AQUA AMERICA, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(In thousands of dollars, except per share amounts)
(UNAUDITED)

Note 1 Basis of Presentation

The accompanying consolidated balance sheets and statements of capitalization of Aqua America, Inc. and subsidiaries (the Company) at September 30, 2011, the consolidated statements of income and comprehensive income for the nine and three months ended September 30, 2011 and 2010, the consolidated statements of cash flow for the nine months ended September 30, 2011 and 2010, and the consolidated statement of equity for the nine months ended September 30, 2011, are unaudited, but reflect all adjustments, consisting of only normal recurring accruals, which are, in the opinion of management, necessary to present fairly the consolidated financial position, the consolidated changes in equity, the consolidated results of operations, and the consolidated cash flow for the periods presented. Because they cover interim periods, the statements and related notes to the financial statements do not include all disclosures and notes normally provided in annual financial statements and, therefore, should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2010. The results of operations for interim periods may not be indicative of the results that may be expected for the entire year. The December 31, 2010 consolidated balance sheet data presented herein was derived from the Company's December 31, 2010 audited consolidated financial statements, but does not include all disclosures and notes normally provided in annual financial statements. Certain prior period amounts have been reclassified including reporting discontinued operations (see Note 4) and to conform to the current period presentation.

Note 2 Goodwill

The following table summarizes the changes in the Company's goodwill, by business segment:

	Regulated Segment	Other	Consolidated
Balance at December 31, 2010	\$ 36,113	\$ 4,121	\$ 40,234
Goodwill acquired	870		870
Reclassifications to utility plant acquisition adjustment	(323)		(323)
Balance at September 30, 2011	\$ 36,660	\$ 4,121	\$ 40,781

Included in the Company's regulated segment goodwill balance at September 30, 2011 and December 31, 2010 is \$12,316 of goodwill associated with discontinued operations.

The reclassification of goodwill to utility plant acquisition adjustment results from a mechanism approved by the applicable public utility commission. The mechanism provides for the transfer over time, and the recovery through customer rates, of goodwill associated with certain acquisitions upon achieving certain objectives.

(UNAUDITED)

As of July 31, 2011, management performed its annual test of goodwill for impairment, in conjunction with the timing of the Company's annual five-year financial plan. Based on the Company's comparison of the estimated fair value of each reporting unit to its respective carrying amount management concluded that the estimated fair value of each reporting unit was substantially in excess of the reporting unit's carrying amount, indicating that none of the Company's goodwill was impaired.

Note 3 Acquisitions

As part of the Company's growth-through-acquisition strategy, in July 2011, the Company entered into a definitive agreement with American Water Works Company, Inc. (American Water) to purchase all of the stock of the subsidiary that holds American Water's regulated water and wastewater operations in Ohio for cash of approximately \$88,000 at closing plus certain assumed liabilities, including debt of approximately \$16,000. American Water's Ohio operations serve approximately 57,000 customers. The purchase price is subject to certain adjustments at closing, and closing is conditioned upon the closing of the Company's sale of its regulated water operations in New York to American Water, and is subject to applicable regulatory approvals. The transaction will be accounted for as a business combination and is expected to close in the first quarter of 2012.

In June 2011, the Company completed its acquisition of approximately 51 water and five wastewater systems in Texas serving approximately 5,300 customers. The total purchase price consisted of \$6,245 in cash. The pro forma effect of the business acquired is not material to the Company's results of operations.

Note 4 Discontinued Operations and Other Dispositions

Discontinued Operations In July 2011, the Company entered into a definitive agreement with Connecticut Water Service, Inc. to sell its regulated water operations in Maine for cash of approximately \$35,800 at closing plus certain assumed liabilities, including debt of approximately \$17,500. The purchase price is subject to certain adjustments at closing. This subsidiary is included in the Regulated segment, and as of September 30, 2011, the carrying amount of Maine's assets and liabilities were \$60,844 and \$48,202, respectively. The Company's Maine operations serve approximately 16,000 customers. The sale is conditioned, among other things, on the receipt of regulatory approvals, and is expected to close in the first quarter of 2012. In the third quarter, the Company recognized additional income tax expense of \$4,501 for the additional deferred tax liabilities that arise from the difference between the stock and tax basis of the Company's investment in its Aqua Maine subsidiary. The completion of this transaction will conclude the Company's operations in Maine.

In July 2011, the Company entered into a definitive agreement with American Water to sell its regulated water operations in New York for cash of approximately \$42,000 at closing plus certain assumed liabilities, including debt of approximately \$23,000. This subsidiary is included in the Regulated segment, and as of September 30, 2011, the carrying amount of New York's assets and liabilities were \$108,883 and \$66,619, respectively. In the third quarter, the Company recognized additional income tax expense of \$2,937 for the additional deferred tax liabilities that arise from the difference between the stock and tax basis of the Company's investment in its Aqua New York subsidiary. The Company's New York operations serve approximately 51,000 customers. The purchase price is subject to certain adjustments at closing, and closing is conditioned upon the closing of the Company's acquisition of American Water's regulated water and wastewater operations in Ohio, and is subject to applicable regulatory approvals. The sale is expected to close in the first quarter of 2012. The completion of this transaction will conclude the Company's operations in New York.

Based on an assessment of the sale prices and the carrying values of the Company's planned dispositions of its Maine and New York operations, there is no anticipated impairment of our long-lived assets or goodwill expected to be recognized as a result of the sale agreements. However, in the third quarter of 2011, the Company recognized an estimated loss on disposition of \$1,254 primarily due to the cessation of depreciation in its New York operations. The operating results, cash flows, and financial position of the Company's subsidiaries named above have been presented in the Company's Consolidated Statements of Income and Comprehensive Income, Consolidated Statements of Cash Flow, and Consolidated Balance Sheets as discontinued operations.

A summary of discontinued operations presented in the Consolidated Statements of Income and Comprehensive Income include the following:

Other Dispositions The following dispositions have not been presented as discontinued operations in the Company's consolidated financial statements as the Company does not believe that disclosure of the following disposed water and wastewater utility systems as discontinued operations is meaningful to the reader of the financial statements for making investment decisions either individually or in the aggregate.

In June 2011, the Company sold a water and wastewater utility system for net proceeds of \$4,106. The sale resulted in the recognition of a gain on the sale, net of expenses, of \$1,580 in the second quarter of 2011, and is reported in the consolidated statements of income and comprehensive income as a reduction to operations and maintenance expense. Further, an additional amount of contingent gain was deferred pending the final regulatory treatment afforded to such item.

In May 2011, the Company sold its regulated water and wastewater operations in Missouri for net proceeds of \$3,225. This sale of the Company's Missouri operations concluded the bulk of our regulated utility operations in Missouri.

In January 2011, the Company sold a water and wastewater utility system in Texas for net proceeds of \$3,118. The sale resulted in the recognition of a gain on the sale of these assets, net of expenses, of \$2,452. The gain is reported in the consolidated statements of income and comprehensive income as a reduction to operations and maintenance expense.

The City of Fort Wayne, Indiana (the "City") has authorized the acquisition by eminent domain of the northern portion of the utility system of one of the operating subsidiaries that the Company acquired in connection with the AquaSource acquisition in 2003. In 2008, the Company reached a settlement with the City to transition the northern portion of the system in 2008 upon receipt of the City's initial valuation payment of \$16,911. The settlement agreement specifically stated that the final valuation of the northern portion of the Company's system will be determined through a continuation of the legal proceedings that were filed challenging the City's valuation. On February 12, 2008, the Company turned over the northern portion of the system to the City upon receipt of the initial valuation payment. The proceeds received by the Company are in excess of the book value of the assets relinquished. No gain has been recognized due to the contingency over the final valuation of the assets. Once the contingency is resolved and the asset valuation is finalized, through the finalization of the litigation between the Company and the City of Fort Wayne, the amounts deferred will be recognized in the Company's consolidated income statement. On March 16, 2009, oral argument was held on certain procedural aspects with respect to the valuation evidence that may be presented and whether the Company is entitled to a jury trial. On October 12, 2010, the Wells County Indiana Circuit Court ruled that the Company is not entitled to a jury trial, and that the Wells County judge should review the City of Fort Wayne Board of Public Works' assessment based upon a "capricious, arbitrary or an abuse of discretion" standard. The Company disagreed with the Court's decision and as such on November 11, 2010, requested that the Wells County Indiana Circuit Court certify those issues for an interim appeal. The Wells County Indiana Circuit Court granted that request and on March 7, 2011, the Indiana Court of Appeals granted the Company's request to review the decision of those issues on appeal. On July 6, 2011, the Company filed its appeal with the Indiana Court of Appeals. The case is now pending before the Indiana Court of Appeals. Depending upon the outcome of all of the legal proceedings the Company may be required to refund a portion of the initial valuation payment, or may receive additional proceeds. The northern portion of the utility system relinquished represents approximately 0.4% of the Company's total assets.

Note 5 Fair Value of Financial Instruments

The carrying amount of current assets and liabilities that are considered financial instruments approximates their fair value as of the dates presented. The carrying amounts and estimated fair values of the Company's long-term debt are as follows:

	September 30, 2011	December 31, 2010
Carrying Amount	\$ 1,538,456	\$ 1,560,389
Estimated Fair Value	1,599,070	1,483,816

Included in the carrying amount of the Company's long-term debt as of September 30, 2011 and December 31, 2010, is long-term debt associated with discontinued operations of \$40,643 and \$40,932, respectively. The fair value of the Company's long-term debt as of September 30, 2011 and December 31, 2010 for its discontinued operations is \$42,708 and \$40,612, respectively.

The fair value of long-term debt has been determined by discounting the future cash flows using current market interest rates for similar financial instruments of the same duration. The Company's customers' advances for construction and related tax deposits have a carrying value of \$68,087 as of September 30, 2011, and \$66,966 as of December 31, 2010, which includes customer's advances for construction and related tax deposits associated with discontinued operations of \$1,718 and \$1,716, respectively. Their relative fair values cannot be accurately estimated because future refund payments depend on several variables, including new customer connections, customer consumption levels, and future rate increases. Portions of these non-interest bearing instruments are payable annually through 2026 and amounts not paid by the contract expiration dates become non-refundable. The fair value of these amounts would, however, be less than their carrying value due to the non-interest bearing feature.

Note 6 Net Income per Common Share

Basic net income per common share is based on the weighted average number of common shares outstanding. Diluted net income per common share is based on the weighted average number of common shares outstanding and potentially dilutive shares. The dilutive effect of employee stock-based compensation is included in the computation of diluted net income per common share. The dilutive effect of stock-based compensation is calculated using the treasury stock method and expected proceeds upon exercise or issuance of the stock-based compensation. The following table summarizes the shares, in thousands, used in computing basic and diluted net income per common share:

	Nine Months Ended		Three Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Average common shares outstanding during the period for basic computation	138,081	136,798	138,297	137,095
Dilutive effect of employee stock-based compensation	544	314	654	299
 Average common shares outstanding during the period for diluted computation	 138,625	 137,112	 138,951	 137,394

For the nine and three months ended September 30, 2011, employee stock options to purchase 933,800 shares of common stock, were excluded from the calculations of diluted net income per share as the calculated proceeds from the options' exercise were greater than the average market price of the Company's common stock during these periods. For the nine and three months ended September 30, 2010, employee stock options to purchase 2,623,273 and 1,512,197 shares of common stock, respectively, were excluded from the calculations of diluted net income per share as the calculated proceeds from the options' exercise were greater than the average market price of the Company's common stock during these periods.

Note 7 Stock-based Compensation

Under the Company's 2009 Omnibus Equity Compensation Plan (the "2009 Plan"), as approved by the Company's shareholders to replace the 2004 Equity Compensation Plan (the "2004 Plan"), stock options, stock units, stock awards, stock appreciation rights, dividend equivalents, and other stock-based awards may be granted to employees, non-employee directors, and consultants and advisors. The 2009 Plan authorizes 5,000,000 shares for issuance under the plan. A maximum of 50% of the shares available for issuance under the 2009 Plan may be issued as restricted stock and the maximum number of shares that may be subject to grants under the Plan to any one individual in any one year is 200,000. Awards under the 2009 Plan are made by a committee of the Board of Directors. At September 30, 2011, 4,133,278 shares underlying stock-based compensation awards were still available for grants under the 2009 Plan. No further grants may be made under the 2004 Plan.

Included within the Company's stock-based compensation for the nine months ended September 30, 2011 and 2010 is \$77 and \$80, respectively, and for the three months ended September 30, 2011 and 2010 is \$27 and \$23, respectively, of stock-based compensation associated with discontinued operations.

Performance Share Units A performance share unit (PSU) represents the right to receive a share of the Company's common stock if specified performance goals are met over the three year performance period specified in the grant, subject to certain exceptions through the three year vesting period. Each grantee is granted a target award of PSUs, and may earn between 0% and 200% of the target amount depending on the Company's performance against the performance goals. During the nine and three months ended September 30, 2011, the Company recorded stock-based compensation related to PSUs as a component of operations and maintenance expense of \$697, and \$336, respectively. The following table summarizes nonvested PSU transactions for the nine months ended September 30, 2011:

	Number of Share Units	Weighted Average Fair Value
Nonvested share units at beginning of period		\$
Granted	109,375	24.38
Performance criteria adjustment	31,127	24.38
Forfeited	(2,039)	24.38
Vested		
Share unit awards issued		
Nonvested share units at end of period	138,463	\$ 24.38

The fair value of PSUs was estimated at the grant date based on the probability of satisfying the performance conditions associated with the PSUs using the Monte Carlo valuation method. The per unit weighted-average fair value at the date of grant for PSUs granted during the nine months ended September 30, 2011 was \$24.38. The fair value of each PSU grant is amortized into compensation expense on a straight-line basis over their respective vesting periods, which range from 24 to 36 months. The accrual of compensation costs is based on our estimate of the final expected value of the award, and is adjusted as required. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. The recording of compensation expense for PSUs has no impact on net cash flows.

Restricted Stock Units A restricted stock unit (RSU) represents the right to receive a share of the Company's common stock. RSUs are eligible to be earned at the end of a specified restricted period, generally three years, beginning on the date of grant. During the nine and three months ended September 30, 2011, the Company recorded stock-based compensation related to awards of RSUs as a component of operations and maintenance expense of \$243, and \$102, respectively. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. The following table summarizes nonvested RSU transactions for the nine months ended September 30, 2011:

	Number of Stock Units	Weighted Average Fair Value
Nonvested stock units at beginning of period		\$
Granted	44,342	22.21
Vested		
Forfeited		
Nonvested stock units at end of period	44,342	\$ 22.21

Stock Options The fair value of stock options is estimated at the grant date using the Black-Scholes option-pricing model. The following table provides compensation costs for stock-based compensation related to stock options granted in prior periods:

	Nine Months Ended September 30,		Three Months Ended September 30,	
	2011	2010	2011	2010
Stock-based compensation for stock options within operations and maintenance expenses	\$ 1,105	\$ 1,540	\$ 337	\$ 526
Income tax benefit	561	502	141	201

There were no stock options granted during the nine months ended September 30, 2011. During the second quarter of 2011, the Company changed its estimation assumptions related to its historical stock option forfeitures which resulted in a favorable adjustment to compensation expense of \$644 and additional income tax expense of \$52.

Note 8 Pension Plans and Other Postretirement Benefits

The Company maintains qualified defined benefit pension plans, nonqualified pension plans and other postretirement benefit plans for certain of its employees. The net periodic benefit cost is based on estimated values and an extensive use of assumptions about the discount rate, expected return on plan assets, the rate of future compensation increases received by the Company's employees, mortality, turnover, and medical costs. The following tables provide the components of net periodic benefit costs:

Included within the Company's net periodic benefit costs for the nine months ended September 30, 2011 and 2010 is \$1,118 and \$1,121, respectively, and for the three months ended September 30, 2011 and 2010 is \$405 and \$333, respectively, of net periodic benefit costs associated with discontinued operations.

The Company made cash contributions of \$16,840 to its defined benefit pension plans during the first nine months of 2011, and intends to make cash contributions of \$300 to the plans during the remainder of 2011. In addition, the Company expects to make cash contributions of \$2,012 for the funding of its other postretirement benefit plans during the remainder of 2011.

Note 9 Water and Wastewater Rates

During the first nine months of 2011, the Company's operating divisions in North Carolina, Ohio, Indiana, Pennsylvania, and Maine, were granted base rate increases designed to increase total operating revenues on an annual basis by \$6,087.

During the first nine months of 2011, the Company's operating division in Pennsylvania received infrastructure rehabilitation surcharges of \$13,150. Infrastructure rehabilitation surcharges are capped as a percentage of base rates, generally at 5% to 9% of base rates, and are reset to zero when new base rates that reflect the costs of those additions become effective or when a utility's earnings exceed a regulatory benchmark.

In October 2010, the Company's operating subsidiary in Texas began to bill interim rates for one of its divisions in accordance with authorization from the Texas Commission on Environmental Quality (TCEQ). The additional revenue billed and collected prior to the TCEQ's final ruling is subject to refund based on the outcome of the rate case. The rate case is expected to conclude with the issuance of an order in the fourth quarter of 2011. However, based on the Company's review of the rate proceeding during the third quarter of 2011, a revenue reserve was removed and additional operating revenues were recognized of \$3,098. As of September 30, 2011, to date we have recognized \$6,195 of revenue that is subject to refund based on the outcome of the final commission order. Based on the Company's review of the present circumstances, a reserve is not considered necessary for the revenue recognized to date.

Note 11 Segment Information

The Company has identified thirteen operating segments and has one reportable segment named the Regulated segment. The reportable segment is comprised of twelve operating segments for the Company's water and wastewater regulated utility companies which are organized by the states where we provide these services. In addition, one segment is not quantitatively significant to be reportable and is comprised of the businesses that provide on-site septic tank pumping, sludge hauling services and certain other non-regulated water and wastewater services. This segment is included as a component of Other in the tables below. Also included in Other are corporate costs that have not been allocated to the Regulated segment and intersegment eliminations.

Note 12 Commitments and Contingencies

The Company is routinely involved in various disputes, claims, lawsuits and other regulatory and legal matters, including both asserted and unasserted legal claims, in the ordinary course of business. The status of each such matter, referred to herein as a loss contingency, is reviewed and assessed in accordance with applicable accounting rules regarding the nature of the matter, the likelihood that a loss will be incurred, and the amounts involved. As of September 30, 2011, the aggregate amount of \$10,910 is accrued for loss contingencies and is reported in the Company's consolidated balance sheet as other accrued liabilities and other liabilities. These accruals represent management's best estimate of probable loss (as defined in the accounting guidance) for loss contingencies or the low end of a range of losses if no single probable loss can be estimated. For some loss contingencies, the Company is unable to estimate the amount of the probable loss or range of probable losses. While the final outcome of these loss contingencies cannot be predicted with certainty, and unfavorable outcomes could negatively impact the Company, at this time in the opinion of management, the final resolution of these matters are not expected to have a material adverse effect on the Company's financial position, results of operations or cash flows. Further, the Company has insurance coverage for certain of these loss contingencies, and as of September 30, 2011, estimates that approximately \$1,191 of the amount accrued for these matters are probable of recovery through insurance, which amount is also reported in the Company's consolidated balance sheet as deferred charges and other assets, net.

Note 13 Income Taxes

As of September 30, 2011, the Company recorded a deferred tax asset for a Federal net operating loss (NOL) carryforward of \$46,135, and for the Company s Pennsylvania operating subsidiary, a state NOL of \$20,621. The Company believes the Federal and state NOL carryforwards are more likely than not to be recovered and require no valuation allowance. The Company s Federal and state NOL carryforwards do not begin to expire until 2030 and 2031, respectively.

On October 5, 2011, the Company received from the Internal Revenue Service its 2010 income tax refund of \$33,600. The refund resulted from a substantial portion of the Company s capital expenditures qualifying for either bonus depreciation or the 100% expensing allowance.

Note 14 Recent Accounting Pronouncements

In September 2011, the Financial Accounting Standards Board (FASB) issued revised accounting guidance for accounting for intangible assets, which is intended to reduce the cost and complexity of the annual goodwill impairment test by permitting an entity the option of performing a qualitative assessment to determine whether further impairment testing is necessary. The revised guidance is effective for annual periods beginning after December 15, 2011. The Company will adopt the provisions of the revised guidance as of January 1, 2012, and the Company does not expect the impact of the adoption of the revised guidance to have an impact on the Company s consolidated results of operations or consolidated financial position.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-looking Statements

This Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of this Quarterly Report contain, in addition to historical information, forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements address, among other things: our belief in our ability to renew our short-term lines of credit; the impact and the actions we may need to take if we are unable to obtain sufficient capital; the projected impact of various legal proceedings; the projected effects of recent accounting pronouncements; prospects, plans, objectives, expectations and beliefs of management, as well as information contained in this report where statements are preceded by, followed by or include the words believes, expects, anticipates, plans, future, potential, probably, predictions, intends, will, continue or the negative of such terms or similar expressions. Forward-looking statements are based on a number of assumptions concerning future events, and are subject to a number of risks, uncertainties and other factors, many of which are outside our control, which could cause actual results to differ materially from those expressed or implied by such statements. These risks and uncertainties include, among others: the effects of regulation, abnormal weather, changes in capital requirements and funding, acquisitions, changes to the capital markets, and our ability to assimilate acquired operations, as well as those risks, uncertainties and other factors discussed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010 under the captions Risk Factors and Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere in such report. As a result, readers are cautioned not to place undue reliance on any forward-looking statements. We undertake no obligation to update or revise forward-looking statements, whether as a result of new information, future events or otherwise.

General Information

Nature of Operations Aqua America, Inc. (we or us), a Pennsylvania corporation, is the holding company for regulated utilities providing water or wastewater services to what we estimate to be approximately 3 million people in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, New York, Florida, Indiana, Virginia, Maine, and Georgia. Our largest operating subsidiary, Aqua Pennsylvania, Inc., provides water or wastewater services to approximately one-half of the total number of people we serve, who are located in the suburban areas in counties north and west of the City of Philadelphia and in 25 other counties in Pennsylvania. Our other subsidiaries provide similar services in 11 other states. In July 2011, we entered into a definitive agreement to purchase all of American Water Works Company, Inc.'s regulated operations in Ohio (the Ohio acquisition), which serve approximately 57,000 customers, and to simultaneously sell our regulated water and wastewater operations in New York, which serve approximately 51,000 customers. Also, in July 2011, we entered into a definitive agreement to sell our operations in Maine, which serve approximately

16,000 customers. The Ohio acquisition will be financed by the issuance of long-term and / or short-term debt. The proceeds from the dispositions of our operations in New York and Maine will be used to paydown a portion of our short-term debt and other general corporate purposes. These transactions are conditioned, among other things, on the receipt of regulatory approvals, and are expected to close in the first quarter of 2012. We are accounting for the sale of our water and wastewater operations in New York and Maine as discontinued operations. The completion of these transactions will conclude our operations in New York and Maine. In December 2010, we entered into a definitive agreement to sell our regulated water and wastewater operations in Missouri, which served approximately 3,900 customers. The sale of our utility in Missouri closed in May 2011, concluding the bulk of our utility operations in Missouri. In addition, we provide water and wastewater service through operating and maintenance contracts with municipal authorities and other parties close to our utility companies' service territories as well as sludge hauling, septage and grease services, backflow prevention services, and certain other non-regulated water and wastewater services.

Aqua America, Inc., which prior to its name change in 2004 was known as Philadelphia Suburban Corporation, was formed in 1968 as a holding company for its primary subsidiary, Aqua Pennsylvania, Inc., formerly known as Philadelphia Suburban Water Company. In the early 1990s, we embarked on a growth-through-acquisition strategy focused on water and wastewater operations. Our most significant transactions to date have been the merger with Consumers Water Company in 1999, the acquisition of the regulated water and wastewater operations of AquaSource, Inc. in 2003, the acquisition of Heater Utilities, Inc. in 2004, and the acquisition of New York Water Service Corporation in 2007. Since the early 1990s, our business strategy has been primarily directed toward the regulated water and wastewater utility industry and has extended our regulated operations from southeastern Pennsylvania to include operations in 11 other states.

Financial Condition

During the first nine months of 2011, we had \$229,006 of capital expenditures, including capital expenditures associated with discontinued operations of \$2,931, and repaid debt and made sinking fund contributions and other loan repayments of \$46,822, including repayments of debt associated with discontinued operations of \$345. The capital expenditures were related to improvements to treatment plants, new and rehabilitated water mains, tanks, hydrants, and service lines, well and booster improvements, and other enhancements and improvements.

At September 30, 2011, we had \$7,988 of cash and cash equivalents compared to \$5,934 at December 31, 2010. During the first nine months of 2011, we used the proceeds from internally generated funds, the sale of other assets, and the sale or issuance of common stock through our equity compensation plan and dividend reinvestment plan, to fund the cash requirements discussed above and to pay dividends. On October 5, 2011, we received from the Internal Revenue Service our 2010 income tax refund of \$33,600. This refund results from a substantial portion of our capital expenditures qualifying for either bonus depreciation or the 100% expensing allowance. The proceeds will be used to paydown a portion of our short-term debt and other general corporate purposes.

At September 30, 2011, our \$95,000 unsecured revolving credit facility, which expires in May 2012, had \$30,399 available for borrowing, and we have begun discussions on the renewal terms for another multi-year facility with our lenders. At September 30, 2011, we had short-term lines of credit of \$164,500, which includes a short-term line of credit associated with a discontinued operation of \$4,000, of which \$61,522 was available. We did not renew one of our credit lines in the amount of \$2,500, which expired on July 1, 2011, as it was no longer needed. One of our short-term lines of credit is an Aqua Pennsylvania \$100,000 364-day unsecured revolving credit facility with three banks, which is used to provide working capital, and as of September 30, 2011, \$19,763 was available.

Our short-term lines of credit of \$164,500 are subject to renewal on an annual basis. Although we believe we will be able to renew these facilities, there is no assurance that they will be renewed, or what the terms of any such renewal will be. The United States credit and liquidity crisis that occurred in 2008 and 2009 caused substantial volatility in capital markets, including credit markets and the banking industry, generally reduced the availability of credit from financing sources, and could re-occur in the future. If in the future, our credit facilities are not renewed or our short-term borrowings are called for repayment, we would have to seek alternative financing sources; however, there can be no assurance that these alternative financing sources would be available on terms acceptable to us. In the event we are not able to obtain sufficient capital, we may need to reduce our capital expenditures and our ability to pursue acquisitions that we may rely on for future growth could be impaired.

The Company's consolidated balance sheet historically has had a negative working capital position whereby routinely our current liabilities exceed our current assets. Management believes that internally generated funds along with existing credit facilities and the proceeds from the issuance of long-term debt and common stock will be adequate to provide sufficient working capital to maintain normal operations and to meet our financing requirements for at least the next twelve months.

Results of Operations

Analysis of First Nine Months of 2011 Compared to First Nine Months of 2010

Unless specifically noted, the following discussion of the Company's results of operations for the first nine months of 2011 refers to the Company's results of operations from continuing operations.

Revenues increased \$24,253 or 4.7% primarily due to additional revenues associated with increased water and wastewater rates of \$27,713 and additional water and wastewater revenues of \$2,630 associated with a larger customer base due to acquisitions. Included as a component of the rates impact is \$3,098 of additional revenue recognized in the third quarter of 2011 from our revised estimate of the final outcome of a rate proceeding. Offsetting these increases were decreases in customer water consumption largely due to unfavorable weather conditions in many of our service territories during the third quarter of 2011, as well as an increase in water conservation awareness by our customers.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

(In thousands of dollars, except per share amounts)

Operations and maintenance expenses increased by \$2,087 or 1.1% primarily due to increased water production costs of \$3,023, an increase in postretirement benefits expenses of \$1,964, increases in operating costs associated with acquired utility systems and other growth ventures of \$1,954, increases in fuel costs for our service vehicles of \$869, and normal increases in other operating costs. Offsetting these increases were the gains on the sales of our utility systems recognized during the first nine months of 2011 of \$4,319, the effect of the write-off in 2010 of previously deferred regulatory expenses of \$2,082, decreased insurance expense of \$1,882, and reduced expenses of \$870 associated with the disposition of utility systems. The increase in water production costs is primarily due to an increase in the cost of purchased water.

Depreciation expense increased \$2,249 or 2.9% due to the utility plant placed in service since September 30, 2010. Amortization decreased \$4,909 primarily due to the additional expense recognized in the first nine months of 2010 of \$5,168 resulting from the recovery of our costs associated with a completed rate filing in Texas, offset by the amortization of the costs associated with, and other costs being recovered in, various rate filings.

Taxes other than income taxes increased by \$965 or 3.0% primarily due to an increase in taxes assessed resulting from the pumping of ground water of \$759.

Interest expense increased by \$4,039 or 7.4% primarily due to additional borrowings to finance capital projects, offset partially by decreased interest rates on long-term debt.

Allowance for funds used during construction (AFUDC) increased by \$1,815 primarily due to an increase in the average balance of proceeds held from tax-exempt bond issuances that are restricted to funding certain capital projects.

Gain on sale of other assets totaled \$475 in the first nine months of 2011 and \$2,294 in the first nine months of 2010. The decrease of \$1,819 is principally due to a gain on the sale of an investment that occurred in the first quarter of 2010.

Our effective income tax rate was 33.3% in the first nine months of 2011 and 39.2% in the first nine months of 2010. The effective income tax rate decreased as a result of the recognition in 2011 of the net state income tax benefit of \$11,193 associated with 100% bonus depreciation for qualifying capital additions.

Income from continuing operations increased by \$22,088 or 24.3%, in comparison to the same period in 2010 primarily as a result of the factors described above. On a diluted per share basis, income from continuing operations increased \$0.15 reflecting the change in income from continuing operations and a 1.1% increase in the average number of common shares outstanding. As compared to the first nine months of 2010, income from continuing operations adjusted to exclude the net state income tax benefit associated with 100% bonus depreciation, a non-GAAP financial measure, would have increased by \$0.07 per share. The increase in the number of shares outstanding is primarily a result of the additional shares sold or issued through our dividend reinvestment plan and equity compensation plan.

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

(In thousands of dollars, except per share amounts)

Income from discontinued operations decreased by \$8,141 or \$0.06 per diluted share, in comparison to the same period in 2010 primarily as a result of the income tax expense recognized in the third quarter of 2011 of \$7,438 for the additional deferred tax liabilities that arise from the difference between the stock and tax basis of the Company's investment in its discontinued operations.

Net income attributable to common shareholders increased by \$13,947 or 14.7%, in comparison to the same period in 2010 primarily as a result of the factors described above. On a diluted per share basis, earnings increased \$0.10 reflecting the change in net income attributable to common shareholders and a 1.1% increase in the average number of common shares outstanding. The increase in the number of shares outstanding is primarily a result of the additional shares sold or issued through our dividend reinvestment plan and equity compensation plan.

Results of Operations

Analysis of Third Quarter of 2011 Compared to Third Quarter of 2010

Unless specifically noted, the following discussion of the Company's results of operations for the third quarter of 2011 refers to the Company's results of operations from continuing operations.

Revenues increased \$3,851 or 2.0% primarily due to additional revenues associated with increased water and wastewater rates of \$9,212 and additional water and wastewater revenues of \$1,341 associated with a larger customer base due to acquisitions. Included as a component of the rates impact is \$3,098 of additional revenue recognized in the third quarter of 2011 from our revised estimate of the final outcome of a rate proceeding. Offsetting these increases were decreases in customer water consumption largely due to unfavorable weather conditions in many of our service territories during the third quarter of 2011 as well as an increase in water conservation awareness by our customers.

Operations and maintenance expenses increased by \$1,131 or 1.6% primarily due to increases in operating costs associated with acquired utility systems and other growth ventures of \$1,133, an increase in postretirement benefits expenses of \$509, increases in fuel costs for our service vehicles of \$420, and normal increases in other operating costs. Offsetting these increases was a decrease in insurance expense of \$1,216, the effect of the write-off in the third quarter of 2010 of previously deferred regulatory expenses of \$1,071, and reduced expenses of \$596 associated with the disposition of utility systems.

Depreciation expense increased \$638 or 2.4% due to the utility plant placed in service since September 30, 2010.

Amortization decreased \$2,236 primarily due to the additional expense recognized in the third quarter of 2010 of \$1,737 resulting from the recovery of our costs associated with a completed rate filing in Texas, offset by the amortization of the costs associated with, and other costs being recovered in, various rate filings.

Taxes other than income taxes decreased by \$118 or 1.0% primarily due to decreases in taxes assessed.

Interest expense increased by \$986 or 5.3% primarily due to additional borrowings to finance capital projects, offset partially by decreased interest rates on long-term debt.

Allowance for funds used during construction (AFUDC) increased by \$786 primarily due to an increase in the average balance of proceeds held from tax-exempt bond issuances that are restricted to funding certain capital projects.

Gain on sale of other assets totaled \$216 in the third quarter of 2011 and \$291 in the third quarter of 2010. The decrease of \$75 is principally due to the timing of sales of land and other property.

Our effective income tax rate was 35.2% in the third quarter of 2011 and 38.9% in the third quarter of 2010. The effective income tax rate decreased as a result of the recognition in 2011 of the net state income tax benefit of \$3,382 associated with 100% bonus depreciation for qualifying capital additions.

Income from continuing operations increased by \$5,186 or 12.9%, in comparison to the same period in 2010 primarily as a result of the factors described above. On a diluted per share basis, income from continuing operations increased \$0.04 reflecting the change in income from continuing operations and a 1.1% increase in the average number of common shares outstanding. As compared to the third quarter of 2010, income from continuing operations adjusted to exclude the net state income tax benefit associated with 100% bonus depreciation, a non-GAAP financial measure, would have increased by \$0.01 per share. The increase in the number of shares outstanding is primarily a result of the additional shares sold or issued through dividend reinvestment plan and our equity compensation plan.

Income from discontinued operations decreased by \$7,814 or \$0.05 per diluted share, in comparison to the same period in 2010 primarily as a result of the income tax expense recognized in the third quarter of 2011 of \$7,438 for the additional deferred tax liabilities that arise from the difference between the stock and tax basis of the Company's investment in its discontinued operations.

Net income attributable to common shareholders decreased by \$2,628 or 6.0%, in comparison to the same period in 2010 primarily as a result of the factors described above. On a diluted per share basis, earnings decreased \$0.02 reflecting the change in net income attributable to common shareholders and a 1.1% increase in the average number of common shares outstanding. The increase in the number of shares outstanding is primarily a result of the additional shares sold or issued through our dividend reinvestment plan and equity compensation plan.

Non-Generally Accepted Accounting Principle (Non-GAAP) Financial Measures

In addition to reporting income from continuing operations and income from continuing operations per common share, U.S. GAAP financial measures, we are presenting below income from continuing operations before net state income tax benefit associated with 100% bonus depreciation and income from continuing operations per common share before net state income tax benefit associated with 100% bonus depreciation, which are considered non-GAAP financial measures. The Company is providing disclosure of the reconciliation of these non-GAAP measures to their most comparable GAAP financial measures. The Company believes that the non-GAAP financial measures provide investors the ability to measure the Company's financial operating performance excluding the net state income tax benefit associated with 100% bonus depreciation, which is more indicative of the Company's ongoing performance, and is more comparable to measures reported by other companies. The Company further believes that the presentation of these non-GAAP financial measures is useful to investors as a more meaningful way to compare the Company's operating performance against its historical financial results and to assess the underlying profitability of our core business. As currently enacted, 100% bonus depreciation is in effect for qualifying capital additions placed in service from September 8, 2010 through December 31, 2011.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are subject to market risks in the normal course of business, including changes in interest rates and equity prices. There have been no significant changes in our exposure to market risks since December 31, 2010. Refer to Item 7A of the Company's Annual Report on Form 10-K for the year ended December 31, 2010 for additional information.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of the end of the period covered by this report are effective such that the information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure.

(b) Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

The City of Fort Wayne, Indiana (the "City") authorized the acquisition by eminent domain of the northern portion of the utility system of one of the Company's operating subsidiaries in Indiana. In 2008, we reached a settlement agreement with the City to transition this portion of the system in 2008 upon receipt of the City's initial valuation payment of \$16,910,500. The settlement agreement specifically stated that the final valuation of the system will be determined through a continuation of the legal proceedings that were filed challenging the City's valuation. On February 12, 2008, we turned over the northern portion of the system to the City upon receipt of the initial valuation payment. The proceeds received by the Company are in excess of the book value of the assets relinquished. No gain has been recognized due to the contingency over the final valuation of the assets. Once

Table of Contents

AQUA AMERICA, INC. AND SUBSIDIARIES

the contingency is resolved and the asset valuation is finalized, through the finalization of the litigation between the Company and the City of Fort Wayne, the amounts deferred will be recognized in the Company's consolidated income statement. On March 16, 2009, oral argument was held before the Allen County Circuit Court on certain procedural aspects with respect to the valuation evidence that may be presented and whether we are entitled to a jury trial. On October 12, 2010, the Wells County Indiana Circuit Court ruled that the Company is not entitled to a jury trial, and that the Wells County judge should review the City of Fort Wayne Board of Public Works' assessment based upon a capricious, arbitrary or an abuse of discretion standard. The Company disagreed with the Court's decision and as such, on November 11, 2010, requested that the Wells County Indiana Circuit Court certify those issues for an interim appeal. The Wells County Circuit Court granted that request and on March 7, 2011, the Indiana Court of Appeals granted the Company's request to review the decision of those issues on appeal. On July 6, 2011, the Company filed its appeal with the Indiana Court of Appeals. The case is now pending before the Indiana Court of Appeals. Depending upon the ultimate outcome of all of the legal proceedings we may be required to refund a portion of the initial valuation payment, or may receive additional proceeds. The northern portion of the system relinquished represented approximately 0.40% of Aqua America's total assets.

A lawsuit was filed by a husband and wife who lived in a house abutting a percolation pond at a wastewater treatment plant owned by one of the Company's subsidiaries, Aqua Utilities Florida, Inc., in Pasco County, Florida. The lawsuit was originally filed in August 2006 in the circuit court for the Sixth Judicial Circuit in and for Pasco County, Florida and has been amended several times by the plaintiffs. The lawsuit alleged our subsidiary was negligent in the design, operation and maintenance of the plant, resulting in bodily injury to the plaintiffs and various damages to their property. Subsequent amendments to the complaint included additional counts alleging trespass, nuisance, and strict liability. A trial of this matter during January 2011 resulted in a judicial dismissal of the count for strict liability and jury verdicts in favor of the Company on the remaining counts. On June 16, 2011, the plaintiffs agreed to dismiss their appeals and to release all claims against our subsidiary and the Company, which resulted in the conclusion of the original plaintiffs' litigation against our subsidiary. In the third quarter of 2008, approximately thirty-five additional plaintiffs, associated with approximately eight other homes in the area, filed a lawsuit with the same court making similar allegations against our subsidiary with respect to the operation of the facility. No trial date has been set for this lawsuit, but some of these plaintiffs testified in the trial of the original lawsuit in which all allegations were resolved in the Company's favor. The lawsuit has been submitted to our insurance carriers, who have reserved their rights with respect to various portions of the plaintiffs' claims. Based on the ultimate outcome of the litigation, we may or may not have insurance coverage for parts or all of the claim. The Company continues to assess this matter and any potential loss. At this time, the Company believes that the estimated amount of any potential loss would not be material to the Company's consolidated results of operations or consolidated financial condition.

In July 2010 one of the Company's subsidiaries, Aqua Pennsylvania, Inc., received a notice of violation from the Pennsylvania Department of Environmental Protection (the DEP). The notice of violation resulted from the subsidiary's commencement of construction of a water tank prior to receipt of a construction permit from DEP. The permit was subsequently received. On September 29, 2010, the DEP notified the Company of a proposed penalty of \$120,000 in connection with the violation. A settlement has been reached with the DEP and the penalty amount was reduced to \$80,000 as of August 1, 2011, which was paid on August 10, 2011

Item 1A. Risk Factors

There have been no material changes to the risks disclosed in our Annual Report on Form 10-K for the year ended December 31, 2010 (Form 10-K) under Part 1, Item 1A Risk Factors.

Total	151	\$ 21.78		548,278

- (1) These amounts consist of shares we purchased from employees who elected to pay the exercise price of their stock options (and then hold shares of the stock) upon exercise by delivering to us (and, thus, selling) shares of Aqua America common stock in accordance with the terms of our equity compensation plans that were previously approved by our shareholders and disclosed in our proxy statements. This feature of our equity compensation plan is available to all employees who receive stock-based compensation under the plans. We purchased these shares at their fair market value, as determined by reference to the closing price of our common stock on the day prior to the option exercise.
- (2) On August 5, 1997, our Board of Directors authorized a common stock repurchase program that was publicly announced on August 7, 1997, for up to 1,007,351 shares. No repurchases have been made under this program since 2000. The program has no fixed expiration date. The number of shares authorized for purchase was adjusted as a result of the stock splits affected in the form of stock distributions since the authorization date.
