PERFORMANCE DATA QUOTED REPRESENTS PAST PERFORMANCE, WHICH IS NO GUARANTEE OF FUTURE RESULTS, AND CURRENT PERFORMANCE MAY BE LOWER OR HIGHER THAN THE FIGURES SHOWN. FOR THE MOST RECENT MONTH-END PERFORMANCE FIGURES, PLEASE VISIT VANKAMPEN.COM OR SPEAK WITH YOUR FINANCIAL ADVISOR. INVESTMENT RETURNS, NET ASSET VALUE (NAV) AND COMMON SHARE MARKET PRICE WILL FLUCTUATE AND TRUST SHARES, WHEN SOLD, MAY BE WORTH MORE OR LESS THAN THEIR ORIGINAL COST.

NAV per share is determined by dividing the value of the trust's portfolio securities, cash and other assets, less all liabilities and preferred shares, by the total number of common shares outstanding. The common share market price is the price the market is willing to pay for shares of the trust at a given time. Common share market price is influenced by a range of factors, including supply and demand and market conditions. Total return assumes an investment at the beginning of the period, reinvestment of all distributions for the period in accordance with the trust's dividend reinvestment plan, and sale of all shares at the end of the period. The trust's adviser has waived or reimbursed fees and expenses from time to time; absent such waivers/ reimbursements the trust's returns would have been lower.

The Lehman Brothers U.S. Corporate High Yield 2% Issuer Cap Index is an unmanaged, broad based index that reflects the general performance of the U.S. dollar denominated, fixed-rate, non-investment grade, taxable corporate bond market. Issuers are capped at 2% of the index. It is not possible to invest directly in an index.

Trust Report

FOR THE SIX-MONTH PERIOD ENDED JUNE 30, 2007

MARKET CONDITIONS

Moderate economic growth, accommodating Treasury yields, low defaults and reasonably good earnings combined to push high-yield debt prices higher during the first quarter of 2007. As a result, spreads tightened by two basis points for the quarter to close at 297 basis points over Treasuries, and the high-yield sector outperformed both equities and Treasuries. During that time, investors seemed confident that slower, but moderate economic growth and lower interest rates would continue to be positive for high-yield companies. In the second quarter, however, the high-yield market faced a host of headwinds, including higher volatility, rising interest rates, ongoing problems in the sub-prime mortgage market, and heavy new issue supply. The new issue calendar was particularly heavy in May and June and included many aggressive, lower-rated deals, some of which had to be postponed late in the quarter due to market conditions and a general lack of interest. These factors contributed to a decline in high-yield prices in June and only a slightly positive return for the sector for the overall quarter. Nonetheless, high-yield still outperformed Treasuries for the quarter, but underperformed equities. Spreads widened by 18 basis points to close the period 16 basis points wider than at the beginning of the year, but still much tighter than they have historically been. These tight spreads generally reflected many factors that remained positive for the high-yield market, including very low default rates, moderate economic growth, global demand for high yield, and solid corporate earnings.

The Federal Open Market Committee (the "Fed") left the target federal funds rate unchanged at 5.25 percent throughout the reporting period, but stated that inflation risks still remain a concern. Early in the year, when first-quarter gross domestic product (GDP) growth slowed to just 0.7 percent, the market began to speculate that the Fed might ease monetary policy and reduce the federal funds rate, but as the economic outlook began to improve and inflation began to moderate, these expectations dissipated as it became apparent the Fed would remain on hold.

The high-yield market benefited from ongoing strong demand as investors continued to reach for yield. As such, CCC rated securities outperformed higher-quality issues for the overall period. Industry returns varied considerably, but for the overall period, transportation services, wireless communications, and cable turned in the best performance while finance companies, home construction, and utilities were the worst performers.

2

PERFORMANCE ANALYSIS

The Trust's return can be calculated based upon either the market price or the net asset value (NAV) of its shares. NAV per share is determined by dividing the value of the Trust's portfolio securities, cash and other assets, less all liabilities and preferred shares, by the total number of common shares outstanding, while market price reflects the supply and demand for the shares. As a result, the two returns can differ, as they did during the reporting period. The Trust underperformed its benchmark index, the Lehman Brothers U.S. Corporate High Yield 2% Issuer Cap Index, on both an NAV and market price basis.

TOTAL RETURNS FOR THE SIX-MONTH PERIOD ENDED JUNE 30, 2007

Performance data quoted represents past performance, which is no guarantee of future results, and current performance may be lower or higher than the figures shown. Investment return, net asset value and common share market price will fluctuate and Trust shares, when sold, may be worth more or less than their original cost. See Performance Summary for additional performance information and index definition.

Although high-yield spreads widened in the latter months of the reporting period, they still remained tight by historical standards. As such, we continue to believe there is a strong likelihood that spreads will widen, which led us to maintain the Trust's higher credit-rating profile. Although this defensive positioning was beneficial late in the period when spreads widened, it detracted from performance for the overall period as lower-quality bonds generally outperformed.

The Trust's interest-rate positioning was also somewhat defensive as we maintained a lower relative duration (a measure of interest rate sensitivity) throughout the period. During the first quarter of the year, this positioning dampened performance as interest rates generally declined. In the second quarter, however, interest rates rose and the lower duration proved additive to returns. As a result, the Trust's duration had a minimal impact on performance for the overall period.

Strong security selection in various sectors, including energy and utilities, added to relative returns, as did an underweight to the buildings products/home builders sector early in the period. Conversely, security selection in auto/vehicle parts and telecommunication services detracted from performance.

We continued to seek to maintain a balanced and well-diversified portfolio while allowing for strategic overweights in securities and sectors that we believed possessed the most attractive risk profiles. In terms of issuer size, we

3

focus on larger companies because of their financial flexibility, their ability to withstand less favorable financial conditions, and their superior access to capital markets. These strategies led to major sector overweights in the energy, health care, and food and tobacco sectors as of the end of the period. The largest sectors underweights were in technology, cable, telecom, and media.

The trust uses leverage to enhance its dividend to common shareholders. The trust borrows money at short-term rates through the issuance of preferred shares. The proceeds are reinvested in longer-term securities, taking advantage of the difference between short- and longer-term rates. During the course of the period, the Trust's borrowing activity became more expensive, thereby tempering its benefits.

The Trustees have approved a procedure whereby the trust may, when appropriate,

Edgar Filing: VAN KAMPEN HIGH INCOME TRUST II - Form N-CSRS

repurchase its shares in the open market or in privately negotiated transactions at a price not above market value or NAV, whichever is lower at the time of purchase. This may help support the market value of the trust's shares.

There is no guarantee that any sectors mentioned will continue to perform as discussed herein or that securities in such sectors will be held by the Trust in the future.

CHANGES IN INVESTMENT POLICIES/PORTFOLIO MANAGER CHANGE

The fund approved changes/clarifications in its investment policies to allow the fund to enter into the following transactions.

OPTIONS ON SWAPS. The fund may write (sell) and purchase put and call swap options. A swap option is a contract that gives a counterparty the right (but not the obligation) to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms. The Fund may use swap options for hedging purposes or to manage and mitigate the credit and interest rate risk of the fund.

A swap option is a contract that gives a counterparty the right (but not the obligation) to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms. The fund may write (sell) and purchase put and call swap options. The use of swap options involves risks, including, among others, changes in the market value of securities held by the fund, and of swap options relating to those securities may not be proportionate, (ii) there may not be a liquid market for the fund to sell a swap option, which could result in difficulty closing a position, (iii) swap options can magnify the extent of losses incurred due to changes in the market value of the securities to which they relate and (iv) counterparty risk.

4

PORTFOLIO MANAGER CHANGE

The fund is managed by members of the Adviser's Taxable Fixed Income team. The Taxable Fixed Income team consists of portfolio managers and analysts. The current member of the team primarily responsible for the day-to-day management and the execution of the overall strategy of the Fund's portfolio is Steven K. Kreider, a Managing Director of the Adviser. Mr. Kreider has been associated with the Adviser in an investment management capacity since 1988 and joined the team that manages the fund in June 2007.

Investment Advisory Agreement Approval

Both the Investment Company Act of 1940 and the terms of the Fund's investment advisory agreement require that the investment advisory agreement between the Fund and its investment adviser be approved annually both by a majority of the Board of Trustees and by a majority of the independent trustees voting separately.

At meetings held on April 17, 2007 and May 30, 2007, the Board of Trustees, and the independent trustees voting separately, considered and ultimately determined that the terms of the investment advisory agreement are fair and reasonable and approved the continuance of the investment advisory agreement as being in the best interests of the Fund and its shareholders. In making its determination, the Board of Trustees considered materials that were specifically prepared by the investment adviser at the request of the Board and Fund counsel, and by an

Edgar Filing: VAN KAMPEN HIGH INCOME TRUST II - Form N-CSRS

independent provider of investment company data contracted to assist the Board, relating to the investment advisory agreement review process. The Board also considered information received periodically about the portfolio, performance, the investment strategy, portfolio management team and fees and expenses of the Fund. The Board of Trustees considered the investment advisory agreement over a period of several months and the trustees held sessions both with the investment adviser and separate from the investment adviser in reviewing and considering the investment advisory agreement.

In approving the investment advisory agreement, the Board of Trustees considered, among other things, the nature, extent and quality of the services provided by the investment adviser, the performance, fees and expenses of the Fund compared to other similar funds and other products, the investment adviser's expenses in providing the services and the profitability of the investment adviser and its affiliated companies. The Board of Trustees considered the extent to which any economies of scale experienced by the investment adviser are shared with the Fund's shareholders, and the propriety of breakpoints in the Fund's investment advisory fee schedule. The Board of Trustees considered comparative advisory fees of the Fund and other investment companies and/or other products at different asset levels, and considered the trends in the industry. The Board of Trustees evaluated other benefits the investment adviser and its affiliates derive from their relationship with the Fund. The Board of Trustees reviewed information about the foregoing factors and considered changes, if any, in such information since its previous approval. The Board of Trustees discussed the financial strength of the investment adviser and its affiliated companies and the capability of the personnel of the investment adviser, and specifically the strength and background of its portfolio management personnel. The Board of Trustees reviewed the statutory and regulatory requirements for approval and disclosure of investment advisory agreements. The Board of Trustees, including the independent trustees, evaluated all of the foregoing and does not believe any single factor or group of

8

factors control or dominate the review process, and, after considering all factors together, has determined, in the exercise of its business judgment, that approval of the investment advisory agreement is in the best interests of the Fund and its shareholders. The following summary provides more detail on certain matters considered but does not detail all matters considered.

Nature, Extent and Quality of the Services Provided. On a regular basis, the Board of Trustees considers the roles and responsibilities of the investment adviser as a whole and for those specific portfolio management, support and trading functions servicing the Fund. The trustees discuss with the investment adviser the resources available and used in managing the Fund. The trustees also discuss certain other services which are provided on a cost-reimbursement basis by the investment adviser or its affiliates to the Van Kampen funds including certain accounting, administrative and legal services. The Board has determined that the nature, extent and quality of the services provided by the investment adviser support its decision to approve the investment advisory agreement.

Performance, Fees and Expenses of the Fund. On a regular basis, the Board of Trustees reviews the performance, fees and expenses of the Fund compared to its peers and to appropriate benchmarks. In addition, the Board spends more focused time on the performance of the Fund and other funds in the Van Kampen complex, paying specific attention to underperforming funds. The trustees discuss with the investment adviser the performance goals and the actual results achieved in managing the Fund. When considering a fund's performance, the trustees and the investment adviser place emphasis on trends and longer-term returns (focusing on one-year, three-year and five-year performance with special attention to three-year performance) and, when a fund's weighted performance is under the

Edgar Filing: VAN KAMPEN HIGH INCOME TRUST II - Form N-CSRS

fund's benchmark, they discuss the causes and where necessary seek to make specific changes to investment strategy or investment personnel. The Fund discloses more information about its performance elsewhere in this report. The trustees discuss with the investment adviser the level of advisory fees for this Fund relative to comparable funds and other products advised by the adviser and others in the marketplace. The trustees review not only the advisory fees but other fees and expenses (whether paid to the adviser, its affiliates or others) and the Fund's overall expense ratio. The Board has determined that the performance, fees and expenses of the Fund support its decision to approve the investment advisory agreement.

Investment Adviser's Expenses in Providing the Service and Profitability. At least annually, the trustees review the investment adviser's expenses in providing services to the Fund and other funds advised by the investment adviser and the profitability of the investment adviser. These profitability reports are put together by the investment adviser with the oversight of the Board. The trustees discuss with the investment adviser its revenues and expenses, including among other things, revenues for advisory services, portfolio management-related expenses, revenue sharing arrangement costs and allocated expenses both on an

9

aggregate basis and per fund. The Board has determined that the analysis of the investment adviser's expenses and profitability support its decision to approve the investment advisory agreement.

Economies of Scale. On a regular basis, the Board of Trustees considers the size of the Fund and how that relates to the Fund's expense ratio and particularly the Fund's advisory fee rate. In conjunction with its review of the investment adviser's profitability, the trustees discuss with the investment adviser how more (or less) assets can affect the efficiency or effectiveness of managing the Fund's portfolio and whether the advisory fee level is appropriate relative to current asset levels and/or whether the advisory fee structure reflects economies of scale as asset levels change. The Board has determined that its review of the actual and potential economies of scale of the Fund support its decision to approve the investment advisory agreement.

Other Benefits of the Relationship. On a regular basis, the Board of Trustees considers other benefits to the investment adviser and its affiliates derived from its relationship with the Fund and other funds advised by the investment adviser. These benefits include, among other things, fees for transfer agency services provided to the funds, in certain cases research received by the adviser generated from commission dollars spent on funds' portfolio trading, and in certain cases distribution or service related fees related to funds' sales. The trustees review with the investment adviser each of these arrangements and the reasonableness of its costs relative to the services performed. The Board has determined that the other benefits received by the investment adviser or its affiliates support its decision to approve the investment advisory agreement.

VAN KAMPEN HIGH INCOME TRUST II

NOTES TO FINANCIAL STATEMENTS -- JUNE 30, 2007 (UNAUDITED)

1. SIGNIFICANT ACCOUNTING POLICIES

Van Kampen High Income Trust II (the "Trust") is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940 (the "1940 Act"), as amended. The Trust's investment objective is to provide high current income, while seeking to preserve shareholders' capital through investment in a professionally managed diversified portfolio of high yield, fixed income securities. The Trust commenced investment operations on April 28, 1989.

The following is a summary of significant accounting policies consistently followed by the Trust in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses

Edgar Filing: VAN KAMPEN HIGH INCOME TRUST II - Form N-CSRS

during the reporting period. Actual results could differ from those estimates.

A. SECURITY VALUATION Investments are stated at value using market quotations or indications of value obtained from an independent pricing service. For those securities where quotations or prices are not readily available, valuations are obtained from yield data relating to instruments or securities with similar characteristics in accordance with procedures established in good faith by the Board of Trustees. Futures contracts are valued at the settlement price established each day on the exchange on which they are traded. Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value.

B. SECURITY TRANSACTIONS Security transactions are recorded on a trade date basis. Realized gains and losses are determined on an identified cost basis. The Trust may purchase and sell securities on a "when-issued" or "delayed delivery" basis with settlement to occur at a later date. The value of the security so purchased is subject to market fluctuations during this period. The Trust will segregate assets with the custodian having an aggregate value at least equal to the amount of the when-issued or delayed delivery purchase commitments until after payment is made. At June 30, 2007, the Trust had \$402,141 of when-issued or delayed delivery purchase commitments.

The Trust may invest in repurchase agreements, which are short-term investments in which the Trust acquires ownership of a debt security and the seller agrees to repurchase the security at a future time and specified price. The Trust may invest independently in repurchase agreements, or transfer uninvested cash balances into a pooled cash account along with other investment companies advised by Van Kampen Asset Management (the "Adviser") or its affiliates, the daily aggregate of which is invested in repurchase agreements. Repurchase agreements are fully collateralized by the underlying debt security. The Trust will make payment for such securities only upon physical delivery or evidence of book entry transfer to the account of the custodian bank. The seller is required to maintain the value of the underlying security at not less than the repurchase proceeds due the Trust.

C. INVESTMENT INCOME Interest income is recorded on an accrual basis. Bond discount is accreted and premium is amortized over the expected life of each applicable security. Other

income is comprised primarily of consent fees. Consent fees are earned as compensation for agreeing to changes in the terms of debt instruments.

D. FEDERAL INCOME TAXES It is the Trust's policy to comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes is required. The Trust files tax returns with the U.S. Internal Revenue Service and various states. Generally, the tax authorities can examine all tax returns filed for the last three years. If applicable, the Trust recognizes interest accrued related to unrecognized tax benefits in interest expense and penalties in "Other" expenses on the Statement of Operations. The Trust adopted the provisions of the Financial Accounting Standards Board's (FASB) Interpretation number 48 Accounting for Uncertainty in Income Taxes, on June 30, 2007. As of June 30, 2007, this did not result in an impact to the Fund's financial statements.

Edgar Filing: VAN KAMPEN HIGH INCOME TRUST II - Form N-CSRS

The Trust intends to utilize provisions of the federal income tax laws which allow it to carry a realized capital loss forward for eight years following the year of the loss and offset these losses against any future realized capital gains. At December 31, 2006, the Trust had an accumulated capital loss carryforward for tax purposes of \$62,923,467 which will expire according to the following schedule.

| AMOUNT | EXPIRATION |
|-------------------|-------------------|
| \$ 6,008,551..... | December 31, 2007 |
| 9,851,557..... | December 31, 2008 |
| 17,412,110..... | December 31, 2009 |
| 17,027,138..... | December 31, 2010 |
| 6,782,916..... | December 31, 2011 |
| 875,105..... | December 31, 2012 |
| 565,263..... | December 31, 2013 |
| 4,400,827..... | December 31, 2014 |

Due to a merger with another regulated investment company, a portion of the capital loss carryforward referred to above may be limited under Internal Revenue Code Section 382.

At June 30, 2007, the cost and related gross unrealized appreciation and depreciation were as follows:

| | |
|---|-------------------------|
| Cost of investments for tax purposes..... | \$146,676,080 ===== |
| Gross tax unrealized appreciation..... | \$ 2,089,410 |
| Gross tax unrealized depreciation..... | (4,869,169) ----- |
| Net tax unrealized depreciation on investments..... | \$ (2,779,759) ===== |

E. DISTRIBUTION OF INCOME AND GAINS The Trust declares and pays monthly dividends from net investment income to common shareholders. Net realized gains, if any, are distributed at least annually on a pro rata basis to common and preferred shareholders. Distributions from net realized gains for book purposes may include short-term capital gains, which are included in ordinary income for tax purposes.

23

VAN KAMPEN HIGH INCOME TRUST II

NOTES TO FINANCIAL STATEMENTS -- JUNE 30, 2007 (UNAUDITED) continued

The tax character of distributions paid during the year ended December 31, 2006 was as follows:

| | |
|-----------------------------|--------------|
| Distributions paid from: | |
| Ordinary income..... | \$9,909,458 |
| Long-term capital gain..... | -0- ----- |

Edgar Filing: VAN KAMPEN HIGH INCOME TRUST II - Form N-CSRS

\$9,909,458

=====

As of December 31, 2006, there were no components of distributable earnings on a tax basis.

Net realized gains or losses may differ for financial reporting and tax purposes primarily as a result of the deferral of losses relating to wash sale transactions.

2. INVESTMENT ADVISORY AGREEMENT AND OTHER TRANSACTIONS WITH AFFILIATES

Under the terms of the Trust's Investment Advisory Agreement, the Adviser will provide investment advice and facilities to the Trust for an annual fee payable monthly of .70% of the average daily net assets including preferred shares of the Trust. For the six months ended June 30, 2007, the Adviser voluntarily waived \$36,414 of its investment advisory fees. This represents .05% of the average daily net assets including preferred shares of the Trust. This waiver is voluntary and can be discontinued at any time.

For the six months ended June 30, 2007, the Trust recognized expenses of approximately \$7,100 representing legal services provided by Skadden, Arps, Slate, Meagher & Flom LLP, of which a trustee of the Trust is a partner of such firm and he and his law firm provide legal services as legal counsel to the Trust.

Under separate Legal Services, Accounting Services and Chief Compliance Officer (CCO) Employment agreements, the Adviser provides accounting and legal services and the CCO provides compliance services to the Trust. The costs of these services are allocated to each trust. For the six months ended June 30, 2007, the Trust recognized expenses of approximately \$21,400 representing Van Kampen Investments Inc.'s or its affiliates' (collectively "Van Kampen") cost of providing accounting and legal services to the Trust, as well as the salary, benefits and related costs of the CCO and related support staff paid by Van Kampen. Services provided pursuant to the Legal Services agreement are reported as part of "Professional Fees" on the Statement of Operations. Services provided pursuant to the Accounting Services and CCO Employment agreement are reported as part of "Accounting and Administrative Expenses" on the Statement of Operations.

Certain officers and trustees of the Trust are also officers and directors of Van Kampen. The Trust does not compensate its officers or trustees who are also officers of Van Kampen.

The Trust provides deferred compensation and retirement plans for its trustees who are not officers of Van Kampen. Under the deferred compensation plan, trustees may elect to defer all or a portion of their compensation to a later date. Benefits under the retirement plan are payable upon retirement for a ten-year period and are based upon each trustee's years of service to the Trust. The maximum annual benefit per trustee under the plan is \$2,500.

3. CAPITAL TRANSACTIONS

For the six months ended June 30, 2007 and the year ended December 31, 2006, transactions in common shares were as follows:

Edgar Filing: VAN KAMPEN HIGH INCOME TRUST II - Form N-CSRS

| | SIX MONTHS ENDED JUNE 30, 2007 | YEAR ENDED DECEMBER 31, 2006 |
|--------------------------|-----------------------------------|---------------------------------|

| | ----- | ----- |
| Ending Shares..... | 18,851,327 | 18,893,621 |
| | ===== | ===== |

* For the period ended June 30, 2007, the Trust repurchased 42,294 of its shares at an average discount of 6.269% from net asset value per share.

4. INVESTMENT TRANSACTIONS

During the period, the cost of purchases and proceeds from sales of investments, excluding short-term investments, were \$28,587,591 and \$27,924,726, respectively.

5. DERIVATIVE FINANCIAL INSTRUMENTS

A derivative financial instrument in very general terms refers to a security whose value is "derived" from the value of an underlying asset, reference rate or index.

The Trust may use derivative instruments for a variety of reasons, such as to attempt to protect the Trust against possible changes in the market value of its portfolio or to generate potential gain. All of the Trust's portfolio holdings, including derivative instruments, are marked to market each day with the change in value reflected in the unrealized appreciation/depreciation. Upon disposition, a realized gain or loss is recognized accordingly, except when taking delivery of a security underlying a futures contract. In this instance, the recognition of gain or loss is postponed until the disposal of the security underlying the futures contract. Risk may arise as a result of the potential inability of the counterparties to meet the terms of their contracts.

During the period the Trust invested in futures contracts, a type of derivative. A futures contract is an agreement involving the delivery of a particular asset on a specified future date at an agreed upon price. The Trust generally invests in futures on U.S. Treasury Bonds or Notes. Upon entering into futures contracts, the Trust maintains an amount of cash or liquid securities with a value equal to a percentage of the contract amount with either a futures commission merchant pursuant to rules and regulations promulgated under the 1940 Act, as amended, or with its custodian in an account in the broker's name. This amount is known as initial margin. During the period the futures contract is open, payments are received from or made to the broker based upon changes in the value of the contract (the variation margin). The risk of loss associated with a futures contract is in excess of the variation margin reflected on the Statement of Assets and Liabilities.

VAN KAMPEN HIGH INCOME TRUST II

NOTES TO FINANCIAL STATEMENTS -- JUNE 30, 2007 (UNAUDITED) continued

Transactions in futures contracts for the six months ended June 30, 2007 were as follows:

| | ===== |

6. PREFERRED SHARES

The Trust has outstanding 2,616 APS. Series A contains 1,112 shares and Series B contains 1,504 shares. Dividends are cumulative and the dividend rate on each series is currently reset every 28 days through an auction process. The average rate in effect on June 30, 2007 was 5.261%. During the six months ended June 30, 2007, the rates ranged from 5.000% to 5.300%.

The Trust pays annual fees equivalent to .25% of the preferred share liquidation value for the remarketing efforts associated with the preferred auctions. These fees are included as a component of "Preferred Share Maintenance" expense on the Statement of Operations.

The APS are redeemable at the option of the Trust in whole or in part at the liquidation value of \$25,000 per share plus accumulated and unpaid dividends. The Trust is subject to certain asset coverage tests and the APS are subject to mandatory redemption if the tests are not met.

7. INDEMNIFICATIONS

The Trust enters into contracts that contain a variety of indemnifications. The Trust's maximum exposure under these arrangements is unknown. However, the Trust has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

8. ACCOUNTING PRONOUNCEMENT

In September 2006, Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS 157), was issued and is effective for fiscal years beginning after November 15, 2007. SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. Management is currently evaluating the impact the adoption of SFAS 157 will have on the Trust's financial statement disclosures.
