Based on recent media reports regarding historical stock option practices at other publicly traded companies, the Company's Audit Committee has initiated an internal review on a proactive basis into the Company's historical stock option practices, including a review of the Company's underlying option grant documentation and procedures and related accounting. In accordance with New York Stock Exchange requirements, the Audit Committee is composed solely of independent directors. The Audit Committee's internal review is being conducted with the assistance of independent legal counsel and outside accounting experts. The Audit Committee has not reached any final conclusions as the internal review is not complete and is continuing. The Company's independent registered public accounting firm has been informed about the internal review. The Company has also voluntarily reported the commencement of this review to the Securities and Exchange Commission.

Due to the volume of data subject to this review, the Company has been unable to complete and file by the prescribed due date its Quarterly Report on Form 10-Q for the fiscal quarter ended April 29, 2006. The Company is working diligently to file its Quarterly Report on Form 10-Q by the fifth calendar day following the required filing date as permitted by Rule 12b-25. At this time, the Company is unable to determine whether any accounting adjustment to non-cash stock-based compensation expense might be required, the final amount of any such accounting adjustment, if required, or whether such an adjustment will require a restatement of prior period financial statements or will be reflected in its fiscal 2006 results of operations. The Company is also evaluating whether previously deducted compensation related to exercised stock options might be non-deductible under Section 162(m) of the Internal Revenue Code, which could result in additional taxes and interest related to the prior deductions and the loss of

future deductions. However, the Company has not finalized its assessment of this tax-related matter.

The internal review is focused principally upon the period from 1990 to 2001. Since October 2001, the Company has utilized pre-determined effective grant dates and generally pre-determined grant levels for its stock option program. Stock option grants from October 2001 to the present have consistently followed these processes.

Prior to October 2001, the Company granted stock options principally utilizing a process in which an authorized committee of the Board would approve stock option grants from time to time through unanimous consent resolutions with specified effective dates that generally preceded the date on which the consents were executed by members of the applicable committee. The Company has historically considered the effective date specified in the written consents by the applicable option committee as the accounting measurement date for determining stock-based compensation expense under APB 25.
