minnesota, Mason City, and Nahant, Iowa; and Huron, South Dakota. We own 49% of the IHB Railroad Company, a switching railway serving Greater Chicago and northwest Indiana, and have two major intermodal terminals in Chicago and one in Minneapolis. In addition, we have a major locomotive repair facility at St. Paul and car repair facilities at St. Paul and Chicago. We share a yard with KCS in Kansas City.

## SECTION 4: DESCRIPTION OF THE BUSINESS

### 4.4.3 The Eastern Corridor: Thunder Bay-Montreal and Detroit

*Overview* The Eastern Corridor extends from Thunder Bay through to its eastern terminus at Montreal and from Toronto to Windsor, Ontario. Our Eastern Corridor provides shippers direct rail service from Toronto and Montreal to Calgary and Vancouver via our Western Corridor and to the U.S. via our Central Corridor. This is a key element of our transcontinental intermodal and other services, as well as truck trailers moving in drive-on/drive-off Expressway service between Montreal and Toronto. The corridor also supports our market position at the Port of Montreal by providing one of the shortest rail routes for European cargo destined to the U.S. Midwest. The Eastern Corridor consists of a route between Montreal and Windsor, which we own and maintain, coupled with running rights between Windsor and Detroit, a trackage rights arrangement on Norfolk Southern Corporation ( NS ) tracks between Detroit and Chicago and a long-term rail car haulage contract with CSX Corporation ( CSX ) that links Detroit with our lines in Chicago.

*Products* Major traffic categories transported in the Eastern Corridor include forest and industrial and consumer products, intermodal containers, automotive products and general merchandise.

*Feeder Lines* A major feeder line that serves the steel industry at Hamilton, Ontario provides connections to both our Northeast U.S. corridor and other U.S. carriers at Buffalo.

*Connections* The Eastern Corridor connects with a number of shortline railways including routes from Montreal to Quebec City, Quebec and Montreal to St. John, New Brunswick. Connections are also made with CN at a number of locations, including Sudbury, Toronto and Montreal and NS and CSX at Detroit and Buffalo as well as CSX in Montreal.

*Yards and Repair Facilities* We support our rail operations in the Eastern Corridor with major rail yards at Toronto and Montreal. Our largest intermodal facility is located in the northern Toronto suburb of Vaughan and serves the Greater Toronto and southwestern Ontario areas. We also operate intermodal terminals at Montreal and Detroit. Terminals for our Expressway service are located in Montreal and at Milton and Agincourt in the Greater Toronto area.

We have locomotive repair facilities at Montreal and Toronto and car repair facilities at Thunder Bay, Toronto and Montreal.

### 4.4.4 The Northeast U.S. Corridor: Buffalo and Montreal to New York

*Overview* The Northeast U.S. Corridor provides an important link between the major population centres of eastern Canada, the U.S. Midwest and the U.S. Northeast.

*Products* Major traffic categories transported in the Northeast U.S. Corridor include industrial and consumer products.

*Feeder Lines* The Northeast U.S. Corridor connects with important feeder lines. Our route between Montreal and Sunbury, Pennsylvania, in combination with trackage rights over other railways, provides us with direct access to New York City; Philadelphia; and Newark, New Jersey. The line between Guelph Junction, Ontario and Binghamton, New York, including haulage rights over NS lines, links industrial southern Ontario with key U.S. connecting rail carriers at Buffalo and with the Montreal-to-Sunbury line at Binghamton.

*Connections* We have major connections with NS at Harrisburg and Allentown in Pennsylvania, and with CSX at Philadelphia. Shortline connections exist with multiple players throughout the corridor.

*Yards and Repair Facilities* We support our Northeast U.S. Corridor with a major rail yards in Binghamton. We have locomotive and car repair facilities in Montreal and Binghamton, in addition to car repair facilities in Chicago and locomotive and car repair facilities in Toronto.

### 4.4.5 Right-of-Way

Our rail network is standard gauge, which is used by all major railways in Canada, the U.S. and Mexico. Continuous welded rail is used on almost all of our mainline.

We use different train control systems on portions of our owned track, depending on the volume of rail traffic. Remotely controlled centralized traffic control signals are used to authorize the movement of trains where traffic is heaviest.

## SECTION 4: DESCRIPTION OF THE BUSINESS

Where rail traffic is lighter, train movements are directed by written instructions transmitted electronically and by radio from rail traffic controllers to train crews. In some specific areas of intermediate traffic density, we use an automatic block signalling system in conjunction with written instructions from rail traffic controllers.

### 4.5 Quarterly Trends

Volumes of and, therefore, revenues from certain goods are stronger during different periods of the year. First-quarter revenues can be lower mainly due to winter weather conditions, closure of the Great Lakes ports and reduced transportation of retail goods. Second- and third-quarter revenues generally improve over the first quarter as fertilizer volumes are typically highest during the second quarter and demand for construction-related goods is generally highest in the third quarter. Revenues are typically strongest in the fourth quarter, primarily as a result of the transportation of grain after the harvest, fall fertilizer programs and increased demand for retail goods moved by rail. Operating income is also affected by seasonal fluctuations. Operating income is typically lowest in the first quarter due to higher operating costs associated with winter conditions. Net income is also influenced by seasonal fluctuations in customer demand and weather-related issues.

2010 was an extraordinary year with volatility and limited market transparency. Coupled with the quarterly fluctuations in trends caused by the 2009 global recession, our results and volumes are inconsistent with the sensitivity and trends provided above. Management believes that the changes in economic conditions in 2009 affected the quarterly results in 2009 and 2010; the timing of a return to the sensitivity and trends discussed will depend on the recovery of the economy and our customers.

### 4.6 Business Categories

The following table compares the percentage of our total freight revenue derived from each of our major business lines in 2010 compared with 2009:

Business Category	2010	2009
Bulk	43%	44%
Merchandise	29%	28%
Intermodal	28%	28%

### 4.7 Revenues

The following table summarizes our annual freight revenues since 2008:

Freight Revenues (in \$ millions, except for percentages)	Fiscal 2010	Fiscal 2010 Compared to Fiscal 2009	Fiscal 2009 <sup>(1)</sup>	Fiscal 2009 Compared to Fiscal 2008 <sup>(1)</sup>	Fiscal 2008 <sup>(1)</sup>
Business Category					
<b>Bulk</b>					
Grain	1,135.7	(0.1)%	1,137.1	16.4%	977.2
Coal	490.8	10.6%	443.8	(27.4)%	611.4
Sulphur and fertilizers	474.8	53.5%	309.3	(39.6)%	511.9
<b>Total bulk</b>	<b>2,101.3</b>	<b>11.2%</b>	<b>1,890.2</b>	<b>(10.0)%</b>	<b>2,100.5</b>
<b>Merchandise</b>					
Forest products	184.9	5.0%	176.1	(27.0)%	241.1
Industrial and consumer products	902.8	14.8%	786.1	1.8%	772.0

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 40-F

Automotive	316.4	38.0%	229.3	(29.6)%	325.6
<b>Total merchandise</b>	<b>1,404.1</b>	<b>17.8%</b>	<b>1,191.5</b>	<b>(11.0)%</b>	<b>1,338.7</b>
<b>Intermodal</b>	<b>1,347.9</b>	<b>12.5%</b>	<b>1,198.1</b>	<b>(19.2)%</b>	<b>1,482.3</b>
<b>Total freight revenues</b>	<b>4,853.3</b>	<b>13.4%</b>	<b>4,279.8</b>	<b>(13.0)%</b>	<b>4,921.5</b>

(1) Restated on a U.S. GAAP basis.

## SECTION 4: DESCRIPTION OF THE BUSINESS

### 4.7.1 Bulk

Our bulk business represented approximately 43% of total freight revenues in 2010.

#### 4.7.1.1 Grain

Our grain business accounted for approximately 23% of total freight revenues in 2010.

Grain transported by CP consists of both whole grains, such as wheat, corn, soybeans, and canola, and processed products such as meals, oils, and flour.

Our grain business is centred in two key agricultural areas: the Canadian prairies (Alberta, Saskatchewan and Manitoba) and the states of North Dakota, Minnesota, Iowa and South Dakota. Western Canadian grain is shipped primarily west to the Port Metro Vancouver and east to the Port of Thunder Bay for export. Grain is also shipped to the U.S. and to eastern Canada for domestic consumption. U.S.-originated export grain traffic is shipped to ports at Duluth and Superior. In partnership with other railways, we also move grain to export terminals in the U.S. Pacific Northwest and the Gulf of Mexico. Grain destined for domestic consumption moves east via Chicago to the U.S. Northeast or is interchanged with other carriers to the U.S. Southeast, Pacific Northwest and California markets.

Railway revenues for the movement of export grain from western Canada are subject to legislative provisions. These provisions apply to defined commodities and origin/destination pairings set out in the *Canada Transportation Act* ( CTA ). The revenue formula included in the CTA is indexed annually to reflect changes in the input costs associated with transporting grain destined for export markets. For additional information, refer to Section 21.3.1 of our 2010 Management's Discussion and Analysis ( MD&A ), which is available on SEDAR at [www.sedar.com](http://www.sedar.com) in Canada, on EDGAR at [www.sec.gov](http://www.sec.gov) in the U.S. and on our website at [www.cpr.ca](http://www.cpr.ca).

#### 4.7.1.2 Coal

Our coal business represented approximately 10% of total freight revenues in 2010.

We handle mostly metallurgical coal destined for export through the Port Metro Vancouver for use in the steel-making process in the Pacific Rim, Europe and South America.

Our Canadian coal traffic originates mainly from Teck's mines in southeastern B.C. They are considered to be among the most productive, highest-quality metallurgical coal mines in the world. CP announced a ten-year agreement designed to achieve growth in the volume of coal shipped. We move coal west from these mines to port terminals for export to world markets, and east for the U.S. midwest markets and for consumption in steel-making mills along the Great Lakes.

In the U.S. through short haul movements, we move primarily thermal coal, which is interchanged to us from other carriers, for use in power-generating plants. Our U.S. coal business also includes petroleum coke shipments to power-generating facilities.

#### 4.7.1.3 Sulphur and Fertilizers

Sulphur and fertilizers business represented approximately 10% of total freight revenues in 2010.

##### Sulphur

Most sulphur is produced in Alberta as a by-product of processing sour natural gas, refining crude oil and upgrading bitumen produced in the Alberta oil sands. Sulphur is a raw material used primarily in the manufacturing of sulphuric acid, which is used most extensively in the production of phosphate fertilizers. Demand for elemental sulphur rises with demand for fertilizers. Sulphuric acid is also a key ingredient in industrial processes ranging from smelting and nickel leaching to paper production.

Alberta's oil and gas industry produces more than eight million tonnes of sulphur annually. We transport approximately half of the sulphur that enters international markets from Canada and we are the leading transporter of formed sulphur shipped from gas plants in southern Alberta to the Port Metro Vancouver. The two largest shipping points in southern Alberta are Shantz and Waterton and both are located on our rail lines. Currently, our export traffic is destined mainly to China and Australia. In addition, we transport liquid sulphur from Scotford, Alberta, site of one of the largest refineries in the Edmonton area, and from other origins to the southeastern and northwestern U.S. for use in the fertilizer industry.

## SECTION 4: DESCRIPTION OF THE BUSINESS

### Fertilizers

Fertilizers traffic consists primarily of potash and chemical fertilizers. Our potash traffic moves mainly from Saskatchewan to offshore markets through the ports of Metro Vancouver, Thunder Bay and Portland, Oregon and to markets in the U.S. Chemical fertilizers are transported to markets in Canada and the U.S. from key production areas in the Canadian prairies. Phosphate fertilizer is also transported from U.S. and Canadian producers to markets in Canada and the northern U.S.

We provide transportation services from major potash and nitrogen production facilities in western Canada and have efficient routes to the major U.S. markets. We also have direct service to key fertilizer distribution terminals, such as the barge facilities on the Mississippi River system at Minneapolis-St. Paul, as well as access to Great Lakes vessels at Thunder Bay.

### **4.7.2 Merchandise**

Our merchandise business represented approximately 29% of total freight revenues in 2010.

Merchandise products move in trains of mixed freight and in a variety of car types. Service involves delivering products to many different customers and destinations. In addition to traditional rail service, we move merchandise traffic through a network of truck-rail transload facilities and provide logistics services.

#### **4.7.2.1 Forest Products**

Our forest products business represented approximately 4% of total freight revenues in 2010.

Forest products traffic includes wood pulp, paper, paperboard, newsprint, lumber, panel and oriented strand board shipped from key producing areas in B.C., northern Alberta, northern Saskatchewan, Ontario and Quebec to destinations throughout North America.

#### **4.7.2.2 Industrial and Consumer Products**

Our industrial and consumer products business represented approximately 19% of total freight revenues in 2010.

Industrial and consumer products traffic include a wide array of commodities grouped under chemicals, energy and plastics as well as mine, metals and aggregates.

Our industrial and consumer products traffic is widely dispersed throughout North America, with large bases in Alberta, Ontario, Quebec and the U.S. Midwest. The location of mines, steel mills and aggregate facilities adjacent to our rail lines provides for the convenient shipment of a diverse group of industrial products for a wide range of customers. We transport products to destinations throughout North America, including to and from ports. We also participate in the movement of products from the U.S. to Canadian destinations, including chemicals originating in and around the Gulf Coast and destined to points in eastern Canada.

#### **4.7.2.3 Automotive**

Our automotive business represented approximately 6% of total freight revenues in 2010.

Automotive traffic includes domestic, import and pre-owned vehicles as well as automotive parts. We transport finished vehicles from U.S. and Canadian assembly plants to the Canadian marketplace, and to other markets throughout North America via major interchanges at Detroit, Chicago and Buffalo. We also move imported vehicles to retail markets in Canada and the U.S. Midwest. A comprehensive network of automotive compounds is utilized to facilitate final delivery of vehicles to dealers throughout Canada and in the U.S.

## SECTION 4: DESCRIPTION OF THE BUSINESS

### **4.7.3 Intermodal**

Our intermodal business accounted for approximately 28% of total freight revenues in 2010.

Domestic intermodal freight consists primarily of manufactured consumer products moving in containers. International intermodal freight moves in marine containers to and from ports and North American inland markets.

#### Domestic Intermodal

Our domestic intermodal business covers a broad spectrum of industries including food, retail, less-than truckload shipping, trucking, forest products and various other consumer-related products. Key service factors in domestic intermodal include consistent on-time delivery, the ability to provide door-to-door service and the availability of value-added services. The majority of our domestic intermodal business originates in Canada where we market our services directly to retailers, providing complete door-to-door service and maintaining direct relationships with our customers. In the U.S., our service is delivered mainly through wholesalers.

#### International Intermodal

Our international intermodal business consists primarily of containerized traffic moving between the ports in Vancouver, Montreal, New York and Philadelphia and inland points across Canada and the U.S.

We are a major carrier of containers moving via the ports in Montreal and Vancouver. Import traffic from the Port Metro Vancouver is mainly long-haul business destined for eastern Canada and the U.S. Midwest and Northeast. Our trans-Pacific service offers the shortest route between the Port Metro Vancouver and Chicago. We work closely with the Port of Montreal, a major year-round East Coast gateway to Europe, to serve markets primarily in Canada and the U.S. Midwest. Our U.S. Northeast service connects eastern Canada with the ports of Philadelphia and New York, offering a competitive alternative to trucks.

### **4.7.4 Other Business**

We earn additional revenues from leasing certain assets, switching fees, other arrangements including logistical services, contracts with passenger service operators, and investments in joint rail operations.

### **4.7.5 Significant Customers**

In 2010 and 2009, no one customer comprised more than 10% of total revenues and accounts receivable. For the year ended December 31, 2008 one customer comprised 11.3% of total revenues and 1.7% of total accounts receivable.

**SECTION 4: DESCRIPTION OF THE BUSINESS****4.8 Railway Performance**

We focus on safety, franchise investment, increasing network efficiency and improving asset utilization, train operations productivity and labour productivity. The following table summarizes the effect of these strategies based on industry-recognized performance indicators:

**4.8.1 Performance Indicators**

Performance Indicators <sup>(1)</sup>	Year Ended December 31				
	2010 <sup>(2)</sup>	2009 <sup>(2)</sup>	2008 <sup>(2)</sup>	2007	2006
<i>Efficiency and other indicators</i>					
Gross ton-miles (GTM) (millions) <sup>(3)</sup>	<b>242,757</b>	209,475	239,705	246,322	236,405
Train miles (thousands)	<b>39,576</b>	34,757	41,420	42,804	42,310
U.S. gallons of locomotive fuel per 1,000 GTMs freight and yard <sup>(4)</sup>	<b>1.17</b>	1.19	1.22	1.21	1.20
Average number of active employees expens <sup>(5)</sup>	<b>13,879</b>	13,619	14,340	14,172	14,311
Car miles per car day <sup>(6)</sup>	<b>139.9</b>	N/A	N/A	N/A	N/A
Car miles per car day, excluding DM&E	<b>151.5</b>	142.6	143.6	142.3	137.3
Average train speed (miles per hour) <sup>(7)</sup>	<b>22.7</b>	N/A	N/A	N/A	N/A
Average train speed (miles per hour), excluding DM&E	<b>23.8</b>	25.5	24.0	23.2	24.8
Average terminal dwell (hours) <sup>(8)</sup>	<b>21.4</b>	21.9	22.3	22.2	20.8
<i>Safety indicators</i>					
FRA personal injuries per 200,000 employee-hours <sup>(9)(11)</sup>	<b>1.61</b>	1.92	1.63	2.09	2.00
FRA train accidents per million train-miles <sup>(10)(11)</sup>	<b>1.63</b>	1.81	2.53	2.05	1.56

(1) Certain prior period figures have been updated to reflect new information.

(2) Consolidated data includes DM&E for 2010 and 2009. The 2008 figures include DM&E on a fully consolidated basis for the period from October 30 through December 31, 2008.

(3) GTMs of freight measure the movement of total train weight over a distance of one mile. (Total train weight is comprised of the weight of the freight cars, their contents and any inactive locomotives). An increase in GTMs indicates additional workload.

(4) U.S. gallons of locomotive fuel per 1,000 GTMs freight and yard measures the total fuel consumed in freight and yard operations for every 1,000 GTMs traveled. This is calculated by dividing the total amount of fuel issued to our locomotives, excluding commuter and non-freight activities, by the total freight-related GTMs. The result indicates how efficiently we are using fuel.

(5) The average number of actively employed workers during the period whose compensation costs are included in Compensation and Benefits Expense on the Consolidated Statement of Income. This includes employees who are taking vacation and statutory holidays and other forms of short-term paid leave, and excludes individuals who have a continuing employment relationship with us but are not currently working or who have not worked a minimum number of hours. This definition also excludes employees working on capital projects.

(6) Car miles per car day is calculated by dividing total car-miles for a period by the total number of active cars. Total car-miles include the distance travelled by every car on a revenue-producing train and a train used in or around our yards. A car-day is assumed to equal one active car. An active car is a revenue-producing car that is

generating costs to CP on an hourly or mileage basis. Excluded from this count are i) cars that are not on the track or are being stored; ii) cars that are in need of repair; iii) cars that are used to carry materials for track repair; iv) cars owned by customers that are on the customer's tracks; and v) cars that are idle and waiting to be reclaimed by CP.

- (7) The average train speed measures average speed attained as a train travels between terminals, calculated by dividing the total train miles traveled by the total hours operated. This calculation does not include the travel time or the distance traveled by: i) trains used in or around CP's yards; ii) passenger trains; and iii) trains used for repairing track. The calculation also does not include the time trains spend waiting in terminals.
- (8) Average terminal dwell (hours) measures the average time a freight car resides at a specified terminal location. The timing starts with a train arriving in the terminal, a customer releasing the car to us, or a car arriving that is to be transferred to another railway. The timing ends when the train leaves, a customer receives the car from us or the freight car is transferred to another railway. Freight cars are excluded if: i) a train is moving through the terminal without stopping; ii) they are being stored at the terminal; iii) they are in need of repair; or iv) they are used in track repairs.
- (9) U.S. Federal Railroad Administration ( FRA ) personal injuries per 200,000 employee-hours measures the number of personal injuries, multiplied by 200,000 and divided by total employee-hours. Personal injuries are defined as injuries that require employees to lose time away from work, modify their normal duties or obtain medical treatment beyond minor first aid. Employee-hours are the total hours worked, excluding vacation and sick time, by all employees, excluding contractors.
- (10) FRA train accidents per million train-miles measures the number of train accidents, multiplied by 1,000,000 and divided by total train-miles. Train accidents included in this metric meet or exceed the FRA reporting threshold of US\$9,200 in the U.S. or \$10,600 in Canada in damage.
- (11) Safety indicators for 2008 include DM&E for the whole year.

**SECTION 4: DESCRIPTION OF THE BUSINESS****4.9 Franchise Investment**

Franchise investment is an integral part of our multi-year capital program and supports our growth initiatives. Our annual capital program typically includes investments in track and facilities (including rail yards and intermodal terminals); locomotives; information technology ( IT ); and freight cars and other equipment. On an accrual basis, we invested approximately \$2.41 billion in our core assets from 2008 to 2010, with annual capital spending over this period averaging approximately 15% of revenues. This included approximately \$1.81 billion invested in track and roadway, \$0.22 billion in rolling stock, \$0.19 in other equipment, \$0.14 billion in IT and \$0.05 billion in buildings.

**4.9.1 Locomotive Fleet**

Our locomotive fleet includes high-adhesion alternating current ( AC ) locomotives, which are more fuel efficient and reliable and have superior hauling capacity compared with standard direct current ( DC ) locomotives. Our locomotive fleet now includes 727 AC locomotives. While AC locomotives represent approximately 61% of our road-freight locomotive fleet, they handle approximately 83% of our workload. Our investment in AC locomotives has helped to improve service reliability and generate cost savings in fuel, equipment rents and maintenance.

Following is a synopsis of our owned and leased locomotive fleet:

**Number of Locomotives** (owned and long-term leased)

Age in Years	Road Freight		Road Switcher	Yard Switcher	Total
	AC	DC			
0-5	200		2		202
6-10	205				205
11-15	322				322
16-20					
Over 20		472	276	226	974
<b>Total</b>	<b>727</b>	<b>472</b>	<b>278</b>	<b>226</b>	<b>1,703</b>

**4.9.2 Railcar Fleet**

We own, lease or manage approximately 56,200 freight cars. Approximately 18,200 are owned by CP, approximately 7,200 are hopper cars owned by Canadian federal and provincial government agencies and approximately 13,100 are leased on a short-term basis and 17,700 are held under long-term leases. Short-term leases on approximately 6,600 cars are scheduled to expire during 2011, and the leases on approximately 4,800 additional cars are scheduled to expire before the end of 2015.

Our covered hopper car fleet, used for transporting regulated grain, consists of owned, leased and managed cars. A portion of the fleet used to transport export grain is leased from the Government of Canada, with whom we completed an operating agreement in 2007.

**4.10 Integrated Operating Plan ( IOP )**

Our IOP is the foundation for our scheduled railway operations, through which we strive to provide quality service for customers and improve asset utilization to achieve high levels of efficiency. The key principles upon which our IOP is built include moving freight cars across the network with as few handlings as possible, creating balance in directional flow of trains in our corridors by day of week, and minimizing the time that locomotives and freight cars are idle.

Under our IOP, trains are scheduled to run consistently at times agreed upon with our customers. To accomplish this, we establish a plan for each rail car that covers its entire trip from point of origin to final destination. Cars with similar destinations are consolidated into blocks. This reduces delays at intermediate locations by simplifying processes for employees, eliminating the duplication of work and helping to ensure traffic moves fluidly through rail yards and terminals. These measures improve transit times for shipments throughout our network and increase car availability for customers. Our IOP also increases efficiency by more effectively scheduling employee shifts, locomotive

maintenance, track repair, track renewal and material supply.

We have capitalized on the new capabilities of our network, our upgraded locomotive fleet and our new Train Area Marshalling software tool ( TrAM ) to safely operate longer and heavier trains. This has reduced associated expenses, simplified the departure of shipments from points of origin and provided lower-cost capacity for growth.

## SECTION 4: DESCRIPTION OF THE BUSINESS

We are committed to continuously improve scheduled railway operations as a means to achieve additional efficiencies that will enable further growth without the need to incur significant capital expenditures to accommodate the growth. During 2010, execution of our IOP generated productivity and efficiency improvements that reduced expenses in key areas, while improving service reliability to support rate increases and grow market share. Areas of expense reduction included labour, purchased services and equipment costs.

### 4.11 Information Technology

As a 24-hour-a-day, 7-day-a-week business, CP relies heavily on IT systems to schedule and manage planning and operational components safely and efficiently. IT applications map out complex interconnections of freight cars, locomotives, facilities, track and train crews to meet more than 10,000 individual customer service commitments every day. Across the network, CP's suite of operating systems manages the overall movement of customers' shipments and provides railway employees with reliable data on shipment performance, transit times, connections with other trains, train and yard capacities, and locomotive requirements. Within the yards, individual shipments are matched to freight car blocks, which in turn are matched to trains that are scheduled according to CP's IOP.

Our forward focus is on modernization and simplification of our IT systems, standardizing on two separate platforms: Shipment Suite for Rail Operations and SAP for Enterprise Resource Planning. CP's significant IT initiatives are as follows:

#### MultiRail

Core to CP's success has been the innovative and industry-leading use of a product design software tool called MultiRail. MultiRail is a fully-integrated application that allows CP to refine and evaluate our operating plan strategy. It creates and communicates a balanced plan to accommodate shippers' needs, operational considerations and asset utilization. CP has modeled the IOP within the MultiRail application using forward-looking traffic data. The full integration of the design process with our operation control systems allows us to move from the planning phase into the execution phase and to react quickly and efficiently to changing business conditions and opportunities.

#### Transportation Management Systems ( TMS )

CP's TMS system is operating at all intermodal facilities. The system improves intermodal service by providing customer self-service, proof of delivery and full shipment tracking. TMS also provides more sophisticated pricing options and simplified billing processes.

#### Mycpr.ca

A multi-year program designed to revamp e-business applications is underway to provide customers with an industry leading electronic commerce capability. The next phase will see the launch of a new version of CP's customer website, [www.myCPR.ca](http://www.myCPR.ca). This new tool will allow customers to manage all aspects of their shipments from initial price inquiries, car ordering, shipment tracking, invoice viewing and payment.

#### Engineering Excellence

CP is making significant technology investments in Engineering Excellence to ensure continued network safety and reliability. The bridge inspection system allows employees to capture inspection results electronically in the field, reducing the amount of time spent documenting inspection results and increasing the quality of information gathered about the condition of each asset. Engineering Excellence ensures timely maintenance, improved infrastructure renewal planning and assured compliance to regulatory requirements.

#### Equipment Health Management System ( EHMS )

EHMS is a multi-year project that supports the railway industry's Advanced Technology Safety Initiative to reduce stress on railway infrastructure. The system allows freight car equipment owners to monitor and maintain their fleet proactively. Features include truck hunting detectors and hot box detector information and alerts to our EHMS system.

## SECTION 4: DESCRIPTION OF THE BUSINESS

### 4.12 Labour Productivity and Efficiency

CP believes employees contribute best when the organizational structure is lean and accountabilities are clear. Companies only attain their full potential when they engage employees' intelligence and creativity in a structured manner that becomes part of the fabric of the company.

In the past few years CP has initiated a number of strategic initiatives to achieve these conditions. In 2009, we commenced a holistic review of our organizational structure. We made significant progress implementing changes in 2010, which are designed to ensure clear accountability and alignment. The changes will facilitate more efficient decision making and have led to some reductions in the number of management positions.

Our investments in lean and continuous improvement principles are now beginning to provide a return on our investment in increased productivity and reduced costs.

To reinforce the link between employee performance and organizational outcomes, CP also uses performance based programs designed to allow eligible unionized and non-unionized employees to share in the profits they help generate.

### 4.13 Business Risks and Enterprise Risk Management

In the normal course of our operations, we are exposed to various business risks and uncertainties that can have an effect on our financial condition. CP's Enterprise Risk Management (ERM) program targets strategic risk areas to determine additional prevention or mitigation plans that can be undertaken to either reduce risk or enable opportunities to be realized. The ERM process instils discipline in the approach to managing risk at CP and has been a contributing factor in providing focus on key areas. CP has managed to mitigate a number of strategic business risks using this focused approach.

The risks and our enterprise risk management are discussed in more detail in Section 21.0 Business Risks and Enterprise Risk Management of our 2010 MD&A, which is available on SEDAR at [www.sedar.com](http://www.sedar.com) in Canada, on EDGAR at [www.sec.gov](http://www.sec.gov) in the U.S. and on our website at [www.cpr.ca](http://www.cpr.ca).

### 4.14 Indemnifications

Pursuant to a trust and custodial services agreement with the trustee of the Canadian Pacific Railway Company Pension Trust Fund, we have undertaken to indemnify and save harmless the trustee, to the extent not paid by the fund, from any and all taxes, claims, liabilities, damages, costs and expenses arising out of the performance of the trustee's obligations under the agreement, except as a result of misconduct by the trustee. The indemnity includes liabilities, costs or expenses relating to any legal reporting or notification obligations of the trustee with respect to the defined contribution option of the pension plans or otherwise with respect to the assets of the pension plans that are not part of the fund. The indemnity survives the termination or expiry of the agreement with respect to claims and liabilities arising prior to the termination or expiry. At December 31, 2010, we had not recorded a liability associated with this indemnification, as we do not expect to make any payments pertaining to it.

Pursuant to our by-laws, we indemnify all of our current and former directors and officers. In addition to the indemnity provided by our by-laws, we also indemnify our directors and officers pursuant to indemnity agreements. We carry a liability insurance policy for directors and officers, subject to a maximum coverage limit and certain deductibles in cases where a director or officer is reimbursed for any loss covered by the policy.

### 4.15 Safety

Safety is a key priority for our management and Board of Directors. Our two main safety indicators – personal injuries and train accidents – follow strict U.S. Federal Railroad Administration (FRA) reporting guidelines.

The FRA personal injury rate per 200,000 employee-hours for CP was 1.61 in 2010, a decrease compared with 1.92 in 2009 and 1.63 in 2008. The FRA train accident rate for CP in 2010 was 1.63 accidents per million train-miles, compared with 1.81 in 2009 and 2.53 in 2008. CP strives to continually improve its safety performance through ten key strategies and activities such as training and technology. 2010 represents CP's second lowest personal injury rate and our third lowest train accident rate.

Our Health, Safety, Security and Environment Committee provides ongoing focus, leadership, commitment and support for efforts to improve the safety of our operations as well as the safety and health of our employees. The committee is comprised of all of the most senior representatives from our different operations departments and is a

key component of safety governance at CP. Our Safety Framework governs the safety management process, which involves more than 1,000 employees in planning

## SECTION 4: DESCRIPTION OF THE BUSINESS

and implementing safety-related activities. This management process, combined with planning that encompasses all operational functions, ensures a continuous and consistent focus on safety.

### 4.16 Environmental Protection

We have implemented a comprehensive Environmental Management System, which uses the five elements of the ISO 14001 standard – policy, planning, implementation and operation, checking and corrective action, and management review – as described below.

#### 4.16.1 Policy

We have adopted an Environmental Protection Policy and continue to develop and implement policies and procedures to address specific environmental issues and reduce environmental risk. Each policy is implemented with training for employees and a clear identification of roles and responsibilities.

We are a partner in Responsible Care<sup>®</sup>, an initiative of the Chemistry Industry Association of Canada and the American Chemistry Council (ACC) in the U.S., an ethic for the safe and environmentally sound management of chemicals throughout their life cycle. Partnership in Responsible Care<sup>®</sup> involves a public commitment to continually improve the industry's environmental, health and safety performance. We successfully completed our first Responsible Care<sup>®</sup> external verification in June 2002 and were granted Responsible Care<sup>®</sup> practice-in-place status. We were successfully re-verified in 2005 and again in 2008.

#### 4.16.2 Planning

We prepare an annual Corporate Environmental Plan and an Operations Environmental Plan, which include details of our environmental goals and targets as well as high-level strategies. These plans are used by various departments to integrate key corporate environmental strategies into their business plans.

#### 4.16.3 Implementation and Operation

We have developed specific environmental programs to address areas such as air emissions, wastewater, management of vegetation, chemicals and waste, storage tanks and fuelling facilities, and environmental impact assessment. Our environmental specialists and consultants lead these programs.

Our focus is on preventing spills and other incidents that have a negative impact on the environment. As a precaution, we have established a Strategic Emergency Response Contractor network and located spill equipment kits across Canada and the U.S. to ensure a rapid and efficient response in the event of an environmental incident. In addition, we regularly update and test emergency preparedness and response plans.

#### 4.16.4 Environmental Contamination

We continue to be responsible for remediation work on portions of a property in the State of Minnesota and continue to retain liability accruals for remaining future anticipated costs. The costs are expected to be incurred over a period of approximately 10 years. The state's voluntary investigation and remediation program will oversee the work to ensure it is completed in accordance with applicable standards. We currently estimate the remaining liability associated with these areas to be US\$24.2 million.

#### 4.16.5 Checking and Corrective Action

Our environmental audit comprehensively, systematically and regularly assesses our facilities for compliance with legal and regulatory requirements and conformance to our policies, which are based on legal requirements and accepted industry standards. Audits are scheduled based on risk assessment for each facility and are led by third-party environmental audit specialists supported by our environmental staff.

Audits are followed by a formal Corrective Action Planning process that ensures findings are addressed in a timely manner. Progress is monitored against completion targets and reported quarterly to senior management. Our audit program includes health and safety.

## **SECTION 4: DESCRIPTION OF THE BUSINESS**

### **4.16.6 Management Review**

Our Board of Directors Health, Safety, Security and Environment Committee conducts a semi-annual comprehensive review of environmental issues. An Environmental Lead Team, which is comprised of senior leaders of our Real Estate, Legal Services, Sales and Marketing, Finance, Operations, Supply Services, and Safety and Environmental Services departments, meets quarterly to review environmental matters.

### **4.16.7 Expenditures**

We spent \$34.4 million in 2010 for environmental management, including amounts spent on ongoing operations, fuel conservation, capital upgrades and remediation.

### **4.17 Insurance**

We maintain insurance policies to protect our assets and to protect against liabilities. Our insurance policies include, but are not limited to, liability insurance, director and officer liability insurance, automobile insurance and property insurance. The property insurance program includes business interruption coverage and contingent business interruption coverage, which would apply in the event of catastrophic damage to our infrastructure and specified strategic assets in the transportation network. We believe our insurance is adequate to protect us from known and unknown liabilities. However, in certain circumstances, certain losses may not be covered or completely covered by insurance and we may suffer losses, which could be material.

### **4.18 Competitive Conditions**

For a discussion of CP's competitive conditions in which we operate, please refer to Section 21.1 Competition included in our 2010 MD&A, which are incorporated by reference herein.

**SECTION 5: DIVIDENDS****5.1 Declared Dividends and Dividend Policy**

Dividends declared by the Board of Directors in the last three years are as follows:

<b>Dividend Amount</b>	<b>Record Date</b>	<b>Payment Date</b>
\$0.2475	March 28, 2008	April 28, 2008
\$0.2475	June 27, 2008	July 28, 2008
\$0.2475	September 26, 2008	October 27, 2008
\$0.2475	December 24, 2008	January 26, 2009
\$0.2475	March 27, 2009	April 27, 2009
\$0.2475	June 26, 2009	July 27, 2009
\$0.2475	September 25, 2009	October 26, 2009
\$0.2475	December 31, 2009	January 25, 2010
\$0.2475	March 26, 2010	April 26, 2010
\$0.2700	June 25, 2010	July 26, 2010
\$0.2700	September 24, 2010	October 25, 2010
\$0.2700	December 31, 2010	January 31, 2011
\$0.2700	March 25, 2011	April 25, 2011

Our Board of Directors is expected to give consideration on a quarterly basis to the payment of future dividends. The amount of any future quarterly dividends will be determined based on a number of factors that may include the results of operations, financial condition, cash requirements and future prospects of the Company. The Board of Directors is, however, under no obligation to declare dividends and the declaration of dividends is wholly within their discretion. Further, our Board of Directors may cease declaring dividends or may declare dividends in amounts that are different from those previously declared. Restrictions in the credit or financing agreements entered into by the Company or the provisions of applicable law may preclude the payment of dividends in certain circumstances.

## SECTION 6: CAPITAL STRUCTURE

### 6.1 Description of Capital Structure

The Company is authorized to issue an unlimited number of Common Shares, an unlimited number of First Preferred Shares and an unlimited number of Second Preferred Shares. At December 31, 2010, no first or second Preferred Shares had been issued.

- 1) The rights, privileges, restrictions and conditions attaching to the Common Shares are as follows:
  - a) **Payment of Dividends:** The holders of the Common Shares will be entitled to receive dividends if, as and when declared by CP's Board of Directors out of the assets of the Company properly applicable to the payment of dividends in such amounts and payable in such manner as the Board may from time to time determine. Subject to the rights of the holders of any other class of shares of the Company entitled to receive dividends in priority to or rateably with the holders of the Common Shares, the Board may in its sole discretion declare dividends on the Common Shares to the exclusion of any other class of shares of the Company.
  - b) **Participation upon Liquidation, Dissolution or Winding Up:** In the event of the liquidation, dissolution or winding up of the Company or other distribution of assets of the Company among its shareholders for the purpose of winding up its affairs, the holders of the Common Shares will, subject to the rights of the holders of any other class of shares of the Company entitled to receive the assets of the Company upon such a distribution in priority to or rateably with the holders of the Common Shares, be entitled to participate rateably in any distribution of the assets of the Company.
  - c) **Voting Rights:** The holders of the Common Shares will be entitled to receive notice of and to attend all annual and special meetings of the shareholders of the Company and to one (1) vote in respect of each Common Share held at all such meetings, except at separate meetings of or on separate votes by the holders of another class or series of shares of the Company.
- 2) The rights, privileges, restrictions and conditions attaching to the First Preferred Shares are as follows:
  - a) **Authority to Issue in One or More Series:** The First Preferred Shares may at any time or from time to time be issued in one (1) or more series. Subject to the following provisions, the Board may by resolution fix from time to time before the issue thereof the number of shares in, and determine the designation, rights, privileges, restrictions and conditions attaching to the shares of each series of First Preferred Shares.
  - b) **Voting Rights:** The holders of the First Preferred Shares will not be entitled to receive notice of or to attend any meeting of the shareholders of the Company and will not be entitled to vote at any such meeting, except as may be required by law.
  - c) **Limitation on Issue:** The Board may not issue any First Preferred Shares if by so doing the aggregate amount payable to holders of First Preferred Shares as a return of capital in the event of the liquidation, dissolution or winding up of the Company or any other distribution of the assets of the Company among its shareholders for the purpose of winding up its affairs would exceed \$500,000,000.
  - d) **Ranking of First Preferred Shares:** The First Preferred Shares will be entitled to priority over the Second Preferred Shares and the Common Shares of the Company and over any other shares ranking junior to the First Preferred Shares with respect to the payment of dividends and the distribution of assets of the Company in the event of any liquidation, dissolution or winding up of the Company or other distribution of the assets of the Company among its shareholders for the purpose of winding up its affairs.
  - e)

**Dividends Preferential:** Except with the consent in writing of the holders of all outstanding First Preferred Shares, no dividend can be declared and paid on or set apart for payment on the Second Preferred Shares or the Common Shares or on any other shares ranking junior to the First Preferred Shares unless and until all dividends (if any) up to and including any dividend payable for the last completed period for which such dividend is payable on each series of First Preferred Shares outstanding has been declared and paid or set apart for payment.

## SECTION 6: CAPITAL STRUCTURE

- 3) The rights, privileges, restrictions and conditions attaching to the Second Preferred Shares are as follows:
- a) **Authority to Issue in One or More Series:** The Second Preferred Shares may at any time or from time to time be issued in one (1) or more series. Subject to the following provisions, the Board may by resolution fix from time to time before the issue thereof the number of shares in, and determine the designation, rights, privileges, restrictions and conditions attaching to the shares of each series of Second Preferred Shares.
  - b) **Voting Rights:** The holders of the Second Preferred Shares will not be entitled to receive notice of or to attend any meetings of the shareholders of the Company and will not be entitled to vote at any such meeting, except as may be required by law.
  - c) **Limitation on Issue:** The Board may not issue any Second Preferred Shares if by so doing the aggregate amount payable to holders of Second Preferred Shares as a return of capital in the event of the liquidation, dissolution or winding up of the Company or any other distribution of the assets of the Company among its shareholders for the purpose of winding up its affairs would exceed \$500,000,000.
  - d) **Ranking of Second Preferred Shares:** The Second Preferred Shares will be entitled to priority over the Common Shares of the Company and over any other shares ranking junior to the Second Preferred Shares with respect to the payment of dividends and the distribution of assets of the Company in the event of the liquidation, dissolution or winding up of the Company or any other distribution of the assets of the Company among its shareholders for the purpose of winding up of its affairs.
  - e) **Dividends Preferential:** Except with the consent in writing of the holders of all outstanding Second Preferred Shares, no dividend can be declared and paid on or set apart for payment on the Common Shares or on any other shares ranking junior to the Second Preferred Shares unless and until all dividends (if any) up to and including any dividend payable for the last completed period for which such dividend is payable on each series of Second Preferred Shares outstanding has been declared and paid or set apart for payment.

### 6.2 Security Ratings

The following information relating to the Company's credit ratings is provided as it relates to the Company's financing costs, liquidity and operations. Specifically, credit ratings affect the Company's ability to obtain short-term and long-term financing and /or the cost of such financing. Additionally, the ability of the Company to engage in certain collateralized business activities on a cost effective basis depends on the Company's credit ratings. A reduction in the current rating on the Company's debt by its rating agencies, particularly a downgrade below investment grade ratings, or a negative change in the Company's ratings outlook could adversely affect the Company's cost of financing and/or its access to sources of liquidity and capital. In addition, changes in credit ratings may affect the Company's ability to, and/or the associated costs of, (i) entering into ordinary course derivative or hedging transactions and may require the Company to post additional collateral under certain of its contracts, and (ii) entering into and maintaining ordinary course contracts with customers and suppliers on acceptable terms and (iii) ability to self-insure certain leased or financed rolling stock assets as per common industry practice.

The Company's debt securities are rated by three approved rating organizations – Moody's Investors Service, Inc., Standard & Poor's Corporation and Dominion Bond Rating Service Limited. Currently, our securities are rated as Investment Grade, shown in the table below:

Approved Rating Organization	Long-Term Debt Rating
---------------------------------	-----------------------------

Moody's Investors Service	Baa3
Standard & Poor's Corporation	BBB
Dominion Bond Rating Service	BBB

**SECTION 6: CAPITAL STRUCTURE**

The Standard & Poor's Corporation has a negative outlook, while the Moody's Investors Service and Dominion Bond Rating Service have a stable outlook.

Credit ratings are intended to provide investors with an independent measure of the credit quality of an issue of securities and are indicators of the likelihood of payment and of the capacity and willingness of a company to meet its financial commitment on an obligation in accordance with the terms of the obligation. A description of the rating categories of each of the rating agencies in the table above is set out below.

Credit ratings are not recommendations to purchase, hold or sell securities and do not address the market price or suitability of a specific security for a particular investor and may be subject to revision or withdrawal at any time by the rating agencies. Credit ratings may not reflect the potential impact of all risks on the value of securities. In addition, real or anticipated changes in the rating assigned to a security will generally affect the market value of that security. There can be no assurance that a rating will remain in effect for any given period of time or that a rating will not be revised or withdrawn entirely by a rating agency in the future.

The following table summarizes rating categories for respective rating agencies:

<b>Moody's Investors Service</b>	<b>Standard &amp; Poor's</b>	<b>Dominion Bond Rating Service</b>	
Aaa	AAA	AAA	
Aa1	AA+	AA(high)	High Investment Grade
Aa2	AA	AA	
Aa3	AA-	AA(low)	
A1	A+	A(high)	Investment Grade
A2	A	A	
A3	A-	A(low)	
Baa1	BBB+	BBB(high)	Investment Grade
Baa2	BBB	BBB	
Baa3	BBB-	BBB(low)

**SECTION 7: MARKET FOR SECURITIES****7.1 Stock Exchange Listings**

The Common Shares of CP are listed on the Toronto Stock Exchange and the New York Stock Exchange under the symbol CP .

**7.2 Trading Price and Volume**

The following table provides the monthly trading information for our Common Shares on the Toronto Stock Exchange during 2010:

<b>Month</b>	<b>Opening Price per Share (\$)</b>	<b>High Price per Share (\$)</b>	<b>Low Price per Share (\$)</b>	<b>Closing Price per Share (\$)</b>	<b>Volume of Shares Traded</b>
January	57.14	57.48	49.98	50.48	9,122,731
February	50.51	52.36	49.58	50.79	9,466,384
March	51.00	57.54	50.80	57.24	10,568,993
April	57.01	61.66	55.55	59.88	9,487,200
May	60.35	62.00	53.57	58.88	14,227,073
June	57.77	62.90	56.03	57.06	15,469,194
July	57.25	62.13	55.65	61.39	12,208,568
August	61.76	63.15	58.19	62.81	10,558,343
September	63.25	65.82	62.44	62.86	10,812,161
October	63.01	67.50	61.60	66.48	9,812,600
November	66.49	67.25	63.93	65.55	7,919,864
December	66.00	66.68	64.10	64.62	7,441,455

The following table provides the monthly composite trading information for our Common Shares on the New York Stock Exchange during 2010:

<b>Month</b>	<b>Opening Price per Share (\$)</b>	<b>High Price per Share (\$)</b>	<b>Low Price per Share (\$)</b>	<b>Closing Price per Share (\$)</b>	<b>Volume of Shares Traded</b>
January	54.76	55.74	46.77	47.00	11,418,147
February	47.55	50.39	46.13	48.18	10,748,305
March	48.71	56.65	48.29	56.24	9,753,036
April	56.59	61.38	55.43	58.86	9,258,699
May	59.55	60.78	49.98	55.03	17,260,850
June	54.78	61.98	53.15	53.62	17,870,414
July	53.81	60.42	52.15	59.87	12,998,927
August	61.00	62.14	54.73	58.98	13,356,734
September	59.89	63.47	59.89	60.93	13,237,176
October	61.42	66.72	60.14	65.14	11,116,621
November	65.45	67.03	62.62	63.99	8,600,049
December	64.86	66.43	63.59	64.81	10,300,835

**SECTION 8: DIRECTORS AND OFFICERS**

Following are the names and municipalities of residence of the directors and officers of the Company, their positions and principal occupations within the past five years, the period during which each director has served as director of the Company, and the date on which each director's term of office expires.

**8.1 Directors**

<b>Name and Municipality of Residence</b>	<b>Position Held and Principal Occupation within the Preceding Five Years<sup>(1)</sup></b>	<b>Year of Annual Meeting at which Term of Office Expires (Director Since)</b>
J.E. Cleghorn, O.C., F.C.A. <sup>(3)</sup> Toronto, Ontario, Canada	Chairman, Canadian Pacific Railway Limited and Canadian Pacific Railway Company	2011 (2001)
T.W. Faithfull <sup>(3)(4)(5)</sup> Oxford, Oxfordshire, England	Retired President and Chief Executive Officer Shell Canada Limited (oil and gas company)	2011 (2003)
F.J. Green <sup>(4)</sup> Calgary, Alberta, Canada	President and Chief Executive Officer, Canadian Pacific Railway Company and Canadian Pacific Railway Limited	2011 (2006)
K.T. Hoeg, C.A. <sup>(2)(6)</sup> Toronto, Ontario, Canada	Former President and Chief Executive Officer of Corby Distilleries Limited (spirits and wine)	2011 (2007)
R. C. Kelly <sup>(2)(4)</sup> Minneapolis, Minnesota, U.S.A.	Chairman and Chief Executive Officer Xcel Energy Inc. (a utility supplier of electric power and natural gas)	2011 (2008)
The Hon. J.P. Manley <sup>(2)(3)(6)</sup> Ottawa, Ontario, Canada	President and Chief Executive Officer, Canadian Council of Chief Executives (non-profit public policy, consultation and advocacy organization)	2011 (2006)
L.J. Morgan <sup>(2)(4)</sup> Bethesda, Maryland, U.S.A.	Counsel, Covington & Burling LLP (law firm)	2011 (2006)
M. Paquin <sup>(4)(5)</sup> Montreal, Quebec, Canada	President and Chief Executive Officer, Logistec Corporation (international cargo-handling company)	2011 (2001)
M.E.J. Phelps, O.C. <sup>(3)(5)(6)</sup> West Vancouver, B.C., Canada	Chairman, Dornoch Capital Inc. (private investment company)	2011 (2001)
R. Phillips, O.C., S.O.M., F.Inst.P. <sup>(2)(3)(6)</sup> Regina, Saskatchewan, Canada	Retired President and Chief Executive Officer, IPSCO Inc. (steel manufacturing company)	2011 (2001)
D.W. Raisbeck <sup>(5)(6)</sup> Sanibel, Florida, U.S.A.	Retired Vice-Chairman, Cargill Inc. (producer and marketer of agricultural, financial and industrial products)	2011 (2009)

H.T. Richardson, C.M., O.M. <sup>(5)(6)</sup> Winnipeg, Manitoba, Canada	President and Chief Executive Officer, James Richardson & Sons, Limited (privately owned corporation)	2011 (2006)
M.W. Wright <sup>(2)(3)(4)</sup> Longboat Key, Florida, U.S.A.	Retired Chairman of the Board and Chief Executive Officer, SUPERVALU INC. (food distributor and grocery retailer)	2011 (2001)

Notes:

- (1) J.E. Cleghorn was Chairman of the Board of SNC-Lavalin Group from May 2002 until May 2007. F.J. Green was President and Chief Operating Officer, Canadian Pacific Railway Company and Canadian Pacific Railway Limited from November 2005 until May 2006. K.T. Hoeg was President and Chief Executive Officer of Corby Distilleries Limited from October 1996 to February 2007. The Hon. J.P. Manley

## SECTION 8: DIRECTORS AND OFFICERS

was the counsel for McCarthy Tétrault from July 2004 until October 2009 and President-Elect of the Canadian Council of Chief Executives from October to December 2009. R.C. Kelly was President of Xcel Energy Inc. from June 2005 to September 2009. D.W. Raisbeck was Vice-Chairman of Cargill Inc. from 1999 to 2009.

- (2) Member of the Audit, Finance and Risk Management Committee.
- (3) Member of the Corporate Governance and Nominating Committee.
- (4) Member of the Health, Safety, Security and Environment Committee.
- (5) Member of the Management Resources and Compensation Committee.
- (6) Member of the Pension Committee.

### **8.2 Cease Trade Orders, Bankruptcies, Penalties or Sanctions**

As a result of the announcement in May 2004 by Nortel Networks Corporation and Nortel Networks Limited (collectively, the Nortel Companies ) of the need to restate certain of their previously reported financial results and the resulting delays in filing interim and annual financial statements for certain periods by the required filing dates under Ontario securities laws, the Ontario Securities Commission made a final order on May 31, 2004 prohibiting all trading by directors, officers and certain current and former employees including J.E. Cleghorn and J.P. Manley, both former directors. The Quebec and Alberta Securities commissions issued similar orders. The cease trade order issued by the Ontario Securities Commission was revoked on June 21, 2005. The Quebec and Alberta orders were revoked shortly thereafter. Mr. Cleghorn and Mr. Manley were not subject to the Quebec and Alberta orders. Following the March 10, 2006 announcement by the Nortel Companies of the need to restate certain of their previously reported financial results and the resulting delay in the filing of certain 2005 financial statements by the required filing dates, the Ontario Securities Commission issued a final management cease trade order on April 10, 2006 prohibiting all of the directors, officers and certain current and former employees including Mr. Cleghorn and Mr. Manley from trading in the securities of the Nortel Companies. The British Columbia and Quebec Securities commissions issued similar orders. The Ontario Securities Commission lifted the cease trade order effective June 8, 2006 and the British Columbia and the Quebec Securities commissions also lifted their cease trade orders shortly thereafter. Mr. Cleghorn and Mr. Manley were not subject to the British Columbia and Quebec orders.

Mr. Manley was a director of the Nortel Companies when the Nortel Companies applied for and was granted creditor protection under the Companies Creditors Arrangement Act on January 14, 2009.

Mr. R. Kelly was President and Chief Executive Officer of NRG Energy, Inc. ( NRG ), a former subsidiary of Xcel Energy Inc. from June 6, 2002 to May 14, 2003, and a director of NRG from June 2000 to May 14, 2003. In May 2003, NRG and certain of NRG's affiliates filed voluntary petitions for reorganization under Chapter 11 of the U.S. Bankruptcy Code to restructure their debt. NRG emerged from bankruptcy on December 5, 2003.

**SECTION 8: DIRECTORS AND OFFICERS****8.3 Senior Officers**

30

---

**SECTION 10: TRANSFER AGENTS AND REGISTRARS**

**10.1 Transfer Agent**

Computershare Investor Services Inc., with transfer facilities in Montreal, Toronto, Calgary and Vancouver, serves as transfer agent and registrar for CP's Common Shares in Canada.

Computershare Trust Company NA, Denver, Colorado, serves as co-transfer agent and co-registrar for CP's Common Shares in the U.S.

Requests for information should be directed to:

Computershare Investor Services Inc.

100 University Avenue, 9<sup>th</sup> Floor

Toronto, Ontario Canada

M5J 2Y1

**SECTION 11: INTERESTS OF EXPERTS**

The Company's independent auditors are PricewaterhouseCoopers LLP, Chartered Accountants. PricewaterhouseCoopers LLP has issued an independent auditors' report dated February 24, 2011, in respect of the Company's consolidated financial statements, as at December 31, 2010 and 2009 and for each of the years in the three year period ended December 31, 2010. They have also prepared an audit report on the effectiveness of internal control over financial reporting, at December 31, 2010. PricewaterhouseCoopers LLP has advised that they are independent with respect to CP within the meaning of the Rules of Professional Conduct of the Institute of Chartered Accountants of Alberta and within the meaning of Public Company Accounting Oversight Board Rule 3520, Auditor Independence.

## SECTION 12: AUDIT, FINANCE AND RISK MANAGEMENT COMMITTEE

### 12.1 Composition of the Audit, Finance and Risk Management Committee and Relevant Education and Experience

The following individuals comprise the entire membership of the Audit, Finance and Risk Management Committee ( the Committee ).

**K. T. Hoeg** - Ms. Hoeg is the former President and Chief Executive Officer of Corby Distilleries Limited, a marketer and seller of spirits and wine, a position that she held from October 1996 to February 2007. She is currently a director of Imperial Oil Limited, Sun Life Financial Inc., Shoppers Drug Mart Corporation, Ganong Bros. Limited and Samuel, Son & Co., Limited. She is also on the Board of the Toronto East General Hospital. Ms. Hoeg is a Chartered Accountant (1982) and holds a B.Sc. from McMaster University, and a B.Com. and an M.Sc. from the University of Windsor.

**R. C. Kelly** - Mr. Kelly is Chairman and Chief Executive Officer of Xcel Energy Inc., a utility supplier of electric power and natural gas service in eight Western and Midwestern States. He has held that position since September 2009. From December 2005 to September 2009 he was Chairman of the Board, President and Chief Executive Officer, from June to mid-December 2005 he served as President and Chief Executive Officer, and previous to that he served as Chief Financial Officer. Mr. Kelly is Chairman of Edison Electric Institute, and a Board member of the Capital City Partnership, the Electric Power Research Institute, the Nuclear Energy Institute, Regis University and director on the Denver Metro Chamber of Commerce. Mr. Kelly earned both an M.B.A. and a bachelor's degree in accounting from Regis University.

**The Hon. J. P. Manley** - Mr. Manley is President and Chief Executive Officer of the Canadian Council of Chief Executives. He has held that position since January 2010. From May 2004 to December 2009 he was counsel at the law firm of McCarthy Tétrault LLP. He is a director of Canadian Imperial Bank of Commerce, CAE Inc. and a director and Board Chair of Optosecurity Inc. (a private company). In addition, Mr. Manley serves on the Boards of the University of Waterloo, MaRS Discovery District, National Arts Center Foundation, CARE Canada, The Conference Board of Canada and the Institute for Research on Public Policy. In October 2007 he was appointed by the Prime Minister to Chair the Independent Panel on Canada's role in Afghanistan. Mr. Manley was previously the Member of Parliament for Ottawa South from November 1988 to June 2004. As a Member of Parliament, Mr. Manley also held various positions in the Canadian Federal Government, including Deputy Prime Minister of Canada from January 2002 to December 2003, Minister of Finance from June 2002 to December 2003, Minister of Foreign Affairs from October 2000 to January 2002 and Minister of Industry prior thereto. He graduated from Carleton University with a B.A. and from the University of Ottawa with an LL.B. He was granted the designation C.Dir (Chartered Director) by McMaster University in 2006.

**L. J. Morgan** - Ms. Morgan is Of Counsel at Covington & Burling LLP, a U.S. based international law firm. She joined the firm as a partner in September 2003 and retired from the partnership in February 2010. During her tenure with the firm, she has chaired its transportation and government affairs practices. She also serves on the Board of Visitors for the Georgetown University Law Center and the Business Advisory Committee for Northwestern University's Transportation Center. Ms. Morgan was previously Chairman of the U.S. Surface Transportation Board, and its predecessor the Interstate Commerce Commission, from March 1995 to December 2002. Prior to joining the Interstate Commerce Commission, Ms. Morgan served as General Counsel to the Senate Committee on Commerce, Science and Transportation. Ms. Morgan was granted the honour of Recognition in Chambers - USA, Best Lawyers in America, and SuperLawyers for outstanding legal counsel in the transportation sector. She graduated from Vassar College with an A.B. and the Georgetown University Law Center with a J.D., and is an alumna of the Program for Senior Managers in Government at Harvard University's John F. Kennedy School of Government.

**R. Phillips** - Mr. Phillips is the Retired President and Chief Executive Officer of IPSCO Inc., a steel manufacturing company. He held that position from February 1982 until his retirement in December 2001. He is currently a director of Cliffs Natural Resources. Mr. Phillips is a Fellow of the Institute of Physics and a Member of the Canadian Association of Physicists. He is also President of La Sauciere Investments Inc., a private company. He was appointed an Officer of the Order of Canada in 1999 and was presented with the Saskatchewan Order of Merit in 2002. He

graduated from McGill University in Montreal with a B.Sc. in Physics and Mathematics.

**M. W. Wright (Chair)** - Mr. Wright is the Retired Chairman of the Board and Chief Executive Officer of SUPERVALU INC., a food distributor and grocery retailer. He was Chairman and Chief Executive Officer from June 1981 to June 2001 and Chairman until June 2002. He is a Past Chairman of Food Distributors International and the Food Marketing Institute, and is a director of Honeywell International, Inc., S.C. Johnson & Son, Inc. and Cargill Inc. He is a Trustee Emeritus of the University of Minnesota Foundation and the Board of Trustees of St. Thomas Academy. He graduated from the University of Minnesota with a B.A. and from the University of Minnesota Law School with a J.D. (Honours).

## SECTION 12: AUDIT, FINANCE AND RISK MANAGEMENT COMMITTEE

Each of the aforementioned committee members has been determined by the board to be independent and financially literate within the meaning of National Instrument 52-110.

### 12.2 Pre-Approval of Policies and Procedures

The Committee has adopted a written policy governing the pre-approval of audit and non-audit services to be provided to CP by our independent auditors. The policy is reviewed annually and the audit and non-audit services to be provided by our independent auditors, as well as the budgeted amounts for such services, are pre-approved at that time. Our Senior Vice-President, Finance and Comptroller must submit to the Committee at least quarterly a report of all services performed or to be performed by our independent auditors pursuant to the policy. Any additional audit or non-audit services to be provided by our independent auditors either not included among the pre-approved services or exceeding the budgeted amount for such pre-approved services by more than 10% must be individually pre-approved by the Committee or its Chairman, who must report all such additional pre-approvals to the Committee at its next meeting following the granting thereof. Our independent auditors' annual audit services engagement terms and fees are subject to the specific pre-approval of the Committee. In addition, prior to the granting of any pre-approval, the Committee or its Chairman, as the case may be, must be satisfied that the performance of the services in question will not compromise the independence of our independent auditors. Our Chief Internal Auditor monitors compliance with this policy.

### 12.3 Audit, Finance and Risk Management Committee Charter

The term "Corporation" herein shall refer to each of Canadian Pacific Railway Limited ( "CPRL" ) and Canadian Pacific Railway Company ( "CPRC" ), and the terms "Board", "Directors", "Board of Directors" and "Committee" shall refer to Board, Directors, Board of Directors, or Committee of CPRL or CPRC, as applicable.

#### A. Committee and Procedures

##### 1. *Purpose*

The purposes of the Audit, Finance and Risk Management Committee (the "Committee") of the Board of Directors of the Corporation are to fulfill applicable public company audit committee legal obligations and to assist the Board of Directors in fulfilling its oversight responsibilities in relation to the disclosure of financial statements and information derived from financial statements, and in relation to risk management matters including:

the review of the annual and interim financial statements of the Corporation;

the integrity and quality of the Corporation's financial reporting and systems of internal control, and risk management;

the Corporation's compliance with legal and regulatory requirements;

the qualifications, independence, engagement, compensation and performance of the Corporation's external auditors; and

the performance of the Corporation's internal audit function;

and to prepare, if required, an audit committee report for inclusion in the Corporation's annual management proxy circular, in accordance with applicable rules and regulations.

The Corporation's external auditors shall report directly to the Committee.

##### 2. *Composition of Committee*

The members of the Committee of each of CPRL and CPRC shall be identical and shall be Directors of CPRL and CPRC, respectively. The Committee shall consist of not less than three and not more than six Directors, none of whom is either an officer or employee of the Corporation or any of its subsidiaries. Members of the Committee shall meet applicable requirements and guidelines for audit committee service, including requirements and guidelines with respect to being independent and unrelated to the Corporation and to having accounting or related financial

management expertise and financial literacy, set forth in applicable securities laws or the rules of any stock exchange on which the Corporation's securities are listed for trading. No director who serves on the audit committee of more than two public companies other than the Corporation shall be eligible to serve as a member of the Committee, unless the Board of Directors has determined that such simultaneous service would not impair the ability of such member to effectively serve on the Committee. Determinations as to whether a particular Director satisfies the requirements for membership on the Committee shall be affirmatively made by the full Board.

## SECTION 12: AUDIT, FINANCE AND RISK MANAGEMENT COMMITTEE

### 3. Appointment of Committee Members

Members of the Committee shall be appointed from time to time by the Board and shall hold office at the pleasure of the Board. Where a vacancy occurs at any time in the membership of the Committee, it may be filled by the Board. The Board shall fill a vacancy whenever necessary to maintain a Committee membership of at least three Directors.

### 4. Committee Chair

The Board shall appoint a Chair for the Committee from among the Committee members.

### 5. Absence of Committee Chair

If the Chair of the Committee is not present at any meeting of the Committee, one of the other members of the Committee who is present at the meeting shall be chosen by the Committee to preside at the meeting.

### 6. Secretary of Committee

The Committee shall appoint a Secretary who need not be a director of the Corporation.

### 7. Meetings

The Committee shall meet at regularly scheduled meetings at least once every quarter and shall meet at such other times during each year as it deems appropriate. In addition, the Chair of the Committee may call a special meeting of the Committee at any time.

### 8. Quorum

Three members of the Committee shall constitute a quorum.

### 9. Notice of Meetings

Notice of the time and place of every meeting shall be given in writing by any means of transmitted or recorded communication, including facsimile, telex, telegram or other electronic means that produces a written copy, to each member of the Committee at least 24 hours prior to the time fixed for such meeting; provided however, that a member may in any manner waive a notice of a meeting. Attendance of a member at a meeting constitutes a waiver of notice of the meeting, except where a member attends a meeting for the express purpose of objecting to the transaction of any business on the grounds that the meeting is not lawfully called.

### 10. Attendance of Others at Meetings

At the invitation of the Chair of the Committee, other individuals who are not members of the Committee may attend any meeting of the Committee.

### 11. Procedure, Records and Reporting

Subject to any statute or the articles and by-laws of the Corporation, the Committee shall fix its own procedures at meetings, keep records of its proceedings and report to the Board when the Committee may deem appropriate (but not later than the next meeting of the Board). The minutes of its meetings shall be tabled at the next meeting of the Board.

### 12. Delegation

The Committee may delegate from time to time to any person or committee of persons any of the Committee's responsibilities that lawfully may be delegated.

### 13. Report to Shareholders

The Committee shall prepare a report to shareholders or others concerning the Committee's activities in the discharge of its responsibilities, when and as required by applicable laws or regulations.

### 14. Guidelines to Exercise of Responsibilities

The Board recognizes that meeting the responsibilities of the Committee in a dynamic business environment requires a degree of flexibility. Accordingly, the procedures outlined in these Terms of Reference are meant to serve as guidelines rather than inflexible rules, and the Committee may adopt such different or additional procedures as it deems necessary from time to time.

## SECTION 12: AUDIT, FINANCE AND RISK MANAGEMENT COMMITTEE

### 15. Use of Outside Legal, Accounting or Other Advisors; Appropriate Funding

The Committee may retain, at its discretion, outside legal, accounting or other advisors, at the expense of the Corporation, to obtain advice and assistance in respect of any matters relating to its duties, responsibilities and powers as provided for or imposed by these Terms of Reference or otherwise by law.

The Committee shall be provided by the Corporation with appropriate funding, as determined by the Committee, for payment of:

- (i) compensation of any outside advisers as contemplated by the immediately preceding paragraph;
- (ii) compensation of any independent auditor engaged for the purpose of preparing or issuing an audit report or performing other audit, review or attest services for the Corporation; or

- (iii) ordinary administrative expenses that are necessary or appropriate in carrying out the Committee's duties.

All outside legal, accounting or other advisors retained to assist the Committee shall be accountable ultimately to the Committee.

### 16. Remuneration of Committee Members

No member of the Committee shall receive from the Corporation or any of its affiliates any compensation other than the fees to which he or she is entitled as a Director of the Corporation or a member of a committee of the Board. Such fees may be paid in cash and/or shares, options or other in-kind consideration ordinarily available to Directors.

### **B. Mandate**

17. The Committee's role is one of oversight. Management is responsible for preparing the interim and annual financial statements of the Corporation and for maintaining a system of risk assessment and internal controls to provide reasonable assurance that assets are safeguarded and that transactions are authorized, recorded and reported properly, for maintaining disclosure controls and procedures to ensure that it is informed on a timely basis of material developments and the Corporation complies with its public disclosure obligations, and for ensuring compliance by the Corporation with legal and regulatory requirements. The external auditors are responsible for auditing the Corporation's financial statements. In carrying out its oversight responsibilities, the Committee does not provide any professional certification or special assurance as to the Corporation's financial statements or the external auditors' work.

The Committee shall:

### Audit Matters

#### **External Auditors' Report on Annual Audit**

- a) obtain and review annually prior to the completion of the external auditors' annual audit of the year-end financial statements a report from the external auditors describing:
  - (i) all critical accounting policies and practices to be used;
  - (ii) all alternative treatments of financial information within generally accepted accounting principles that have been discussed with management, the ramifications of the use of such alternative disclosures and treatments, and the treatment preferred by the external auditors; and
  - (iii) other material written communications between the external auditors and management, such as any management letter or schedule of unadjusted differences;

#### **Management's and Internal Auditors' Reports on External Audit Issues**

- b) review any reports on the above or similar topics prepared by management or the internal auditors and discuss with the external auditors any material issues raised in such reports;

**Annual Financial Reporting Documents and External Auditors Report**

- c) meet to review with management, the internal auditors and the external auditors the Corporation's annual financial statements, the report of the external auditors thereon, the related Management's Discussion and Analysis, and the information derived from the financial statements, as contained in the Annual Information Form and the Annual Report. Such review will include obtaining assurance from the external auditors that the audit was conducted in a manner consistent with applicable law and will include a review of:
  - (i) all major issues regarding accounting principles and financial statement presentations, including any significant changes in the Corporation's selection or application of accounting policies or principles;

## SECTION 12: AUDIT, FINANCE AND RISK MANAGEMENT COMMITTEE

- (ii) all significant financial reporting issues and judgments made in connection with the preparation of the financial statements, including the effects on the financial statements of alternative methods within generally accepted accounting principles;
  - (iii) the effect of regulatory and accounting issues, as well as off-balance sheet structures, on the financial statements;
  - (iv) all major issues as to the adequacy of the Corporation's internal controls and any special steps adopted in light of material control deficiencies; and
  - (v) the external auditors' judgment about the quality, and not just the acceptability, of the accounting principles applied in the Corporation's financial reporting;
- d) following such review with management and the external auditors, recommend to the Board of Directors whether to approve the audited annual financial statements of the Corporation and the related Management's Discussion and Analysis, and report to the Board on the review by the Committee of the information derived from the financial statements contained in the Annual Information Form and Annual Report;

### Interim Financial Statements and MD&A

- e) review with management, the internal auditors and the external auditors the Corporation's interim financial statements and its interim Management's Discussion and Analysis, and if thought fit, approve the interim financial statements and interim Management's Discussion and Analysis and the public release thereof by management;

### Earnings Releases, Earnings Guidance

- f) review and discuss earnings press releases, including the use of pro forma or adjusted information determined other than in accordance with generally accepted accounting principles, and the disclosure by the Corporation of earnings guidance and other financial information to the public including analysts and rating agencies, it being understood that such discussions may, in the discretion of the Committee, be done generally (i.e., by discussing the types of information to be disclosed and the type of presentation to be made) and that the Committee need not discuss in advance each earnings release or each instance in which the Corporation discloses earnings guidance or other financial information; and be satisfied that adequate procedures are in place for the review of such public disclosures and periodically assess the adequacy of those procedures;

### Material Litigation, Tax Assessments, Etc.

- g) review with management, the external auditors and, if necessary, legal counsel all legal and regulatory matters and litigation, claims or contingencies, including tax assessments, that could have a material effect upon the financial position of the Corporation, and the manner in which these matters may be, or have been, disclosed in the financial statements; and obtain reports from management and review with the Corporation's chief legal officer, or appropriate delegates, the Corporation's compliance with legal and regulatory requirements;

### Oversight of External Auditors

- h) subject to applicable law relating to the appointment and removal of the external auditors, be directly responsible for the appointment, retention, termination, compensation and oversight of the external auditors; and be responsible for the resolution of disagreements between management and the external auditors regarding financial reporting;

### Rotation of External Auditors - Audit Partners

- i) review and evaluate the lead audit partner of the external auditors and assure the regular rotation of the lead audit partner and the audit partner responsible for reviewing the audit and other audit partners, as required by applicable law; and consider whether there should be a regular rotation of the external audit firm itself;

External Auditors Internal Quality Control

- j) obtain and review, at least annually, and discuss with the external auditors a report by the external auditors describing the external auditors internal quality-control procedures, any material issues raised by the most recent internal quality-control review, or peer review, of the external auditors, or by any inquiry or investigation by governmental or professional authorities, within the preceding five years, respecting one or more independent audits carried out by the external auditors, and any steps taken to deal with any such issues;

## SECTION 12: AUDIT, FINANCE AND RISK MANAGEMENT COMMITTEE

### External Auditors Independence

- k) review and discuss at least annually with the external auditors all relationships that the external auditors and their affiliates have with the Corporation and its affiliates in order to assess the external auditors independence, including, without limitation:
- (i) obtaining and reviewing, at least annually, a formal written statement from the external auditors delineating all relationships that in the external auditors professional judgment may reasonably be thought to bear on the independence of the external auditors with respect to the Corporation,
  - (ii) discussing with the external auditors any disclosed relationships or services that may affect the objectivity and independence of the external auditors, and
  - (iii) recommending that the Board take appropriate action in response to the external auditors report to satisfy itself as to the external auditors independence;

### Policies Regarding Hiring of External Auditors Employees and Former Employees

- l) set clear policies for the hiring by the Corporation of partners, employees and former partners and employees of the external auditors;

### Pre-Approval of Audit and Non-Audit Services Provided by External Auditors

- m) be solely responsible for the pre-approval of all audit and non-audit services to be provided to the Corporation and its subsidiary entities by the external auditors (subject to any prohibitions provided in applicable law), and of the fees paid for these services; provided however, that the Committee may delegate to an independent member or members of the Committee authority to pre-approve such non-audit services, and such member(s) shall report to the Committee at its next meeting following the granting any pre-approvals granted pursuant to such delegated authority;
- n) review the external auditors annual audit plan (including scope, staffing, reliance on internal controls and audit approach);
- o) review the external auditors engagement letter;

### Oversight of Internal Audit

- p) oversee the internal audit function by reviewing senior management action with respect to the appointment or dismissal of the Chief Internal Auditor; afford the Chief Internal Auditor unrestricted access to the Committee; review the charter, activities, organizational structure, and the skills and experience of the Internal Audit Department; discuss with management and the external auditors the competence, performance and cooperation of the internal auditors; and discuss with management the compensation of the internal auditors;
- q) review and consider, as appropriate, any significant reports and recommendations issued by the Corporation or by any external party relating to internal audit issues, together with management's response thereto;

### Internal Controls and Financial Reporting Processes

- r) review with management, the internal auditors and the external auditors, the Corporation's financial reporting processes and its internal controls;
- s) review with the internal auditors the adequacy of internal controls and procedures related to any corporate transactions in which directors or officers of the Corporation have a personal interest, including the expense accounts of officers of the Corporation at the level of Vice-President and above and officers' use of corporate assets, and consider the results of any reviews thereof by the internal or external auditors;

### Complaints Processes

- t) establish procedures for:

- (i) the receipt, retention and treatment of complaints received by the Corporation regarding accounting, internal accounting controls or auditing matters, and
  - (ii) the confidential, anonymous submission by employees of the Corporation of concerns regarding questionable accounting or auditing matters,
- and review periodically with management and the internal auditors these procedures and any significant complaints received;

## SECTION 12: AUDIT, FINANCE AND RISK MANAGEMENT COMMITTEE

### Separate Meetings with External Auditors, Internal Audit, Management

- u) meet separately with management, the external auditors and the internal auditors periodically to discuss matters of mutual interest, including any audit problems or difficulties and management's response thereto, the responsibilities, budget and staffing of the Internal Audit Department and any matter they recommend bringing to the attention of the full Board;

### Finance

- v) review all major financings, including financial statement information contained in related prospectuses, information circulars, etc., of the Corporation and its subsidiaries and annually review the Corporation's financing plans and strategies;
- w) review management's plans with respect to Treasury operations, including such items as financial derivatives and hedging activities;

### Risk Management

- x) discuss risk assessment and risk management policies and processes to be implemented for the Corporation, review with management and the Corporation's internal auditors the effectiveness and efficiency of such policies and processes and their compliance with other relevant policies of the Corporation, and make recommendations to the Board with respect to any outcomes, findings and issues arising in connection therewith;

- y) review management's program to obtain appropriate insurance to mitigate risks;

### Terms of Reference and Performance Evaluation of Committee

- z) review and reassess the adequacy of these Terms of Reference at least annually, and otherwise as it deems appropriate, and recommend changes to the Board. The Committee shall also undertake an annual evaluation of the Committee's performance.

### Other

- aa) perform such other activities, consistent with these Terms of Reference, the Corporation's articles and by-laws and governing law, as the Committee or the Board deems appropriate.

- bb) report regularly to the Board of Directors on the activities of the Committee.

### 12.4 Audit and Non-Audit Fees and Services

Fees payable to PricewaterhouseCoopers LLP for the years ended December 31, 2010, and December 31, 2009, totalled \$2,525,200 and \$3,396,200, respectively, as detailed in the following table:

	<b>Year ended December 31, 2010</b>	<b>Year ended December 31, 2009</b>
Audit Fees	\$ 1,795,600	\$ 2,176,800
Audit-Related Fees	388,400	794,800
Tax Fees	341,200	424,600
All Other Fees		
<b>TOTAL</b>	<b>\$ 2,525,200</b>	<b>\$ 3,396,200</b>

The nature of the services provided by PricewaterhouseCoopers LLP under each of the categories indicated in the table is described below:

#### 12.4.1 Audit Fees

Audit fees were for professional services rendered for the audit of CP's annual financial statements and services provided in connection with statutory and regulatory filings or engagements, including the attestation engagement for the independent auditors' report on the effectiveness of internal controls over financial reporting.

**12.4.2 Audit-Related Fees**

Audit-related fees were for attestation and related services reasonably related to the performance of the audit or review of the annual financial statements, but which are not reported under "Audit Fees" above. These services consisted of: the audit or

## SECTION 12: AUDIT, FINANCE AND RISK MANAGEMENT COMMITTEE

review of financial statements of certain subsidiaries and of various pension and benefits plans of CP; special attestation services as may be required by various government entities; access fees for technical accounting database resources; and general advice and assistance related to accounting and/or disclosure matters with respect to new and proposed U.S. and Canadian accounting standards, securities regulations, and/or laws.

### 12.4.3 Tax Fees

Tax fees were for professional services related to tax compliance, tax planning and tax advice. These services consisted of: tax compliance including the review of tax returns; assistance with questions regarding corporate tax audits; tax planning and advisory services relating to common forms of domestic and international taxation (i.e. income tax, capital tax, goods and services tax, and value added tax); and access fees for taxation database resources.

### 12.4.4 All Other Fees

Fees disclosed under this category would be for products and services other than those described under Audit Fees , Audit-Related Fees and Tax Fees above. In both 2010 and 2009, there were no services in this category.

### **SECTION 13: FORWARD-LOOKING INFORMATION**

This AIF contains certain forward-looking statements within the meaning of the *Private Securities Litigation Reform Act of 1995* (U.S.) and other relevant securities legislation relating, but not limited to expected improvements in operating efficiency and fluidity, the ability of information technology to improve service and provide sophisticated billing options, the benefits of lean process and continuous improvement principles, the cost of environmental remediation and anticipated capital expenditures. Forward-looking information typically contains statements with words such as anticipate , believe , expect , plan or similar words suggesting future outcomes.

Readers are cautioned to not place undue reliance on forward-looking information because it is possible that actual results will be different from our forward-looking information. In addition, except as required by law, we undertake no obligation to update publicly or otherwise revise any forward-looking information, whether as a result of new information, future events or otherwise.

The forward-looking information in this document involves numerous assumptions, inherent risks and uncertainties, including but not limited to the following factors: the ability to implement cost-cutting and efficiency initiatives, the effectiveness of new information technology and estimates of future costs.

## SECTION 14: ADDITIONAL INFORMATION

### 14.1 Additional Company Information

Additional information about CP is available on SEDAR (System for Electronic Document Analysis and Retrieval) at [www.sedar.com](http://www.sedar.com) in Canada, and on the U.S. Securities and Exchange Commission's website (EDGAR) at [www.sec.gov](http://www.sec.gov). The aforementioned information is issued and made available in accordance with legal requirements and is not incorporated by reference into this AIF except as specifically stated.

Additional information, including directors' and officers' remuneration and indebtedness, principal holders of our securities and securities authorized for issuance under equity compensation plans, where applicable, is contained in the information circular for our most recent annual meeting of shareholders at which directors were elected.

Additional financial information is provided in our Consolidated Financial Statements and MD&A for the most recently completed financial year.

This information is also available on our website at [www.cpr.ca](http://www.cpr.ca).

## **CHIEF EXECUTIVE OFFICER'S LETTER TO SHAREHOLDERS**

In last year's letter, I said that I was confident that the lessons learned during the challenges of 2009 would serve us well in 2010 and beyond that by maintaining a firm focus on managing fixed and variable costs and ensuring we continue to price for value we would make the most of an inevitable economic recovery. And that has been the case.

Some of the notable accomplishments of the past year:

- o Revenue ton miles were increased by 17% as a result of an improving economy and CP's market development activities;
- o Adjusted diluted earnings per share increased by 54%;
- o CP's adjusted operating ratio was improved by 410 basis points;
- o The annual dividend rate was increased by 9%;
- o The balance sheet was further strengthened by reducing long-term debt by approximately \$250 million and making a \$650 million voluntary prepayment to the Canadian Defined Benefit Pension Plan; and
- o CP and our largest customer, Teck Resources signed a historic ten year services contract that aligns the two parties to substantially grow volumes in the decade ahead.

These results were achieved in a year that brought its own unique challenges.

The rate of economic recovery in 2010 exceeded the expectations of most of our customers, which was obviously excellent news. But the limited visibility into near term customer demands placed on CP resources created a challenge of coordination between CP's capacity and the capacities of the many North American and global supply chains in which we participate. CP responded well, however there were times when CP and the supply chains did not perform optimally and this is an opportunity we will address.

In 2011, CP will benefit from our 2010 resource actions on people and equipment and expects to meet customer demand with a level of service, and at a level of efficiency, necessary to achieve its marketplace and financial objectives.

2010 was also a year in which CP continued to strengthen its reputation as a responsible and active corporate citizen.

I am proud to say, that for the fifth consecutive year, Canadian Pacific remained the industry leader in train safety performance. The Company has now been the safest railway in North America 11 out of the past 13 years a testament to the dedication and diligence of our employees and to the effectiveness of our underlying safety management process.

Canadian Pacific also prides itself on its active involvement in the many communities in which it operates. In 2010, CP was the official rail services supplier for the 2010 Vancouver Olympic and Paralympic Winter Games and played an important role in bringing the Olympic experience to the people of Canada. CP's Holiday Train once again visited over 140 communities throughout North America. Since its inception in 1999, the Holiday Train has helped raise \$5.6 million and collected 2.6 million pounds of food in support of community food banks.

In 2010 CP celebrated the 125<sup>th</sup> anniversary of the completion of the construction of the transcontinental railway. In the same way CP has been at the forefront of innovation throughout its long history, we used this anniversary of the driving the last spike to announce the company's commitment to Driving the Digital Railway. This is a broad and comprehensive initiative that will ensure CP remains a leader in innovation and the application of technology to deliver a successful and prosperous future for shareholders, employees, and customers.

Turning to 2011, CP enters the year with the balance sheet strength and liquidity necessary to execute the elements of its strategy without delay. This is best evidenced by a \$1 billion capital plan that is focused squarely on providing capacity to grow with an improving economy, leveraging the customer service and efficiency benefits of technology and realizing the potential of market development initiatives carefully nurtured over the past few years.

In 2011 there is much that can and must be done to continue our steady march to achieving our stated financial goals. It is an exciting time for this company and its employees. The cornerstone of CP's success will be an unrelenting focus on the safety of our operations and the quality of our service.

Sincerely,

Fred Green  
President and Chief Executive Officer

2010  
2 ANNUAL  
REPORT

---

This Management's Discussion and Analysis ( MD&A ) is provided in conjunction with the Consolidated Financial Statements and related notes for the year ended December 31, 2010 prepared in accordance with accounting principles generally accepted in the United States ( U.S. GAAP ). Except where otherwise indicated, all financial information reflected herein is expressed in Canadian dollars. All information has been prepared in accordance with U.S. GAAP, except as described in Section 6.0 Non-GAAP Earnings of this MD&A.

## **March 2, 2011**

In this MD&A, our , us , we , CP and the Company refer to Canadian Pacific Railway Limited ( CPRL ), CPRL subsidiaries, CPRL and one or more of its subsidiaries, or one or more of CPRL's subsidiaries, as the context may require. Other terms not defined in the body of this MD&A are defined in Section 25.0 Glossary of Terms.

Unless otherwise indicated, all comparisons of results for the fourth quarter of 2010 are against the results for the fourth quarter of 2009. Unless otherwise indicated, all comparisons of results for 2010 and 2009 are against the results for 2009 and 2008, respectively.

## **1.0 Business Profile**

Canadian Pacific Railway Limited, through its subsidiaries, operates a transcontinental railway in Canada and the United States ( U.S. ) and provides logistics and supply chain expertise. Through our subsidiaries, we provide rail and intermodal transportation services over a network of approximately 14,800 miles, serving the principal business centres of Canada from Montreal, Quebec, to Vancouver, British Columbia ( B.C. ), and the U.S. Northeast and Midwest regions. Our railway feeds directly into the U.S. heartland from the East and West coasts. Agreements with other carriers extend our market reach east of Montreal in Canada, throughout the U.S. and into Mexico. We transport bulk commodities, merchandise freight and intermodal traffic. Bulk commodities include grain, coal, sulphur and fertilizers. Merchandise freight consists of finished vehicles and automotive parts, as well as forest and industrial and consumer products. Intermodal traffic consists largely of high-value, time-sensitive retail goods in overseas containers that can be transported by train, ship and truck, and in domestic containers and trailers that can be moved by train and truck.

## **2.0 Strategy**

Our vision is to become the safest and most fluid railway in North America. Through the ingenuity of our people, it is our objective to create long-term value for our customers, shareholders and employees. We seek to accomplish this objective through the following three-part strategy:

- o generating quality revenue growth by realizing the benefits of demand growth in our bulk, intermodal and merchandise business lines with targeted infrastructure capacity investments linked to global trade opportunities;
- o improving productivity by leveraging strategic marketing and operating partnerships, executing a scheduled railway through our Integrated Operating Plan ( IOP ) and driving more value from existing assets and resources by improving fluidity ; and
- o continuing to develop a dedicated, professional and knowledgeable workforce that is committed to safety and sustainable financial performance through steady improvement in profitability, increased free cash flow and a competitive return on investment.

In line with our strategic vision, CP accomplished the following initiatives in 2010:

CP announced a ten-year agreement with Teck Resources Limited ( Teck ). The agreement reflects the companies commitment to work together to achieve growth in the volume of coal shipped through a range of economic and marketplace dynamics and provides flexibility critical for a long term agreement.

We made significant progress re-organizing the Company to reduce the total number of management layers. The new organizational structure is based on ensuring clear accountability and alignment and will facilitate more efficient decision making consistent with delivering on our multi-year service reliability, productivity and asset velocity objectives. The redesign has reduced the number of operating regions, and the Operations side of the reorganization is complete.

During 2010, CP took on new initiatives targeted at permanently reducing structural costs. This included the consolidation of certain offices, as well as the consolidation of locomotive and freight car repair facilities.

In addition, we took further actions to strengthen the balance sheet and create and enhance the organization's financial flexibility. CP took advantage of low cost debt markets and used both debt and funds from operations to pre-fund the main Canadian defined benefit pension plan. This effectively puts our cash to work more quickly and reduces expected future pension contributions. The actions taken have given the Company significant flexibility in pension funding levels over the next 3-5 years.

Finally, with the strengthening economy in 2010, CP enjoyed a 12.6% increase in volumes (as measured by carloads) and delivered on the key objective of sustaining long train improvements while managing a busier network. Our multi-year capital plan includes the intention to expand and increase the number of sidings that can accommodate long trains to allow further productivity improvements. Our 2011 capital plan includes key improvements in IT and investment to support growth and productivity enhancements.

### **3.0 Additional Information**

Additional information, including our Consolidated Financial Statements, Annual Information Form, press releases and other required filing documents, is available on SEDAR at [www.sedar.com](http://www.sedar.com) in Canada, on EDGAR at [www.sec.gov](http://www.sec.gov) in the U.S. and on our website at [www.cpr.ca](http://www.cpr.ca). The aforementioned documents are issued and made available in accordance with legal requirements and are not incorporated by reference into this MD&A.

	<b>77.6%</b>	81.1%	79.4%	
Operating ratio <sup>(5)</sup>	<b>77.6%</b>	81.7%	79.4%	

(1) Restated for the Company's change in accounting policy in relation to the accounting for rail grinding (discussed further in Section 13.1.1 Rail Grinding).

(2) Revenues and Operating income include DM&E (discussed further in Section 18.0 Acquisition) from October 30, 2008 to December 31, 2008.

(3) DM&E results for the period January 1, 2008 to October 29, 2008 which under GAAP was reported as one line in equity income in DM&E.

(4) Pro forma basis redistributes DM&E equity income to a line by line consolidation of DM&E results for the year ended December 31, 2008.

(5) These earnings measures have no standardized meanings prescribed by U.S. GAAP and, therefore, are unlikely to be comparable to similar measures of other companies. These earnings measures and other specified items are described in Section 6.0 Non-GAAP Earnings. A reconciliation of income and diluted EPS, before FX on LTD and other specified items, to net income and diluted EPS, as presented in the consolidated financial statements is provided in Section 6.0 Non-GAAP Earnings. A reconciliation of free cash to GAAP cash position is provided in Section 14.4 Free Cash.

(6) Excludes deferred taxes of the following amounts: \$1,944.8 million, \$1,818.7 million and \$1,964.5 million, and other non-financial long-term liabilities of \$1,447.1 million, \$1,769.8 million and \$1,688.2 million for the years 2010, 2009 and 2008 respectively.

(7) Includes a \$650 million voluntary prepayment to the Company's main Canadian defined benefit pension plan in 2010 and a \$500 million voluntary prepayment in 2009 (discussed further in Section 20.5 Pension Plan Deficit).

2010  
4 ANNUAL  
REPORT

---

## 5.0 Operating Results

### 5.1 INCOME

Operating income in 2010 was \$1,116.1 million, up \$286.0 million, or 34.5%, from \$830.1 million in 2009. Adjusted operating income in 2010, excluding certain other specified items (discussed further in Section 6.0 Non-GAAP Earnings and Section 6.2 Other Specified Items) was also \$1,116.1 million, an increase of \$310.6 million, or 38.6% from 2009 adjusted operating income of \$805.5 million.

Operating income in 2010 increased due to the stronger economy (discussed further in Section 7.0 Lines of Business), along with continued cost management activities (discussed further in Section 9.0 Operating Expenses). The increase in 2010 operating income also reflected the 2009 loss of \$54.5 million which arose from the termination of a lease with a shortline railway (discussed further in Section 9.1.7.2 Loss on Termination of Lease with Shortline Railway).

This increase in operating income was partially offset by the 2009 gain on sales of significant properties (discussed further in Section 9.1.7.1 Gain on Sales of Significant Properties) and the unfavourable impact of the change in foreign exchange ( FX , discussed further in Section 25.0 Glossary of Terms).

Adjusted operating income increased primarily due to an increase in overall freight volumes and associated revenues driven by the continuing economic recovery along with the favourable impact of cost management initiatives. The increase was partially offset by an unfavourable impact of the change in FX.

Operating income in 2009 was \$830.1 million, down \$208.9 million, or 20.1%, from \$1,039.0 million in 2008. Operating income in 2009 was down \$295.1 million, or 26.2%, from \$1,125.2 million in 2008 on a pro forma basis. Adjusted operating income in 2009, excluding certain other specified items (discussed further in Section 6.0 Non-GAAP Earnings and Section 6.2 Other Specified Items) was \$805.5 million, a decrease of \$319.7 million, or 28.4% from 2008 on a pro forma adjusted operating income basis of \$1,125.2 million.

The decrease in 2009 operating income, compared to 2008 on a pro forma basis, was primarily due to:

- o the global recession which resulted in lower traffic volumes;
- o reduced coal revenues as a result of regulatory rate proceedings and reduced average length of haul on export coal; and
- o a loss on termination of a lease (discussed further in Section 9.1.7.2 Loss on Termination of Lease with Shortline Railway).

This decrease was partially offset by:

- o the gain on sales of significant properties (discussed further in Section 9.1.7.1 Gain on Sales of Significant Properties);
- o the favourable impact of the change in FX;
- o a decline in overall compensation and benefits expense due to lower volumes, however, the success of variable cost reductions in response to lower volumes resulted in higher incentive compensation and gainshare payments to employees;

- o the net effect of fuel price declines; and
- o lower purchased services and other expenses.

Net income for the year ended December 31, 2010 was \$650.7 million, an increase of \$100.7 million, or 18.3%, from \$550.0 million in 2009. The increase in 2010 was primarily due to higher operating income.

This increase was partially offset by:

- o the 2009 gain on sale of a partnership interest (discussed further in Section 10.1 Gain on Sale of Partnership Interest);
- o an increase in income tax expense; and
- o income tax recoveries in 2009 (discussed further in Section 10.5 Income Taxes).

Net income for the year ended December 31, 2009 was \$550.0 million, a decrease of \$77.8 million, or 12.4%, from \$627.8 million in 2008. The decrease in 2009 was mainly due to lower operating income. The decrease was partially offset by:

- o the gain on sale of a partnership interest (discussed further in Section 10.1 Gain on Sale of Partnership Interest);
- o the absence of the 2008 loss in fair value of our investment in Asset-backed Commercial Paper ( ABCP ); and
- o income tax recoveries in 2009 (discussed further in Section 10.5 Income Taxes).

## **5.2 DILUTED EARNINGS PER SHARE**

Diluted earnings per share ( EPS ) was \$3.85 in 2010, an increase of \$0.55, or 16.7% from 2009. Diluted EPS was \$3.30 in 2009, a decrease of \$0.74, or 18.3%, from \$4.04 in 2008. The increase in 2010 was mainly due to higher net income, offset slightly by an increase in the number of common shares. The decrease in 2009 was mainly due to lower net income and the issuance of common shares in the first quarter of 2009.

Diluted EPS, before foreign exchange on long-term debt ( FX on LTD ) and other specified items (discussed further in Section 6.0 Non-GAAP Measures) was \$3.87 in 2010, an increase of \$1.36 or 54.2%, from 2009. Diluted EPS before FX on LTD and other specified items was \$2.51 in 2009, a decrease of \$1.55, or 38.2%, from \$4.06 in 2008. The increase in 2010 was primarily due to higher adjusted operating income, partially offset by an increase in income tax expense. The decrease in 2009 was mainly due to lower operating income. The issuance of common shares in the first quarter further reduced 2009 diluted EPS, before FX on LTD and other specified items.

## **5.3 OPERATING RATIO**

The operating ratio provides the percentage of revenues used to operate the railway, and is calculated as operating expenses divided by revenues. A lower percentage normally indicates higher efficiency in the operation of the railway. Operating ratio was 77.6% in 2010,

an improvement from 81.1% in 2009. Operating ratio increased to 81.1% in 2009 from 79.4% in 2008.

Excluding certain other specified items our adjusted operating ratio (discussed further in Section 6.0 Non-GAAP Earnings and Section 6.2 Other Specified Items) was 77.6% in 2010, compared with 81.7% in 2009. Adjusted operating ratio increased to 81.7% in 2009 from 79.4% in 2008.

The adjusted operating ratio in 2010 improved 410 basis points from 81.7% in 2009. The improvement was primarily due to an increase in freight revenues (discussed further in Section 7.0 Lines of Business) combined with continued cost management initiatives (discussed further in Section 9.0 Operating Expenses).

The 2009 adjusted operating ratio of 81.7% increased by 270 basis points from 79.0% in 2008 on a pro forma basis. The increase in 2009 was primarily due to lower volumes which were partially mitigated by cost management initiatives that reduced both variable and structural costs and lower fuel prices.

#### **5.4 IMPACT OF FOREIGN EXCHANGE ON EARNINGS**

Fluctuations in FX affect our results because U.S. dollar-denominated revenues and expenses are translated into Canadian dollars. U.S. dollar-denominated revenues and expenses increase when the Canadian dollar weakens in relation to the U.S. dollar.

In 2010, the Canadian dollar strengthened against the U.S. dollar on average by approximately 10.4% compared to 2009 and weakened by approximately 9.4% in 2009 compared with 2008. The average FX rate for converting U.S. dollars to Canadian dollars decreased to \$1.03 in 2010 from \$1.15 in 2009 and increased to \$1.15 in 2009 from \$1.05 in 2008.

The FX fluctuations throughout 2010 impacted both the year-over-year and 2010 fourth-quarter to 2009 fourth-quarter comparisons. Our revenues and expenses, long-term debt and U.S. investments are subject to changes in the value of the Canadian dollar and the timing of the settlement of certain transactions.

#### **6.0 Non-GAAP Earnings**

We present non-GAAP measures and cash flow information to provide a basis for evaluating underlying earnings and liquidity trends in our business that can be compared with the results of our operations in prior periods. These non-GAAP measures exclude FX on LTD, which can be volatile and short term, and other specified items that are not among our normal ongoing revenues and operating expenses.

These non-GAAP measures have no standardized meaning and are not defined by GAAP and, therefore, are unlikely to be comparable to similar measures presented by other companies. Income, before FX on LTD and other specified items, or adjusted earnings, provides management with a measure of income that can help in a multi-period assessment of long-term profitability and also allows management and other external users of our consolidated financial statements to compare our profitability on a long-term basis with that of our peers. Diluted EPS, before FX on LTD and other specified items is also referred to as adjusted diluted EPS.

Adjusted operating income is calculated as operating income less other specified operating expenses. This provides a measure of the profitability of the railway on an ongoing basis as it excludes other specified items. Adjusted operating expenses is calculated as operating expenses less other specified operating expenses that do not typify normal business activities. There were no such adjustments for the three months and year ended December 31, 2010. In the three months ended December 31, 2009 the loss on termination of a lease with a shortline railway of \$54.5 million was excluded from operating expenses. In the year ended December 31, 2009 the gain on sales of significant properties of

\$79.1 million and the loss on termination of a lease with a shortline railway of \$54.5 million were excluded from operating expenses. Adjusted operating ratio is calculated as adjusted operating expenses divided by revenues. This provides the percentage of revenues used to operate the railway on an ongoing basis as it excludes certain other specified items.

Our results for fourth-quarter and full year 2009 are compared to fourth-quarter and full year 2008 on a pro forma basis. Pro forma is a non-GAAP measure which redistributes the DM&E operating results originally reported on an equity basis of accounting to a line-by-line consolidation of revenues and expenses. Doing so provides a comparable measure for period to period changes until DM&E results are fully consolidated with CP's operations for comparable periods.

The following table details a reconciliation of income, before FX on LTD and other specified items, to net income, as presented in the consolidated financial statements.

Free cash is calculated as cash provided by operating activities, less cash used in investing activities and dividends paid, adjusted for changes in cash and cash equivalent balances resulting from FX fluctuations and excludes the acquisition of DM&E and changes in the accounts receivable securitization program. The measure is used by management to provide information with respect to the relationship between cash provided by operating activities and investment decisions and provides a comparable measure for period to period changes. Free cash is discussed further and is reconciled to the change in cash and cash equivalents as presented in the financial statements in Section 14.4 Free Cash.

Interest coverage ratio is a metric used in assessing the Company's debt servicing capabilities, but does not have a comparable GAAP measure to which it can be reconciled. This ratio provides an indicator of our debt servicing capabilities, and how these have changed, period over period and in comparison to our peers. Interest coverage ratio includes adjusted earnings before interest and taxes ( adjusted EBIT ) which can also be calculated as adjusted operating income less other income and charges, before FX on LTD and other specified items. The ratio reported quarterly is measured on a twelve month rolling basis. Interest coverage ratio is discussed further in Section 14.3.2 Interest Coverage Ratio.

(1) Restated for the Company's change in accounting policy in relation to the accounting for rail grinding (discussed further in Section 13.1.1 Rail Grinding).

(2) DM&E results for the period January 1, 2008 to October 29, 2008 which under GAAP was reported as one line in equity income in DM&E.

(3) Pro forma basis redistributes DM&E equity income to a line by line consolidation of DM&E results for 2008.

(4) These earnings measures have no standardized meanings prescribed by U.S. GAAP and, therefore, are unlikely to be comparable to similar measures of other companies. These earnings measures and other specified items are

described in this section.

<sup>(5)</sup> Adjusted operating income is calculated as revenues less adjusted operating expenses. Adjusted operating expenses are discussed further in Section 9.0 Operating expenses.

2010  
7 ANNUAL  
REPORT

---

## 6.1 FOREIGN EXCHANGE GAINS AND LOSSES ON LONG-TERM DEBT

FX on LTD arises mainly as a result of translating U.S. dollar-denominated debt into Canadian dollars. We calculate FX on LTD using the difference in FX rates at the beginning and at the end of each reporting period. The FX gains and losses are mainly unrealized and can only be realized when net U.S. dollar-denominated LTD matures or is settled. Income, before FX on LTD and other specified items, is disclosed in the table above and excludes FX on LTD from our earnings in order to eliminate the impact of volatile short-term exchange rate fluctuations. The majority of our U.S. dollar-denominated debt is designated as a hedge of our net investments in U.S. subsidiaries.

On a pre-tax basis, we recorded the following FX on LTD as the Canadian dollar exchange rate changed at the end of each reporting period:

- o FX gain on LTD of \$2.3 million in 2010, as the Canadian dollar strengthened to \$0.9946 at December 31, 2010, relative to the U.S. dollar;
- o FX gain on LTD of \$3.6 million in 2009, as the Canadian dollar strengthened to \$1.0510 at December 31, 2009, relative to the U.S. dollar;
- o FX loss on LTD of \$5.8 million in 2008, as the Canadian dollar exchange rate weakened to \$1.2180 at December 31, 2008 relative to the U.S. dollar; and
- o income tax recovery (expense) related to FX on LTD is discussed further in Section 10.5 Income Taxes.

## 6.2 OTHER SPECIFIED ITEMS

Other specified items are material transactions that may include, but are not limited to, gains and losses on non-routine sales of assets, unusual income tax adjustments, restructuring and asset impairment charges, and other items that do not typify normal business activities.

In 2010 we recorded net realized gains on the settlement of long-term floating rate notes and unrealized gains from the change in the estimated fair value of long-term floating rate notes totalling \$3.4 million (\$2.4 million after tax), of which \$0.3 million (\$0.2 million after tax) were recorded in the fourth quarter.

In 2009, there were five other specified items included in net income as follows:

- o in the fourth quarter of 2009, we recorded a loss of \$54.5 million (\$37.6 million after tax) on the termination of a lease with a shortline railway (discussed further in Section 9.1.7.2 Loss on Termination of Lease with Shortline Railway).
- o in the fourth quarter of 2009, the Company recorded a tax benefit of \$55.7 million due to a rate reduction and a settlement related to a prior year income tax matter.
- o in the third quarter of 2009, we recorded gains of \$79.1 million (\$68.1 million after tax) on the sale of Windsor Station, in Montreal and a land sale in western Canada (discussed further in Section 9.1.7.1 Gain on Sales of Significant Properties).
- o in the second quarter of 2009, we recorded a gain of \$81.2 million (\$68.7 million after tax) on the sale of a partnership interest in the Detroit River Tunnel Partnership ( DRTP ) (discussed further in Section 10.1 Gain on Sale

of Partnership Interest).

- o in the second and third quarters of 2009, the Company recorded realized gains from the settlement of and unrealized gains from the change in estimated fair value of long-term floating rate notes totalling \$6.3 million (\$4.5 million after tax), (discussed further in Section 22.6 Long-term Floating Rate Notes).

In the first and third quarters of 2008, we recorded charges totalling \$49.4 million (\$34.8 million after tax) to reflect the change in the estimated fair value of ABCP (discussed further in Section 22.6 Long-term Floating Rate Notes).

## **7.0 Lines of Business**

### **7.1 VOLUMES**

Changes in freight volumes generally contribute to corresponding changes in freight revenues and certain variable expenses, such as fuel, equipment rents and crew costs.

2010  
ANNUAL 8  
REPORT

---

**VOLUMES**

	2010	2009	2008	
For the year ended December 31			As reported <sup>(1)</sup>	Pro forma <sup>(2)</sup>
<b>Carloads (in thousands)</b>				
Grain	<b>466.4</b>	469.5	382.4	460.4
Coal	<b>341.1</b>	305.1	281.0	317.7
Sulphur and fertilizers	<b>177.2</b>	108.8	191.3	195.4
Forest products	<b>71.6</b>	66.8	91.8	97.6
Industrial and consumer products	<b>396.9</b>	345.9	340.9	425.5
Automotive	<b>137.3</b>	103.7	141.3	142.0
Intermodal	<b>1,070.1</b>	962.9	1,216.0	1,216.0
<b>Total Carloads</b>	<b>2,660.6</b>	2,362.7	2,644.7	2,854.6
<b>Revenue ton-miles (in millions)</b>				
Grain	<b>34,556</b>	34,838	29,376	32,019
Coal	<b>19,021</b>	16,997	21,247	21,600
Sulphur and fertilizers	<b>17,687</b>	9,362	19,757	19,956
Forest products	<b>5,238</b>	4,470	5,677	5,927
Industrial and consumer products	<b>21,996</b>	17,653	18,296	21,364
Automotive	<b>2,067</b>	1,607	2,213	2,221
Intermodal	<b>25,863</b>	23,425	27,966	27,966
<b>Total revenue ton-miles</b>	<b>126,428</b>	108,352	124,532	131,053

<sup>(1)</sup> The 2008 figures include DM&E from October 30, 2008 to December 31, 2008.

<sup>(2)</sup> Pro forma basis includes DM&E results for the full year ended December 31, 2008.

Volumes in 2010, as measured by total carloads, increased by approximately 297,900, or 12.6%, and revenue ton-miles ( RTM ) increased by 18,076 million, or 16.7%, compared with 2009.

These increases in carloads and RTMs in 2010 were a result of higher demand driven by an improved economy, a rebound in coal and fertilizer volumes, and inventory replenishment by our customers benefiting the majority of our lines of business in the year.

Volumes in 2009, as measured by total carloads, decreased by approximately 491,900, or 17.2%, and RTMs decreased by 22,701 million, or 17.3%, compared with pro forma 2008.

These decreases in carloads and RTMs in 2009 were driven by the global recession which resulted in soft market conditions and reduced customer demand lowering shipments in all but the grain line of business which benefited from a larger than normal crop. Coal volumes measured by carloads did not decline as much as RTMs due to decreased average length of haul.

2010  
9 ANNUAL  
REPORT

---

## 7.2 REVENUES

Our revenues are primarily derived from transporting freight. Other revenues are generated mainly from leasing of certain assets, switching fees and passenger revenue.

### REVENUES

	2010	2009	As reported <sup>(1)</sup>	2008 DM&E <sup>(2)</sup>	Pro forma <sup>(3)(4)</sup>
For the year ended December 31 (in millions)					
Grain	\$ 1,135.7	\$ 1,137.1	\$ 977.2	\$ 102.3	\$ 1,079.5
Coal	490.8	443.8	611.4	15.8	627.2
Sulphur and fertilizers	474.8	309.3	511.9	10.5	522.4
Forest products	184.9	176.1	241.1	9.9	251.0
Industrial and consumer products	902.8	786.1	772.0	156.3	928.3
Automotive	316.4	229.3	325.6	4.0	329.6
Intermodal	1,347.9	1,198.1	1,482.3		1,482.3
<b>Total freight revenues</b>	<b>4,853.3</b>	<b>4,279.8</b>	<b>4,921.5</b>	<b>298.8</b>	<b>5,220.3</b>
Other revenues	128.2	122.4	127.0	1.9	128.9
<b>Total revenues</b>	<b>\$ 4,981.5</b>	<b>\$ 4,402.2</b>	<b>\$ 5,048.5</b>	<b>\$ 300.7</b>	<b>\$ 5,349.2</b>

(1) The 2008 figures include DM&E from October 30, 2008 to December 31, 2008.

(2) DM&E figures are for the period January 1, 2008 to October 29, 2008.

(3) Pro forma basis redistributes DM&E results on a line by line consolidation for the full year 2008.

(4) These earnings measures have no standardized meanings prescribed by U.S. GAAP and, therefore, are unlikely to be comparable to similar measures of other companies. These earnings measures and other specified items are described in Section 6.0 Non-GAAP Earnings.

In 2010 and 2009, no one customer comprised more than 10% of total revenues and accounts receivable. For the year ended December 31, 2008, one customer comprised 11.0% of total revenues and 1.7% of total trade accounts receivable.

## 7.3 2010 TO 2009 COMPARATIVES

### 7.3.1 Freight Revenues

Freight revenues are earned from transporting bulk, merchandise and intermodal goods, and include fuel recoveries billed to our customers. Freight revenues were \$4,853.3 million in 2010, an increase of \$573.5 million, or 13.4%

compared to \$4,279.8 million in 2009.

The increase in 2010 was driven primarily by:

- o higher traffic volumes due to an improved economy;
- o higher fuel surcharge revenues due to the change in fuel price; and
- o increased freight rates on average for all lines of business.

These improvements were partially offset by the unfavourable impact of the change in FX.

#### 7.3.1.1 Fuel Cost Recovery Program

A change in fuel prices may adversely impact the Company's expenses and revenues. As such, CP primarily employs a fuel cost recovery program utilizing a 15 day average fuel index price designed to respond to fluctuations in fuel prices and help mitigate the financial impact of fuel price volatility.

#### 7.3.1.2 Grain

Grain transported by CP consists of both whole grains, such as wheat, corn, soybeans, and canola, and processed products such as meals, oils, and flour. Canadian grain products are primarily transported to ports for export and to Canadian and U.S. markets for domestic consumption. U.S. grain products are shipped from the Midwestern U.S. to other points in the Midwest, the Pacific Northwest and North-eastern U.S. Grain revenues in 2010 were \$1,135.7 million, a decrease of \$1.4 million, or 0.1% compared to \$1,137.1 million in 2009.

Grain revenues decreased slightly in 2010 primarily due to lower Canadian grain shipments driven by lower overall production for the 2009/2010 crop year compared to an above average 2008/2009 crop year, and the unfavourable impact of the change in FX.

This decrease was partially offset by increased U.S. originated shipments, higher fuel surcharge revenues due to the change in fuel prices, and increased freight rates.

#### 7.3.1.3 Coal

Our Canadian coal business consists primarily of metallurgical coal transported from southeastern B.C. to the ports of Vancouver, B.C. and Thunder Bay, Ontario, and to the U.S. Midwest. Our U.S. coal

business consists primarily of the transportation of thermal coal and petroleum coke within the U.S. Midwest. Coal revenues in 2010 were \$490.8 million, an increase of \$47.0 million, or 10.6% from \$443.8 million in 2009.

Coal revenues increased in 2010 primarily due to:

- o an increase in demand for metallurgical coal to Asia;
- o increased freight rates for U.S. originated traffic; and
- o higher fuel surcharge revenues due to the change in fuel price.

This increase was partially offset by reduced average length of haul, and the unfavourable impact of the change in FX.

#### 7.3.1.4 Sulphur and Fertilizers

Sulphur and fertilizers include potash, chemical fertilizers and sulphur shipped mainly from western Canada to the ports of Vancouver, B.C., and Portland, Oregon, and to other Canadian and U.S. destinations. Sulphur and fertilizers revenues in 2010 were \$474.8 million, an increase of \$165.5 million, or 53.5% from \$309.3 million in 2009.

Sulphur and fertilizers revenues increased in 2010 primarily due to:

- o higher export potash shipments as a result of the return of international buyers to the market;
- o higher domestic potash shipments due to increased overall demand and rising commodity prices such as grain, in the second half of the year;
- o higher fuel surcharge revenues due to the change in fuel price; and
- o increased freight rates.

This increase was partially offset by the unfavourable impact of the change in FX.

#### 7.3.1.5 Forest Products

Forest products include lumber, wood pulp, paper products and panel transported from key producing areas in western Canada, Ontario and Quebec to various destinations in North America. Forest product revenues in 2010 were \$184.9 million, an increase of \$8.8 million, or 5.0% from \$176.1 million in 2009.

Forest product revenues increased in 2010 primarily due to:

- o higher overall shipments of lumber, panel and pulp and paper products due to the re-opening of a mill on our lines in 2010;
- o higher fuel surcharge revenues due to the change in fuel price; and
- o increased freight rates and extended length of haul.

The increase was partially offset by the unfavourable impact of the change in FX.

#### 7.3.1.6 Industrial and Consumer Products

Industrial and consumer products include chemicals, plastics, aggregates, steel, mine, ethanol and other energy-related products (other than coal) shipped throughout North America. Industrial and consumer products revenues in 2010 were \$902.8 million, an increase of \$116.7 million, or 14.8% from \$786.1 million in 2009.

Industrial and consumer products revenues increased in 2010 primarily due to:

- o increased shipments of steel, clay and aggregates driven by the improvement in the North American economy;
- o higher fuel surcharge revenues due to the change in fuel price; and
- o increased freight rates.

This increase was partially offset by the unfavourable impact of the change in FX.

#### 7.3.1.7 Automotive

Automotive consists primarily of three core finished-vehicle traffic segments: import vehicles, Canadian-produced vehicles and U.S.-produced vehicles. These segments move through Port Metro Vancouver to eastern Canadian markets; to the U.S. from Ontario production facilities; and to Canadian markets, respectively. Automotive revenues in 2010 were \$316.4 million, an increase of \$87.1 million, or 38.0% from \$229.3 million in 2009.

The increase in 2010 was primarily due to:

- o increased overall auto production and higher North American auto sales;
- o the absence of a series of unusual plant shutdowns and curtailments of production caused by the restructuring of U.S. automakers in 2009;
- o higher fuel surcharge revenues due to the change in fuel price; and
- o increased freight rates.

This increase was partially offset by the unfavourable impact of the change in FX.

#### 7.3.1.8 Intermodal

CP's intermodal portfolio consists of domestic and international services. Our domestic business consists primarily of the movement of manufactured consumer products in containers within North America. The international business handles the movement of marine containers to and from ports and into North American inland markets. Intermodal revenues in 2010 were \$1,347.9 million, an increase of \$149.8 million, or 12.5% from \$1,198.1 million in 2009.

The increase in 2010 was primarily due to:

- o increased domestic container shipments due to increased domestic sales in the cross border and retail sectors offset by reduced volumes in short-haul lanes;
- o higher overall import/export volumes through the Port Metro Vancouver;

2010  
11 ANNUAL  
REPORT

---

- o higher fuel surcharge revenues due to the change in fuel price; and
- o increased freight rates.

This increase was partially offset by the unfavourable impact of the change in FX and overall lower imports through the Eastern ports by CP served shipping lines.

### 7.3.2 Other Revenues

Other revenues are generated from leasing certain assets, switching fees, other arrangements including logistical services, and contracts with passenger service operators. Other revenues in 2010 were \$128.2 million, an increase of \$5.8 million, or 4.7% from \$122.4 million in 2009.

The increase was primarily due to increased revenues from leasing and switching, partially offset by lower passenger revenues and the unfavourable impact of the change in FX.

### 7.3.3 Freight Revenue per Carload

#### **FREIGHT REVENUE PER CARLOAD**

			2008	
			As reported <sup>(1)</sup>	Pro forma <sup>(2)(3)</sup>
For the year ended December 31	<b>2010</b>	2009		
Grain	\$ <b>2,435</b>	\$ 2,422	\$ 2,555	\$ 2,345
Coal	<b>1,439</b>	1,455	2,176	1,974
Sulphur and fertilizers	<b>2,679</b>	2,843	2,676	2,673
Forest products	<b>2,582</b>	2,636	2,626	2,572
Industrial and consumer products	<b>2,275</b>	2,273	2,265	2,182
Automotive	<b>2,304</b>	2,211	2,304	2,321
Intermodal	<b>1,260</b>	1,244	1,219	1,219
Total freight revenue per carload	\$ <b>1,824</b>	\$ 1,811	\$ 1,861	\$ 1,829

<sup>(1)</sup> The 2008 figures include DM&E from October 30, 2008 to December 31, 2008.

<sup>(2)</sup> Pro forma basis redistributes DM&E results on a line by line consolidation for the full year 2008.

<sup>(3)</sup> These earnings measures have no standardized meanings prescribed by U.S. GAAP and, therefore, are unlikely to be comparable to similar measures of other companies. These earnings measures and other specified items are described in Section 6.0 Non-GAAP Earnings.

Freight revenue per carload is the amount of freight revenue earned for every carload moved, calculated by dividing the freight revenue for a commodity by the number of carloads of the commodity transported in the period.

Total freight revenue per carload in 2010 increased by 0.7% due to the increase in fuel surcharge revenues and increased freight rates. This increase was partially offset by the unfavourable impact of the change in FX.

## 7.3.4 Freight Revenue per Revenue Ton-Mile

**FREIGHT REVENUE PER REVENUE TON-MILE**

For the year ended December 31 (cents)	2010	2009	2008

Grain	<b>3.29</b>	3.26	3.33	3.37
Coal	<b>2.58</b>	2.61	2.88	2.90
Sulphur and fertilizers	<b>2.68</b>	3.30	2.59	2.62
Forest products	<b>3.53</b>	3.94	4.25	4.23
Industrial and consumer products	<b>4.10</b>	4.45	4.22	4.35
Automotive	<b>15.31</b>	14.27	14.71	14.84
Intermodal	<b>5.21</b>	5.11	5.30	5.30
Total freight revenue per revenue ton-mile	<b>3.84</b>	3.95	3.95	3.98

(1) The 2008 figures include DM&E from October 30, 2008 to December 31, 2008.

(2) Pro forma basis redistributes DM&E results on a line by line consolidation for the full year 2008.

(3) These earnings measures have no standardized meanings prescribed by U.S. GAAP and, therefore, are unlikely to be comparable to similar measures of other companies. These earnings measures and other specified items are described in Section 6.0 Non-GAAP Earnings.

Freight revenue per RTM is the amount of freight revenue earned for every RTM moved, calculated by dividing the freight revenue for a commodity by the number of RTMs of the commodity transported in the period.

Freight revenue per RTM in 2010 decreased by 2.8% due to the unfavourable impact of the change in FX and a significant increase in shipments of potash and metallurgical coal, which generate lower freight revenue per RTM. This decrease was partially offset by increased fuel surcharge revenues and increased freight rates.

#### **7.4 2009 TO 2008 COMPARATIVES**

Revenue variances below (Sections 7.4.1.1 to 7.4.4) compare 2009 to 2008 figures. DM&E revenues are included on a pro forma basis.

##### **7.4.1 Freight Revenues**

Freight revenues are earned from transporting bulk, merchandise and intermodal goods, and include fuel recoveries billed to our customers. Freight revenues were \$4,279.8 million in 2009, a decrease of \$641.7 million, or 13.0%, from \$4,921.5 million in 2008.

Freight revenue including DM&E revenues on a pro forma basis decreased by \$940.5 million, or 18.0% from \$5,220.3 million in 2008.

The decrease in 2009 was driven primarily by:

- o lower traffic volumes due to the global recession;
- o a decline in freight revenues due to fuel price changes; and
- o decreased rates and reduced average length of haul on export coal as a result of regulatory rate proceedings.

The decrease was partially offset by the favourable impact of the change in FX on U.S. dollar-denominated revenues and net increases in freight rates for business other than coal.

###### **7.4.1.1 Grain**

Grain revenues in 2009 were \$1,137.1 million an increase of \$57.6 million, or 5.3% compared to 2008 pro forma of \$1,079.5 million.

Grain revenues increased in 2009 primarily due to:

- o an increase in Canadian grain export shipments driven by strong demand and an above average 2008/2009 crop year;
- o the favourable impact of the change in FX; and
- o a net increase in freight rates for U.S. and commercial grain.

The increase was partially offset by lower fuel surcharge revenues due to the change in fuel price and a negative rate decision in regulated grain.

#### 7.4.1.2 Coal

Coal revenues in 2009 were \$443.8 million, a decrease of \$183.4 million, or 29.2% from pro forma 2008 of \$627.2 million.

Coal revenues decreased in 2009 primarily due to:

- o reduced coal shipments as a result of reduced market demand for metallurgical coal for the first three quarters of the year;
- o decreased rates as a result of regulatory rate proceedings and reduced average length of haul on export coal which reduced coal revenues by approximately \$63 million; and
- o lower fuel surcharge revenues due to the change in fuel price.

This decrease was partially offset by new short haul U.S. coal traffic, the favourable impact of the change in FX and increased export coal volumes in the fourth quarter driven by offshore steel demand.

#### 7.4.1.3 Sulphur and Fertilizers

Sulphur and fertilizers revenues in 2009 were \$309.3 million, a decrease of \$213.1 million, or 40.8% from pro forma 2008 of \$522.4 million.

Sulphur and fertilizers revenues decreased in 2009 primarily due to:

- o lower export potash shipments as a result of ongoing price negotiations between producers and major buyers;
- o lower domestic potash shipments as farmers deferred purchases; and
- o lower fuel surcharge revenues due to the change in fuel price.

The decrease was partially offset by the favourable impact of the change in FX and a net increase in freight rates.

#### 7.4.1.4 Forest Products

Forest product revenues in 2009 were \$176.1 million, a decrease of \$74.9 million, or 29.8% from pro forma 2008 of \$251.0 million.

Forest product revenues decreased in 2009 primarily due to soft market demand for lumber, panel and pulp and paper products due to the global recession resulting in mill shutdowns and production curtailments as well as lower fuel surcharge revenues due to the change in fuel price.

The decrease was partially offset by the favourable impact of the change in FX and a net increase in freight rates.

#### 7.4.1.5 Industrial and Consumer Products

Industrial and consumer products revenues in 2009 were \$786.1 million, a decrease of \$142.2 million, or 15.3% from pro forma 2008 of \$928.3 million.

Industrial and consumer products revenues decreased in 2009 primarily due to reduced overall volumes primarily from our steel, building products, chemical and plastics customers due to the global recession and lower fuel surcharge revenues due to the change in fuel price.

This decrease was partially offset by:

- o the favourable impact of the change in FX;
- o increased volumes in ethanol and other energy related products;

2010  
13 ANNUAL  
REPORT

---

- o increased demurrage, a charge for the utilization of railroad assets beyond the standard times provided for loading or unloading; and
- o a net increase in freight rates.

#### 7.4.1.6 Automotive

Automotive revenues in 2009 were \$229.3 million, a decrease of \$100.3 million, or 30.4% from pro forma 2008 of \$329.6 million.

The decrease in 2009 was primarily due to a significant reduction of auto sales in the first three quarters of the year resulting in plant shutdowns and lower shipments of finished vehicles, and lower fuel surcharge revenues resulting from the change in fuel price. This decrease was partially offset by a net increase in freight rates, the favourable impact of the change in FX and increased volumes in the fourth quarter due to increased North American vehicle sales.

#### 7.4.1.7 Intermodal

Intermodal revenues in 2009 were \$1,198.1 million, a decrease of \$284.2 million, or 19.2% from pro forma 2008 of \$1,482.3 million.

The decrease in 2009 was primarily due to the global recession which reduced import and export volumes as well as domestic intermodal container shipments and lower fuel surcharge revenues resulting from the change in fuel price. The decrease was partially offset by a net increase in freight rates and the favourable impact of the change in FX.

### 7.4.2 Other Revenues

Other revenues in 2009 were \$122.4 million, a decrease of \$6.5 million, or 5.0% from pro forma 2008 of \$128.9 million. The decrease in 2009 was mainly due to lower switching fees.

### 7.4.3 Freight Revenue per Carload

Total freight revenue per carload in 2009 decreased by 1.0% compared with pro forma 2008 due to lower fuel price recoveries and negative rate decisions in coal and regulated grain. This decrease was partially offset by favourable changes in FX and higher net freight rates.

### 7.4.4 Freight Revenue per Revenue Ton-Mile

Freight revenue per RTM in 2009 decreased by 0.8% compared with pro forma 2008 due to lower fuel price recoveries and negative rate decisions in coal and regulated grain. This decrease was partially offset by favourable changes in FX and higher net freight rates.

## 8.0 Performance Indicators

The indicators listed in this table are key measures of our operating performance. Definitions of these performance indicators are provided in Section 25.0 Glossary of Terms.

### PERFORMANCE INDICATORS<sup>(1)</sup>

For the year ended December 31	2010	2009	2008 Pro forma <sup>(2)</sup>
<i>Efficiency and other indicators</i>			
Gross ton-miles ( GTM ) of freight (millions)	<b>242,757</b>	209,475	250,991
Train miles (thousands)	<b>39,576</b>	34,757	43,243
U.S. gallons of locomotive fuel consumed per 1,000 GTMs freight and yard	<b>1.17</b>	1.19	1.22
Average number of active employees expense	<b>13,879</b>	13,619	15,107
Car miles per car day	<b>139.9</b>	N/A	N/A
Car miles per car day, excluding DM&E	<b>151.5</b>	142.6	143.6
Average train speed (miles per hour)	<b>22.7</b>	N/A	N/A
Average train speed (miles per hour), excluding DM&E	<b>23.8</b>	25.5	24.0
Average terminal dwell (hours) <sup>(3)</sup>	<b>21.4</b>	21.9	22.3
<i>Safety indicators</i>			
FRA personal injuries per 200,000 employee-hours	<b>1.61</b>	1.92	1.63
FRA train accidents per million train-miles	<b>1.63</b>	1.81	2.53

<sup>(1)</sup> Certain comparative period figures have been updated to reflect new information.

<sup>(2)</sup> Pro forma basis includes DM&E results for the full year ended December 31, 2008, except U.S. gallons of locomotive fuel consumed per 1,000 GTMs freight and yard in 2008, car miles per car day, average train speed and average terminal dwell.

<sup>(3)</sup> Figures are excluding DM&E for 2009 and 2008.

## 8.1 EFFICIENCY AND OTHER INDICATORS

2010 performance indicators variances for GTMs, train miles, average number of active expense employees and U.S. gallons of locomotive fuel consumed are compared to 2009. 2009 performance indicator variances are compared to 2008 on a pro forma basis for the above mentioned metrics.

GTM's for 2010 were 242,757 million which increased by 15.9% compared with 209,475 million in the same period in 2009. The increase in 2010 was mainly due to an increase in traffic across all lines of business, other than grain which was relatively flat year-over-year. GTM's for 2009 were 209,475 million which decreased by 16.5% compared with 250,991 million in the same period in 2008 on a pro forma basis. The decrease in 2009 was mainly due to the global recession which led to a decrease in traffic for all lines of business except for grain. Fluctuations in GTM's normally drive fluctuations in certain variable costs, such as fuel and train crew costs.

Train miles increased by 13.9% in 2010 compared to 2009. The increase in 2010 was driven by increased traffic volumes and offset, in part, by management's strategy of consolidating and running longer, heavier trains. Train miles decreased by 19.6% in 2009 compared to pro forma 2008. The decrease in 2009 was driven by management's strategy of consolidating and running longer, heavier trains and was further impacted by reduced volumes. As a result, overall train miles were decreased.

U.S. gallons of locomotive fuel consumed per 1,000 GTM's in both freight and yard activity decreased by 1.7% in 2010 compared to 2009. The decrease in fuel consumption was due primarily to new fuel saving technology introduced on 200 locomotives and continued focus on fuel conservation programs including idle reduction and train handling practices. U.S. gallons of locomotive fuel consumed per 1,000 GTM's decreased 2.5% in 2009 compared with 2008. The decrease in 2009 was primarily due to an on-going fuel conservation programs which included the introduction of new fuel saving technology, operation of longer trains and use of a higher proportion of fuel efficient locomotives.

The average number of active expense employees for 2010 increased by 260, or 1.9%, compared with 2009. The increase in 2010 was driven by higher traffic volumes resulting from a stronger economy. The average number of active expense employees for 2009 decreased by 1,488, or 9.8%, compared with 2008 on a pro forma basis. This decrease in 2009 was primarily due to temporary employee layoffs and position reductions made in response to the decline in traffic volumes that accompanied the global recession.

Car miles per car day, including DM&E, were 139.9 in 2010. Excluding DM&E, car miles per car day were 151.5, an increase of 6.2% from 142.6 in 2009. The increase in 2010 was mainly due to various initiatives in the design and execution of our operations plan focused on improving asset velocity. Excluding DM&E, car miles per car day decreased by 0.7% in 2009 to 142.6 compared to 143.6 in 2008. The decrease in 2009 was mainly due to lower volumes.

Average train speed, including DM&E, was 22.7 miles per hour in 2010. Excluding DM&E, average train speed was 23.8 miles per hour, a decrease of 6.7% from 25.5 miles per hour in 2009. The decrease in 2010 was mainly due to increased volumes, traffic mix, and supply chain pipeline issues. Excluding DM&E, average train speed improved by 6.3% in 2009. The improvement in 2009 occurred due to improved network fluidity as a result of a combination of lower volumes and the execution of our long train strategy for fewer train starts.

Average terminal dwell, the average time a freight car resides in a terminal, improved 2.3% in 2010 to 21.4 hours from 21.9 hours in 2009. The improvement was the result of various initiatives in the design and execution of our operating plan to improve asset velocity and continued focus on the storage of surplus cars. Average terminal dwell,

improved 1.8% in 2009 when compared to 2008. The improvement in 2009 reflected lower volumes and the aggressive storage of surplus cars which reduced the number of active cars online and therefore, the average time freight cars spent in terminals.

## 8.2 SAFETY INDICATORS

Safety is a key priority for our management and Board of Directors. Our two main safety indicators – personal injuries and train accidents – follow strict U.S. Federal Railroad Administration ( FRA ) reporting guidelines.

The FRA personal injury rate per 200,000 employee-hours for CP was 1.61 in 2010, a decrease from 1.92 in 2009 and 1.63 in 2008 on a pro forma basis. The FRA train accident rate for CP in 2010 was 1.63 accidents per million train-miles, compared with 1.81 in 2009 and 2.53 in 2008 on a pro forma basis. CP strives to continually improve its safety performance through key strategies and activities such as training and technology. 2010 represents CP's second lowest personal injury rate and our third lowest train accident rate.

2010  
15 ANNUAL  
REPORT

---

**9.0 Operating Expenses****OPERATING EXPENSES**

For the year ended December 31 (in millions)	2010		2009 <sup>(2)</sup>		2008 <sup>(2)</sup>		Pro forma <sup>(1)(4)</sup>
	Variance		Variance		Expense	DM&E <sup>(3)</sup>	
	2010 to 2009		2009 to 2008				
	Expense	Fav/(unfav) %	Expense	Fav/(unfav) %	Expense	DM&E <sup>(3)</sup>	
Compensation and benefits	\$ 1,431.0	(9.5)	\$ 1,306.6	3.4	\$ 1,289.8	\$ 63.0	\$ 1,352.8
Materials	728.1	(25.5)	580.3	45.1	1,005.9	51.5	1,057.4
Equipment rents	214.2	1.6	217.6	20.2	257.8	14.9	272.7
Depreciation and amortization	206.0	8.8	226.0	2.4	218.5	13.0	231.5
Purchased services and other	489.6	(1.3)	483.2	(4.1)	428.2	35.9	464.1
	796.5	(1.7)	783.0	7.4	809.3	36.2	845.5
<b>Adjusted operating expenses<sup>(1)</sup></b>	<b>\$ 3,865.4</b>	<b>(7.5)</b>	<b>\$ 3,596.7</b>	<b>14.9</b>	<b>\$ 4,009.5</b>	<b>\$ 214.5</b>	<b>\$ 4,224.0</b>
Gain on termination of lease with shortline way		<b>100.0</b>	54.5	(100.0)			
Gain on sales of significant properties		<b>(100.0)</b>	(79.1)	100.0			
<b>Total operating expenses</b>	<b>\$ 3,865.4</b>	<b>(8.2)</b>	<b>\$ 3,572.1</b>	<b>15.4</b>	<b>\$ 4,009.5</b>	<b>\$ 214.5</b>	<b>\$ 4,224.0</b>

<sup>(1)</sup> These earnings measures have no standardized meanings as prescribed by U.S. GAAP and, therefore, are unlikely to be comparable to similar measures of other companies. These earnings measures and other specified items are described in Section 6.0 Non-GAAP Earnings.

<sup>(2)</sup> Restated for the Company's change in accounting policy in relation to the accounting for rail grinding (discussed further in Section 13.1.1 Rail Grinding).

<sup>(3)</sup> Includes DM&E operating expenses for the period January 1, 2008 to October 29, 2008.

<sup>(4)</sup> Pro forma basis redistributes DM&E equity income to a line by line consolidation of DM&E results for full year 2008.

Operating expenses were \$3,865.4 million in 2010, an increase of \$293.3 million, or 8.2% from \$3,572.1 million in 2009. Operating expenses in 2009 decreased by \$651.9 million, or 15.4% from 2008 on a pro forma basis.

Adjusted operating expenses were \$3,865.4 million in 2010, an increase of \$268.7 million, or 7.5%, from \$3,596.7 million in 2009. Adjusted operating expenses decreased by \$627.3 million, or 14.9% in 2009, from 2008 on a pro forma basis.

Adjusted operating expenses for 2010 compared to 2009 were higher primarily due to increased volumes, resulting in higher labour costs and increased fuel consumption, and higher fuel prices. The increase in adjusted operating expenses was partially offset by lower equipment rents due to reduced freight car and intermodal equipment leasing costs, the use of customer provided rail cars and the favourable impact of the change in FX.

The increase in operating expenses in 2010 was the result of the 2009 gain on sales of significant properties and increased volumes, resulting in higher labour costs and increased fuel consumption, and higher fuel prices. The increase was partially offset by lower equipment rents due to reduced freight car and intermodal equipment leasing costs, the use of customer provided rail cars, the favourable impact of the change in FX and the 2009 loss on termination of a lease with a shortline railway.

Adjusted operating expenses for 2009 compared to 2008 on a pro forma basis were lower primarily due to:

- o decreased volumes;
- o cost management initiatives to align and size resources accordingly;
- o lower fuel prices;
- o lower costs from train accidents; and
- o fewer locomotive overhauls.

The decrease in adjusted operating expenses was partially offset by the unfavourable impact of the change in FX.

The decrease in operating expenses in 2009 compared to 2008 on a pro forma basis was a result of the reasons noted above and the gain on sales of significant properties, partially offset by the loss on termination of a lease with a shortline railway and the unfavourable impact of the change in FX.

## **9.1 2010 TO 2009 COMPARATIVES**

### **9.1.1 Compensation and Benefits**

Compensation and benefits expense includes employee wages, salaries and fringe benefits. Compensation and benefits expense was \$1,431.0 million in 2010, an increase of \$124.4 million, or 9.5%, from \$1,306.6 million in 2009.

The increase in 2010 was primarily due to higher:

- o labour expenses driven by higher traffic volumes;
- o employee incentive compensation expenses driven by improved corporate performance;
- o wage and benefit inflation;
- o pension expense; and
- o restructuring charges in 2010 associated with the implementation of our structural cost initiatives.

The increase was partially offset by the favourable impact of the change in FX.

### **9.1.2 Fuel**

Fuel expense consists of fuel used by locomotives and includes provincial, state and federal fuel taxes and the impact of our hedging program. Fuel expense was \$728.1 million in 2010, an increase of \$147.8 million, or 25.5%, from \$580.3 million in 2009.

The increase in 2010 was primarily due to higher fuel prices and increased consumption as a result of higher traffic volumes partially offset by the favourable impact of the change in FX as well as improved efficiencies from ongoing fuel-conservation programs and the operation of longer trains.

### **9.1.3 Materials**

Materials expense includes the cost of material used for track, locomotive, freight car, and building maintenance. Materials expense was \$214.2 million in 2010, a decrease of \$3.4 million or 1.6%, from \$217.6 million in 2009.

The decrease in 2010 was mainly due to the favourable impact of the change in FX and increased proceeds received from the scrapping of freight car material. This decrease was partially offset by higher locomotive material repair and servicing costs primarily due to the return from storage of locomotives to move higher volumes and improve fluidity.

### **9.1.4 Equipment Rents**

Equipment rents expense includes the cost to lease freight cars, intermodal equipment, and locomotives from other companies including railways. Equipment rents expense was \$206.0 million in 2010, a decrease of \$20.0 million or 8.8% from \$226.0 million in 2009.

The decrease in 2010 was mainly due to reduced freight car and intermodal equipment leasing costs resulting from the benefits of fleet reductions that occurred in 2009 and the favourable impact of the change in FX. This was partially offset by higher car hire payments made to other railways as we made greater use of foreign freight cars on our lines to meet traffic demands and higher locomotive leasing costs due to higher volumes.

### **9.1.5 Depreciation and Amortization**

Depreciation and amortization expense represents the charge associated with the use of track and roadway, buildings, locomotives, freight cars and other depreciable assets. Depreciation and amortization expense was \$489.6 million in 2010, an increase of \$6.4 million, or 1.3%, from \$483.2 million in 2009. The increase in 2010 was primarily due to

more depreciable assets, partially offset by the favourable impact of the change in FX.

#### **9.1.6 Purchased Services and Other**

Purchased services and other expenses encompasses a wide range of costs, including expenses for joint facilities, personal injuries and damage, environmental remediation, property and other taxes, contractor and consulting fees, insurance, gains on land sales and equity earnings. Purchased services and other expense was \$796.5 million in 2010, an increase of \$13.5 million, or 1.7% from \$783.0 million in 2009.

The increase in 2010 was mainly due to:

- o higher volume-related expenses;
- o higher information technology project planning costs due to an increase in activity in preparation for 2011 projects;
- o lower gains on land sales which are recorded as reductions to operating expenses;
- o higher property and other taxes;
- o higher relocation costs related to CP's structural cost initiatives;
- o increased consulting costs; and
- o increased maintenance costs performed by third parties.

The increase was partially offset by the favourable impact of the change in FX and the absence of a 2009 charge to workers' compensation benefit.

**PURCHASED SERVICES AND OTHER**

For the year ended December 31 (in millions)	<b>2010</b>	2009 <sup>(1)</sup>
Support and facilities	\$ <b>341.7</b>	\$ 319.1
Track and operations	<b>228.9</b>	242.0
Intermodal	<b>140.5</b>	136.2
Equipment	<b>82.9</b>	100.4
Other	<b>30.4</b>	24.7
	<b>824.4</b>	822.4
Land sales <sup>(2)</sup>	<b>(27.9)</b>	(39.4)
<b>Total purchased services and other</b>	<b>\$ 796.5</b>	\$ 783.0

<sup>(1)</sup> Restated for the Company's change in accounting policy in relation to the accounting for rail grinding (discussed further in Section 13.1.1 Rail Grinding).

<sup>(2)</sup> Land sales does not include specified operating expenses which are discussed further in Section 9.1.7 Specified Operating Expenses.

**9.1.7 Specified Operating Expenses**

There were no specified operating expense items in 2010.

**9.1.7.1 Gain on Sales of Significant Properties**

During the third quarter of 2009, the Company completed two significant real estate sales, resulting in gains of \$79.1 million (\$68.1 million after tax).

The Company sold Windsor Station in Montreal, for proceeds of \$80.0 million, including the assumption of a mortgage of approximately \$16 million due in 2011. CP will continue to occupy a portion of Windsor Station through a lease for a 10 year period after the sale. As a result, part of the transaction is considered to be a sale-leaseback and consequently a gain of \$19.5 million related to this part of the transaction has been deferred and is being amortized over the remainder of the lease term.

The Company sold land in western Canada for transit purposes for proceeds of \$43.0 million.

**9.1.7.2 Loss on Termination of Lease with Shortline Railway**

During the fourth quarter of 2009, the Company made a payment of approximately \$73 million to terminate a contract with a lessee in order to cease through-train operations over the CP owned rail branchline between Smiths Falls, Ontario and Sudbury, Ontario including a settlement of a \$20.6 million existing liability. The contract with the lessee provided for the operation of a minimum number of CP freight trains over the leased branchline. The loss on the transaction recognized in the fourth quarter was \$54.5 million (\$37.6 million after tax).

**9.2 2009 TO 2008 COMPARATIVES**

Expense variances below (Sections 9.2.1 to 9.2.6) compare 2009 to 2008 pro forma figures.

### **9.2.1 Compensation and Benefits**

Compensation and benefits expense was \$1,306.6 million in 2009, a decrease of \$46.2 million, or 3.4%, from \$1,352.8 million on a pro forma basis.

The decrease in 2009 was primarily due to:

- o reductions in labour expenses achieved through temporary layoffs and employment reductions in response to reduced volumes;
- o lower training and recertification costs associated with fewer active employees;
- o lower pension and other post-retirement benefit expense caused by a higher discount rate and a settlement of a post-retirement benefit liability with a U.S. national multi-employer benefit plan; and
- o savings from reduced overtime hours worked as a result of cost management initiatives.

The decrease was partially offset by:

- o increased employee incentive compensation associated with a more normal bonus accrual in 2009 and increased gainshare payments to union employees;
- o increased labour expenses due to wage rate increases; and
- o the unfavourable impact of changes in FX for 2009.

### **9.2.2 Fuel**

Fuel expense was \$580.3 million in 2009, a decrease of \$477.1 million, or 45.1%, from \$1,057.4 million in 2008 on a pro forma basis.

The decrease in 2009 was primarily due to lower fuel prices and decreased consumption as a result of lower traffic volumes and improved efficiencies from ongoing fuel-conservation programs, operation of longer trains and the use of a higher proportion of fuel efficient locomotives. The decrease was partially offset by the unfavourable impact of the change in FX.

### **9.2.3 Materials**

Materials expense was \$217.6 million in 2009, a decrease of \$55.1 million, or 20.2%, from \$272.7 million on a pro forma basis.

The decrease in 2009 was mainly due to lower locomotive overhaul costs, lower freight car and locomotive maintenance as reduced

volumes resulted in a higher number of stored freight cars and locomotives and reduced vehicle and other fuel costs. This decrease was partially offset by the unfavourable impact of the change in FX.

#### **9.2.4 Equipment Rents**

Equipment rents expense was \$226.0 million in 2009, a decrease of \$5.5 million, or 2.4%, from \$231.5 million on a pro forma basis.

The 2009 decrease was due to lower volumes which resulted in a reduction in active cars online. This was achieved through the turn back of leased equipment which reduced freight car leasing costs, combined with a reduction in car hire payments as a result of fewer foreign cars online. The decrease was partially offset by the unfavourable impact of the change in FX and lower car hire receipts due to lower numbers of CP cars operating on other railways.

#### **9.2.5 Depreciation and Amortization**

Depreciation and amortization expense was \$483.2 million in 2009, an increase of \$19.1 million, or 4.1%, from \$464.1 million in 2008 on a pro forma basis.

The increase in 2009 was primarily due to unfavourable FX and higher depreciable assets partially offset by favourable depreciation rate changes, mainly in information systems and locomotives, and retirements of properties.

#### **9.2.6 Purchased Services and Other**

Purchased services and other expense was \$783.0 million in 2009, a decrease of \$62.5 million, or 7.4%, from \$845.5 million on a pro forma basis.

The decrease in 2009 was due to:

- o lower costs from train accidents and personal injuries;
- o higher gains on land sales recorded as a reduction to operating expenses;
- o reduced locomotive maintenance and intermodal handling reflecting lower volumes;
- o lower intermodal trucking costs;
- o lower bad debt expense;
- o reduced business travel expenses, realized through cost management initiatives; and
- o lower utility costs.

The decrease was partially offset by increased workers' compensation benefit accruals reflecting actuarial studies and the unfavourable impact of the change in FX.

### **10.0 Other Income Statement Items**

#### **10.1 GAIN ON SALE OF PARTNERSHIP INTEREST**

During the second quarter of 2009, the Company completed the sale of a portion of its investment in the DRTP to its existing partner, reducing the Company's ownership from 50% to 16.5%. The sale was agreed to on March 31, 2009 but was subject to regulatory approval, which was received during the second quarter. The proceeds received in the second quarter from the transaction were approximately \$110 million. Additional proceeds of approximately \$22 million are contingent on achieving certain future freight volumes through the tunnel, and have not been recognized. The gain on this transaction was \$81.2 million (\$68.7 million after tax).

## 10.2 OTHER INCOME AND CHARGES

Other income and charges consists of gains and losses from the change in FX on LTD and working capital, various costs related to financing, gains and losses associated with changes in the fair value of non-hedging derivative instruments and other non-operating expenditures. For the year ending December 31, 2010, other income and charges were a favourable credit to income of \$12.0 million as the Company recognized gains from FX on LTD and FX gains on the Company's working capital position due to the weakening of the U.S. dollar. FX on LTD is discussed further in Section 6.1 Foreign Exchange Gains and Losses on Long-Term Debt. Other income and charges was an expense of \$12.4 million in 2009, a decrease of \$59.9 million or 82.8%, compared to \$72.3 million in 2008.

The decrease in 2009 was the result of realized and unrealized gains on long-term floating rate notes in 2009 versus losses in 2008 associated with ABCP and the gain in 2009 versus the loss in 2008 on FX on LTD (discussed further in Section 6.1 Foreign Exchange Gains and Losses on Long-Term Debt). The decrease was partially offset by the net loss recognized upon the repurchase of debt, discussed below.

During the second quarter of 2009, the Company issued US\$350 million 7.25% 10-year Notes for net proceeds of \$408.2 million. The proceeds from this offering contributed to the repurchase of debt with a net carrying amount of \$555.3 million, net of deferred costs of \$1.4 million, pursuant to a tender offer for a total cost of \$571.9 million. Upon repurchase of the debt a net loss of \$16.6 million was recognized in Other income and charges.

## 10.3 EQUITY INCOME IN DAKOTA, MINNESOTA & EASTERN RAILROAD CORPORATION

Following Surface Transportation Board (STB) approval on October 30, 2008, earnings of the DM&E are fully consolidated with CP. As a result, earnings of DM&E in 2010 and 2009 are consolidated on a line by line basis. Prior to October 30, 2008 earnings of DM&E were reported as equity income in DM&E totalling \$50.9 million in 2008.

## 10.4 NET INTEREST EXPENSE

Net interest expense includes interest on long-term debt and capital leases, net of interest income of \$10.8 million (2009 \$18.3 million). Net interest expense was \$257.3 million in 2010, a decrease of \$10.3 million, or 3.8%. Net interest expense was \$267.6 million in 2009, an increase of \$26.1 million, or 10.8%, from 2008 on a pro forma basis. On a reported basis net interest expense was \$239.6 million in 2008.

The decrease in 2010 was primarily due to:

- o the favourable impact of the change in FX on U.S. dollar-denominated interest expense;
- o the repayment of debt during the second quarter of 2010 (discussed further in Section 14.3 Financing Activities); and
- o the repurchase of debt securities during the second quarter of 2009.

The decrease was partly offset by interest on new debt issuances (discussed further in Section 14.3 Financing Activities) and lower interest income resulting from the collection of an interest bearing receivable during the second quarter of 2010.

The increase in 2009 was primarily due to:

- o a lower amount of interest capitalized on qualifying projects;
- o the unfavourable impact from the change in FX on U.S. dollar-denominated interest expense;
- o interest on new debt issuances (discussed further in Section 14.3 Financing Activities); and
- o lower interest income due to lower rates on deposits.

The increase was partly offset by:

- o the repurchase of debt as part of the tender offer of debt securities;
- o lower draws on the credit facility;
- o reduced rates on variable debt; and
- o repayment of the remaining DM&E bridge financing in December 2008 (discussed further in Section 14.3 Financing Activities).

## 10.5 INCOME TAXES

Income tax expense was \$220.1 million in 2010, an increase of \$138.8 million, from \$81.3 million in 2009. Income tax expense was \$81.3 million in 2009, a decrease of \$68.9 million, from 2008. The increase in 2010 was primarily due to higher earnings. The decrease in tax expense in 2009 was due to lower earnings and deferred tax benefits related to provincial rate reductions and the resolution of a prior year income tax matter in 2009.

The effective income tax rate for 2010 was 25.3%, compared with 12.9% and 19.3% for 2009 and 2008 respectively. The normalized rates (income tax rate based on income adjusted for FX on LTD, and other specified items) for 2010, 2009 and 2008 were 24.4%, 18.9% and 27.2%, respectively. The changes in the normalized tax rates were primarily due to lower Canadian federal and provincial corporate income tax rates, tax planning initiatives, and a weak business environment in 2009.

We expect a normalized 2011 income tax rate of between 24% and 26%. The 2011 outlook on our normalized income tax rate is based on certain assumptions about events and developments that may or may not materialize or that may

be offset entirely or partially by other events and developments (discussed further in Section 21.0 Business Risks and Enterprise Risk Management and Section 22.4 Deferred Income Taxes). We expect to have an increase in our cash tax payments in future years.

As part of a consolidated financing strategy, CP structures its U.S. dollar-denominated long-term debt in different tax jurisdictions. As well, a portion of this debt is designated as a net investment hedge against net investment in U.S. subsidiaries. As a result, the tax on foreign exchange gains and losses on long-term debt in different tax jurisdictions can vary significantly.

## 11.0 Quarterly Financial Data

### QUARTERLY FINANCIAL DATA AS REPORTED

Quarter ended	2010				2009			
	Dec. 31	Sept. 30	Jun. 30 <sup>(1)</sup>	Mar. 31 <sup>(1)</sup>	Dec. 31 <sup>(1)</sup>	Sept. 30 <sup>(1)</sup>	Jun. 30 <sup>(1)</sup>	Mar.
(Millions, except per share data)								
Revenue	\$ 1,294.3	\$ 1,286.2	\$ 1,234.2	\$ 1,166.8	\$ 1,143.2	\$ 1,118.1	\$ 1,031.3	\$ 1,000.0

<sup>(1)</sup> Restated for the Company's change in accounting policy in relation to the accounting for rail grinding (discussed further in Section 13.1.1 Rail Grinding).

<sup>(2)</sup> These earnings measures have no standardized meanings prescribed by U.S. GAAP and, therefore, are unlikely to be comparable to similar measures of other companies. These earnings measures and other specified items are described in Section 6.0 Non-GAAP Earnings. A reconciliation of income, adjusted operating income and diluted EPS, before FX on LTD and other specified items, to net income and diluted EPS, as presented in the financial statements is provided in Section 6.0 Non-GAAP Earnings.

2010  
ANNUAL 20  
REPORT

## 11.1 QUARTERLY TRENDS

Volumes of and, therefore, revenues from certain goods are stronger during different periods of the year. First-quarter revenues can be lower mainly due to winter weather conditions, closure of the Great Lakes ports and reduced transportation of retail goods. Second- and third-quarter revenues generally improve over the first quarter as fertilizer volumes are typically highest during the second quarter and demand for construction-related goods is generally highest in the third quarter. Revenues are typically strongest in the fourth quarter, primarily as a result of the transportation of grain after the harvest, fall fertilizer programs and increased demand for retail goods moved by rail. Operating income is also affected by seasonal fluctuations. Operating income is typically lowest in the first quarter due to higher operating costs associated with winter conditions. Net income is also influenced by seasonal fluctuations in customer demand and weather-related issues.

2010 was an extraordinary year with volatility and limited market transparency. Coupled with the quarterly fluctuations in trends caused by the 2009 global recession, our results and volumes are inconsistent with the sensitivity and trends provided above. Management believes that the changes in economic conditions in 2009 affected the quarterly results in 2009 and 2010; the timing of a return to the sensitivity and trends discussed will depend on the recovery of the economy and our customers.

## 12.0 Fourth-Quarter Summary

(in millions)	<b>2010</b>	2009 <sup>(1)</sup>	Q4 2010 to Q4 2009 % fav/(unfav)
<b>Revenues</b>			
Grain	\$ 299.8	\$ 293.6	2.1

(1) Restated for the Company's change in accounting policy in relation to the accounting for rail grinding (discussed further in Section 13.1.1 Rail Grinding).

(2) These earnings measures have no standardized meanings as prescribed by U.S. GAAP and, therefore, are unlikely to be comparable to similar measures of other companies. These earnings measures and other specified items are described in Section 6.0 Non-GAAP Earnings.

2010  
ANNUAL 21  
REPORT

---

## 12.1 OPERATING RESULTS

Operating income for the three months ended December 31, 2010 was \$297.7 million, an increase of \$130.2 million, or 77.7% from \$167.5 million in 2009.

Adjusted operating income (discussed further in Section 6.0 Non-GAAP Earnings) for the three-month period ended December 31, 2010, was \$297.7 million, an increase of \$75.7 million, or 34.1%, from \$222.0 million for the same period in 2009. The increase is due to a stronger economy, as demonstrated by a 13.9% increase in RTMs, driving an increase in associated revenues (discussed further in Section 7.0 Lines of Business), along with the continued cost management activities (discussed further in Section 9.0 Operating Expenses).

Operating income for the three-month period ending December 31, 2010 increased due to the stronger economy, continued cost management activities and the absence of the 2009 loss on termination of lease with a shortline railway (discussed further in Section 9.1.7.2 Loss on Termination of Lease with Shortline Railway).

Net income was \$185.8 million in the fourth quarter of 2010, an increase of \$39.6 million, or 27.1%, from \$146.2 million in the fourth quarter of 2009.

The increase in net income was mainly due to higher operating income driven by higher volumes and the absence of the 2009 loss on termination of a lease (discussed further in Section 9.1.7.2 Loss on Termination of Lease with Shortline Railway). This increase was partially offset by 2009 income tax recoveries.

Diluted EPS was \$1.09 in the fourth quarter of 2010, an increase of \$0.22 from \$0.87 in 2009. This was primarily due to higher net income.

In the fourth quarter of 2010, GTMs were approximately 62,498 million, an increase of 13.2%, from 55,198 million in 2009. RTMs were approximately 32,883 million, an increase of 13.9%, from 28,874 million in 2009. The increase in GTMs and RTMs was primarily due to the continuing economic recovery.

## 12.2 NON-GAAP EARNINGS

A discussion of non-GAAP earnings and a reconciliation of adjusted operating income, adjusted EBIT and income before FX on LTD and other specified items, to net income as presented in the consolidated financial statements for the fourth quarters of 2010 and 2009, are included in Section 6.0 Non-GAAP Earnings.

Income, before FX on LTD and other specified items, was \$190.1 million in the fourth quarter of 2010, an increase of \$64.5 million from \$125.6 million in 2009. The increase was mainly driven by higher operating income, partially offset by the unfavourable impact of the change in FX. Income, before FX on LTD and other specified items, was \$125.6 million in the fourth quarter of 2009, a decrease of \$41.1 million from \$166.7 million, on a pro forma basis (discussed further in Section 6.0 Non-GAAP Earnings). The decrease was mainly driven by lower operating income. This was partially offset by lower interest expense (discussed further in Section 12.5 Other Income Statement Items) and income tax expense before FX on LTD.

## 12.3 REVENUES

Total revenues were \$1,294.3 million in fourth-quarter 2010, an increase of \$151.1 million or 13.2% from \$1,143.2 million as reported in the same period of 2009.

This increase was primarily driven by:

- o higher overall volumes in all lines of business other than grain;
- o higher fuel surcharge revenues resulting from the change in fuel price; and
- o increased freight rates.

This increase was partially offset by the unfavourable impact of the change in FX.

### **12.3.1 Grain**

Grain revenues in the fourth quarter of 2010 were \$299.8 million, an increase of \$6.2 million or 2.1% from \$293.6 million in 2009.

This increase was primarily driven by:

- o higher volumes of U.S. originated shipments due to the larger and better quality crop;
- o increased freight rates; and
- o higher fuel surcharge revenues due to the change in fuel price.

This increase was partially offset by lower Canadian grain shipments and the unfavourable impact of the change in FX.

### **12.3.2 Coal**

Coal revenues were \$125.2 million in fourth-quarter of 2010, an increase of \$12.9 million or 11.5% from \$112.3 million in 2009.

This increase was primarily driven by:

- o higher export coal shipments due to an increase in demand for metallurgical coal to Asia;
- o higher fuel surcharge revenues due to the change in fuel price; and
- o increased freight rates.

This increase was partially offset by the unfavourable impact of the change in FX.

### **12.3.3 Sulphur and Fertilizers**

Sulphur and fertilizers revenues were \$132.0 million in the fourth quarter of 2010, an increase of \$46.9 million or 55.1% from \$85.1 million in 2009.

The increase was primarily due to:

- o higher export potash shipments as a result of the return of international buyers to the market;

2010  
ANNUAL 22  
REPORT

---

- o higher domestic potash shipments due to increased overall demand in the second half of the year;
- o higher fuel surcharge revenues due to the change in fuel price; and
- o increased freight rates.

This increase was partially offset by the unfavourable impact of the change in FX.

#### **12.3.4 Forest Products**

Forest products revenues were \$50.2 million in the fourth quarter of 2010, an increase of \$7.4 million or 17.3% from \$42.8 million in 2009.

The increase was due to:

- o higher overall shipments of lumber, panel and pulp and paper products due to the re-opening of a mill on our lines in 2010;
- o higher fuel surcharge revenues due to the change in fuel price; and
- o increased freight rates.

This increase was partially offset by the unfavourable impact of the change in FX.

#### **12.3.5 Industrial and Consumer Products**

Industrial and consumer products revenues were \$240.0 million in the fourth quarter of 2010, an increase of \$34.8 million or 17.0% from \$205.2 million in 2009.

This increase was primarily due to:

- o increased shipments of steel, plastics, aggregates and ethanol driven by the improvement in the North American economy;
- o higher fuel surcharge revenues due to the change in fuel price; and
- o increased freight rates and extended length of haul.

This increase was partially offset by the unfavourable impact of the change in FX.

#### **12.3.6 Automotive**

Automotive revenues were \$75.3 million in fourth-quarter 2010, an increase of \$7.4 million or 10.9% from \$67.9 million in 2009.

This increase was driven by:

- o increased auto production and higher North American auto sales;

- o increased freight rates; and
- o the absence of a series of unusual plant shutdowns and curtailments of production caused by the restructuring of U.S. automakers in 2009.

This increase was partially offset by the unfavourable impact of the change in FX.

### **12.3.7 Intermodal**

Intermodal revenues increased in the fourth quarter of 2010 to \$339.6 million, an increase of \$30.7 million or 9.9% from \$308.9 million in 2009.

This increase was driven by:

- o increased domestic container shipments due to increased domestic sales in the cross border and retail sectors offset by reduced volumes in short-haul lanes;
- o increased freight rates; and
- o higher fuel surcharge revenues due to the change in fuel price.

These increases were partially offset by the unfavourable impact of the change in FX.

### **12.3.8 Other Revenues**

Other revenues were \$32.2 million in the fourth quarter of 2010, an increase of \$4.8 million or 17.5% from \$27.4 million in 2009. The increase was primarily due to increased revenues from leasing and switching which was higher due to increased volumes, partially offset by lower passenger revenues and the unfavourable impact of the change in FX.

## **12.4 OPERATING EXPENSES**

Operating expenses in the fourth quarter of 2010 were \$996.6 million, an increase of \$20.9 million or 2.1% from \$975.7 million in 2009. Adjusted operating expenses in the fourth quarter of 2010 were \$996.6 million, an increase of \$75.4 million or 8.2% from \$921.2 million in 2009. These increases were primarily due to the increased traffic volumes, partially offset by the favourable change in FX in the fourth quarter of 2010. The increase in operating expenses was also partially offset by the absence of the 2009 loss on termination of a lease with a shortline railway (discussed further in Section 9.1.7.2 Loss on Termination of Lease with Shortline Railway).

### **12.4.1 Compensation and Benefits**

Compensation and benefits expense in fourth-quarter 2010 was \$362.3 million, an increase of \$45.6 million or 14.4% from \$316.7 million in 2009.

This increase was primarily driven by:

- o a greater number of employees in response to higher volumes;
- o increased employee incentive compensation expenses driven by improved corporate performance;
- o higher wage and benefit inflation;

- o restructuring charges in 2010 associated with the implementation of our structural cost initiatives; and
- o higher training costs associated with additional employees hired to handle increased volumes.

2010  
23 ANNUAL  
REPORT

---

#### **12.4.2 Fuel**

Fuel expense was \$202.4 million in fourth-quarter 2010, an increase of \$44.8 million or 28.4% from \$157.6 million in 2009. The increase was primarily due to higher fuel prices and increased consumption as a result of higher traffic volumes partially offset by the favourable impact of the change in FX.

#### **12.4.3 Materials**

Materials expense was \$56.0 million in the fourth quarter of 2010, an increase of \$13.9 million or 33.0% from \$42.1 million in the fourth quarter of 2009. This increase was primarily due to the number of freight car wheels replaced as traffic volumes increased. In addition, as locomotives were returned to service to accommodate the increase in volumes, we incurred higher repair and service costs. The increase was partially offset by the favourable impact of the change in FX.

#### **12.4.4 Equipment Rents**

Equipment rents expense was \$48.5 million in the fourth quarter of 2010, a decrease of \$4.5 million or 8.5% from \$53.0 million. The decrease was mainly due to increased car hire receipts related to more CP-owned cars operating on other railways and the favourable impact of the change in FX.

#### **12.4.5 Depreciation and Amortization**

Depreciation and amortization expense was \$121.2 million in fourth-quarter 2010, a decrease of \$1.0 million or 0.8% from \$122.2 million in 2009, largely due to adoption of updated depreciation rates for 2010 and the favourable impact of the change in FX, offset by higher depreciable assets.

#### **12.4.6 Purchased Services and Other**

Purchased services and other expense was \$206.2 million in fourth-quarter 2010, a decrease of \$23.4 million, or 10.2% from \$229.6 million.

This decrease was primarily due to:

- o the favourable impact of the absence of the 2009 charge to workers' compensation benefit;
- o a higher level of gains on land sales in the fourth quarter of 2010 compared to the same period of 2009;
- o lower locomotive overhaul costs performed by third parties; and
- o the favourable impact of the change in FX.

This decrease was partially offset by:

- o increased traffic volumes;
- o higher information technology project planning costs due to an increase in activity in preparation for 2011 projects; and
- o higher relocation costs related to CP's structural cost initiatives.

**PURCHASED SERVICES AND OTHER**

For the three months ended December 31 (in millions)	<b>2010</b>	2009 <sup>(1)</sup>
Support and facilities	\$ <b>89.1</b>	\$ 85.0
Track and operations	<b>65.9</b>	84.5
Intermodal	<b>38.1</b>	33.5
Equipment	<b>23.5</b>	29.3
Other	<b>11.5</b>	8.9
	<b>228.1</b>	241.2
Land sales <sup>(2)</sup>	<b>(21.9)</b>	(11.6)
<b>Total purchased services and other</b>	<b>\$ 206.2</b>	\$ 229.6

<sup>(1)</sup> Restated for the Company's change in accounting policy in relation to the accounting for rail grinding (discussed further in Section 13.1.1 Rail Grinding).

<sup>(2)</sup> Land sales do not include specified operating expenses which are discussed further in Section 9.1.7 Specified Operating Expenses.

**12.5 OTHER INCOME STATEMENT ITEMS**

In the fourth quarter of 2010 there was a loss due to FX on LTD of \$0.9 million, as the Canadian dollar strengthened to \$0.99 from \$1.03 at September 30, 2010.

Other income and charges were a favourable credit to income of \$4.7 million in the fourth quarter of 2010, compared with a credit to income of \$7.0 million in the fourth quarter of 2009.

Net interest expense was \$65.2 million in the fourth quarter of 2010, a decrease of \$3.2 million from \$68.4 million in 2009. The decrease was largely due to the repayment of debt during the second quarter of 2010 (discussed further in Section 14.3 Financing Activities) and from a higher level of capitalization of interest for the increased number of long-term capital projects in 2010. The decrease was offset in part by interest on new debt issuances (discussed further in Section 14.3 Financing Activities).

## 12.6 INCOME TAXES

Income tax expense was \$51.4 million in the fourth quarter of 2010, based on income before income tax expense of \$237.2 million. In the fourth quarter of 2009 the Company had a recovery of income taxes of \$40.1 million, based on income before income tax expense of \$106.1 million. Income taxes in 2009 reflected benefits resulting from a tax rate change implemented by the government of Ontario, as well as tax recoveries related to the termination of a lease with a shortline railway and the settlement of a prior year income tax matter.

The effective income tax rate for fourth-quarter 2010 was 21.7%. The normalized rate (income tax rate based on income adjusted for FX on LTD, and other specified items) for the fourth quarter of 2010 was 20.1%. The effective income tax rate for fourth-quarter 2009 was a recovery at 37.8%, which reflected the provincial rate reduction benefit as well as tax recoveries related to the termination of a lease with a shortline railway and the settlement of a prior year income tax matter. The normalized rate (income tax rate based on income adjusted for FX on LTD, and other specified items noted above) for the fourth quarter of 2009 was 17.9%.

## 12.7 LIQUIDITY AND CAPITAL RESOURCES

During the fourth quarter of 2010, the Company generated cash and cash equivalents of \$92.8 million compared with \$63.2 million generated in the same period of 2009.

The increase in cash and cash equivalents during the fourth quarter of 2010 compared to 2009 was primarily due to higher pension payments in 2009 which included a \$500 million voluntary prepayment to the Canadian defined benefit pension plans (discussed further in Section 20.5 Pension Plan Deficit) and higher net income. This increase was largely offset by higher cash provided by financing activities in 2009 which included the issuance of \$400 million 6.45% 30-year Notes and US\$64.7 million of 5.57% Senior Secured Notes and increased additions to properties in 2010.

## 13.0 Changes in Accounting Policy

### 13.1 2010 ACCOUNTING CHANGES

#### 13.1.1 Rail Grinding

During the second quarter of 2010, the Company changed its accounting policy for the treatment of rail grinding costs. In prior periods, CP had capitalized such costs and depreciated them over the expected economic life of the rail grinding. The Company concluded that, although the accounting treatment was within acceptable accounting standards, it is preferable to expense the costs as incurred, given the subjectivity in determining the expected economic life and the associated depreciation methodology. The accounting policy change has been accounted for on a retrospective basis. The effects of the adjustment to January 1, 2010 resulted in an adjustment to decrease net properties by \$89.0 million, deferred income taxes by \$26.3 million, and shareholders equity by \$62.7 million. As a result of the change the following increases (decreases) to financial statement line items occurred:

	For the three months ended		For the year ended December 31		
	December 31 2010	2009	2010	2009	2008
(in millions of Canadian dollars, except per share data)

### 13.1.2 U.S. GAAP/International Financial Reporting Standards ( IFRS )

Effective the first quarter of 2010, CP commenced reporting its financial results using U.S. GAAP, which is consistent with the current reporting of all other North American Class I railways. As a result, CP will not be adopting IFRS in 2011.

### 13.1.3 Consolidations

In June 2009, the Financial Accounting Standards Board ( FASB ) issued Amendments to Consolidation of Variable Interest Entities. The guidance retains the scope of the previous guidance and removes the exemption of entities previously considered qualifying special purpose entities. In addition, it replaces the previous quantitative approach with a qualitative analysis approach for determining whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity. The guidance is further amended to require ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity and requires enhanced disclosures about an enterprise's involvement in a variable interest entity. The guidance is applicable to all variable interest entities that existed at January 1, 2010, the date of adoption, or are created thereafter.

The Company has variable interests in variable interest entities; however, the adoption of the new guidance did not change the previous assessment that the Company is not the primary beneficiary and as such does not consolidate the variable interest entities. Additional note disclosure regarding the nature of the Company's variable interests and where judgment was required to assess the primary beneficiary of these variable interest entities has been provided in the Company's Notes to Consolidated Financial Statements.

### 13.1.4 Accounting for Transfers of Financial Assets

The FASB has released additional guidance with respect to the accounting and disclosure of transfers of financial assets such as securitized accounts receivable. Although the Company currently does not have an accounts receivable securitization program, the guidance, which includes revisions to the derecognition criteria in a transfer and the treatment of qualifying special purpose entities, would be applicable to any future securitization. The new guidance is effective for the Company from January 1, 2010. The adoption of this guidance had no impact to the Company's financial statements.

### 13.1.5 Fair Value Measurement and Disclosure

In January 2010, the FASB amended the disclosure requirements related to fair value measurements. The update provides for new disclosures regarding transfers in and out of Level 1 and Level 2 financial asset and liability

categories and expanded disclosures in the Level 3 reconciliation. The update also provides clarification that the level of disaggregation should be at the class level and that disclosures about inputs and valuation techniques are required for both recurring and non recurring fair value measurements that fall in either Level 2 or Level 3. New disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, except for the expanded disclosures in the Level 3 reconciliation, which are effective for fiscal years beginning after December 15, 2010. The Company has adopted this guidance resulting in expanded note disclosure in the Company's Notes to Consolidated Financial Statements.

### **13.2 NEW ACCOUNTING PRONOUNCEMENTS ISSUED AND NOT YET ADOPTED**

#### **13.2.1 Future Accounting Changes**

There have been no new accounting pronouncements issued that are expected to have a significant impact to the Company's financial statements.

### **14.0 Liquidity and Capital Resources**

We believe adequate amounts of cash and cash equivalents are available in the normal course of business to provide for ongoing operations, including the obligations identified in the tables in Section 19.0 Contractual Commitments and Section 20.4 Certain Other Financial Commitments. We are not aware of any trends or expected fluctuations in our liquidity that would create any deficiencies. Liquidity risk is discussed in Section 21.2 Liquidity. The following discussion of operating, investing and financing activities describes our indicators of liquidity and capital resources.

#### **14.1 OPERATING ACTIVITIES**

Cash provided by operating activities was \$502.1 million in 2010, an increase of \$51.2 million from \$450.9 million in 2009. Cash provided by operating activities in 2009 decreased by \$492.0 million from \$942.9 million in 2008.

The increase in 2010 was primarily due to higher net income and a lower cash cost related to the unwind of the Total Return Swap ( TRS ), (discussed further in Section 16.7.1 Total Return Swap).

This increase was offset in part by:

- o a \$650 million voluntary prepayment to the Company's main Canadian defined benefit pension plan in 2010, compared to a \$500 million voluntary prepayment in 2009 (discussed further in Section 20.5 Pension Plan Deficit). In addition, in 2010 the Company made scheduled contributions of approximately \$100 million towards the main Canadian defined benefit pension plan's deficit. The Company did not make a similar payment in 2009;
- o the unfavourable impact of the change in working capital balances in 2010; and
- o cash tax payments in 2010 compared to tax recoveries in 2009.

The decrease in 2009 was primarily due to:

- o a \$500 million voluntary prepayment to the Canadian defined benefit pension plans (discussed further in Section 20.5 Pension Plan Deficit);
- o lower net income; and
- o the partial unwind of the TRS (discussed further in Section 16.7.1 Total Return Swap).

This decrease was offset in part by:

- o the termination of our \$120.0 million accounts receivable securitization program in 2008 (discussed further in Section 17.1 Sale of Accounts Receivable);
- o the favourable improvement in working capital balances; and
- o cash tax recoveries in 2009 compared to payments in 2008.

## 14.2 INVESTING ACTIVITIES

Cash used in investing activities was \$635.6 million in 2010, an increase of \$276.9 million from 2009. Cash used in investing activities was \$358.7 million in 2009, a decrease of \$441.4 million from \$800.1 million in 2008.

The overall investing activities increase in 2010 was largely due to the 2009 proceeds from the sale of significant properties and other assets and including the sale of a partnership interest in the second quarter of 2009.

The decrease in 2009 was largely due to proceeds on the sales of a partnership interest and significant properties (discussed further in Section 10.1 Gain on Sale of Partnership Interest and Section 9.1.7.1 Gain on Sales of Significant Properties) and lower additions to properties in 2009 and 2008.

Additions to properties ( capital programs ) in 2011 are expected to be in the range of \$950 million to \$1.05 billion. Planned capital programs include approximately \$680 million for basic track infrastructure renewal, \$100 million for volume growth and productivity initiatives, \$100 million for strategic network enhancements, \$80 million to strengthen and upgrade information technology systems to enhance shipment visibility and information needs, and \$40 million to address capital regulated by governments, principally train control.

## CAPITAL PROGRAMS

(in millions, except for miles and crossties)	<b>2010</b>	2009 <sup>(1)</sup>	2008 <sup>(1)</sup>
---	-------------	---------------------	---------------------

**Additions to properties<sup>(2)</sup>**

Track and roadway	\$ 589.2	\$ 509.9	\$ 663.2
Buildings	19.0	12.0	14.9
Rolling stock	26.4	79.8	107.8
Information systems	53.7	41.3	46.4
Other	55.1	60.3	73.0

Total accrued	743.4	703.3	905.3
---------------	-------	-------	-------

**Less:**

Assets acquired through capital leases	1.1	0.8	79.5
Other non-cash transactions	16.2	(1.0)	9.9

Cash invested in additions to properties (as per Consolidated Statement of Cash Flows)	\$ 726.1	\$ 703.5	\$ 815.9
--	----------	----------	----------

**Track installation capital programs<sup>(3)</sup>**

Track miles of rail laid (miles)	416	395	408
Track miles of rail capacity expansion (miles)	3	1	31
Crossties installed (thousands)	872	870	1,065

<sup>(1)</sup> Restated for the Company's change in accounting policy in relation to the accounting for rail grinding (discussed further in Section 13.1.1 Rail Grinding).

<sup>(2)</sup> The figures include the results of the DM&E on a fully consolidated basis for the periods after October 30, 2008.

<sup>(3)</sup> The 2008 figures exclude DM&E data.

Of the total additions to properties noted in the table above, costs of approximately \$588 million as at December 31, 2010 (2009 \$606 million) for the renewal of the railway, including track and roadway, buildings and rolling stock, have been capitalized. Costs of approximately \$790 million during the year ended December 31, 2010 (2009 \$782 million) related to normal repairs and maintenance of the railroad have been expensed and presented within operating expenses for the year. Repairs and maintenance does not have a standardized definition and, therefore is unlikely to be comparable to similar measures of other companies and definitions applied by regulators.

We intend to finance capital expenditures with available cash from operations but may partially finance these expenditures with new debt, capital leases and temporary draws on our credit facility and equity. Our decisions on funding equipment acquisitions will be influenced by such factors as the need to keep our capital structure within debt covenants and maintain financial ratios that enable CP to manage its long-term financing structure to maintain its investment grade rating, as well as the amount of cash flow we believe can be generated from operations and the prevailing capital market conditions.

### 14.3 FINANCING ACTIVITIES

Cash used in financing activities was \$167.8 million in 2010 as compared to cash provided by financing activities of \$489.4 million in 2009 and cash used in financing activities in 2008 of \$431.2 million.

Cash used in financing activities in 2010 was mainly for the repayment of \$350 million 4.9% seven-year Medium Term Notes; \$225.7 million bank loan, including \$71.7 million in interest; which was offset in part by the collection of a related \$219.8 million receivable, including \$69.8 million in interest, from a financial institution; and the payment of dividends. These uses of cash were also partly offset by the issuance of US\$350 million 4.45% 12.5-year Notes for net proceeds of CDN\$355.2 million.

Cash provided by financing activities in 2009 was mainly due to the issuance of:

- o common shares under a final prospectus offering for net cash proceeds of approximately \$489 million;
- o US\$350 million 7.25% 10-year Notes for net proceeds of approximately \$409 million;
- o \$400 million 6.45% 30-year Notes for net proceeds of \$397.8 million; and
- o US\$64.7 million 5.57% Senior Secured Notes for net proceeds of \$66.7 million.

These proceeds were partially offset by the tendering of debt for a total cost of \$571.9 million and the repayment of short-term borrowings and the payments of dividends.

Cash used in financing activities in 2008 was mainly due to the repayment of the bridge financing originally used to finance the acquisition of DM&E, dividends paid and the reduction in short-term borrowings. These uses were largely offset by the following debt issuances to permanently finance the acquisition of DM&E and replace the bridge financing:

- o US\$400 million 5.75% five-year Notes;
- o US\$300 million 6.50% 10-year Notes; and
- o \$375 million 6.25% 10-year Medium Term Notes.

In addition, \$79.5 million of assets held for sale were refinanced under capital leases during the year.

The Company has available, as sources of financing, unused credit facilities of up to \$705 million.

### **14.3.1 Debt to Total Capitalization**

At December 31, 2010, our debt to total capitalization decreased to 47.2%, compared with 50.5% at December 31, 2009 and 54.5% at December 31, 2008.

The decrease in 2010 was primarily due to:

- o repayment of long-term debt;
- o an increase in equity driven by earnings; and
- o the impact of the stronger Canadian dollar on U.S. dollar-denominated debt at December 31, 2010, compared with December 31, 2009.

This was partially offset by the issuance of long-term debt and an increase in the accumulated loss of the pension plan which decreased equity.

The decrease in 2009 was primarily due to:

- o the proceeds raised from CP's equity issue;
- o the tendering of debt;
- o an increase in equity driven by earnings;
- o the impact of the stronger Canadian dollar on U.S. dollar-denominated debt at December 31, 2009, compared with December 31, 2008; and
- o the repayment of short-term borrowings.

This was partially offset by the issuance of long-term debt and an increase in the accumulated loss of the pension plan which decreased equity.

Debt to total capitalization is the sum of long-term debt, long-term debt maturing within one year and short-term borrowing, divided by debt plus total shareholders' equity as presented on our Consolidated Balance Sheet.

### **14.3.2 Interest Coverage Ratio**

At December 31, 2010, our interest coverage ratio (discussed further in Section 6.0 Non-GAAP Earnings) was 4.4, compared with 2.9 for the same period in 2009 and 4.5 in the same period of 2008.

The increase in 2010 was primarily due to a year-over-year improvement in adjusted EBIT (discussed further in Section 6.0 Non-GAAP Earnings).

2010  
ANNUAL  
REPORT

---

The decrease in 2009 was primarily due to a year-over-year reduction in adjusted EBIT (discussed further in Section 6.0 Non-GAAP Earnings).

Interest coverage ratio is measured, on a rolling twelve month basis, as adjusted EBIT divided by net interest expense. This ratio excludes changes in the estimated fair value of the Company's investment in long-term floating rate notes/ABCP, the gains on sales of partnership interest and significant properties and the loss on termination of a lease with a shortline railway as these are not in the normal course of business and FX gains and losses on long-term debt, which can be volatile and short term. The interest coverage ratio and adjusted EBIT are non-GAAP measures.

#### 14.4 FREE CASH

Free cash is a non-GAAP measure that management considers to be an indicator of liquidity. The measure is used by management to provide information with respect to the relationship between cash provided by operating activities and investment decisions and a comparable measure for period to period changes. Free cash is calculated as cash provided by operating activities, less cash used in investing activities and dividends paid, adjusted for changes in cash and cash equivalent balances resulting from FX fluctuations and excludes the acquisition of DM&E and changes in the accounts receivable securitization program. Free cash is adjusted for the DM&E acquisition as it is not indicative of normal day-to-day investments in the Company's asset base. The securitization of accounts receivable is a financing-type transaction, which is excluded to clarify the nature of the use of free cash.

#### CALCULATION OF FREE CASH<sup>(5)</sup>

(reconciliation of free cash to GAAP cash position)

For the year ended December 31 (in millions)

	<b>2010</b>	2009 <sup>(2)</sup>	2008 <sup>(1)(2)</sup>
Cash provided by operating activities	\$ <b>502.1</b>	\$ 450.9	\$ 942.9
Cash used in investing activities	<b>(635.6)</b>	(358.7)	(800.1)
Dividends paid	<b>(174.5)</b>	(162.9)	(148.7)
Add back investment in DM&E <sup>(3)</sup>			8.6
Termination of accounts receivable securitization program <sup>(4)</sup>			120.0
Foreign exchange effect on cash and cash equivalents	<b>(17.2)</b>	(20.0)	28.0
<b>Free cash<sup>(5)</sup></b>	<b>(325.2)</b>	(90.7)	150.7
Cash provided by (used in) financing activities, excluding dividend payment	<b>6.7</b>	652.3	(282.5)
Investment in DM&E <sup>(3)</sup>			(8.6)
Accounts receivable securitization program <sup>(4)</sup>			(120.0)
<b>(Decrease)/increase in cash, as shown on the Consolidated Statement of Cash Flows</b>	<b>(318.5)</b>	561.6	(260.4)
Net cash and cash equivalents at beginning of year	<b>679.1</b>	117.5	377.9
<b>Net cash and cash equivalents at end of year</b>	<b>\$ 360.6</b>	\$ 679.1	\$ 117.5

<sup>(1)</sup> The 2008 figures include DM&E consolidated from October 30, 2008 to December 31, 2008.

<sup>(2)</sup> Restated for the Company's change in accounting policy in relation to the accounting for rail grinding (discussed further in Section 13.1.1 Rail Grinding).

- (3) The acquisition of DM&E in 2007 (discussed further in Section 18.0 Acquisition).
- (4) The termination of accounts receivable securitization program (discussed further in Section 17.1 Sale of Accounts Receivable).
- (5) Free cash has no standardized meaning prescribed by U.S. GAAP and, therefore, is unlikely to be comparable to similar measures of other companies. Free cash is discussed further in Section 6.0 Non-GAAP Earnings.

There was negative free cash of \$325.2 million in 2010, compared with negative free cash of \$90.7 million in 2009 and positive free cash of \$150.7 million in 2008.

The decrease in 2010 was primarily due to:

- o a \$650 million voluntary prepayment to the Company's main Canadian defined benefit pension plan in 2010, compared to a \$500 million voluntary prepayment in 2009 (discussed further in Section 20.5 Pension Plan Deficit). In addition, in 2010 the Company made scheduled contributions of approximately \$100 million towards the main Canadian defined benefit pension plan's deficit. The Company did not make a similar payment in 2009;
- o proceeds on the sales of a partnership interest and significant properties in 2009;
- o the unfavourable impact in working capital balances in 2010; and
- o cash tax payments in 2010 compared to tax recoveries in 2009.

This decrease was offset in part by higher net income in 2010.

The decrease in 2009 was primarily due to:

- o a \$500 million voluntary prepayment to the Company's main Canadian defined benefit pension plans (discussed further in Section 20.5 Pension Plan Deficit);
- o lower net income; and
- o the unfavourable impact in FX fluctuations on U.S. dollar-denominated cash.

This decrease was offset in part by:

- o acquisition of assets held for sale in 2008;
- o proceeds on the sales of a partnership interest and significant properties;
- o lower capital additions; and
- o the favourable improvement in working capital balances and cash tax recoveries in 2009 compared to payments in 2008.

## **15.0 Balance Sheet**

### **15.1 ASSETS**

Assets totalled \$13,675.9 million at December 31, 2010, compared with \$14,154.8 million at December 31, 2009 and \$14,362.2 million at December 31, 2008. The decrease in assets was mainly due to the reduction in cash balances (discussed further in Section 14.0 Liquidity and Capital Resources), the negative impact of a weaker U.S. dollar and a reduction in accounts receivable balances. The reduction in accounts receivable primarily reflected the collection, during 2010, of a \$219.8 million receivable from a financial institution.

This decrease was partially offset by the increase in deferred tax assets reflecting tax loss carry forwards that are expected to be realized in 2011.

The decrease in assets in 2009 was mainly due to the negative impact of a weaker U.S. dollar and a reduction in working capital accounts. This decrease was partially offset by the increase in cash and cash equivalents in 2009 which was mainly due to cash provided by the monetization of various assets and investments (discussed further in Section 9.1.7.1 Gain on Sales of Significant Properties and Section 10.1 Gain on Sale of Partnership Interest), proceeds from the issuance of common shares and certain debt issuances. Adequate cash balances allowed CP to increase funding to the Company's defined benefit pension plan (discussed further in Section 20.5 Pension Plan Deficit).

### **15.2 TOTAL LIABILITIES**

Our combined short-term and long-term liabilities were \$8,851.2 million at December 31, 2010 compared with \$9,496.7 million at December 31, 2009 and \$10,087.1 million at December 31, 2008. The decrease in total liabilities in 2010 reflected the favourable impact on U.S. dollar-denominated liabilities of the strengthening of the Canadian dollar, the reduction in long-term debt (discussed further in Section 14.3 Financing Activities) and a reduction in pension liabilities as a result of our voluntary \$650 million prepayment to the Company's main Canadian defined benefit pension plan. This decrease was partially offset by the unfavourable impact on pension and other benefit

liabilities of a reduction in discount rates at December 31, 2010 and increases in deferred tax liabilities reflecting the presentation of tax loss carry forwards as current assets.

The decrease in total liabilities in 2009 reflected the strengthening of the Canadian dollar and its favourable impact on U.S. dollar-denominated liabilities, as well as lower business activities as a result of the global recession which reduced accounts payable.

### **15.3 EQUITY**

At December 31, 2010, our Consolidated Balance Sheet reflected \$4,824.7 million in equity, compared with an equity balance of \$4,658.1 million at December 31, 2009 and \$4,275.1 million at December 31, 2008. The increase in equity in 2010 was primarily due to net income, in excess of dividends, partially offset by an increase in accumulated other comprehensive loss ( AOCL ) driven by increases in pension liabilities arising from a reduction in discount rates.

The increase in equity in 2009 was primarily due to the issuance of 13.9 million common shares in February 2009 and net income, in excess of dividends. This increase was partially offset by an increase in AOCL as a result of the annual valuation of our pension and other benefit plans.

### **15.4 SHARE CAPITAL**

CP is authorized to issue an unlimited number of Common Shares, an unlimited number of First Preferred Shares and an unlimited number of Second Preferred Shares. At March 2, 2011, 169,354,708 Common Shares and no Preferred Shares were issued and outstanding.

In addition, CP has a Management Stock Option Incentive Plan ( MSOIP ) under which key officers and employees are granted options to purchase CP shares. Each option granted can be exercised for one Common Share. At March 2, 2011, 8.0 million options were outstanding under our MSOIP and Directors' Stock Option Plan, and 0.4 million Common Shares have been reserved for issuance of future options.

**15.5 DIVIDENDS**

Dividends declared by the Board of Directors in the last three years are as follows:

Dividend Amount	Record Date	Payment Date
\$0.2475	March 28, 2008	April 28, 2008
\$0.2475	June 27, 2008	July 28, 2008
\$0.2475	September 26, 2008	October 27, 2008
\$0.2475	December 24, 2008	January 26, 2009
\$0.2475	March 27, 2009	April 27, 2009
\$0.2475	June 26, 2009	July 27, 2009
\$0.2475	September 25, 2009	October 26, 2009
\$0.2475	December 31, 2009	January 25, 2010
\$0.2475	March 26, 2010	April 26, 2010
\$0.2700	June 25, 2010	July 26, 2010
\$0.2700	September 24, 2010	October 25, 2010
\$0.2700	December 31, 2010	January 31, 2011
\$0.2700	March 25, 2011	April 25, 2011

**16.0 Financial Instruments****16.1 FAIR VALUE OF FINANCIAL INSTRUMENTS**

The Company categorizes its financial assets and liabilities measured at fair value into one of three different levels depending on the observability of the inputs employed in the measurement.

- o Level 1: Unadjusted quoted prices for identical assets and liabilities in active markets that are accessible at the measurement date.
- o Level 2: Directly or indirectly observable inputs other than quoted prices included within Level 1 or quoted prices for similar assets and liabilities. Derivative instruments in this category are valued using models or other industry standard valuation techniques derived from observable market data.
- o Level 3: Valuations based on inputs which are less observable, unavailable or where the observable data does not support a significant portion of the instruments' fair value. Generally, Level 3 valuations are longer dated transactions, occur in less active markets, occur at locations where pricing information is not available, or have no binding broker quote to support Level 2 classifications.

When possible, the estimated fair value is based on quoted market prices, and, if not available, estimates from third party brokers. For non exchange traded derivatives classified in Level 2, the Company uses standard valuation techniques to calculate fair value. These methods include discounted mark to market for forwards, futures and swaps. Primary inputs to these techniques include observable market prices (interest, FX and commodity) and volatility, depending on the type of derivative and nature of the underlying risk. The Company uses inputs and data used by willing market participants when valuing derivatives and considers its own credit default swap spread as well as those of its counterparties in its determination of fair value. Wherever possible the Company uses observable inputs. All derivatives are classified as Level 2. A detailed analysis of the techniques used to value the Company's long-term

floating rate notes, which are classified as Level 3, are discussed further in Section 22.6 Long-term Floating Rate Notes.

### **16.1.1 Carrying Value and Fair Value of Financial Instruments**

The carrying values of financial instruments equal or approximate their fair values with the exception of long-term debt which has a carrying value of \$4,314.9 million at December 31, 2010 (December 31, 2009 \$4,743.5 million) and a fair value of approximately \$4,773.0 million at December 31, 2010 (December 31, 2009 \$5,029.4 million). The fair value of publicly traded long-term debt is determined based on market prices at December 31, 2010 and December 31, 2009, respectively.

### **16.2 DERIVATIVE FINANCIAL INSTRUMENTS**

Our policy with respect to using derivative financial instruments is to selectively reduce volatility associated with fluctuations in interest rates, FX rates, the price of fuel and stock-based compensation expense. Where derivatives are designated as hedging instruments, we document the relationship between the hedging instruments and their associated hedged items, as well as the risk management objective and strategy for the use of the hedging instruments. This documentation includes linking the derivatives that are designated as fair value or cash flow hedges to specific assets or liabilities on our Consolidated Balance Sheet, commitments or forecasted transactions. At the time a derivative contract is entered into, and at least quarterly, we assess whether the derivative item is effective in offsetting the changes in fair value or cash flows of the hedged items. The derivative qualifies for hedge accounting treatment if it is effective in substantially mitigating the risk it was designed to address.

It is not our intent to use financial derivatives or commodity instruments for trading or speculative purposes.

### **16.3 CREDIT RISK**

We are exposed to counterparty credit risk in the event of non-performance by counterparties. In order to mitigate this risk, limits are set by our Board of Directors for counterparty transactions and we conduct regular monitoring of the credit standing of the counterparties or their guarantors. We do not anticipate any losses with respect to counterparty credit risk.

### **16.4 INTEREST RATE MANAGEMENT**

The Company is exposed to interest rate risk, which is the risk that the fair value or future cash flows of a financial instrument will vary as a result of changes in market interest rates. In order to manage funding needs or capital structure goals, the Company enters into debt or capital lease agreements that are subject to either fixed market interest rates set at the time of issue or floating rates determined by on-going market conditions. Debt subject to variable interest rates exposes the Company to variability in interest expense, while debt subject to fixed interest rates exposes the Company to variability in the fair value of debt.

To manage interest rate exposure, the Company accesses diverse sources of financing and manages borrowings in line with a targeted range of capital structure, debt ratings, liquidity needs, maturity schedule, and currency and interest rate profiles. In anticipation of future debt issuance, the Company may enter into forward rate agreements such as treasury rate locks, bond forwards or forward starting swaps, designated as cash flow hedges, to substantially lock in all or a portion of the effective future interest expense. The Company may also enter into swap agreements to manage the mix of fixed and floating rate debt. The Company does not currently hold any derivative financial instruments to manage its interest rate risk.

#### **16.4.1 Interest Rate Swaps**

During 2010, the Company entered into interest rate swaps, which are accounted for as fair value hedges, for a notional amount of US\$101.4 million. The swap agreements converted the Company's outstanding fixed interest rate liability into a variable rate liability for its 5.75% Notes due in May 2013. Subsequently in 2010, these swap agreements were unwound for a gain of \$2.9 million of which \$0.6 million was recognized in the year as a reduction to Net interest expense. The gain was deferred as a fair value adjustment to the underlying debt that was hedged and will be amortized to Net interest expense until the time the 5.75% Notes are repaid. At December 31, 2010 and December 31, 2009, the Company had no outstanding interest rate swaps.

During 2009, CP unwound its outstanding fixed-to-floating interest rate swap, which converted a portion of its US\$400 million 6.250% Notes to floating-rate debt, for a gain of \$16.8 million. The gain was deferred as a fair value adjustment to the underlying debt that was hedged and will be amortized to Net interest expense until such time the 6.250% Notes are repaid. Subsequently in 2009, CP repurchased a portion of the underlying debt as part of a tender offer and recognized \$6.5 million of the deferred gain in Other income and charges offsetting part of the recognized loss on repurchase of debt.

The impact of the above noted settled interest rate swaps reduced Net interest expense in 2010 by \$3.5 million (2009 \$5.5 million).

#### **16.4.2 Treasury Rate Locks**

At December 31, 2010, the Company had net unamortized losses related to interest rate locks, which are accounted for as cash flow hedges, settled in previous years totalling \$22.1 million (December 31, 2009 \$23.9 million). This amount is composed of various unamortized gains and losses related to specific debts which are reflected in

Accumulated other comprehensive loss and are amortized to Net interest expense in the period that interest on the related debt is charged. The amortization of these gains and losses resulted in an increase in Net interest expense and Other comprehensive income of \$1.8 million in 2010 (2009 \$3.5 million).

## **16.5 FOREIGN EXCHANGE MANAGEMENT**

The Company is exposed to fluctuations of financial commitments, assets, liabilities, income or cash flows due to changes in FX rates. The Company conducts business transactions and owns assets in both Canada and the U.S., as a result, revenues and expenses are incurred in both Canadian and U.S. dollars. We enter into FX risk management transactions primarily to manage fluctuations in the exchange rate between Canadian and U.S. currencies. In terms of income, excluding FX on LTD, mitigation of U.S. dollar FX exposure is provided primarily through offsets created by revenues and expenses incurred in the same currency. Where appropriate, the Company negotiates with customers and suppliers to reduce the net exposure.

The FX gains and losses on long-term debt are mainly unrealized and can only be realized when U.S. dollar denominated long-term debt matures or is settled. The Company also has long-term FX exposure on its investment in U.S. affiliates. The majority of the Company's U.S. dollar-denominated long-term debt has been designated as a hedge of the net investment in foreign subsidiaries. This designation has the effect of mitigating volatility on net income by offsetting long-term FX gains and losses on long-term debt. In addition, the Company may enter into FX forward contracts to lock-in the amount of Canadian dollars it has to pay on its U.S. denominated debt maturities.

Occasionally the Company will enter into short-term FX forward contracts as part of its cash management strategy.

### **16.5.1 Foreign Exchange Forward Contracts on Long-term Debt**

In 2007, the Company entered into a FX forward contract to fix the exchange rate on US\$400 million 6.250% Notes due 2011. This derivative guaranteed the amount of Canadian dollars that the Company will repay when its US\$400 million 6.250% Notes mature in October 2011. This derivative was not designated as a hedge and changes in fair value were recognized in net income in the period in which the change occurred. During 2009, CP unwound and settled US\$330 million of the US\$400 million currency forward for total proceeds of \$34.1 million. During 2010, CP unwound the remaining

US\$70 million for total proceeds of \$0.2 million. During 2010, no gain or loss was reported on this derivative. During 2009, a net loss of \$23.0 million, inclusive of both realized and unrealized losses, was recorded to Other income and charges .

During 2010, the Company entered into FX forward contracts to fix the exchange rate on US\$50.0 million of its 5.75% Notes due in May 2013 and US\$75.0 million of its 6.50% Notes due in May 2018. These derivatives, which are accounted for as cash flow hedges, guarantee the amount of Canadian dollars that the Company will repay when these Notes mature. During 2010, the Company recorded an unrealized FX loss on long-term debt of \$0.5 million in Other income and charges and \$1.1 million in Other comprehensive loss in relation to these derivatives. At December 31, 2010, the unrealized loss derived from these FX forwards was \$1.6 million which was included in Other long-term liabilities with the offset, net of tax, reflected in Accumulated other comprehensive loss and Retained earnings on our Consolidated Balance Sheet.

## **16.6 FUEL PRICE MANAGEMENT**

The Company is exposed to commodity risk related to purchases of diesel fuel and the potential reduction in net income due to increases in the price of diesel. Fuel expense constitutes a large portion of the Company's operating costs and volatility in diesel fuel prices can have a significant impact on the Company's income. Items affecting volatility in diesel prices include, but are not limited to, fluctuations in world markets for crude oil and distillate fuels which can be affected by supply disruptions and geopolitical events.

The impact of variable fuel expense is mitigated substantially through fuel cost recovery programs which apportion incremental changes in fuel prices to shippers through price indices, tariffs, and by contract, within agreed upon guidelines. While these programs provide effective and meaningful coverage, residual exposure remains as the fuel expense risk cannot be completely recovered from shippers due to timing and volatility in the market. The Company continually monitors residual exposure, and where appropriate, may enter into derivative instruments.

Derivative instruments used by the Company to manage fuel expense risk may include, but are not limited to, swaps and options for crude oil, diesel and crack spreads. In addition, the Company may combine FX forward contracts with fuel derivatives to effectively hedge the risk associated with FX variability on fuel purchases and commodity hedges.

### **16.6.1 Energy Futures**

At December 31, 2010, the Company had diesel futures contracts, which are accounted for as cash flow hedges, to purchase 14.2 million U.S. gallons during the period January 2011 to December 2011 at an average price of US\$2.29 per U.S. gallon. This represents approximately 5% of estimated fuel purchases for this period. At December 31, 2010, the unrealized gain on these futures contracts was \$4.1 million (December 31, 2009 \$2.5 million) and was reflected in Other current assets with the offset, net of tax, reflected in Accumulated other comprehensive loss on the Consolidated Balance Sheet.

The impact of settled commodity swaps decreased Fuel expense in 2010 by \$2.5 million as a result of realized gains on diesel swaps. The net impact of settled swaps increased Fuel expense in 2009 by \$1.2 million due to a combination of realized losses of \$0.8 million arising from settled commodity swaps and \$0.4 million arising from settled FX forward contracts. Included in the \$0.8 million realized losses on commodity swaps in 2009 were \$0.2 million in realized gains from settled derivatives that were not designated as hedges.

## **16.7 STOCK-BASED COMPENSATION EXPENSE MANAGEMENT**

### **16.7.1 Total Return Swap**

The Company is exposed to stock-based compensation risk, which is the probability of increased compensation expense due to the increase in the Company's share price.

The Company's compensation expense is subject to volatility due to the movement of CP's share price and its impact on the value of certain management and director stock-based compensation programs. These programs, as described in the management proxy circular, include tandem share appreciation rights (TSARs), deferred share units (DSUs), restricted share units (RSUs), and performance share units (PSUs). These instruments create increased compensation expense when market prices of CP shares increases.

The Company entered into a TRS in May 2006 to reduce the volatility to the Company, over time, of three types of stock-based compensation programs: TSARs, DSUs and RSUs. The TRS is a derivative that provides price appreciation and dividends, in return for a charge by the counterparty. The swaps were intended to minimize volatility to Compensation and benefits expense by providing a gain to substantially offset increased compensation expense as the share price increases and a loss to offset reduced compensation expense when the share price falls. If stock-based compensation share units fall out of the money after entering the program, the loss associated with the swap would no longer be offset by any compensation expense reductions, which would reduce the effectiveness of the swap. Over time it is CP's intention to reduce the size of the TRS program and has unwound portions of the program in 2010 and 2009.

Compensation and benefits expense on the Company's Consolidated Statement of Income included a net gain on these swaps of \$12.0 million in 2010 which was inclusive of both realized and unrealized gains (2009 \$18.6 million). During 2009, in order to improve the effectiveness of the TRS in mitigating the volatility of stock-based compensation programs, CP unwound and settled a portion of the program for a total cost of \$31.1 million. This cost had previously been recognized in Compensation and benefits expense. During 2010, the Company unwound and settled a further portion of the program for a total cost of \$0.2 million. At December 31, 2010, the unrealized loss on the remaining TRS of \$6.0 million (December 31, 2009 \$18.2 million) was included in Accounts payable and accrued liabilities on our Consolidated Balance Sheet.

## **17.0 Off-Balance Sheet Arrangements**

### **17.1 SALE OF ACCOUNTS RECEIVABLE**

During the second quarter of 2008, our accounts receivable securitization program was terminated and settled. Losses on the securitization program of \$2.7 million in 2008 were included in Other income and charges on our Consolidated Statement of Income. Proceeds from collections reinvested in the accounts receivable securitization program were \$595.4 million for the year ended 2008.

### **17.2 GUARANTEES**

At December 31, 2010, the Company had residual value guarantees on operating lease commitments of \$162.5 million. The maximum amount that could be payable under these and all of the Company's other guarantees cannot be reasonably estimated due to the nature of certain of the guarantees. All or a portion of amounts paid under certain guarantees could be recoverable from other parties or through insurance. The Company has accrued for all guarantees that it expects to pay. As at December 31, 2010, these accruals amounted to \$5.4 million (December 31, 2009 \$9.3 million).

## **18.0 Acquisition**

### **18.1 DAKOTA, MINNESOTA & EASTERN RAILROAD CORPORATION**

Effective October 4, 2007, the Company acquired all of the issued and outstanding shares of DM&E, a Class II railroad operating in the U.S. Midwest, for a purchase price of approximately US\$1.5 billion. DM&E's freight revenues are derived principally from transporting grain, industrial products and coal. DM&E has the option, but not the obligation, to construct a railway line into the Powder River Basin ( PRB ) located in Wyoming, the largest thermal coal producing region in the U.S. No decision will be made by the Corporation on whether to construct a railway line into the PRB until certain milestones have been met. Future contingent payments of up to approximately US\$1.1 billion, plus certain interest and inflationary adjustments may become payable up to December 31, 2025 upon the achievement of certain milestones towards the completion of a track expansion into the PRB and the achievement of certain associated traffic volume targets. Any contingent payments that may become payable would be recorded as an increase in the purchase price.

The purchase was subject to review and approval by the STB, during which time the shares of DM&E were placed in a voting trust. The STB approved the application to acquire control effective October 30, 2008. Prior to October 30, 2008, CP's investment in the DM&E had not been accounted for by CP on a consolidated basis and instead the investment in the DM&E was accounted for as an equity investment and reported as Equity income in Dakota, Minnesota & Eastern Railroad Corporation on the Consolidated Statement of Income.

## **19.0 Contractual Commitments**

The accompanying table indicates our obligations and commitments to make future payments for contracts, such as debt, capital lease and commercial arrangements.

### **CONTRACTUAL COMMITMENTS**

Payments due by period (in millions)	Total	2011	2012 & 2013	2014 & 2015	2016 & beyond
Long-term debt	\$ 4,033.0	\$ 273.2	\$ 179.4	\$ 160.7	\$ 3,419.7
Capital lease obligations	289.8	8.5	17.5	133.3	130.5
Operating lease obligation <sup>(1)</sup>	782.1	133.3	226.4	145.6	276.8
Supplier purchased obligations	1,541.1	206.8	261.1	297.4	775.8
Other long-term liabilities reflected on our Consolidated Balance Sheet <sup>(2)</sup>	762.8	93.5	155.7	137.6	376.0
<b>Total contractual obligations</b>	<b>\$ 7,408.8</b>	<b>\$ 715.3</b>	<b>\$ 840.1</b>	<b>\$ 874.6</b>	<b>\$ 4,978.8</b>

<sup>(1)</sup> Residual value guarantees on certain leased equipment with a maximum exposure of \$162.5 million (discussed further in Section 17.2 Guarantees) are not included in the minimum payments shown above, as management believes that we will not be required to make payments under these residual guarantees.

<sup>(2)</sup> Includes expected cash payments for restructuring, environmental remediation, asset retirement obligations, post-retirement benefits, workers' compensation benefits, long-term disability benefits, pension benefit payments for our non-registered supplemental pension plans, deferred income tax liabilities and certain other long-term liabilities. Projected payments for post-retirement benefits, workers' compensation benefits and long-term disability benefits include the anticipated payments for years 2010 to 2019. Pension contributions for our registered pension plans are not included due to the volatility in calculating them. Pension payments are discussed further in Section 20.5 Pension Plan Deficit. Deferred income tax liabilities may vary according to changes in tax rates, tax regulations and the operating results of the Company. As the cash impact in any particular year cannot be reasonably determined, all long-term deferred tax liabilities have been reflected in the 2016 & beyond category in this table. Deferred income taxes are further discussed in Section 22.4 Deferred Income Taxes.

## **20.0 Future Trends and Commitments**

### **20.1 AGREEMENTS AND RECENT DEVELOPMENTS**

#### **20.1.1 Teck Coal Limited**

On October 6, 2010, CP reached a ten-year agreement with Teck our largest customer, for the transportation of metallurgical coal from their five CP-served mines in southeast British Columbia to Vancouver area ports for export. Contract terms are confidential. The contract commences April 1, 2011.

The agreement reflects the companies' commitment to work together to achieve growth in the volume of coal shipped through a range of economic and marketplace dynamics and provides for flexibility over the long term. The agreement provides for investments by CP that enhance coal handling capacity to provide for Teck's volume growth.

#### **20.1.2 Change in Executive Officer**

On April 6, 2010 Edmond (Ed) Harris was appointed to the position of Executive Vice-President and Chief Operations Officer of Canadian Pacific. Mr. Harris reports to the President and Chief Executive Officer, Fred Green. His responsibilities include all aspects of railway operations, safety, customer service, engineering and mechanical services in both Canada and the U.S.

Effective April 1, 2011, Mr. Harris will be retiring and Mr. Michael Franczak will be appointed Executive Vice-President Operations. Mr. Franczak will report to the President and Chief Executive Officer, Fred Green, and will assume responsibility for operations activity across Canadian Pacific's North American network.

### **20.2 STOCK PRICE**

The market value of our Common Shares measured at December 31, 2010 increased by \$7.83 per share on the Toronto Stock Exchange in 2010 (from \$56.79 on December 31, 2009 to \$64.62 on December 31, 2010). The market value of our Common Shares increased by \$15.81 per share in 2009 (from \$40.98 on December 31, 2008 to \$56.79 on December 31, 2009).

### **20.3 ENVIRONMENTAL**

Cash payments related to our environmental remediation program (described in Section 22.1 Environmental Liabilities) totalled \$13.2 million in 2010, compared with \$18.2 million in 2009 and \$12.6 million in 2008. Cash payments for environmental initiatives are estimated to be approximately \$16 million in 2011, \$16 million in 2012, \$12 million in 2013 and a total of approximately \$63 million over the remaining years through 2020, which will be paid in decreasing amounts. All payments will be funded from general operations.

We continue to be responsible for remediation work on portions of a property in the State of Minnesota and continue to retain liability accruals for remaining future expected costs. The costs are expected to be incurred over approximately 10 years. The state's voluntary investigation and remediation program will oversee the work to ensure it is completed in accordance with applicable standards.

### **20.4 CERTAIN OTHER FINANCIAL COMMITMENTS**

In addition to the financial commitments mentioned previously in Section 17.0 Off-Balance Sheet Arrangements and Section 19.0 Contractual Commitments, we are party to certain other financial commitments discussed below.

### **CERTAIN OTHER FINANCIAL COMMITMENTS AT DECEMBER 31, 2010**

(in millions)	Total	Amount of commitment per period			
		2011	2012 & 2013	2014 & 2015	2016 & beyond
Letters of credit	\$ 358.1	\$ 357.3	\$ 0.8	\$	\$
Capital commitments	236.8	216.0	19.9	0.1	0.8
<b>Total commitments</b>	<b>\$ 594.9</b>	<b>\$ 573.3</b>	<b>\$ 20.7</b>	<b>\$ 0.1</b>	<b>\$ 0.8</b>

#### **20.4.1 Letters of Credit**

Letters of credit are obtained mainly to provide security to third parties as part of various agreements, such as required by our workers' compensation and pension fund requirements. We are liable for these contractual amounts in the case of non-performance under these agreements. As a result, our available line of credit is adjusted for contractual amounts obtained through letters of credit currently included within our revolving credit facility.

#### **20.4.2 Capital Commitments**

We remain committed to maintaining our current high level of plant quality and renewing our franchise. As part of this commitment, we have entered contracts with suppliers to make various capital purchases related to track programs. Payments for these commitments are due in 2011 through 2028. These expenditures are expected to be financed by cash generated from operations or by issuing new debt.

#### **20.5 PENSION PLAN DEFICIT**

We estimate that every 1.0 percentage point increase (or decrease) in the discount rate attributable to changes in long Government of Canada bond yields can cause our defined benefit pension plans' deficit to decrease (or increase) by approximately \$600 million, reflecting the changes to both the pension obligations and the value of the pension funds' debt securities. Similarly, for every 1.0 percentage point the actual return on assets varies above (or below) the estimated return for the year, the deficit would decrease (or increase) by approximately \$85 million. Adverse experience with respect to these factors could eventually increase funding and pension expense significantly, while favourable experience with

respect to these factors could eventually decrease funding and pension expense significantly.

The plans' investment policies provide for between 45% and 51% of the plans' assets to be invested in public equity securities. As a result, stock market performance is the key driver in determining the pension funds' asset performance. Most of the plans' remaining assets are invested in debt securities which, as mentioned above, provide a partial offset to the increase (or decrease) in our pension deficit caused by decreases (or increases) in the discount rate.

The deficit will fluctuate according to future market conditions and funding will be revised as necessary to reflect such fluctuations. We will continue to make contributions to the pension plans that, at a minimum, meet pension legislative requirements.

We made contributions of \$837.2 million to the defined benefit pension plans in 2010, compared with \$595.2 million in 2009. Our 2010 contributions included a voluntary prepayment in September 2010 of \$650 million to our main Canadian defined benefit pension plan. Our 2009 contributions included voluntary prepayments in December 2009 of \$500 million to our main Canadian plan and \$7.4 million to our U.S. plans. We have significant flexibility with respect to the rate at which we apply these voluntary prepayments to reduce future years' pension contribution requirements, which allows us to manage the volatility of future pension funding requirements.

We estimate our aggregate pension contributions to be in the range of \$100 million to \$125 million in 2011, and in the range of \$125 million to \$175 million in each of the subsequent four years. These estimates reflect our current intentions with respect to the rate at which we will apply the December 2009 and September 2010 voluntary prepayments against contribution requirements in 2011 and the subsequent four years.

Future pension contributions will be highly dependent on our actual experience with such variables as investment returns, interest rate fluctuations and demographic changes, on the rate at which the December 2009 and September 2010 voluntary prepayments are applied against pension contribution requirements, and on any changes in the regulatory environment.

## **20.6 RESTRUCTURING**

Cash payments related to severance under all restructuring initiatives totalled \$20.3 million in 2010, compared with \$27.0 million in 2009 and \$40.7 million in 2008. Cash payments for restructuring initiatives are estimated to be approximately \$28 million in 2011, \$14 million in 2012, \$11 million in 2013, and a total of approximately \$27 million over the remaining years through 2025. These amounts include residual payments to protected employees for previous restructuring plans that have been completed.

## **21.0 Business Risks and Enterprise Risk Management**

In the normal course of our operations, we are exposed to various business risks and uncertainties that can have an effect on our financial condition. While some financial exposures are reduced through insurance and hedging programs we have in place, there are certain cases where the financial risks are not fully insurable or are driven by external factors beyond our influence or control.

As part of the preservation and delivery of value to our shareholders, we have developed an integrated Enterprise Risk Management (ERM) framework to support consistent achievement of key business objectives through pro-active management of risk. The objective of the program is to identify events that result from risks, thereby requiring active management. Each event identified is assessed based on the potential impact and likelihood, taking account of financial, environmental, reputational impacts, and existing management control. Risk mitigation strategies are formulated to accept, treat, transfer, or eliminate the exposure to the identified events. Readers are cautioned that the

following is not an exhaustive list of all the risks we are exposed to, nor will our mitigation strategies eliminate all risks listed.

## 21.1 COMPETITION

We face significant competition for freight transportation in Canada and the U.S., including competition from other railways and trucking and barge companies. Competition is based mainly on price, quality of service and access to markets. Competition with the trucking industry is generally based on freight rates, flexibility of service and transit time performance. The cost structure and service of our competitors could impact our competitiveness and have a materially adverse impact on our business or operating results.

To mitigate competition risk, our strategies include:

- o creating long-term value for customers, shareholders and employees by profitably growing within the reach of our rail franchise and through strategic additions to enhance access to markets and quality of service;
- o renewing and maintaining infrastructure to enable safe and fluid operations;
- o improving handling through IOP to reduce costs and enhance quality and reliability of service; and
- o exercising a disciplined yield approach to competitive contract renewals and bids.

## 21.2 LIQUIDITY

CP has in place a revolving credit facility of \$945 million, with an accordion feature to \$1,150 million, of which \$358 million was committed for letters of credit and \$587 million was available on December 31, 2010. This facility is arranged with a core group of 15 highly rated international financial institutions and incorporates pre-agreed pricing. Arrangements with 14 of the 15 financial institutions extend through November 2012, with one institution extending through November 2011. In addition, CP also has available from a financial institution a credit facility of \$118 million, of which \$118 million of this facility was available on December 31, 2010 and is available through the end of 2011. Both facilities are available on next day terms and are subject to a minimum debt to total capitalization ratio. Should our senior unsecured debt not be rated at least investment grade by Moody's and S&P, we will be further required to maintain a minimum fixed charge coverage ratio. At December 31, 2010, the Company satisfied the thresholds stipulated in both financial covenants.

It is CP's intention to manage its long-term financing structure to maintain its investment grade rating.

Surplus cash is invested into a range of short dated money market instruments meeting or exceeding the parameters of our investment policy.

## **21.3 REGULATORY AUTHORITIES**

### **21.3.1 Regulatory Change**

Our railway operations are subject to extensive federal laws, regulations and rules in both Canada and the U.S. which directly affect how we manage many aspects of our railway operation and business activities. Our operations are primarily regulated by the Canadian Transportation Agency (the Agency) and Transport Canada in Canada and the FRA and the STB in the U.S. Various other federal regulators directly and indirectly affect our operations in areas such as health, safety, security and environmental and other matters.

The Canada Transportation Act (CTA) provides shipper rate and service remedies, including Final Offer Arbitration (FOA), competitive line rates and compulsory inter-switching in Canada. The CTA regulates the grain revenue cap, commuter and passenger access, FOA, and charges for ancillary services and railway noise. No assurance can be given to the content, timing or effect on CP of any anticipated additional legislation or future legislative action.

For the grain crop year beginning August 1, 2010 the Agency announced a 7% increase in the Volume-Related Composite Price Index (VRCPI), a cost inflator used in calculating the grain maximum revenue entitlement for CP and Canadian National Railway. Grain revenues are impacted by several factors including volumes and VRCPI, additional factors are discussed in Section 21.8 General and Other Risks.

Transport Canada regulates safety-related aspects of our railway operations in Canada. On June 4, 2010, Bill C-33 was introduced in the House of Commons. The Bill is an Act to amend the Railway Safety Act and to make consequential amendments to the Canada Transportation Act. Bill C-33 is currently moving through the Parliamentary process and could become law in 2011. No assurance can be given as to the effect on CP of the proposed amendments contained in Bill C-33.

On August 12, 2008 the Minister of Transport, Infrastructure and Communities announced the Terms of Reference for the Rail Freight Service Review (RFSR). The review is focused on understanding the nature and extent of problems and best practices within the logistics chain, with a focus on railway performance in Canada. The interim RFSR report was issued on October 8, 2010. CP has provided submissions to the panel based on the results contained in the interim report. The final report is expected to be released in early 2011.

The FRA regulates safety-related aspects of our railway operations in the U.S. State and local regulatory agencies may also exercise limited jurisdiction over certain safety and operational matters of local significance. The Railway Safety Improvement Act requires, among other things the introduction of Positive Train Control by the end of 2015 (discussed further in Section 21.3.3 Positive Train Control); limits freight rail crews' duty time; and requires development of a crew fatigue management plan. The requirements imposed by this legislation could have an adverse impact on the Company's financial condition and results of operations.

The STB regulates commercial aspects of CP's railway operations in the U.S. The STB is an economic regulatory agency that Congress charged with the fundamental mandate of resolving railroad rate and service disputes and reviewing proposed railroad mergers. The STB serves as both an adjudicatory and a regulatory body.

The STB revised rules relating to railway rate cases to address, among other things, concerns raised by small and medium sized shippers that the previous rules resulted in costly and lengthy proceedings. Few cases have been filed, and no case has been filed against the Company, under the new rules. It is too soon to assess the possible impact on CP of such new rules.

The STB has scheduled a hearing to review existing exemptions from railroad-transportation regulations for certain commodities, boxcar and intermodal freight and a hearing on rail competition. The industry and CP will participate.

The Chairman and Ranking Republican on the Senate Commerce Committee reintroduced the Surface Transportation Board Reauthorization Act which was the subject of discussions with shippers and the rail industry during the last Congress.

It is too soon to know whether the hearings or the reintroduced Surface Transportation Board Reauthorization Act will result in further proceedings and regulatory changes.

The railroad industry in the U.S., shippers and representatives of the Senate Commerce Committee met to discuss possible changes to the legislation which governs the STB's mandate. The Senate Commerce Committee produced a draft Bill. To date, the House of Representatives has not produced a related Bill. It is too soon to determine if any Bill at all will be enacted, or if in the event any such Bill is enacted, whether it would have a material impact on the Company's financial condition and results of operations.

To mitigate statutory and regulatory impacts, we are actively and extensively engaged throughout the different levels of government and regulators, both directly and indirectly through industry associations, including the Association of American Railroads ( AAR ) and the Railway Association of Canada ( RAC ).

### **21.3.2 Security**

We are subject to statutory and regulatory directives in Canada and the U.S. that address security concerns. CP plays a critical role in the North American transportation system. Our rail lines, facilities, and equipment, including rail cars carrying hazardous materials, could be direct targets or indirect casualties of terrorist attacks. Regulations by the Department of Transportation and the Department of Homeland Security in the U.S. include speed restrictions, chain of custody and security measures which could cause service degradation and higher costs for the transportation of hazardous materials, especially toxic inhalation materials. New legislative changes in Canada to the Transportation of Dangerous Goods Act are expected to add new security regulatory requirements. In addition, insurance premiums for some or all of our current coverage

could increase significantly, or certain coverage may not be available to us in the future. While CP will continue to work closely with Canadian and U.S. government agencies, future decisions by these agencies on security matters or decisions by the industry in response to security threats to the North American rail network could have a materially adverse effect on our business or operating results.

As we strive to ensure our customers have unlimited access to North American markets, we have taken the following steps to provide enhanced security and reduce the risks associated with the cross-border transportation of goods:

- o to strengthen the overall supply chain and border security, we are a certified carrier in voluntary security programs, such as the Customs-Trade Partnership Against Terrorism and Partners in Protection;
- o to streamline clearances at the border, we have implemented several regulatory security frameworks that focus on the provision of advanced electronic cargo information and improved security technology at border crossings, including the implementation of the Vehicle and Cargo Inspection System at five of our border crossings;
- o to strengthen railway security in North America, we signed a revised voluntary Memorandum of Understanding with Transport Canada and worked with the AAR to develop and put in place an extensive industry-wide security plan to address terrorism and security-driven efforts seeking to restrict the routings and operational handlings of certain hazardous materials;
- o to reduce toxic inhalation risk in high threat urban areas, we are working with the Transportation Security Administration; and
- o to comply with new U.S. regulations for rail security sensitive materials, we have implemented procedures to maintain positive chain of custody and are performing annual route assessments to select and use the route posing the least overall safety and security risk.

### **21.3.3 Positive Train Control**

In the U.S., the Rail Safety Improvement Act requires Class I railroads to implement by December 31, 2015, interoperable Positive Train Control ( PTC ) on main track in the U.S. that has passenger rail traffic or toxic inhalant hazard commodity traffic. The legislation defines PTC as a system designed to prevent train-to-train collisions, over-speed derailments, incursions into established work zone limits, and the movement of a train through a switch left in the wrong position. The FRA has issued rules and regulations for the implementation of PTC, and CP filed its PTC Implementation Plans in April 2010, which outlined the Company's solution for interoperability as well as its consideration of relative risk in the deployment plan. The Company is participating in industry and government working groups to evaluate the scope of effort that will be required to comply with these regulatory requirements, and to further the development of an industry standard interoperable solution that can be supplied in time to complete deployment. At this time CP estimates the cost to implement PTC as required for railway operations in the U.S. to be up to US\$250 million. As at December 31, 2010, total expenditures related to PTC are approximately \$14 million.

### **21.4 LABOUR RELATIONS**

Certain of our union agreements are currently under renegotiation. We cannot guarantee these negotiations will be resolved in a timely manner or on favourable terms. Work stoppage may occur if the negotiations are not resolved, which could materially impact business or operating results.

At December 31, 2010, approximately 79% of our workforce was unionized and approximately 75% of our workforce was located in Canada. Unionized employees are represented by a total of 39 bargaining units. Agreements are in

place with six of seven bargaining units that represent our employees in Canada and 15 of 32 bargaining units that represent employees in our U.S. operations.

#### **21.4.1 Canada**

We are party to collective agreements with seven bargaining units in our Canadian operations. Currently, collective agreements are in effect with six of the seven bargaining units. On February 5, 2011, CP and the CAW announced that a tentative contract settlement was reached; the Memorandum of Settlement was sent to the union membership for ratification. The agreement was ratified by the CAW membership on February 24, 2011. The renewal collective agreement is four years in duration, extending to the end of 2014. Of the six agreements that are in place, two expire at the end of 2011 (Teamsters Canada Rail Conference ( TCRC ) representing running trades employees and the TCRC-Rail Canada Traffic Controllers representing rail traffic controllers). The four agreements that expire at the end of 2012 are Canadian Pacific Police Association, United Steelworkers representing clerical workers, TCRC-Maintenance of Way Employees Division representing track maintenance employees and the International Brotherhood of Electrical Workers representing signals employees.

#### **21.4.2 U.S.**

We are party to collective agreements with fourteen bargaining units of our Soo Line subsidiary, thirteen bargaining units of our D&H subsidiary, and two bargaining units of our DM&E subsidiary, and have commenced first contract negotiations with a bargaining unit certified to represent DM&E signal and communications workers, a bargaining unit to represent track maintainers and a bargaining unit to represent mechanics.

Soo Line agreements with all fourteen bargaining units representing train service employees, car repair employees, locomotive engineers, train dispatchers, yard supervisors, clerks, machinists, boilermakers and blacksmiths, signal maintainers, electricians, sheet metal workers, mechanical labourers, track maintainers, and mechanical supervisors opened for negotiation in January 2010. Soo Line has joined with the other U.S. Class I railroads in national bargaining for this upcoming round of negotiations.

D&H has settled contracts for the last round of negotiations with all thirteen bargaining units, including locomotive engineers, train service employees, car repair employees, signal maintainers, yardmasters, electricians, machinists, mechanical labourers, track maintainers, clerks, police, engineering supervisors and mechanical supervisors. For the 2010 round of negotiations, D&H and its unions

have committed to stand by the outcome of wage, benefits, and rules negotiations at the national table.

DM&E currently has an agreement in place with two bargaining units that extend to the end of 2013 and cover all DM&E engineers and conductors. Negotiations on the first contract to cover signal and communications workers, track maintainers and mechanics continue in the first quarter of 2011.

## **21.5 ENVIRONMENTAL LAWS AND REGULATIONS**

Our operations and real estate assets are subject to extensive federal, provincial, state and local environmental laws and regulations governing emissions to the air, discharges to waters and the handling, storage, transportation and disposal of waste and other materials. If we are found to have violated such laws or regulations it could materially affect our business or operating results. In addition, in operating a railway, it is possible that releases of hazardous materials during derailments or other accidents may occur that could cause harm to human health or to the environment. Costs of remediation, damages and changes in regulations could materially affect our operating results and reputation.

We have implemented a comprehensive Environmental Management System, to facilitate the reduction of environmental risk. CP's annual Corporate and Operations Environmental Plans state our current environmental goals, objectives and strategies.

Specific environmental programs are in place to address areas such as air emissions, wastewater, management of vegetation, chemicals and waste, storage tanks and fuelling facilities. We also undertake environmental impact assessments. There is continued focus on preventing spills and other incidents that have a negative impact on the environment. There is an established Strategic Emergency Response Contractor network and spill equipment kits located across Canada and the U.S. to ensure a rapid and efficient response in the event of an environmental incident. In addition, emergency preparedness and response plans are regularly updated and tested.

We have developed an environmental audit program that comprehensively, systematically and regularly assesses our facilities for compliance with legal requirements and our policies for conformance to accepted industry standards. Included in this is a corrective action follow-up process and semi-annual review by the Health, Safety, Security and Environment Committee established by the Board of Directors.

We focus on key strategies, identifying tactics and actions to support commitments to the community. Our strategies include:

- o protecting the environment;
- o ensuring compliance with applicable environmental laws and regulations;
- o promoting awareness and training;
- o managing emergencies through preparedness; and
- o encouraging involvement, consultation and dialogue with communities along our lines.

## **21.6 CLIMATE CHANGE**

In both Canada and the U.S. the federal governments have not designated railway transportation as a large final emitter with respect to greenhouse gas ( GHG ) emissions. The railway transportation industry is currently not

regulated with respect to GHG emissions, nor do we operate under a regulated cap of GHG emissions. Growing support for climate change legislation is likely to result in changes to the regulatory framework in Canada and the U.S. However, the timing and specific nature of those changes are difficult to predict. Specific instruments such as carbon taxes, and technical and fuel standards have the ability to significantly affect the Company's capital and operating costs. Restrictions, caps and/or taxes on the emissions of GHG could also affect the markets for, or the volume of, the goods the Company transports.

The fuel efficiency of railways creates a significant advantage over trucking, which currently handles a majority of the market share of ground transportation. Although trains are already three times more fuel efficient than trucks on a per ton-mile basis, we continue to adopt new technologies to minimize our fuel consumption and GHG emissions.

Potential physical risks associated with climate change include damage to railway infrastructure due to extreme weather effects, (i.e. increased flooding, winter storms). Improvements to infrastructure design and planning are used to mitigate the potential risks posed by weather events. The Company maintains flood plans, winter operating plans, an avalanche risk management program and geotechnical monitoring of slope stability.

## **21.7 FINANCIAL RISKS**

### **21.7.1 Pension Funding Status Volatility**

Our main Canadian defined benefit pension plan accounts for 97% of CP's pension obligation and can produce significant volatility in pension funding requirements, given the pension fund's size, the many factors that drive the pension plan's funded status, and Canadian statutory pension funding requirements. Over the last several years, CP has made several changes to the plan's investment policy to reduce this volatility, including the reduction of the plan's public equity markets exposure. In addition, CP has made voluntary prepayments to our main Canadian defined benefit pension plan of \$650 million in September 2010 and \$500 million in December 2009 which will reduce pension funding volatility, since we have significant flexibility with respect to the rate at which we apply these voluntary prepayments to reduce future years' pension funding requirements.

### **21.7.2 Fuel Cost Volatility**

Fuel expense constitutes a significant portion of CP's operating costs and can be influenced by a number of factors, including, without limitation, worldwide oil demand, international politics, weather, refinery capacity, unplanned infrastructure failures, labour and political instability and the ability of certain countries to comply with agreed-upon production quotas.

Our mitigation strategy includes a fuel cost recovery program and from time to time derivative instruments (specific instruments

currently used are discussed further in Section 16.6 Fuel Price Management). The fuel cost recovery program reflects changes in fuel costs, which are included in freight rates. Freight rates will increase when fuel prices rise and will decrease when fuel costs decrease. While fluctuations in fuel cost are mitigated, the risk cannot be completely eliminated due to timing and the volatility in the market.

To address the residual portion of our fuel costs not mitigated by our fuel recovery programs, CP has a systematic hedge program with the goal to have hedged at any point in time 5-7% of CP's next 12 months' fuel consumption. Using this approach up to 12% of the previous twelve month period's unmitigated fuel consumption will have been hedged.

### **21.7.3 Foreign Exchange Risk**

Although we conduct our business primarily in Canada, a significant portion of our revenues, expenses, assets and liabilities including debt are denominated in U.S. dollars. Consequently, our results are affected by fluctuations in the exchange rate between these currencies. The value of the Canadian dollar is affected by a number of domestic and international factors, including, without limitation, economic performance, Canadian, U.S. and international monetary policies and U.S. debt levels. Changes in the exchange rate between the Canadian dollar and other currencies (including the U.S. dollar) make the goods transported by us more or less competitive in the world marketplace and, in turn, positively or negatively affect our revenues and expenses. To manage this exposure to fluctuations in exchange rates between Canadian and U.S. dollars, we may sell or purchase U.S. dollar forwards at fixed rates in future periods. Foreign exchange management is discussed further in Section 16.5 Foreign Exchange Management.

### **21.7.4 Interest Rate Risk**

In order to meet our capital structure requirements, we may enter into long-term debt agreements. These debt agreements expose us to increased interest costs on future fixed debt instruments and existing variable rate debt instruments should market rates increase. In addition, the present value of our assets and liabilities will also vary with interest rate changes. To manage our interest rate exposure, we may enter into forward rate agreements such as treasury rate locks or bond forwards that lock in rates for a future date, thereby protecting ourselves against interest rate increases. We may also enter into swap agreements whereby one party agrees to pay a fixed rate of interest while the other party pays a floating rate. Contingent on the direction of interest rates, we may incur higher costs depending on our contracted rate. Interest rate management is discussed further in Section 16.4 Interest Rate Management.

## **21.8 GENERAL AND OTHER RISKS**

### **21.8.1 Transportation of Hazardous Materials**

Railways, including CP, are legally required to transport hazardous materials as part of their common carrier obligations regardless of risk or potential exposure of loss. A train accident involving hazardous materials, including toxic inhalation hazard commodities such as chlorine and anhydrous ammonia could result in catastrophic losses from personal injury and property damage, which could have a material adverse effect on CP's operations, financial condition and liquidity.

### **21.8.2 Supply Chain Disruptions**

The North American transportation system is integrated. CP's operations and service may be negatively impacted by service disruptions of other transportation links such as ports, handling facilities, customer facilities and other railroads. A prolonged service disruption at one of these entities could have a material adverse effect on CP's operations, financial condition and liquidity.

### **21.8.3 Reliance on Technology and Technological Improvements**

Information technology is critical to all aspects of our business. While we have business continuity and disaster recovery plans in place, a significant disruption or failure of one or more of our information technology or communications systems could result in service interruptions or other failures and deficiencies which could have a material adverse effect on our results of operations, financial condition and liquidity.

### **21.8.4 Qualified Personnel**

Changes in employee demographics, training requirements, and the availability of qualified personnel, particularly locomotive engineers and train-persons, could negatively impact the Company's ability to meet demand for rail service. We have workforce planning tools and programs in place and are undertaking technological improvements to assist with manual tasks. Unpredictable increases in the demand for rail services may increase the risk of having insufficient numbers of trained personnel, which could have a material adverse effect on our results of operations and financial condition.

### **21.8.5 Severe Weather**

We are exposed to severe weather conditions including floods, avalanches, mudslides, extreme temperatures and significant precipitation that may cause business interruptions that can adversely affect our entire rail network and result in increased costs, increased liabilities, and decreased revenue, which could have a material adverse effect on CP's operations and financial condition.

### **21.8.6 Supplier Concentration**

Due to the complexity and specialized nature of rail equipment and infrastructure, there can be a limited number of suppliers of this equipment and material available. Should these specialized suppliers cease production or experience capacity or supply shortages, this concentration of suppliers could result in CP experiencing cost increases or difficulty in obtaining rail equipment and materials. While CP manages this risk by sourcing key products and services from multiple suppliers whenever possible, widespread business failures of suppliers could have a material adverse effect on CP's operations and financial position.

There are factors and developments that are beyond the influence or control of the railway industry generally and CP specifically which

may have a material adverse effect on our business or operating results. Our freight volumes and revenues are largely dependent upon the performance of the North American and global economies, which remains uncertain, and other factors affecting the volumes and patterns of international trade. CP's bulk traffic is dominated by grain, metallurgical coal, fertilizers and sulphur. Factors outside of CP's control which affect bulk traffic include: (i) with respect to grain volumes, domestic production-related factors such as weather conditions, acreage plantings, yields and insect populations, (ii) with respect to coal volumes, global steel production, (iii) with respect to fertilizer volumes, grain and other crop markets, with both production levels and prices relevant, and (iv) with respect to sulphur volumes, gas production levels in southern Alberta, industrial production and fertilizer production, both in North America and abroad. The merchandise commodities transported by the Company include those relating to the forestry, energy, industrial, automotive and other consumer spending sectors. Factors outside of CP's control which affect this portion of CP's business include the general state of the North American economy, with North American industrial production, business investment and consumer spending being the general sources of economic demand. Housing, auto production and energy development are also specific sectors of importance. Factors outside of CP's control which affect the Company's intermodal traffic volumes include North American consumer spending and a technological shift toward containerization in the transportation industry that has expanded the range of goods moving by this means.

Adverse changes to any of the factors outside of CP's control which affect CP's bulk traffic, the merchandise commodities transported by CP or CP's intermodal traffic volumes or adverse changes to fuel prices could have a material adverse effect on CP's business, financial condition, results of operations and cash flows.

We are also sensitive to factors including, but not limited to, natural disasters, security threats, commodity pricing, global supply and demand, and supply chain efficiency. Other business risks include: potential increase in maintenance and operational costs, uncertainties of litigation, risks and liabilities arising from derailments and technological changes.

## **22.0 Critical Accounting Estimates**

To prepare consolidated financial statements that conform with U.S. GAAP, we are required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reported periods. Using the most current information available, we review our estimates on an ongoing basis, including those related to environmental liabilities, pensions and other benefits, property, plant and equipment, deferred income taxes, legal and personal injury liabilities, long-term floating rate notes and goodwill and intangible assets.

The development, selection and disclosure of these estimates, and this MD&A, have been reviewed by the Board of Directors' Audit, Finance and Risk Management Committee, which is comprised entirely of independent directors.

## **22.1 ENVIRONMENTAL LIABILITIES**

We estimate the probable cost to be incurred in the remediation of property contaminated by past railway use. We screen and classify sites according to typical activities and scale of operations conducted, and we develop remediation strategies for each property based on the nature and extent of the contamination, as well as the location of the property and surrounding areas that may be adversely affected by the presence of contaminants. We also consider available technologies, treatment and disposal facilities and the acceptability of site-specific plans based on the local regulatory environment. Site-specific plans range from containment and risk management of the contaminants through to the removal and treatment of the contaminants and affected soils and ground water. The details of the estimates reflect the environmental liability at each property. We are committed to fully meeting our regulatory and legal obligations with respect to environmental matters.

Liabilities for environmental remediation may change from time to time as new information about previously untested sites becomes known. The net liability may also vary as the courts decide legal proceedings against outside parties responsible for contamination. These potential charges, which cannot be quantified at this time, are not expected to be material to our financial position, but may materially affect income in the period in which a charge is recognized. Material increases to costs would be reflected as increases to Other long-term liabilities on our Consolidated Balance Sheet and to Purchased Services and Other within operating expenses on our Consolidated Statement of Income.

At December 31, 2010, the accrual for environmental remediation on our Consolidated Balance Sheet amounted to \$107.4 million (2009 \$121.3 million), of which the long-term portion amounting to \$91.0 million (2009 \$106.5 million) was included in Other long-term liabilities and the short-term portion amounting to \$16.4 million (2009 \$14.8 million) was included in Accounts payable and accrued liabilities. Total payments were \$13.2 million in 2010 and \$18.2 million in 2009. The U.S. dollar-denominated portion of the liability was affected by the change in FX, resulting in a decrease in environmental liabilities of \$4.5 million in 2010 and \$14.3 million in 2009.

## 22.2 PENSIONS AND OTHER BENEFITS

We have defined benefit and defined contribution pension plans. Other benefits include post-retirement medical and life insurance for pensioners, and some post-employment workers compensation and long-term disability benefits in Canada. Workers compensation and long-term disability benefits are described in Section 22.5 Legal and Personal Injury Liabilities. Pension and post-retirement benefits liabilities are subject to various external influences and uncertainties, as described in Section 20.5 Pension Plan Deficit.

Pension costs are actuarially determined using the projected-benefit method prorated over the credited service periods of employees. This method incorporates our best estimates of expected plan investment performance, salary escalation and retirement ages of employees. The expected return on fund assets is calculated using market-related asset values developed from a five-year average of market values for the fund's public equity securities (with each prior year's

market value adjusted to the current date for assumed investment income during the intervening period) plus the market value of the fund's fixed income, real estate and infrastructure securities, subject to the market-related asset value not being greater than 120% of the market value nor being less than 80% of the market value. The discount rate we use to determine the benefit obligation is based on market interest rates on high-quality corporate debt instruments with matching cash flows. Unrecognized actuarial gains and losses in excess of 10% of the greater of the benefit obligation and the market-related value of plan assets are amortized over the expected average remaining service period of active employees expected to receive benefits under the plan (approximately 10 years). Prior service costs arising from collectively bargained amendments to pension plan benefit provisions are amortized over the term of the applicable union agreement. Prior service costs arising from all other sources are amortized over the expected average remaining service period of active employees who were expected to receive benefits under the plan at the date of amendment.

The obligations with respect to post-retirement benefits, including health care and life insurance, are actuarially determined and are accrued using the projected-benefit method prorated over the credited service periods of employees. The obligations with respect to post-employment benefits, including some workers' compensation and long-term disability benefits in Canada, are the actuarial present value of benefits payable to employees on disability.

We included pension benefit liabilities of \$673.4 million in Pension and other benefit liabilities on our December 31, 2010 Consolidated Balance Sheet. We also included post-retirement benefits accruals of \$343.6 million in Pension and other benefit liabilities and post-retirement benefits accruals of \$23.0 million in Accounts payable and accrued liabilities on our December 31, 2010 Consolidated Balance Sheet. Accruals for self-insured workers compensation and long-term disability benefit plans are discussed in Section 22.5 Legal and Personal Injury Liabilities.

Fluctuations in the post-retirement benefit obligation can result from changes in the discount rate used. A 1.0 percentage point increase (decrease) in the discount rate would decrease (increase) the liability by approximately \$45 million.

Net periodic benefit costs for pensions and post-retirement benefits were included in Compensation and benefits on our December 31, 2010 Statement of Consolidated Income. Combined net periodic benefit costs for pensions and post-retirement benefits (excluding self-insured workers compensation and long-term disability benefits) were \$68.8 million in 2010, compared with \$45.6 million in 2009.

Net periodic benefit costs for pensions were \$39.7 million in 2010, compared with \$24.8 million in 2009. The portion of this related to defined benefit pensions was \$36.3 million in 2010, compared with \$22.1 million in 2009, and the portion related to defined contribution pensions (equal to contributions) was \$3.4 million for 2010, compared with \$2.7 million for 2009. We estimate net periodic benefit costs for pensions in 2011 to equal approximately \$50 million. Net periodic benefit costs for post-retirement benefits were \$29.1 million in 2010, compared with \$20.8 million in 2009. Net periodic benefit costs for post-retirement benefits in 2011 are not expected to differ materially from the 2010 costs.

### **22.3 PROPERTY, PLANT AND EQUIPMENT**

CP performs depreciation studies of each property group approximately every two years to update depreciation rates. The depreciation studies are based on statistical analysis of historical retirements of properties in the group and incorporate engineering estimates of changes in current operations and of technological advances. We depreciate the cost of properties, net of salvage, on a straight-line basis over the estimated useful life of the property group. We follow the group depreciation method under which a single depreciation rate is applied to the total cost in a particular class of property, despite differences in the service life or salvage value of individual properties within the same class. The estimates of economic lives are uncertain and can vary due to technological changes or in the rate of wear.

Additionally, the depreciation rates are updated to reflect the change in residual values of the assets in the class. Under the group depreciation method, retirements or disposals of properties in the normal course of business are accounted for by charging the cost of the property less any net salvage to accumulated depreciation. For the sale or retirement of larger groups of depreciable assets that are unusual and were not included in our depreciation studies, CP records a gain or loss for the difference between net proceeds and net book value of the assets sold or retired.

Due to the capital intensive nature of the railway industry, depreciation represents a significant part of our operating expenses. The estimated useful lives of properties have a direct impact on the amount of depreciation recorded as a component of Net properties on our Consolidated Balance Sheet. At December 31, 2010, accumulated depreciation was \$5,623.3 million.

Revisions to the estimated useful lives and net salvage projections for properties constitute a change in accounting estimate and we address these prospectively by amending depreciation rates. It is anticipated that there will be changes in the estimates of weighted average useful lives and net salvage for each property group as assets are acquired, used and retired. Substantial changes in either the useful lives of properties or the salvage assumptions could result in significant changes to depreciation expense. For example, if the estimated average life of road locomotives, our largest asset group, increased (or decreased) by 5%, annual depreciation expense would decrease (or increase) by approximately \$3 million.

We review the carrying amounts of our properties when circumstances indicate that such carrying amounts may not be recoverable based on future undiscounted cash flows. When such properties are determined to be impaired, recorded asset values are revised to their fair values and an impairment loss is recognized.

#### **22.4 DEFERRED INCOME TAXES**

We account for deferred income taxes based on the liability method. This method focuses on a Company's balance sheet and the temporary differences otherwise calculated from the comparison of book versus tax values. It is assumed that such temporary differences will be settled in the deferred income tax assets and liabilities at the balance sheet date.

In determining deferred income taxes, we make estimates and assumptions regarding deferred tax matters, including estimating the timing of the realization and settlement of deferred income tax

assets (including the benefit of tax losses) and liabilities. Deferred income taxes are calculated using enacted federal, provincial, and state future income tax rates, which may differ in future periods.

Deferred income tax expense totalling \$211.2 million was included in income tax for 2010 and \$133.0 million was included in income tax in 2009. The change in deferred income tax in 2010 was primarily due to higher taxable income and the utilization of tax assets to reduce income taxes in 2009. The change in deferred tax expense for 2009 was due to lower taxable income and the impact of tax rate changes recognized in prior years. At December 31, 2010, deferred income tax liabilities of \$1,944.8 million (2009 \$1,818.7 million) were recorded as a long-term liability and comprised largely of temporary differences related to accounting for properties. Deferred income tax benefits of \$222.3 million realizable within one year were recorded as a current asset compared to \$128.1 million at December 31, 2009.

## 22.5 LEGAL AND PERSONAL INJURY LIABILITIES

We are involved in litigation in Canada and the U.S. related to our business. Management is required to establish estimates of the potential liability arising from incidents, claims and pending litigation, including personal injury claims and certain occupation-related and property damage claims.

These estimates are determined on a case-by-case basis. They are based on an assessment of the actual damages incurred and current legal advice with respect to settlements in other similar cases. We employ experienced claims adjusters who investigate and assess the validity of individual claims made against us and estimate the damages incurred.

A provision for incidents, claims or litigation is recorded based on the facts and circumstances known at the time. We accrue for likely claims when the facts of an incident become known and investigation results provide a reasonable basis for estimating the liability. The lower end of the range is accrued if the facts and circumstances permit only a range of reasonable estimates and no single amount in that range is a better estimate than any other. Additionally, for administrative expediency, we keep a general provision for lesser-value injury cases. Facts and circumstances related to asserted claims can change, and a process is in place to monitor accruals for changes in accounting estimates.

With respect to claims related to occupational health and safety in the provinces of Quebec, Ontario, Manitoba and B.C., claims administered through the Workers' Compensation Board ( WCB ) are actuarially determined. In the provinces of Saskatchewan and Alberta, we are assessed for an annual WCB contribution. As a result, this amount is not subject to estimation by management.

Railway employees in the U.S. are not covered by a workers' compensation program, but are covered by U.S. federal law for railway employees. Although we manage in the U.S. using a case-by-case comprehensive approach, for accrual purposes, a combination of case-by-case analysis and statistical analysis is utilized.

Provisions for incidents, claims and litigation charged to income, which are included in Purchased services and other on our Consolidated Statement of Income, amounted to \$50.4 million in 2010 (2009 \$54.5 million; 2008 \$79.7 million).

Accruals for incidents, claims and litigation, including WCB accruals, totaled \$160.8 million, net of insurance recoveries, at December 31, 2010 and \$177.4 million at December 31, 2009. At December 31, 2010 and 2009 respectively, the total accrual included \$98.7 million and \$98.9 million in Pension and other benefit liabilities , \$12.9 million and \$19.4 million in Other long-term liabilities and \$52.1 million and \$75.1 million in Accounts payable and accrued liabilities , offset by \$0.8 million and \$0.8 million in Other assets and \$2.1 million and \$15.2 million in Accounts receivable, net .

## 22.6 LONG-TERM FLOATING RATE NOTES

At December 31, 2010 and December 31, 2009, the Company held long-term floating rate notes with a total settlement value of \$117.0 million and \$129.1 million, respectively, and carrying values of \$69.5 million and \$69.3 million, respectively. The carrying values, being the estimated fair values, are reported in Investments .

During the year ended December 31, 2010, the Company received \$0.1 million in partial redemption of certain of the notes held (2009 \$12.5 million). In addition, in 2010, notes with a settlement value of \$12.0 million were used to settle a \$9.0 million credit facility with a major Canadian bank. The notes had an estimated fair value of \$7.6 million. At December 31, 2010, the Company held long-term floating rate notes with settlement value, as follows:

- o \$116.8 million Master Asset Vehicle ( MAV ) 2 notes with eligible assets; and
- o \$0.2 million MAV 3 Class 9 Traditional Asset ( TA ) Tracking notes.

At December 31, 2009, the Company held long-term floating rate notes with settlement value, as follows:

- o \$116.8 million MAV 2 notes with eligible assets;
- o \$12.1 million MAV 2 Ineligible Assets ( IA ) Tracking notes with ineligible assets; and
- o \$0.2 million MAV 3 Class 9 TA Tracking notes.

During the year ended December 31, 2010, Dominion Bond Rating Service ( DBRS ) upgraded the rating of the MAV 2 Class A-1 notes from A Under Review with Positive Implications to A (high). The MAV 2 Class A-2 notes have received a BBB (low) rating from DBRS, unchanged from 2009.

In January 2009, under a Canadian Court granted order, a restructuring of ABCP was completed. As a result, CP received new replacement long-term floating rate notes with a total settlement value of \$142.8 million.

The valuation technique used by the Company to estimate the fair value of its investment in long-term floating rate notes at December 31, 2010 and December 31, 2009 incorporates probability weighted discounted cash flows considering the best available public information regarding market conditions and other factors that a market participant would consider for such investments. The above noted redemption of notes, accretion and other minor changes in assumptions have resulted in gains of \$9.3 million in the year ended December 31, 2010 (2009 \$9.2 million; 2008 losses of \$49.4 million). The interest rates and maturities of the various long-term floating rate notes, discount rates and credit losses modelled at December 31, 2010 and December 31, 2009, respectively, are:

	December 31, 2010	December 31, 2009
Probability weighted average coupon interest rate	0.8%	Nil
Weighted average discount rate	7.1%	7.9%
Expected repayments of long-term floating rate notes	Approximately 6 years	31/2 to 19 years
Credit losses	MAV 2 eligible asset notes: 1% to 100% MAV 2 IA Tracking notes: N/A MAV 3 Class 9 TA Tracking notes: 1%	MAV 2 eligible asset notes: nil to 100% MAV 2 IA Tracking notes: 25% MAV 3 Class 9 TA Tracking notes: Nil

The probability weighted discounted cash flows resulted in an estimated fair value of the Company's long-term floating rate notes of \$69.5 million at December 31, 2010 (2009 \$69.3 million). The change in the original cost and estimated fair value of the Company's long-term floating rate notes is as follows (representing a roll-forward of assets measured at fair value using Level 3 inputs):

(in millions of Canadian dollars)	Original cost	Estimated fair value
As at January 1, 2009	\$ 143.6	\$ 72.7
Change due to restructuring, January 21, 2009	(0.8)	
Redemption of notes	(13.7)	(8.0)
Accretion		2.9
Change in market assumptions		1.7
As at December 31, 2009	129.1	69.3
Redemption of notes	(12.1)	(7.7)
Accretion		5.9
Change in market assumptions		2.0
As at December 31, 2010	\$ 117.0	\$ 69.5

Accretion and gains and losses from the redemption of notes and changes in market assumptions are reported in Other income and charges.

Sensitivity analysis is presented below for key assumptions at December 31, 2010:

(in millions of Canadian dollars)	Change in fair value of long-term floating rate notes
-----------------------------------	---

Coupon interest rate <sup>(1)</sup>	
50 basis point increase	\$ Nil
50 basis point decrease	\$ Nil
Discount rate	
50 basis point increase	\$ (1.9)
50 basis point decrease	\$ 2.0

<sup>(1)</sup> Sensitivity is after reflecting anticipated credit losses.

Continuing uncertainties regarding the value of the assets which underlie the long-term floating rate notes and the amount and timing of cash flows could give rise to a further material change in the value of the Company's investment in long-term floating rate notes which could impact the Company's near-term earnings.

## 22.7 GOODWILL AND INTANGIBLE ASSETS

As part of the acquisition of DM&E in 2007, CP recognized goodwill of US\$147 million on the allocation of the purchase price, determined as the excess of the purchase price over the fair value of the net assets acquired. Since the acquisition, the operations of DM&E have been integrated with CP's operations in the U.S., as a result the related goodwill is now allocated to CP's U.S. reporting unit. Goodwill is tested for impairment at least once per year as at October 1st. The goodwill impairment test determines if the fair value of the reporting unit continues to exceed its net book value, or whether an impairment is required. The fair value of the reporting unit is affected by projections of its profitability including estimates of revenue growth which are inherently uncertain. The annual test for impairment, performed with the assistance of outside consultants, determined that the fair value of CP's U.S. reporting unit exceeded the carrying value by approximately 40% (2009 - 10%) and that no impairment would be required in 2010.

The impairment test was performed primarily using an income approach based on discounted cash flows. Discount rates of 8.50%

to 9.0% (2009 8.75% to 9.0%) were used, based on the weighted average cost of capital. A change in discount rates of 0.25% would change the valuation by 5 to 6%. The valuation used revenue growth projections ranging from 4.3 to 7.1% (2009 4.5 to 6.9%) annually. A change in the long term growth rate of 0.25% would change the valuation by 2 to 3%. These sensitivities indicate that a prolonged recession or increased borrowing rates could result in an impairment to the carrying value of goodwill in future periods. A secondary approach used in the valuation was a market approach which included a comparison of implied earnings multiples of CP U.S. to trading earnings multiples of comparable companies, adjusted for the inherent minority discount. The derived value of CP U.S. using the income approach fell within the range of the observable trading multiples. The income approach was chosen over the market approach as it takes into consideration the particular characteristics attributable to CP U.S.

The carrying value of CP's goodwill changes from period to period due to changes in the exchange rate. As at December 31, 2010 goodwill was \$146.6 million (2009 \$154.9 million).

Intangible assets of \$43.2 million (2009 \$47.4 million), acquired in the acquisition of DM&E, includes the amortized costs of an option to expand the track network, favourable leases, customer relationships and interline contracts. Intangible assets with determinable lives are amortized on a straight-line basis over their estimated useful lives. Intangible assets with indefinite lives are not amortized but are assessed for impairment on an annual basis, or more often if the events or circumstances warrant. If the carrying value of the indefinite-lived intangible asset exceeds its fair value, an impairment charge would be recognized immediately.

### **23.0 Systems, Procedures and Controls**

The Company's Chief Executive Officer and Chief Financial Officer are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the U.S. Securities Exchange Act of 1934 (as amended)) to ensure that material information relating to the Company is made known to them. The Chief Executive Officer and Chief Financial Officer have a process to evaluate these disclosure controls and are satisfied that they are effective for ensuring that such material information is made known to them.

### **24.0 Forward-Looking Information**

This MD&A, especially but not limited to Section 24, contains certain forward-looking statements within the meaning of the *Private Securities Litigation Reform Act of 1995* (US) and other relevant securities legislation relating but not limited to our operations, anticipated financial performance, business prospects and strategies. Forward-looking information typically contains statements with words such as "anticipate", "believe", "expect", "plan" or similar words suggesting future outcomes.

Readers are cautioned not to place undue reliance on forward-looking information because it is possible that we will not achieve predictions, forecasts, projections and other forms of forward-looking information. In addition, except as required by law, we undertake no obligation to update publicly or otherwise revise any forward-looking information, whether as a result of new information, future events or otherwise.

By its nature, our forward-looking information involves numerous assumptions, inherent risks and uncertainties, including but not limited to the following factors: changes in business strategies; general North American and global economic and business conditions; the availability and price of energy commodities; the effects of competition and pricing pressures; industry capacity; shifts in market demands; changes in laws and regulations, including regulation of rates; changes in taxes and tax rates; potential increases in maintenance and operating costs; uncertainties of litigation; labour disputes; risks and liabilities arising from derailments; timing of completion of capital and maintenance projects; currency and interest rate fluctuations; effects of changes in market conditions on the financial position of pension plans and liquidity of investments; various events that could disrupt operations, including severe

weather conditions; security threats and governmental response to them; and technological changes.

There are more specific factors that could cause actual results to differ materially from those described in the forward-looking statements contained in this MD&A. These more specific factors are identified and discussed in Section 21.0 Business Risks and Enterprise Risk Management and elsewhere in this MD&A.

## **24.1 2010 FINANCIAL ASSUMPTIONS**

CP provided the following financial assumptions for 2010:

- o capital expenditures were estimated to range from \$680 million to \$730 million;
- o we expected our tax rate to be in the 25% to 27% range; and
- o 2010 pension contributions were estimated to be between \$150 million and \$200 million.

### **24.1.1 First-Quarter 2010 Guidance Updates**

CP updated its financial assumptions as follows: The assumptions were unchanged from information previously reported and discussed above. However, CP expected its 2010 defined benefit pension expense to increase by \$15 million from 2009 expenses.

### **24.1.2 Second-Quarter 2010 Guidance Updates**

CP revised expectations, announcing an update to the expected capital program in 2010 that was to be in the range of \$750 million to \$800 million. The 2010 pension contributions for the defined benefit pension plans were changed to an estimate of between \$185 million and \$195 million. On June 29, 2010 CP announced the reopening of its southern mainline after severe flooding that caused an 11 day outage. The impact of flooding reduced second quarter earnings per share by approximately 12 cents.

### **24.1.3 Third-Quarter 2010 Guidance Updates**

On September 20, 2010 CP announced a voluntary prepayment to its Canadian defined benefit pension plan of \$650 million. Excluding this voluntary prepayment CP continued to estimate its contributions to the defined benefit pension plans to be between \$185 million and \$195 million for 2010. Including the voluntary prepayment CP

estimated the contributions to the defined benefit pension plans to be between \$835 million and \$845 million for 2010. There were no other changes to our previously stated assumptions.

#### **24.1.4 Variance from 2010 Guidance**

CP's capital expenditures for 2010 came in at \$726.1 million, (discussed further in Section 14.2 Investing Activities). The tax rate for 2010 was 25.3%, in line with the guidance provided (discussed further in Section 10.5 Income Taxes). Our 2010 pension contributions to the Canadian defined benefit pension plan was \$837.2 million in 2010, including the \$650 million voluntary prepayment noted above.

#### **24.2 2011 FINANCIAL ASSUMPTIONS**

Capital expenditures are currently estimated to range from \$950 million to \$1.05 billion. CP expects its tax rate to be in the 24% to 26% range. The 2011 pension contributions are currently estimated to be between \$100 million and \$125 million (discussed further in Section 20.5 Pension Plan Deficit). Undue reliance should not be placed on these assumptions and other forward-looking information.

2010  
ANNUAL 46  
REPORT

---

## 25.0 Glossary of Terms

**Average active employees expense** The average number of actively employed workers during the period whose compensation costs are included in Compensation and Benefits Expense on the Consolidated Statement of Income. This includes employees who are taking vacation and statutory holidays and other forms of short-term paid leave, and excludes individuals who have a continuing employment relationship with us but are not currently working or who have not worked a minimum number of hours. This definition also excludes employees working on capital projects.

**Average terminal dwell** The average time a freight car resides at a specified terminal location. The timing starts with a train arriving in the terminal, a customer releasing the car to us, or a car arriving that is to be transferred to another railway. The timing ends when the train leaves, a customer receives the car from us or the freight car is transferred to another railway. Freight cars are excluded if: i) a train is moving through the terminal without stopping; ii) they are being stored at the terminal; iii) they are in need of repair; or iv) they are used in track repairs.

**Average train speed** The average speed attained as a train travels between terminals, calculated by dividing the total train miles traveled by the total hours operated. This calculation does not include the travel time or the distance traveled by: i) trains used in or around CP's yards; ii) passenger trains; and iii) trains used for repairing track. The calculation also does not include the time trains spend waiting in terminals.

**Car miles per car day** The total car-miles for a period divided by the total number of active cars. Total car-miles includes the distance travelled by every car on a revenue-producing train and a train used in or around our yards.

A car-day is assumed to equal one active car-day. An active car is a revenue-producing car that is generating costs to CP on an hourly or mileage basis. Excluded from this count are i) cars that are not on the track or are being stored; ii) cars that are in need of repair; iii) cars that are used to carry materials for track repair; iv) cars owned by customers that are on the customer's tracks; and v) cars that are idle and waiting to be reclaimed by CP.

**Carloads** Revenue-generating shipments of containers, trailers and freight cars.

**Casualty expenses** Includes costs associated with personal injuries, freight and property damages, and environmental mishaps.

**CP**, the Company CPRL, CPRL and its subsidiaries, CPRL and one or more of its subsidiaries, or one or more of CPRL's subsidiaries.

**CPRL** Canadian Pacific Railway Limited.

**D&H** Delaware and Hudson Railway Company, Inc., a wholly owned indirect U.S. subsidiary of CPRL.

**DM&E** Dakota, Minnesota & Eastern Railroad Corporation.

**Fluidity** Obtaining more value from our existing assets and resources.

**FRA** U.S. Federal Railroad Administration, a regulatory agency whose purpose is to promulgate and enforce rail safety regulations; administer railroad assistance programs; conduct research and development in support of improved railroad safety and national rail transportation policy; provide for the rehabilitation of Northeast Corridor rail passenger service; and consolidate government support of rail transportation activities.

**FRA personal injury rate per 200,000 employee-hours** The number of personal injuries, multiplied by 200,000 and divided by total employee-hours. Personal injuries are defined as injuries that require employees to lose time away from work, modify their normal duties or obtain medical treatment beyond minor first aid. Employee-hours are the total hours worked, excluding vacation and sick time, by all employees, excluding contractors.

**FRA train accidents rate** The number of train accidents, multiplied by 1,000,000 and divided by total train-miles. Train accidents included in this metric meet or exceed the FRA reporting threshold of US\$9,200 in the U.S. or \$10,600 in Canada in damage.

**Freight revenue per carload** The amount of freight revenue earned for every carload moved, calculated by dividing the freight revenue for a commodity by the number of carloads of the commodity transported in the period.

**Freight revenue per RTM** The amount of freight revenue earned for every RTM moved, calculated by dividing the total freight revenue by the total RTMs in the period.

**FX or Foreign Exchange** The value of the Canadian dollar relative to the U.S. dollar (exclusive of any impact on market demand).

**FX on LTD** Foreign exchange gains and losses on long-term debt.

**GAAP** Accounting principles generally accepted in the United States.

**GTMs or gross ton-miles** The movement of total train weight over a distance of one mile. Total train weight is comprised of the weight of the freight cars, their contents and any inactive locomotives. An increase in GTMs indicates additional workload.

**IOP** Integrated Operating Plan, the foundation for our scheduled railway operations.

**LIBOR** London Interbank Offered Rate.

**Operating income** Calculated as revenues less operating expenses and is a common measure of profitability used by management.

**Operating ratio** The ratio of total operating expenses to total revenues. A lower percentage normally indicates higher efficiency.

**RTMs or revenue ton-miles** The movement of one revenue-producing ton of freight over a distance of one mile.

**Soo Line** Soo Line Railroad Company, a wholly owned indirect U.S. subsidiary of CPRL.

STB U.S. Surface Transportation Board, a regulatory agency with jurisdiction over railway rate and service issues and rail restructuring, including mergers and sales.

U.S. gallons of locomotive fuel consumed per 1,000 GTMs The total fuel consumed in freight and yard operations for every 1,000 GTMs traveled. This is calculated by dividing the total amount of fuel issued to our locomotives, excluding commuter and non-freight activities, by the total freight-related GTMs. The result indicates how efficiently we are using fuel.

WCB Workers Compensation Board, a mutual insurance corporation providing workplace liability and disability insurance in Canada.

## **MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING**

The information in this report is the responsibility of management. The consolidated financial statements have been prepared by management in accordance with accounting principles generally accepted in the United States ( GAAP ) and include some amounts based on management's best estimates and careful judgment. The consolidated financial statements include the accounts of Canadian Pacific Railway Limited, Canadian Pacific Railway Company and all of its subsidiaries (the Company ). The financial information of the Company included in the Company's Annual Report is consistent with that in the consolidated financial statements. The consolidated financial statements have been approved by the Board of Directors.

Our Board of Directors is responsible for reviewing and approving the consolidated financial statements and for overseeing management's performance of its financial reporting responsibilities. The Board of Directors carries out its responsibility for the consolidated financial statements principally through its Audit, Finance and Risk Management Committee (the Audit Committee ), consisting of six members, all of whom are independent directors. The Audit Committee reviews the consolidated financial statements with management and the independent auditor prior to submission to the Board for approval. The Audit Committee meets regularly with management, internal auditors, and the independent auditor to review accounting policies, and financial reporting. The Audit Committee also reviews the recommendations of both the independent and internal auditors for improvements to internal controls, as well as the actions of management to implement such recommendations. The internal and independent auditors have full access to the Audit Committee, with or without the presence of management.

## **MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has assessed the effectiveness of the Company's internal control over financial reporting in accordance with the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control-Integrated Framework . Based on this assessment, management determined that the Company maintained effective internal control over financial reporting as of December 31, 2010.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2010 has been audited by PricewaterhouseCoopers LLP, independent auditor, as stated in their report, which is included herein.

KATHRYN B. MCQUADE

## **INDEPENDENT AUDITOR S REPORT**

### **TO THE SHAREHOLDERS OF CANADIAN PACIFIC RAILWAY LIMITED**

We have completed integrated audits of Canadian Pacific Railway Limited s 2010, 2009 and 2008 consolidated financial statements and its internal control over financial reporting as at December 31, 2010. Our opinions, based on our audits, are presented below.

#### **REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS**

We have audited the accompanying consolidated financial statements of Canadian Pacific Railway Limited, which comprise the consolidated balance sheets as at December 31, 2010 and 2009 and the consolidated statements of income, comprehensive income, cash flows and changes in shareholders equity for each of the years in the three year period ended December 31, 2010, and the related notes including a summary of significant accounting policies.

#### **MANAGEMENT S RESPONSIBILITY FOR THE CONSOLIDATED FINANCIAL STATEMENTS**

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

#### **AUDITOR S RESPONSIBILITY**

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform an audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement. Canadian generally accepted auditing standards require that we comply with ethical requirements.

An audit involves performing procedures to obtain audit evidence, on a test basis, about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor s judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company s preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting principles and policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

#### **OPINION**

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Canadian Pacific Railway Limited as at December 31, 2010 and 2009 and the results of its operations and cash flows for each of the years in the three year period ended December 31, 2010 in accordance with accounting principles generally accepted in the United States of America.

**EMPHASIS OF MATTER**

We draw attention to Note 2 to the consolidated financial statements which describes the change in accounting policy related to the treatment of rail grinding costs by Canadian Pacific Railway Limited. Our opinion is not qualified in respect of this matter.

**REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

We have also audited Canadian Pacific Railway Limited's internal control over financial reporting as at December 31, 2010, based on criteria established in Internal Control – Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

**MANAGEMENT'S RESPONSIBILITY FOR INTERNAL CONTROL OVER FINANCIAL REPORTING**

Management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting.

**AUDITOR'S RESPONSIBILITY**

Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit. We conducted our audit of internal control over financial reporting in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

An audit of internal control over financial reporting includes obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control, based on the assessed risk, and performing such other procedures as we consider necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on the company's internal control over financial reporting.

2010  
ANNUAL 51  
REPORT

---

## **DEFINITION OF INTERNAL CONTROL OVER FINANCIAL REPORTING**

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

## **INHERENT LIMITATIONS**

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## **OPINION**

In our opinion, Canadian Pacific Railway Limited maintained, in all material respects, effective internal control over financial reporting as at December 31, 2010 based on criteria established in Internal Control – Integrated Framework issued by COSO.

**CANADIAN PACIFIC RAILWAY LIMITED**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

December 31, 2010

Canadian Pacific Railway Limited ( CPRL ), through its subsidiaries (collectively referred to as CP or the Company ), operates a transcontinental railway in Canada and the United States. Through its subsidiaries, CP provides rail and intermodal transportation services over a network of approximately 14,800 miles, serving the principal business centres of Canada from Montreal, Quebec, to Vancouver, British Columbia, and the U.S. Northeast and Midwest regions. CP's railway network feeds directly into the U.S. heartland from the East and West coasts. Agreements with other carriers extend the Company's market reach east of Montreal in Canada, throughout the U.S. and into Mexico. Through its subsidiaries, CP transports bulk commodities, merchandise freight and intermodal traffic. Bulk commodities include grain, coal, sulphur and fertilizers. Merchandise freight consists of finished vehicles and automotive parts, as well as forest and industrial and consumer products. Intermodal traffic consists largely of retail goods in overseas containers that can be transported by train, ship and truck, and in domestic containers and trailers that can be moved by train and truck.

**1 Summary of significant accounting policies**

**GENERALLY ACCEPTED ACCOUNTING PRINCIPLES ( GAAP )**

These consolidated financial statements are expressed in Canadian dollars and have been prepared in accordance with U.S. GAAP as codified in the Financial Accounting Standards Board ( FASB ) Accounting Standards Codification.

**PRINCIPLES OF CONSOLIDATION**

These consolidated financial statements include the accounts of CP and all of its subsidiaries. The Company's investments in which it has significant influence are accounted for using the equity method. All intercompany accounts and transactions have been eliminated.

**USE OF ESTIMATES**

The preparation of these consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of revenues and expenses during the period, the reported amounts of assets and liabilities, and the disclosure of contingent assets and liabilities at the date of the financial statements. Management regularly reviews its estimates, including those related to investments, restructuring and environmental liabilities, pensions and other benefits, depreciable lives of properties and intangible assets, deferred income tax assets and liabilities, as well as legal and personal injury liabilities based upon currently available information. Actual results could differ from these estimates.

**PRINCIPAL SUBSIDIARIES**

The following list sets out CPRL's principal railway operating subsidiaries, including the jurisdiction of incorporation. All of these subsidiaries are wholly owned, directly or indirectly, by CPRL as of December 31, 2010.

Principal subsidiary	Incorporated under
Canadian Pacific Railway Company	the laws of
Soo Line Railroad Company ( Soo Line )	Canada
	Minnesota

Delaware and Hudson Railway Company, Inc. ( D&H )	Delaware
Dakota, Minnesota & Eastern Railroad Corporation ( DM&E )	Delaware
Mount Stephen Properties Inc. ( MSP )	Canada

## REVENUE RECOGNITION

Railway freight revenues are recognized based on the percentage of completed service method. The allocation of revenue between reporting periods is based on the relative transit time in each reporting period with expenses recognized as incurred. Volume rebates to customers are accrued as a reduction of freight revenues based on estimated volume and contract terms as freight service is provided. Other revenue, including passenger revenue, revenue from leasing certain assets and switching fees, is recognized as service is performed or contractual obligations are met. Revenues are presented net of taxes collected from customers and remitted to government authorities.

2010  
ANNUAL 58  
REPORT

---

## **CASH AND CASH EQUIVALENTS**

Cash and cash equivalents includes highly-liquid short-term investments that are readily convertible to cash with original maturities of three months or less.

## **FOREIGN CURRENCY TRANSLATION**

Assets and liabilities denominated in foreign currencies, other than those held through foreign subsidiaries, are translated into Canadian dollars at the year-end exchange rate for monetary items and at the historical exchange rates for non-monetary items. Foreign currency revenues and expenses are translated at the exchange rate in effect on the dates of the related transactions. Foreign currency gains and losses, other than those arising from the translation of the Company's net investment in foreign subsidiaries, are included in income.

The accounts of the Company's foreign subsidiaries are translated into Canadian dollars using the year-end exchange rate for assets and liabilities and the average exchange rates during the year for revenues, expenses, gains and losses. Exchange gains and losses arising from translation of these foreign subsidiaries' accounts are included in Other comprehensive loss. The majority of U.S. dollar-denominated long-term debt has been designated as a hedge of the net investment in foreign subsidiaries. As a result, unrealized foreign exchange (FX) gains and losses on this U.S. dollar-denominated long-term debt are offset against foreign exchange gains and losses arising from translation of foreign subsidiaries' accounts in Other comprehensive income.

## **PENSIONS AND OTHER BENEFITS**

Pension costs are actuarially determined using the projected-benefit method prorated over the credited service periods of employees. This method incorporates management's best estimates of expected plan investment performance, salary escalation and retirement ages of employees. The expected return on fund assets is calculated using market-related asset values developed from a five-year average of market values for the fund's public equity securities (with each prior year's market value adjusted to the current date for assumed investment income during the intervening period) plus the market value of the fund's fixed income, real estate and infrastructure securities, subject to the market-related asset value not being greater than 120% of the market value nor being less than 80% of the market value. The discount rate used to determine the benefit obligation is based on market interest rates on high-quality corporate debt instruments with matching cash flows. Unrecognized actuarial gains and losses in excess of 10% of the greater of the benefit obligation and the market-related value of plan assets are amortized over the expected average remaining service period of active employees expected to receive benefits under the plan (approximately 10 years). Prior service costs arising from collectively bargained amendments to pension plan benefit provisions are amortized over the term of the applicable union agreement. Prior service costs arising from all other sources are amortized over the expected average remaining service period of active employees who are expected to receive benefits under the plan at the date of amendment.

Costs for post-retirement and post-employment benefits other than pensions, including post-retirement health care and life insurance and some workers' compensation and long-term disability benefits in Canada, are actuarially determined and accrued on a basis similar to pension costs.

The over or under funded status of defined benefit pension and other post-retirement benefit plans are recognized on the balance sheet. The over or under funded status is measured as the difference between the fair value of the plan assets and the benefit obligation. In addition, any unrecognized actuarial gains and losses and prior service costs and credits that arise during the period are recognized as a component of Other comprehensive income (loss), net of tax.

Gains and losses on post-employment benefits that do not vest or accumulate, including some workers' compensation and long-term disability benefits in Canada, are included immediately in income.

## **MATERIALS AND SUPPLIES**

Materials and supplies are carried at the lower of average cost and market.

## **PROPERTIES**

Fixed asset additions and major renewals are recorded at cost, including direct costs, attributable indirect costs and carrying costs, less accumulated depreciation and any impairments. When there is a legal obligation associated with the retirement of property, plant and equipment, a liability is initially recognized at its fair value and a corresponding asset retirement cost is added to the gross book value of the related asset and amortized to expense over the estimated term to retirement. The Company reviews the carrying amounts of its properties whenever changes in circumstances indicate that such carrying amounts may not be recoverable based on future undiscounted cash flows. When such properties are determined to be impaired, recorded asset values are revised to the fair value.

The Company recognizes expenditures as additions to properties or operating expenses based on whether the expenditures increase the output or service capacity, lower the associated operating costs or extend the useful life of the properties and whether the expenditures exceed minimum physical and financial thresholds.

Much of the additions to properties, both new and replacement properties, are self-constructed. These are initially recorded at cost, including direct costs and attributable indirect costs and carrying costs. Direct costs include, among other things, labour costs, purchased services, equipment costs and material costs. Attributable indirect and overhead costs include incremental long-term variable costs resulting from the execution of capital projects. Indirect costs include largely local crew facilities, highway vehicles, work trains and area management costs. Overhead costs primarily include a portion of the Company's engineering department which plans, designs and administers these capital projects. These costs are allocated to projects by applying a measure consistent with the nature of the cost based on cost studies. For replacement properties, dismantling work is performed concurrently with the installation, the project costs are allocated to dismantling and installation based on cost studies.

Ballast programs including undercutting, shoulder ballasting and renewal programs which form part of our annual track program are capitalized as this work, and the related added ballast material, significantly improves drainage which in turn extends the life of ties and other track materials. These costs are tracked separately from the underlying assets and depreciated over the period to the next estimated similar ballast program. Spot replacement of ballast is considered a repair which is expensed as incurred.

The cost of large refurbishments are capitalized and locomotive overhauls and rail grinding costs (Note 2) are expensed as incurred.

The Company capitalizes development costs for major new computer systems.

The Company follows group depreciation which groups assets which are similar in nature and have similar economic lives. The property groups are depreciated based on their expected economic lives determined by studies of historical retirements of properties in the group and engineering estimates of changes in current operations and of technological advances. Actual use and retirement of assets may vary from current estimates, which would impact the amount of depreciation expense recognized in future periods.

When depreciable property is retired or otherwise disposed of in the normal course of business, the book value, less net salvage proceeds, is charged to accumulated depreciation and if different than the assumptions under the depreciation study could potentially result in adjusted depreciation expense over a period of years. However, when removal costs exceed the salvage value on assets and the Company had no legal obligation to remove, the new removal cost is charged to income in the period in which the asset is removed and is not charged to accumulated depreciation.

For the sale or retirement of larger groups of depreciable assets that are unusual and were not considered in depreciation studies, CP records a gain or loss for the difference between net proceeds and net book value of the assets sold or retired.

Depreciation is calculated on the straight-line basis at rates based on the estimated service life, taking into consideration the projected annual usage of depreciable property, except for rail and other track material in the U.S., which is based directly on usage.

Equipment under capital lease is included in properties and depreciated over the period of expected use.

#### **ASSETS HELD FOR SALE**

Assets to be disposed that meet the held for sale criteria are reported at the lower of the carrying amount and fair value, less costs to sell, and are no longer depreciated.

## **GOODWILL AND INTANGIBLE ASSETS**

Goodwill represents the excess of the purchase price over the fair value of identifiable net assets upon acquisition of a business. Goodwill is assigned to the reporting units that are expected to benefit from the business acquisition which, after integration of operations with the railway network, may be different than the acquired business.

The carrying value of goodwill, which is not amortized, is assessed for impairment annually in the fourth quarter of each year, or more frequently as economic events dictate. The fair value of the reporting unit is compared to its carrying value, including goodwill. If the fair value of the reporting unit is less than its carrying value goodwill is potentially impaired. The impairment charge that would be recognized is the excess of the carrying value of the goodwill over the fair value of the goodwill, determined in the same manner as in a business combination.

Intangible assets with finite lives are amortized on a straight-line basis over the estimated useful lives of the respective assets. The option to expand the track network has an amortization period of 100 years. Favourable leases, customer relationships and interline contracts have amortization periods ranging from four to 20 years. When there is a change in the estimated useful life of an intangible asset with a finite life, amortization is adjusted prospectively.

## **FINANCIAL INSTRUMENTS**

Financial instruments are contracts that give rise to a financial asset of one party and a financial liability or equity instrument of another party.

Financial instruments are recognized initially at fair value, which is the amount of consideration that would be agreed upon in an arm's length transaction between willing parties.

Subsequent measurement depends on how the financial instrument has been classified. Accounts receivable and investments, classified as loans and receivables, are measured at amortized cost, using the effective interest method. Certain equity investments, classified as available for sale, are recognized at cost as fair value cannot be reliably established. Cash and cash equivalents and long-term floating rate notes are classified as held for trading and are measured at fair value. Accounts payable, accrued liabilities, short-term borrowings, dividends payable, other long-term liabilities and long-term debt, classified as financial liabilities, are also measured at amortized cost.

## DERIVATIVE FINANCIAL INSTRUMENTS

Derivative financial and commodity instruments may be used from time to time by the Company to manage its exposure to risks relating to foreign currency exchange rates, stock-based compensation, interest rates and fuel prices. When CP utilizes derivative instruments in hedging relationships, CP identifies, designates and documents those hedging transactions and regularly tests the transactions to demonstrate effectiveness in order to continue hedge accounting.

All derivative instruments are classified as held for trading and recorded at their fair value. Any change in the fair value of derivatives not designated as hedges is recognized in the period in which the change occurs in the Consolidated Statement of Income in the line item to which the derivative instrument is related. On the Consolidated Balance Sheet they are classified in Other assets, Other long-term liabilities and Other current assets or Accounts payable and accrued liabilities as applicable. Gains and losses arising from derivative instruments affect the following income statement lines: Revenues, Compensation and benefits, Fuel, Other income and charges, and Net interest expense.

For fair value hedges, the periodic change in value is recognized in income, on the same line as the changes in values of the hedged items are also recorded. For a cash flow hedge, the change in value of the effective portion is recognized in Other comprehensive loss. Any ineffectiveness within an effective cash flow hedge is recognized in income as it arises in the same income account as the hedged item. Should a cash flow hedge relationship become ineffective, previously unrealized gains and losses remain within Accumulated other comprehensive loss until the hedged item is settled and, prospectively, future changes in value of the derivative are recognized in income. The change in value of the effective portion of a cash flow hedge remains in Accumulated other comprehensive loss until the related hedged item settles, at which time amounts recognized in Accumulated other comprehensive loss are reclassified to the same income or balance sheet account that records the hedged item.

In the Consolidated Statement of Cash Flows, cash flows relating to derivative instruments designated as hedges are included in the same line as the related hedged item.

The Company from time to time enters into foreign exchange forward contracts to hedge anticipated sales in U.S. dollars, the related accounts receivable and future capital acquisitions. Foreign exchange translation gains and losses on foreign currency-denominated derivative financial instruments used to hedge anticipated U.S. dollar-denominated sales are recognized as an adjustment of the revenues when the sale is recorded. Those used to hedge future capital acquisitions are recognized as an adjustment of the property amount when the acquisition is recorded.

The Company also occasionally enters into foreign exchange forward contracts as part of its short-term cash management strategy. These contracts are not designated as hedges due to their short-term nature and are carried on the Consolidated Balance Sheet at fair value. Changes in fair value are recognized in income in the period in which the change occurs.

The Company enters into interest rate swaps to manage the risk related to interest rate fluctuations. These swap agreements require the periodic exchange of payments without the exchange of the principal amount on which the payments are based. Interest expense on the debt is adjusted to include the payments owing or receivable under the interest rate swaps.

The Company from time to time enters into bond forwards to fix interest rates for anticipated issuances of debt. These agreements are usually accounted for as cash flow hedges with gains and losses recorded in Accumulated other comprehensive loss and amortized to Net interest expense in the period that interest on the related debt is charged.

The Company has a fuel-hedging program under which CP acquires crude oil and / or diesel future contracts for a portion of its diesel fuel purchases to reduce the risk of price volatility affecting future cash flows. In addition, foreign exchange forward contracts may be used as part of the fuel-hedging program to manage the foreign exchange variability component of CP's fuel price risk. These agreements are usually accounted for as cash flow hedges, however, on occasion derivatives of a short-term duration may not be designated as a hedge for accounting purposes. The gains or losses on the hedge contracts are applied against the corresponding fuel purchases in the period during which the hedging contracts mature.

The Company, prior to 2010, entered into derivatives called Total Return Swaps ( TRS ) to mitigate fluctuations in tandem share appreciation rights ( TSAR ), deferred share units ( DSU ) and restricted share units ( RSU ). These are not designated as hedges and are recorded at market value with the offsetting gain or loss reflected in Compensation and benefits .

## **RESTRUCTURING ACCRUAL**

Restructuring liabilities are recorded at their present value. The discount related to liabilities is amortized to

Compensation and benefits over the payment period. Provisions for labour restructuring are recorded in Other long-term liabilities, except for the current portion, which is recorded in Accounts payable and accrued liabilities.

## **ENVIRONMENTAL REMEDIATION**

Environmental remediation accruals, recorded on an undiscounted basis, cover site-specific remediation programs.

Provisions for environmental remediation costs are recorded in Other long-term liabilities, except for the current portion, which is recorded in Accounts payable and accrued liabilities.

## **INCOME TAXES**

The Company follows the liability method of accounting for income taxes. Deferred income tax assets and liabilities are determined based on differences between the financial reporting and tax bases of assets and liabilities using enacted tax rates and laws that will be in effect when the differences are expected to reverse. The effect of a change in income tax rates on deferred income tax assets and liabilities is recognized in income in the period during which the change occurs.

When appropriate, we record a valuation allowance against deferred tax assets to reflect that these tax assets may not be realized. In determining whether a valuation allowance is appropriate, we consider whether it is more likely than not that all or some portion of our deferred tax assets will not be realized, based on management's judgments using available evidence about future events.

At times, we may claim tax benefits that may be challenged by a tax authority. We recognize tax benefits only for tax positions that are more likely than not to be sustained upon examination by tax authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50 percent likely to be realized upon settlement. A liability for unrecognized tax benefits is recorded for any tax benefits claimed in our tax returns that do not meet these recognition and measurement standards.

Investment tax credits are deferred on the Consolidated Balance Sheet and amortized to Income tax expense as the related asset is recognized in income.

## **EARNINGS PER SHARE**

Basic earnings per share are calculated using the weighted average number of Common Shares outstanding during the year. Diluted earnings per share are calculated using the treasury stock method for determining the dilutive effect of options.

## **STOCK-BASED COMPENSATION**

CP follows the fair value based approach to account for stock options. Compensation expense and an increase in additional paid-in capital are recognized for stock options over their vesting period, or over the period from the grant date to the date employees become eligible to retire when this is shorter than the vesting period, based on their estimated fair values on the grant date, as determined using the Black-Scholes option-pricing model.

With the granting of regular stock options, employees may be simultaneously granted share appreciation rights, which provide the employee the choice to either exercise the stock option for shares, or to exercise the TSAR and thereby receive the intrinsic value of the stock option in cash. Options with TSARs are awards that may call for settlement in cash and, therefore, are recorded as liabilities. CP follows the fair value based approach to account for the TSAR liability. The liability is fair valued and changes in the liability are recorded in Compensation and benefits expense over the vesting period, or over the period from the grant date to the date employees become eligible to retire when this is shorter than the vesting period, until exercised. If an employee chooses to exercise the option, thereby cancelling the TSAR, both the exercise price and the liability are settled to Share capital .

Forfeitures of options and tandem options are estimated at issuance and subsequently at the balance sheet date.

Any consideration paid by employees on exercise of stock options is credited to share capital when the option is exercised and the recorded fair value of the option is removed from additional paid-in capital and credited to share capital.

Compensation expense is also recognized for TSARs, DSUs, performance share units ( PSUs ) and RSUs using the fair value method. Forfeitures of TSARs, DSUs, PSUs and RSUs are estimated at issuance and subsequently at the balance sheet date.

The employee share purchase plan ( ESPP ) gives rise to compensation expense that is recognized using the issue price, by amortizing the cost over the vesting period or over the period from the grant date to the date employees become eligible to retire when this is shorter than the vesting period.

## **2 Accounting changes**

### **CONSOLIDATIONS**

In June 2009, the FASB issued Amendments to Consolidation of Variable Interest Entities. The guidance retains the scope of the previous guidance and removes the exemption of entities previously considered qualifying special purpose entities. In addition, it replaces the previous quantitative approach with a qualitative analysis approach for determining whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity. The guidance is further amended to require ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity and requires enhanced disclosures about an enterprise's involvement in a variable interest entity. The guidance is applicable to all variable interest entities that existed at January 1, 2010, the date of adoption, or are created thereafter. The Company has variable interests in variable interest entities, however, the adoption of the new guidance did not change the previous assessment that the Company is not the primary beneficiary and as such does not consolidate the variable interest entities. Additional note disclosure regarding the nature of the Company's variable interests and where judgment was required to assess the primary beneficiary of these variable interest entities has been provided in Note 28.

### **ACCOUNTING FOR TRANSFERS OF FINANCIAL ASSETS**

The FASB has released additional guidance with respect to the accounting and disclosure of transfers of financial assets such as securitized accounts receivable. Although the Company currently does not have an accounts receivable securitization program, the guidance, which includes revisions to the derecognition criteria in a transfer and the treatment of qualifying special purpose entities, would be applicable to any future securitization. The new guidance is effective for the Company from January 1, 2010. The adoption of this guidance had no impact to the Company's financial statements.

### **FAIR VALUE MEASUREMENT AND DISCLOSURE**

In January 2010, the FASB amended the disclosure requirements related to fair value measurements. The update provides for new disclosures regarding transfers in and out of Level 1 and Level 2 financial asset and liability categories and expanded disclosures in the Level 3 reconciliation (see Note 21 for a definition of Level 1, 2 and 3 financial asset and liability categories). The update also provides clarification that the level of disaggregation should be at the class level and that disclosures about inputs and valuation techniques are required for both recurring and nonrecurring fair value measurements that fall in either Level 2 or Level 3. New disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, except for the expanded disclosures in the Level 3 reconciliation, which are effective for fiscal years beginning after December 15, 2010. The Company has adopted this guidance resulting in expanded note disclosure in Note 21.

### **RAIL GRINDING**

During the second quarter of 2010, the Company changed its accounting policy for the treatment of rail grinding costs. In prior periods, CP had capitalized such costs and depreciated them over the expected economic life of the rail grinding. The Company concluded that, although the accounting treatment was within acceptable accounting standards, it is preferable to expense the costs as incurred, given the subjectivity in determining the expected economic life and the associated depreciation methodology. The accounting policy change has been accounted for on a retrospective basis. The effects of the adjustment to January 1, 2010 resulted in an adjustment to decrease net properties by \$89.0 million, deferred income taxes by \$26.3 million, and shareholders equity by \$62.7 million. As a result of the change the following increases (decreases) to financial statement line items occurred:

## FUTURE ACCOUNTING CHANGES

There have been no new accounting pronouncements issued that are expected to have a significant impact to the Company's financial statements.

## RECLASSIFICATION OF COMPARATIVE FIGURES

Certain comparative figures have been reclassified in order to be consistent with the 2010 presentation.

### **3 Gain on sales of significant properties**

During 2009, the Company completed two significant real estate sales, including Windsor Station and land in western Canada, resulting in gains of \$79.1 million (\$68.1 million after tax).

The Company sold Windsor Station, in Montreal, for proceeds of \$80.0 million, including the assumption of a mortgage of \$16.0 million due in 2011. CP will continue to occupy a portion of Windsor Station through a lease for a 10-year period after the sale. As a result, part of the transaction is considered to be a sale-leaseback and consequently a gain of \$19.5 million related to this part of the transaction has been deferred and is being amortized over the remainder of the lease term.

The Company sold land in western Canada for transit purposes for proceeds of \$43.0 million.

#### 4 Gain on sale of partnership interest

During 2009, the Company completed a sale of a portion of its investment in the Detroit River Tunnel Partnership ( DRTP ) to its existing partner, reducing the Company's ownership from 50% to 16.5%. The proceeds received from the transaction were \$110.0 million. Additional proceeds of approximately \$22 million are contingent on achieving certain future freight volumes through the tunnel, and have not been recognized. The gain on this transaction was \$81.2 million (\$68.7 million after tax).

#### 5 Loss on termination of lease with shortline railway

During 2009, the Company made a payment of approximately \$73 million to terminate a contract with a lessee in order to cease through-train operations over the CP owned rail branchline between Smiths Falls, Ontario and Sudbury, Ontario including a settlement of a \$20.6 million existing liability. The contract with the lessee provided for the operation of a minimum number of CP freight trains over the leased branchline. The loss on the transaction was \$54.5 million (\$37.6 million after tax).

#### 6 Other income and charges

(in millions of Canadian dollars)	2010	2009	2008
Accretion income on long-term floating rate notes (Note 21)	\$ (5.9)	\$ (2.9)	\$
(Gain) loss in fair value of long-term floating rate notes/asset backed commercial paper (Note 21)	(3.4)	(6.3)	49.4
Net loss on repurchase of debt (Note 20)		16.6	
Other foreign exchange (gains) losses	(9.4)	(0.4)	6.1
Foreign exchange (gain) loss on long-term debt	(2.3)	(3.6)	5.8
Other	9.0	9.0	11.0
Total other income and charges	\$ (12.0)	\$ 12.4	\$ 72.3

#### 7 Net interest expense

(in millions of Canadian dollars)	2010	2009	2008
Interest cost	\$ 287.7	\$ 305.1	\$ 291.3
Interest capitalized to net properties	(19.6)	(19.2)	(30.9)
Interest expense	268.1	285.9	260.4
Interest income	(10.8)	(18.3)	(20.8)
Net interest expense	\$ 257.3	\$ 267.6	\$ 239.6

Interest expense includes interest on capital leases of \$22.4 million for the year ended December 31, 2010 (2009 \$26.8 million; 2008 \$20.3 million).

2010  
ANNUAL 65  
REPORT

**8 Income taxes**

The following is a summary of the major components of the Company's income tax expense:

(in millions of Canadian dollars)	<b>2010</b>	2009 Restated (Note 2)	2008 Restated (Note 2)
Current income tax expense (recovery)	<b>\$ 8.9</b>	\$ (51.7)	\$ (20.4)
Deferred income tax expense			
Origination and reversal of temporary differences	<b>244.9</b>	242.6	151.1
Effect of tax rate decreases		(35.3)	(10.4)
Effect of hedge of net investment in foreign subsidiaries	<b>(18.2)</b>	(31.7)	41.6
Tax credits	<b>(16.0)</b>	(16.4)	(3.8)
Other	<b>0.5</b>	(26.2)	(7.9)
Total deferred income tax expense	<b>211.2</b>	133.0	170.6
Total income taxes	<b>\$ 220.1</b>	\$ 81.3	\$ 150.2
Income before income tax expense			
Canada	<b>\$ 576.6</b>	\$ 602.3	\$ 162.9
Foreign	<b>294.2</b>	29.0	615.1
Total income before income tax expense	<b>\$ 870.8</b>	\$ 631.3	\$ 778.0
Income tax expense (recovery)			
Current			
Canada	<b>\$ (0.8)</b>	\$ (51.0)	\$ 14.0
Foreign	<b>9.7</b>	(0.7)	(34.4)
Total current income tax expense (recovery)	<b>8.9</b>	(51.7)	(20.4)
Deferred			
Canada	<b>122.6</b>	81.4	63.6
Foreign	<b>88.6</b>	51.6	107.0
Total deferred income tax expense	<b>211.2</b>	133.0	170.6
Total income taxes	<b>\$ 220.1</b>	\$ 81.3	\$ 150.2

2010  
ANNUAL  
REPORT

---

The provision for deferred income taxes arises from temporary differences in the carrying values of assets and liabilities for financial statement and income tax purposes and the effect of loss carry forwards. The items comprising the deferred income tax assets and liabilities are as follows:

(in millions of Canadian dollars)	<b>2010</b>	2009 Restated (Note 2)
<b>Deferred income tax assets</b>		
Restructuring liability	\$ 22.1	\$ 21.4
Amount related to tax losses carried forward	333.6	224.2
Liabilities carrying value in excess of tax basis	266.7	358.6
Future environmental remediation costs	38.4	42.6
Other	123.5	82.4
<b>Total deferred income tax assets</b>	<b>784.3</b>	729.2
<b>Deferred income tax liabilities</b>		
Properties carrying value in excess of tax basis	2,465.6	2,389.1
Other long-term assets carrying value in excess of tax basis	17.8	8.9
Other	23.4	21.8
<b>Total deferred income tax liabilities</b>	<b>2,506.8</b>	2,419.8
<b>Total net deferred income tax liabilities</b>	<b>1,722.5</b>	1,690.6
Current deferred income tax assets	222.3	128.1
<b>Long-term deferred income tax liabilities</b>	<b>\$ 1,944.8</b>	\$ 1,818.7

The Company's consolidated effective income tax rate differs from the expected statutory tax rates. Expected income tax expense at statutory rates is reconciled to income tax expense as follows:

(in millions of Canadian dollars, except percentage)	<b>2010</b>	2009 Restated (Note 2)	2008 Restated (Note 2)
Statutory federal and provincial income tax rate	<b>29.15%</b>	30.71%	31.53%
<b>Expected income tax expense at Canadian enacted statutory tax rates</b>	<b>\$ 253.8</b>	\$ 193.9	\$ 245.3
Increase (decrease) in taxes resulting from:			
Items not subject to tax	<b>(3.2)</b>	(24.7)	(63.3)
Canadian tax rate differentials	<b>(9.7)</b>	(26.1)	(18.0)
Foreign tax rate differentials	<b>0.2</b>	(7.1)	(1.1)
Effect of tax rate decreases		(34.5)	(10.2)
Tax credits	<b>(16.0)</b>	(16.4)	(3.8)

Other	(5.0)	(3.8)	1.3
Income tax expense	\$ 220.1	\$ 81.3	\$ 150.2

The Company has no unrecognized tax benefits from capital losses at December 31, 2010 and 2009.

The Company has not provided a deferred liability for the income taxes, if any, which might become payable on any temporary difference associated with its foreign investments because the Company intends to indefinitely reinvest in its foreign investments and has no intention to realize this difference by a sale of its interest in foreign investments.

At December 31, 2010, the Company has income tax operating losses carried forward of \$1,208.3 million, which have been recognized as a deferred tax asset. Certain of these losses carried forward will begin to expire in 2016, with the majority expiring between 2026 and 2029. The Company also has alternative minimum tax credits of approximately \$32.2 million that will begin to expire in 2016 as well as investment tax credits of \$28.2 million, certain of which will begin to expire in 2018, and track maintenance credits of \$33.6 million which will begin to expire in 2025.

It is more likely than not that the Company will realize the majority of its deferred income tax assets from the generation of future taxable income, as the payments for provisions, reserves and accruals are made and losses and tax credit carryforwards are utilized.

The following table provides a reconciliation of uncertain tax positions in relation to unrecognized tax benefits for Canada and the United States for the year ended December 31, 2010:

(in millions of Canadian dollars)	2010	2009	2008
Unrecognized tax benefits at January 1	\$ 87.7	\$ 85.6	\$ 79.2
Increase in unrecognized:			
Tax benefits related to the current year	5.2	13.9	9.4
Gross uncertain tax benefits related to prior years	1.9	11.2	7.7
Accrued interest and penalties on uncertain tax benefits	3.7	18.2	7.6
Dispositions:			
Gross uncertain tax benefits related to prior years	(4.9)	(14.7)	(13.5)
Settlements with tax authorities	(3.2)	(26.5)	
Accrued interest and penalties on uncertain tax benefits	(10.5)		(4.8)
Unrecognized tax benefits as at December 31	\$ 79.9	\$ 87.7	\$ 85.6

If these uncertain tax positions were recognized all of the amount of unrecognized tax positions as at December 31, 2010 would impact the Company's effective tax rate.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits as a component of income tax expense in the Company's Consolidated Statement of Income. The total amount of accrued interest and penalties in 2010 was a credit of \$6.8 million (2009 expensed \$18.2 million; 2008 expensed \$2.8 million). The total amount of accrued interest and penalties included in unrecognized tax benefit at December 31, 2010 was \$20.3 million (2009 \$27.1 million; 2008 \$8.9 million).

The Company and its subsidiaries are subject to either Canadian federal and provincial income tax, U.S. federal, state and local income tax, or the relevant income tax in other international jurisdictions. The Company has substantially concluded all Canadian federal and provincial income tax matters for the years through 2006. The federal and provincial income tax returns filed for 2007 and subsequent years remain subject to examination by the taxation authorities.

All U.S. federal income tax returns and generally all U.S. state and local income tax returns are closed to 2006. The income tax returns for 2007 and subsequent years continue to remain subject to examination by the taxation authorities.

The Company does not anticipate any material changes to the unrecognized tax benefits previously disclosed within the next 12 months as at December 31, 2010.

## **9 Earnings per share**

Basic earnings per share have been calculated using net income for the year divided by the weighted average number of CPRL shares outstanding during the year.

Diluted earnings per share have been calculated using the treasury stock method, which assumes that any proceeds received from the exercise of in-the-money options would be used to purchase Common Shares at the average market price for the period. For purposes of this calculation, at December 31, 2010, there were 2.7 million dilutive options outstanding (2009 1.6 million; 2008 1.5 million). These option totals at December 31, 2010 exclude 3.6 million options (2009 1.3 million; 2008 1.0 million) for which there are TSARs outstanding (Note 27), as these are not included in the dilution calculation.

2010  
68 ANNUAL  
REPORT

---

The number of shares used in the earnings per share calculations is reconciled as follows:

(in millions)	2010	2009	2008
Weighted average shares outstanding	<b>168.8</b>	166.3	153.7
Dilutive effect of weighted average number of stock options	<b>0.4</b>	0.5	1.8
Weighted average diluted shares outstanding	<b>169.2</b>	166.8	155.5

In 2010, the weighted-average number of options excluded from the computation of diluted earnings per share because their effect was not dilutive was 1,631,631 (2009 2,818,398; 2008 1,344,669).

As a result of changes in Canadian tax law, subsequent to 2010, the Company has initiated a plan to cancel the majority of the TSAR component of tandem stock option awards. The related options will not be cancelled and will be included in the calculation of diluted earnings per share in future periods.

## 10 Other comprehensive loss and accumulated other comprehensive loss

The components of Accumulated other comprehensive loss, net of tax, are as follows:

(in millions of Canadian dollars)	2010	2009 Restated (Note 2)
Unrealized foreign exchange loss on translation of the net investment in U.S. subsidiaries	\$ (308.5)	\$ (184.6)
Unrealized foreign exchange gain on translation of the U.S. dollar-denominated long-term debt designated as a hedge of the net investment in U.S. subsidiaries	372.7	249.3
Deferred loss on settled hedge instruments	(17.0)	(18.3)
Unrealized effective gains on cash flow hedges	1.9	1.7
Amounts for defined benefit pension and other post-retirement plans not recognized in income	(2,134.9)	(1,792.8)
Accumulated other comprehensive loss	\$ (2,085.8)	\$ (1,744.7)

Components of other comprehensive loss and the related tax effects are as follows:

(in millions of Canadian dollars)	<b>2010</b>	2009 Restated (Note 2)	2008 Restated (Note 2)
Accumulated other comprehensive loss January 1	\$ (1,744.7)	\$ (1,225.2)	\$ (853.4)
Other comprehensive loss:			
Unrealized foreign exchange (loss) gain on:			
Translation of the net investment in U.S. subsidiaries	(123.9)	(244.0)	302.3
Translation of the U.S. dollar-denominated long-term debt designated as a hedge of the net investment in U.S. subsidiaries (net of tax of \$(18.2) million, \$(31.7) million, and \$41.6 million, respectively)	123.4	215.0	(266.4)
Change in derivatives designated as cash flow hedges:			
Realized (gain) loss on cash flow hedges recognized in income (net of tax of \$nil, \$(1.4) million, and \$3.2 million, respectively)	(0.1)	3.4	(7.8)
Unrealized gain (loss) on cash flow hedges (net of tax of \$(0.8) million, \$(0.8) million, and \$1.4 million, respectively)	1.6	1.7	(3.7)
Change in pension and other benefits actuarial gains and losses (net of tax of \$120.5 million, \$170.8 million and \$141.2 million, respectively)	(350.7)	(511.5)	(380.1)
Change in prior service pension and other benefit costs (net of tax of \$(3.0) million, \$(5.3) million and \$6.0 million, respectively)	8.6	15.9	(16.1)
Other comprehensive loss	(341.1)	(519.5)	(371.8)
Accumulated other comprehensive loss December 31	\$ (2,085.8)	\$ (1,744.7)	\$ (1,225.2)

## 11 Change in non-cash working capital balances related to operations

(in millions of Canadian dollars)	<b>2010</b>	2009	2008
Source (use) of cash:
